ENVIRONNEMENT ECONOMIQUE ET FINANCIER

Les douze derniers mois se sont achevés sur une note extrêmement positive pour les actifs risqués, poursuivant la tendance déjà favorable observée au cours de la période précédente. Le scénario d'une croissance mondiale résiliente, associée à de solides bénéfices des entreprises et à une baisse de l'inflation, qui étaye le discours désinflationniste des banques centrales, ainsi que l'optimisme entourant l'intelligence artificielle (IA), ont plus que compensé les fortes incertitudes géopolitiques. Le contexte est cependant resté tendu, que ce soit au niveau des grands conflits (guerres en Ukraine et au Moyen-Orient) ou sur le plan politique (dissolution de l'Assemblée nationale en France, élections américaines).

Les perspectives économiques se sont globalement améliorées. Alors que d'importantes disparités régionales subsistent, avec notamment une dynamique économique en berne en Europe et en Chine, les États-Unis et les marchés émergents (hors Chine) sont apparus comme les moteurs de la croissance mondiale. De plus, les chiffres trimestriels du PIB américain ont également été révisés à la hausse à plusieurs reprises, confirmant ainsi la croissance soutenue de l'économie américaine, supérieure à son potentiel à long terme, au cours des huit derniers trimestres. Cette croissance a principalement été alimentée par la consommation nationale, les dépenses représentant environ deux tiers du PIB. L'excédent d'épargne accumulé durant la pandémie et la vigueur du marché du travail ont soutenu le pouvoir d'achat. L'économie chinoise, en proie à des difficultés depuis la crise du Covid, compte tenu de la baisse de la consommation et de l'investissement et des pressions déflationnistes persistantes, a bénéficié du soutien d'un nouveau plan de relance ambitieux introduit durant l'été. Les autorités ont mis en œuvre une série de mesures de politique monétaire d'envergure, ainsi qu'un soutien ciblé aux marchés des actions et de l'immobilier, suscitant l'espoir d'une stabilisation de l'économie qui permettrait d'atteindre l'objectif de croissance officiel de 5%.

Un certain soulagement a également été observé sur le front de l'inflation lors de la période sous revue, alors qu'à la fin de la période précédente les investisseurs se demandaient si celle-ci allait continuer de refluer. Aux États-Unis, diverses statistiques (IPC de base, IPC global, IPP, indice sous-jacent des dépenses de consommation personnelle) se sont révélées rassurantes, confirmant les progrès réalisés sur le front de la désinflation. Une tendance similaire a été observée dans la zone euro, l'inflation étant retombée à 1.8% en septembre, son niveau le plus bas depuis avril 2021, en deçà de l'objectif de 2% de la Banque centrale européenne (BCE).

Dans ce contexte, les banques centrales des pays développés ont pu commencer à baisser leurs taux directeurs, à l'instar de leurs homologues des pays émergents qui avaient déjà initié un cycle de réductions l'année dernière. La Banque nationale suisse (BNS) a été la première à sauter le pas en mars. Elle a abaissé son taux directeur de 25 points de base (pb) à trois reprises, pour le porter à 1%. Avec deux réductions de 25 pb, la BCE a préféré faire de petits pas face à une économie atone. En septembre, la Réserve fédérale (Fed) a frappé fort en baissant ses taux d'un demi-point de pourcentage et en prévoyant une nouvelle baisse d'un demi-point d'ici fin 2024.

Les perspectives des marchés boursiers mondiaux ont également été soutenues par la dynamique des actions américaines, et plus particulièrement par le thème de l'intelligence artificielle. La promesse de l'IA a alimenté la hausse du marché, à travers l'envolée des actions des "7 Magnifiques" (Nvidia, Microsoft, Apple, Amazon, Meta, Alphabet et Tesla, les principaux acteurs américains du secteur). La dispersion des performances entre ces 7 Magnifiques et le reste du marché a dès lors été considérable, soulignant la capacité de l'IA à perturber les industries et les attentes. Les 7 Magnifiques se sont envolées de 44.4% en 2024 et ont dominé l'indice S&P500, dans lequel elles représentent environ 30% de la capitalisation boursière.

