¹ The fund management company has not concluded any fee-sharing agreements or agreements concerning retrocessions in the form of soft commissions.

² The TER (total expense ratio) refers to the sum of all periodically levied costs and commissions charged to the fund assets retrospectively as a percentage of the average fund assets. Any rebates/portfolio maintenance commissions from target funds were credited to the fund and thus reduce the TER.

³ Aggregated TER, as more than 10% of net assets were invested in other collective investment schemes (target funds) as of the reporting date. If audited TER are not available for the target funds, the TER for the target funds are calculated from KIIDs, etc. The maximum management commission of the target funds is 3%.

¹ Fund performance is based on official published net asset values, which are based on the stock market closing prices at the end of the relevant month.

Historical performance is not an indicator of current or future performance. Performance data exclude commissions and expenses charged on the issue and redemption of units.

The tracking difference between the Fund's performance and the performance of the replicated index is primarily due to the following factors: Fees charged in connection with management of the Fund, the use of optimised sampling, income arising from securities lending, currency hedging costs, non-recoverable foreign withholding tax and transaction costs.

Note 4: Identity of the contracting parties in OTC transactions

Note 6: Direct and indirect operational costs and fees from securities lending

Principal borrower setup with UBS AG as borrower and UBS Fund Management (Switzerland) AG – acting on behalf of the sub-funds that generate income from securities lending – as lender. During the reporting period, 80% of the income generated from securities lending is credited to the fund.

Note 7: Portfolio composition

The composition of the portfolio shows portfolio changes without fractions. This may lead to rounding differences in the calculation of the total.

Note 8: Presentation of currency derivatives (commitment approach I)

For currency derivatives, only the net sale requires covering, therefore only the sell side (net) is shown in off-balance sheet transactions as exposure reducing derivatives.

Note 9: Payment and withdrawals by transfers of assets in kind instead of cash

There were in-kind transactions in the reporting period.

Note 10: Sub-funds or unit classes launched during the year – presentation of comparatives

Information on the statement of assets and income of sub-funds or unit classes launched during the current reporting period is shown with zero values in the previous period.

The following unit classes were activated, or deactivated due to redemptions of the entire current portfolio.

Note 11: Last valuation day

The last valuation day in August (August 29, 2025) is not consistent with the effective month-end of August 31, 2025. The investments of the fund were therefore valued as of August 29, 2025 and the last net asset value calculated on this day.

Note 12: Valuation of the fund assets and units

1. The net asset value of each sub-fund and the share of each class (quotas) is calculated at fair value at the end of the accounting year and in the unit of account of the corresponding sub-fund for each day on which units are issued or redeemed. For days on which the stock exchanges or markets of the main investment countries of a sub-fund are closed (e.g. bank and stock exchange holidays), no calculation of the assets of the corresponding sub-fund takes place.
2. Investments traded on a stock exchange or other regulated market open to the public shall be valued at the current prices paid on the principal market. Other investments or investments for which current prices are not available shall be valued at the price that would probably be obtained by diligent sale at the time of the estimate. In this case, the fund management company applies appropriate valuation models and principles recognised in practice to determine the market value.
3. Open-ended collective investment schemes are valued at their redemption price or net asset value. If they are regularly traded on a stock exchange or on another regulated market open to the public, the fund management company may value them in accordance with Article 2.
4. The value of money market instruments that are not traded on a stock exchange or another regulated market open to the public is determined as follows – the valuation price of such investments, starting from the net acquisition price, is successively adjusted to the redemption price while the investment return calculated therefrom remains constant. In the event of significant changes in market conditions, the valuation basis of the individual investments is adjusted to the new market return. In the absence of a current market price, the valuation is generally based on money market instruments with the same characteristics (quality and domicile of the issuer, issue currency, maturity).
5. Bank balances are measured at their receivable amount plus accrued interest. In the event of significant changes in market conditions or creditworthiness, the valuation basis for bank balances is adjusted to the new circumstances.
6. The net asset value of a unit of a class of a sub-fund is calculated by dividing the quota attributable to the unit class in question in the market value of the assets of this sub-fund less any liabilities of this sub-fund allocated to the unit class in question by the number of units of the corresponding class in circulation. In each case it is rounded to the next smallest unit of account of the reference currency.
7. The share of the fair value of the net assets of a sub-fund (assets of a sub-fund less liabilities) attributable to the relevant unit classes shall be determined initially upon the first issue of several unit classes (if such issue takes place simultaneously) or that of a further unit class on the basis of the amounts accruing to the relevant sub-fund for each unit class. The share is then recalculated for each of the following events:
 - a) issue and redemption of units;
 - b) the record date for distributions insofar as (i) such distributions only arise on individual unit classes (distribution classes) or (ii) the distributions of the various unit classes differ as a percentage of their relevant net asset value or (iii) different commission or cost charges arise regarding the distributions of the various unit classes as a percentage of the distribution;
 - c) the net asset value calculation as part of the allocation of liabilities (including costs and commissions due or accrued) to the various unit classes if the liabilities of the different unit classes differ as a percentage of their respective net asset values, namely where (i) different commission rates are applied to the different unit classes or where (ii) class-specific cost charges are made;
 - d) the net asset value calculation as part of the allocation of income or capital gains to the various unit classes, provided that the income or capital gains arise from transactions occurring only in the interest of one unit class or in the interest of several unit classes but not in proportion to their share of net assets of a sub-fund.

Note 13: Extraordinary events

The war in Ukraine had and still has a material impact on financial markets, first and foremost on Russian and Ukrainian securities but also on the wider markets globally. The situation remains very volatile and the Fund Management Company is closely monitoring the situation in order to quickly take appropriate action to protect the interest of investors in our funds. It has put in place the necessary measures to at all times comply with applicable laws and regulations, in particular but not limited to the enacted sanctions regimes in the EU, Switzerland, the UK and the US. As we are experiencing serious trading limitations beyond sanctioned Russian securities, we are applying fair value pricing for all relevant securities where price quotes (if available) are not considered reflective of their current market value.
