What is this product?

Type: This product is a sub-fund of an investment company with variable capital established under the laws of Ireland as an undertaking for collective investment in transferable securities (“UCITS”).

Term: The product does not have a pre-defined maturity and it is an open-ended structure.

The Fund may be terminated by the board of directors of the Umbrella in certain circumstances as described further in the prospectus of the Umbrella.

Objectives

The objective of this Fund is to generate consistent long-term capital appreciation. The Fund will seek to achieve the investment objective by investing primarily in a broad range of fixed income securities, such as bonds (including, inter alia, inflation-linked or high-yield), treasuries and money market instruments (including certificates of deposit), floating rate notes and fixed or variable rate commercial paper and in cash, mainly denominated in Emerging Markets or Frontier Markets currencies or otherwise linked or related to Emerging Markets or Frontier Markets. Notwithstanding that the Fund will typically focus on issuers in the public sector or supranational issuers, the bonds held by the Fund can be government, corporate and/or supranational bonds and can be fixed and/or floating rate, where appropriate and may be investment grade or below investment grade, as determined by Standard & Poor's Rating Group or any similar recognised ratings agency. "Emerging Markets" are countries that are in the process of developing into modern industrialised nations and therefore offer a high potential but also an elevated risk. "Frontier Markets" are countries that are less established than Emerging Markets because they are smaller, carry higher inherent risk, or are more illiquid compared to an Emerging Market.

The Fund may invest in derivatives (financial instruments derived from other securities or assets) for hedging purposes, efficient portfolio management and / or investment purposes.

The Fund's portfolio is actively managed in reference to the JPM GBI-EM Global Diversified (TR) Index (the "Benchmark"), by virtue of the fact that it uses the Benchmark for performance comparison purposes. However, the Benchmark is not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the Benchmark.

Environmental, social and governance ("ESG") aspects are considered as part of the Fund's investment process.

The Fund may have positions in cash and cash equivalents.

The portfolio transaction costs may have a material impact on performance.

Investors may on a daily basis subscribe for shares of the Fund and may on a daily basis redeem shares of the Fund.

Any income generated by the Class is reinvested in the Class, which increases the value of the shares.

Intended retail investor: Investment in the Fund is suitable for investors with detailed knowledge about the fixed income instruments contained in the Fund. An investment horizon of 5 years is recommended and the ability to bear low investment losses. There is a risk of losing the full capital invested.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class. This classification rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.

There are no material risks not included in the SRI. The Fund bears additional risks (e.g. operational, political, legal or liquidity risk) as explained in the prospectus, not covered in the SRI.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.