En conclusion, l'environnement macroéconomique résilient a joué un rôle stabilisateur et soutenu les bénéfices des entreprises. Les chiffres trimestriels publiés sur la grande majorité des marchés boursiers ont fait état d'une dynamique des bénéfices positive, bien que plus modérée.

Le comportement des marchés financiers appelle plusieurs observations. La période s'est clôturée sur une note très positive pour les actions. Portés par un scénario d'atterrissage en douceur de l'économie américaine et des résultats d'entreprises généralement bien orientés, plusieurs indices boursiers (les trois principaux indices américains, le DAX et le FTSE 100) ont atteint des niveaux inédits au cours de la période. En devises locales, les indices MSCI World ont gagné 7.2% et 30.4% respectivement. Au niveau régional, les Etats-Unis ont surperformé tous les autres marchés d'actions. Avec un gain de 36.3%, l'indice S&P500 a bénéficié de son biais en faveur des grandes capitalisations, qui ont profité des avancées dans le domaine de l'IA. Toutefois, au cours des trois derniers mois, la reprise s'est étendue aux segments bénéficiant de la baisse des taux d'intérêt, tels que les valeurs financières, l'immobilier et les petites et moyennes capitalisations. Les actions de la zone euro ont également enregistré une performance solide de 20.4%, tout comme les actions émergentes, dont la performance de 25.0% est essentiellement imputable aux titres indiens (+41.6%). Le marché chinois a lui aussi contribué à cette tendance avec une performance positive de 22.4%. Les nombreuses nouvelles mesures de relance visant à stabiliser le secteur immobilier et à restaurer la confiance des consommateurs ont déclenché un rebond spectaculaire des actions en septembre. Ailleurs en Asie, les actions japonaises sont arrivées en fin de classement avec une performance de 16.5%. La hausse des taux de 25 pb opérée par la Banque du Japon (BoJ) et sa décision de réduire de moitié ses achats d'emprunts d'Etat, ainsi que la liquidation des positions courtes sur le yen, ont pesé sur la tendance. Le marché actions britannique est également resté à la traîne (+12.2%), en raison d'une exposition plus importante aux valeurs énergétiques, qui ont sous-performé, et de la vigueur de la livre sterling.

En ce qui concerne les obligations, les marchés obligataires ont bénéficié de la désinflation et de l'assouplissement des conditions monétaires par les banques centrales. En devises locales, les obligations souveraines des économies développées ont enregistré des performances positives (BofAML Euro Govt : +9.3%, BofAML US Govt : +9.9%). D'une manière générale, le contexte économique favorable a donné un coup de pouce aux segments obligataires les plus risqués. La bonne résistance de l'économie s'est reflétée dans les bénéfices des entreprises, ce qui a contribué à maintenir les spreads de crédit à un bas niveau. Dans ce contexte, nous avons observé des performances à deux chiffres du côté des obligations d'entreprises investment grade (ICE BofA Global Corporate : +12.6%) et des obligations à haut rendement (ICE BofA Global High Yield : +15.6%), ainsi qu'au niveau de la dette émergente en dollars américains et en devises locales (JPM EMBI USD : +18.6% ; ML GBI-EM : +13.4%).

Tous les marchés d'investissements alternatifs ont progressé sur la période, à l'exception des matières premières. L'or a atteint un niveau record en dépassant les 2,600 dollars l'once. Dopé par les achats importants des banques centrales des pays émergents comme la Chine et par les risques géopolitiques, le métal jaune a enregistré une hausse remarquable de plus de 40%. En revanche, l'environnement géopolitique a pesé sur le prix du Brent, qui a terminé en baisse de 14.0% dans un contexte de forte volatilité. Le secteur de l'énergie a plombé l'indice GSCI des matières premières (-6.1%). Des conditions favorables ont également permis aux fonds spéculatifs de progresser de 6,9% (indice HFRX Global).

Rapport du Réviseur d'Entreprises Agréé

Aux Actionnaires de
Pictet
(Société d'Investissement à Capital Variable de droit luxembourgeois)
15, Avenue J.F. Kennedy
L-1855 Luxembourg

Opinion

Nous avons révisé les états financiers de Pictet (la "SICAV") et de chacun de ses compartiments, qui se composent de l'état des actifs nets et de l'état du portefeuille-titres et autres actifs nets au 30 septembre 2024, de l'état des opérations et des variations des actifs nets pour l'exercice clôturé à cette date, ainsi que des notes relatives aux états financiers, y compris une synthèse des principales méthodes comptables.

A notre avis, les états financiers ci-joints donnent une image fidèle et sincère de la situation financière de la SICAV et de chacun de ses compartiments au 30 septembre 2024, et des résultats de leurs opérations et des variations de leurs actifs nets pour l'exercice clôturé à cette date, conformément aux dispositions législatives et réglementaires du Luxembourg relatives à l'établissement et à la présentation des états financiers.

Observation particulière

Nous attirons l'attention sur la Note 21 des états financiers, qui décrit les décisions prises par le Conseil d'Administration de la SICAV, dans le contexte du conflit entre la Russie et l'Ukraine, d'attribuer une valeur nulle aux titres russes libellés en devise locale et en devise forte, de même qu'aux comptes courants et de dépôt en RUB, ainsi que de suspendre le calcul de la valeur nette d'inventaire, la souscription et le rachat des actions et de renoncer à la commission de gestion pour le compartiment Pictet - Russian Equities à compter du 28 février 2022.

Notre opinion n'est pas modifiée à l'égard de ce point.

Fondement de notre opinion

Nous avons effectué notre audit conformément à la loi du 23 juillet 2016 relative à la profession de l'audit ("Loi du 23 juillet 2016") et aux Normes internationales d'audit ("NIA"), telles qu'adoptées pour le Luxembourg par la Commission de Surveillance du Secteur Financier ("CSSF"). Nos responsabilités en vertu de la Loi du 23 juillet 2016 et de ces NIA telles qu'adoptées pour le Luxembourg par la CSSF sont plus amplement décrites dans la section de notre rapport intitulée "Responsabilités du réviseur d'entreprises agréé à l'égard de l'Audit des états financiers". Nous sommes en outre indépendants du Fonds conformément au Code de déontologie des professionnels comptables, y compris les normes internationales d'indépendance, émis par le Conseil des normes internationales de déontologie comptable (Code IESBA), tel qu'adopté pour le Luxembourg par la CSSF, ainsi qu'aux exigences éthiques pertinentes dans le cadre de notre audit des états financiers, et nous avons satisfait à nos autres responsabilités éthiques en vertu de ces exigences. Nous estimons que les éléments de vérification que nous avons obtenus sont suffisants et appropriés pour constituer la base de notre opinion.

Autres informations

Le Conseil d'Administration de la SICAV est responsable des autres informations. Les autres informations incluent les informations contenues dans le rapport annuel mais pas les états financiers et notre rapport du réviseur d'entreprises agréé à ce sujet.

Notre avis sur ces états financiers ne concerne pas les autres informations et nous n'exprimons aucune forme de conclusion d'assurance à ce sujet.

Rapport du Réviseur d'Entreprises Agréé (suite)

Dans le cadre de notre vérification des états financiers, notre responsabilité est de lire les autres informations et, ce faisant, de considérer si les autres informations sont matériellement incohérentes avec les états financiers ou les connaissances que nous avons acquises dans le cadre de la vérification, ou si elles semblent présenter des anomalies significatives. Si, en fonction du travail que nous avons effectué, nous concluons qu'il existe une anomalie significative de ces autres informations, nous sommes tenus de le signaler. Nous n'avons rien à signaler à cet égard.

Responsabilités du Conseil d'Administration de la SICAV à l'égard des états financiers

Le Conseil d'Administration de la SICAV est responsable de la préparation et de la présentation fidèle des états financiers, conformément aux exigences légales et réglementaires du Luxembourg en la matière et du contrôle interne que le Conseil d'Administration de la SICAV jugera nécessaire pour permettre l'établissement d'états financiers ne comportant aucune anomalie majeure frauduleuse ou involontaire.

Dans le cadre de l'établissement des états financiers, il incombe au Conseil d'Administration de la SICAV d'évaluer la capacité du Fonds à poursuivre ses activités, de communiquer, s'il y a lieu, des informations liées à la continuité des activités et d'appliquer le principe comptable de continuité d'exploitation, à moins qu'il n'ait l'intention de liquider le Fonds ou de mettre un terme à ses activités, ou qu'il ne puisse objectivement faire autrement.

Responsabilités du réviseur d'entreprises agréé à l'égard de l'audit des états financiers

Les objectifs de notre audit sont d'obtenir une assurance raisonnable que les états financiers dans leur ensemble ne comportent pas d'anomalies significatives, que celles-ci résultent de fraudes ou d'erreurs, et d'établir un rapport du réviseur d'entreprises agréé dans lequel nous faisons part de notre opinion. L'assurance raisonnable est un niveau d'assurance élevé, mais non une garantie qu'un audit effectué conformément à la Loi du 23 juillet 2016 et aux NIA, telles qu'adoptées pour le Luxembourg par la CSSF, permettra toujours de déceler une anomalie significative, le cas échéant. Les anomalies peuvent résulter d'une fraude ou d'une erreur, et elles sont considérées comme significatives si, individuellement ou collectivement, elles sont raisonnablement susceptibles d'influer sur les décisions économiques prises par les utilisateurs sur la base de ces états financiers.

Dans le cadre d'un audit effectué conformément à la Loi du 23 juillet 2016 et aux NIA, telles qu'adoptées pour le Luxembourg par la CSSF, nous exerçons un jugement professionnel et faisons preuve d'esprit critique tout au long de l'audit. En outre, nous :

- identifions et évaluons les risques d'anomalies significatives dans les états financiers, qu'elles résultent de fraudes ou d'erreurs, définissons et appliquons des procédures d'audit adaptées à ces risques et recueillons des éléments probants suffisants et appropriés pour étayer notre opinion. Le risque de ne pas détecter une anomalie significative résultant d'une fraude est plus élevé que dans le cas d'une anomalie due à une erreur, car la fraude peut impliquer une collusion, une falsification, des omissions intentionnelles, de fausses déclarations ou le contournement du contrôle interne ;
- appréhendons les aspects du contrôle interne pertinents dans le cadre de l'audit afin de concevoir des procédures d'audit appropriées, mais non dans le but d'exprimer une opinion sur l'efficacité du contrôle interne du Fonds ;
- évaluons la pertinence des politiques comptables utilisées et le caractère raisonnable des estimations comptables et des informations connexes fournies par le Conseil d'Administration de la SICAV ;
- Formulons une conclusion quant à savoir si l'application du principe comptable de continuité d'exploitation par le Conseil d'Administration de la SICAV est pertinente et, à la lumière des éléments probants recueillis, s'il existe une incertitude importante quant aux événements ou aux conditions susceptibles de remettre en cause sa capacité à poursuivre ses activités. Si nous arrivons à la conclusion qu'il existe une incertitude importante, nous sommes tenus d'attirer l'attention, dans notre rapport du réviseur d'entreprises agréé, sur les informations correspondantes figurant dans les états financiers ou, si ces informations ne sont pas pertinentes, de modifier notre opinion. Nos conclusions sont fondées sur les éléments probants recueillis jusqu'à la date du rapport du réviseur d'entreprises agréé. Cependant, des conditions ou événements futurs peuvent amener le Fonds à cesser ses activités ;

Rapport du Réviseur d'Entreprises Agréé (suite)

- évaluons la présentation générale, la structure et le contenu des états financiers, y compris les informations fournies, et déterminons si les états financiers reflètent les opérations et les événements sous-jacents dans le sens d'une présentation fidèle.

Nous communiquons avec les personnes en charge de la gouvernance en ce qui concerne, entre autres, la portée et le calendrier prévus de l'audit ainsi que les constatations importantes en découlant, s'agissant notamment de tout dysfonctionnement important dans le contrôle interne.

Un nouveau prospectus est entré en vigueur en août 2024.

Classes d'actions

Les classes d'actions disponibles sont décrites dans les annexes du prospectus de la SICAV.

L'ensemble des compartiments constitue la SICAV. Les actifs nets de chaque compartiment sont représentés par des actions, qui peuvent être de différentes classes. Toutes les actions représentant les actifs d'un compartiment forment ensemble une classe d'actions. Lorsque des classes d'actions sont émises, leurs caractéristiques sont détaillées dans les annexes du prospectus de la SICAV.

Le Conseil d'Administration de la SICAV peut décider de créer pour chaque compartiment plusieurs classes d'actions dont les actifs seront investis conformément à la politique d'investissement spécifique du compartiment concerné, sachant que ces classes d'actions pourront se distinguer par leurs structures de commission de souscription et/ou de rachat, leurs politiques de couverture du risque de change, leurs politiques de distribution et/ou leurs commissions de gestion ou de conseil en investissement, ou encore par d'autres spécificités applicables à chaque classe. Le cas échéant, ces informations sont précisées dans le prospectus en vigueur de la SICAV.

Structure maître-nourricier

Pictet - Global Equities Diversified Alpha

Le compartiment Pictet - Global Equities Diversified Alpha agit en tant que Fonds nourricier du compartiment Pictet TR - Diversified Alpha (le "Fonds maître") et il investit au moins 85% de ses actifs en actions de Classe I EUR du Fonds maître.

Au 30 septembre 2024, le pourcentage de part de propriété du Fonds maître est de 0.93%.

Au 30 septembre 2024, le TER (Total Expense Ratio) annualisé du compartiment Pictet - Global Equities Diversified Alpha est le suivant :

CLASSE	TER ANNUALISE, COMMISSION DE PERFORMANCE INCLUSE	TER ANNUALISE, HORS COMMISSION DE PERFORMANCE	TER SYNTHETIQUE
I EUR	0.13%	0.13%	1.50%
I CHF	0.13%	0.13%	1.50%
I USD	0.11%	0.11%	1.50%
Z EUR	0.03%	0.03%	1.40%

Le TER (commissions de performance incluses) des actions de Classe I EUR du Fonds maître s'élève à 1.53%.

Pooling

La SICAV a recours au pooling pour des raisons techniques liées à la comptabilisation des commissions de performance et à la couverture du risque de change pour ses classes d'actions hedgées libellées dans d'autres devises que la devise de référence des compartiments. Cette méthode fait appel à une structure "pool nourricier".

Pooling technique (commissions de performance et classes d'actions hedgées)

Les investissements, autres actifs nets et opérations (comme les dividendes, les intérêts, les résultats réalisés sur investissements, etc.), communs à toutes les Classes d'Actions, sont détenus au titre du compartiment par l'intermédiaire de placements dans le pool d'investissements, tandis que les éléments spécifiques à chaque Classe d'Actions (comme les commissions de dépositaire, de service, de gestion et les commissions de performance) ainsi que les éléments spécifiques à une classe d'actions hedgée (tels que les contrats de change à terme et autres frais contractuels liés à la couverture) sont comptabilisés au sein de comptes "nourriciers".

Une portion du pool (participation exprimée en pourcentage) est allouée à chaque compte "nourricier" en fonction de sa contribution initiale. Par la suite, la portion de la participation exprimée en pourcentage de chaque compte nourricier est déterminée lors de chaque calcul de la VNI, sur la base de la taille de chaque compte nourricier telle que convertie dans la devise de référence du pool au taux de change en vigueur le jour du calcul de la VNI.

Présentation et impact du Pooling dans les états financiers

Les données reprises dans l'état des opérations et des variations des actifs nets sous le poste "Bénéfice/Perte net(te) réalisé(e) sur pool - effet du pooling" représentent : l'effet de change résultant de la différence entre les taux de change utilisés à la date de clôture et ceux utilisés lors de chaque calcul de la VNI.

Au cours et à la fin de l'exercice, les investissements détenus au niveau d'un pool spécifique sont entièrement alloués à un compartiment précis.

2. PRINCIPALES METHODES COMPTABLES

Généralités

Les états financiers sont préparés conformément aux méthodes comptables généralement acceptées et à la réglementation en vigueur au Luxembourg eu égard aux organismes de placement collectif ("OPC").

Frais de constitution

Les frais de constitution ont été amortis sur une période de cinq ans maximum.

Conversion des devises étrangères de chaque compartiment

Les avoirs en banque, les autres actifs nets ainsi que la valeur d'évaluation des titres en portefeuille exprimés en d'autres devises que la devise de base du compartiment sont convertis dans cette devise aux cours de change en vigueur à la date de clôture.

Les revenus et les frais exprimés dans des devises autres que la devise de base du compartiment sont convertis dans cette devise au taux de change en vigueur à la date de la transaction.

Les bénéfices et pertes de change en résultant sont enregistrés dans l'état des opérations et des variations des actifs nets.

Etats financiers consolidés de la SICAV

Les états financiers consolidés de la SICAV sont établis en euros et correspondent à la somme des postes correspondants dans les états financiers de chaque compartiment convertis en euros au cours de change en vigueur à la date de clôture.

Evaluation des actifs de chaque compartiment

1. Les titres admis à la cote officielle d'une bourse de valeurs ou d'un autre marché réglementé sont évalués sur la base du dernier prix connu ou du prix à un moment donné et de la juste valeur, à moins que ce prix ne soit pas représentatif.
2. Les titres qui ne sont ni admis à la cote officielle d'une bourse de valeurs ni négociés sur un autre marché réglementé, ainsi que les titres cotés dont le dernier cours disponible n'est pas représentatif sont évalués sur la base de leur valeur probable de réalisation, estimée avec prudence et en toute bonne foi par le Conseil d'Administration de la SICAV.
3. La valeur des sociétés qui ne sont pas cotées sur une bourse de valeurs ou sur un marché réglementé peut être déterminée au moyen d'une méthode d'évaluation proposée avec prudence et en toute bonne foi par le Conseil d'Administration de la SICAV sur la base des derniers états financiers annuels révisés disponibles, et/ou sur la base des récents événements susceptibles d'avoir un impact sur la valeur du titre en question et/ou sur toute autre évaluation disponible. Le choix de la méthode et des outils d'évaluation dépend de la pertinence estimée des données disponibles. La valeur peut être corrigée sur la base de tout état financier intérimaire non révisé disponible. Si le Conseil d'Administration de la SICAV considère que le prix ainsi obtenu ne reflète pas le prix de vente prévisible d'un tel titre, il doit estimer la valeur du titre avec prudence et en toute bonne foi sur la base de son prix de vente prévisible.
4. La valeur des contrats à terme (futures) et d'options négociés sur une bourse de valeurs ou un autre marché réglementé doit être déterminée sur la base du prix de clôture ou de règlement publié par la bourse de valeurs ou l'autre marché réglementé qui constitue en règle générale le principal lieu de négociation de ces contrats. Les contrats à terme (futures) et contrats d'options qui ne sont pas négociés sur une bourse de valeurs ou un autre marché réglementé sont évalués à leur valeur de liquidation déterminée conformément aux règles fixées prudemment et de bonne foi par le Conseil d'Administration de la SICAV, selon des critères uniformes établis pour chaque type de contrats.
5. Les parts/actions émises par des organismes de placement collectif de type ouvert sont évaluées :
 - sur la base de la dernière VNI connue par l'Agent d'administration centrale, ou
 - sur la base de la VNI estimée à la date la plus proche du jour d'évaluation du compartiment.
6. Les instruments du marché monétaire sont évalués selon la méthode du coût amorti à leur valeur nominale majorée des intérêts courus, le cas échéant, ou selon une évaluation à la valeur de marché.
7. Les Contracts For Difference ("CFD") sont évalués sur la base de la différence entre les cours de leur sous-jacent à la date d'évaluation et à la date d'acquisition.
8. Les bénéfices ou pertes non réalisé(e)s sur contrats de change à terme en cours sont calculé(e)s le jour d'évaluation sur la base des taux de change à terme en vigueur ce même jour et sont comptabilisé(e)s dans l'état des actifs nets.
9. Pour les Swaps de taux d'intérêt ("IRS"), les flux futurs attendus à percevoir et à verser en vertu des contrats de swaps sont évalués à leur valeur actualisée.
10. Les Credit Default Swaps ("CDS") sont réévalués sur la base des spreads de remplacement fournis par Bloomberg Valuation Services.
11. Les Total Return Swaps ("TRS") sont évalués sur la base de la différence entre les cours de leur sous-jacent à la date d'évaluation et à la date d'acquisition.
12. La valeur des espèces en caisse ou en banque, effets et billets payables à vue et comptes à recevoir, dépenses payées d'avance, dividendes et intérêts déclarés ou venus à échéance et non encore reçus correspond à la valeur nominale des actifs, sauf s'il s'avère improbable que cette valeur puisse être réalisée, auquel cas la valeur est déterminée en retranchant un montant jugé approprié par le Conseil d'Administration de la SICAV en vue de refléter la valeur réelle de ces avoirs.

Le Conseil d'Administration de la SICAV peut, s'il le juge nécessaire, faire appel à un comité d'évaluation chargé de l'estimation de la valeur de certains titres qu'il réalisera avec prudence et en toute bonne foi.

Le Conseil d'Administration de la SICAV est autorisé à appliquer d'autres principes appropriés pour évaluer les actifs d'un compartiment lorsqu'il ne serait pas possible ou inadéquat d'utiliser les critères spécifiés ci-dessus.

Evaluation spécifique des titres de certains compartiments

Pour les compartiments Short-Term Money Market (CHF, EUR, GBP, JPY et USD) et Sovereign Short-Term Money Market (EUR et USD), l'évaluation des titres non cotés est réalisée selon la méthode "Marked-to-Model", en tenant compte du spread de l'émetteur et des taux sans risque. Les titres pour lesquels des cotations de marché existent sont évalués à la "valeur de marché".

Evaluation des investissements non cotés

L'entrée de tels titres dans le portefeuille se fait au coût d'achat. La fréquence de valorisation est dépendante de l'identification d'événements importants affectant le titre. En cas d'absence d'événements, une revue au moins semestrielle de l'évaluation est faite. Parmi les événements déclenchant le processus d'évaluation figurent notamment :

- Des profits sensiblement inférieurs/supérieurs aux attentes ;
- Un nouveau tour de financement initié par la société ;
- Une nouvelle transaction (initiée par un investisseur tiers) ;
- Des opérations de restructuration.

Reconnaissance des contrats futures, contrats d'options sur futures et CFD

Lors de chaque calcul de la VNI, l'appel de marge sur contrats futures, contrats d'options sur futures et CFD est enregistré directement au sein du poste "Bénéfices et pertes réalisé(e)s sur contrats à terme".

Comptabilisation des contrats futures, contrats d'options sur futures et CFD

Les bénéfices ou pertes non réalisé(e)s sur contrats futures, contrats d'options sur futures et CFD font l'objet d'un règlement journalier via la réception/le paiement d'un montant en espèces correspondant à l'augmentation/la diminution journalière de la valeur de marché de chaque contrat future, contrat d'option sur future ou CFD ouvert. Ce montant en espèces est comptabilisé sous le poste "Avoirs en banque" de l'état des actifs nets et le montant correspondant est comptabilisé sous le poste "Bénéfices et pertes nets réalisés sur contrats à terme" de l'état des opérations et des variations des actifs nets.

Comptabilisation et valorisation des accords de mise et de prise en pension

Un accord de mise en pension ("repo") désigne la vente d'un titre associé à l'engagement par le vendeur de racheter ce même titre à l'acheteur à un prix spécifié et à une date future déterminée.

Un accord de prise en pension ("reverse repo") désigne l'achat d'un titre associé à l'engagement par l'acheteur de revendre ce même titre au vendeur à un prix spécifié et à une date future déterminée. Par convention, la désignation de la transaction comme un accord de mise en pension ou de prise en pension est effectuée en se plaçant du point de vue du courtier (c'est-à-dire de la contrepartie du fonds).

Un accord de mise en pension a un effet similaire à un prêt octroyé par la SICAV au vendeur et garanti par les titres. La SICAV ne comptabilise pas l'achat des titres reçus mais enregistre l'accord de mise en pension comme s'il s'agissait d'un prêt. L'opération est présentée dans l'état de l'actif net au poste "A recevoir sur accords de mise en pension", y compris les intérêts à recevoir sur cette opération. Etant donné qu'un accord de mise en pension entre les deux parties concernées est généralement conclu pour une durée relativement courte et qu'il n'est pas cessible, il n'existe pas de marché actif. La SICAV comptabilise les accords de mise en pension au coût d'acquisition qui, associé aux intérêts courus, se rapproche de la valeur de marché.

Les revenus d'intérêt sont comptabilisés dans l'état des opérations et des variations des actifs nets sous le poste "Revenus d'intérêts sur accords de mise en pension".

Dans le cadre d'un accord de prise en pension, la SICAV vend un titre à un acheteur, généralement un courtier, contre des liquidités. La SICAV n'enregistre pas la vente du titre et s'engage à rembourser les liquidités majorées des intérêts à une date ultérieure en échange de la restitution (rachat) du même titre. La transaction a donc un effet similaire à un emprunt effectué par la SICAV et garanti par les titres. Les produits sont comptabilisés dans l'état de l'actif net au poste "A payer sur accords de prise en pension", en ce compris les intérêts à payer sur cette opération. Les titres sont évalués à la valeur de marché. Les charges d'intérêts sont comptabilisées dans l'état des opérations et des variations des actifs nets sous le poste "Charges d'intérêts sur accords de prise en pension".

Dans ce cas, la SICAV n'est pas soumise au risque de dépréciation des actifs sous-jacents. Les accords de mise/prise en pension sont respectivement considérés comme des emprunts et des prêts portant sur le montant des liquidités reçues et/ou payées.

Bénéfices/Pertes net(te)s réalisé(e)s sur vente de titres

Les bénéfices ou pertes net(te)s réalisé(e)s sur ventes de titres sont calculés sur la base du coût moyen pondéré des titres vendus.

Coût d'acquisition des investissements en portefeuille

Les coûts des investissements libellés dans des devises autres que la devise de base du compartiment sont convertis dans cette devise aux taux de change en vigueur à la date d'acquisition.

Revenus

Les dividendes sont enregistrés nets de retenue à la source à la date de détachement. Les intérêts sont comptabilisés selon la méthode de la comptabilité d'engagement.

Distribution de dividendes

Le Conseil d'Administration de la SICAV se réserve le droit d'introduire une politique de distribution pouvant varier suivant les compartiments et les sous-classes d'actions émises. Outre les distributions mentionnées ci-dessus, la SICAV pourra décider de distribuer des dividendes intérimaires. La SICAV pourra distribuer les revenus nets d'investissement, les plus-values réalisées, les plus-values non réalisées ainsi que le capital. Les investisseurs doivent donc savoir que les distributions pourront avoir pour effet de réduire la valeur nette de la SICAV. Aucune distribution de revenus à la suite de laquelle l'actif net de la SICAV deviendrait inférieur à 1,250,000 EUR ne pourra être effectuée. La SICAV pourra, dans la même limite, procéder à la distribution d'actions gratuites. Les dividendes et attributions qui ne seront pas réclamés dans les cinq ans suivant la date de paiement seront perdus et reviendront aux compartiments ou à la sous-classe d'actions correspondante des compartiments de la SICAV.

Les compartiments d'instruments du marché monétaire ne figurent pas dans le tableau ci-dessus en raison de la faible volatilité de leurs investissements.

Frais de transaction

Les frais de transaction représentent les frais afférents aux achats et ventes d'investissements encourus par chaque compartiment. Ils comprennent les frais de courtage, les frais bancaires, les impôts, les frais de dépôt et autres frais de transaction, et sont inclus dans l'état des opérations et des variations des actifs nets pour l'exercice clôturé le 30 septembre 2024.

Impôts sur les plus-values

La Société de gestion et/ou les Gestionnaires d'investissement se réservent le droit de comptabiliser des provisions au titre de l'impôt sur les plus-values, ce qui aura un impact sur la valorisation des Fonds concernés. Compte tenu de l'incertitude entourant l'éventualité d'une imposition sur les plus-values et le mode d'imposition, une provision pour impôts constituée par la Société de gestion et/ou les Gestionnaires d'investissement peut s'avérer excessive ou inadéquate en vue de faire face aux obligations fiscales finales sur les plus-values. Ces provisions pour impôts sont comptabilisées au poste "Autres frais à payer" de l'état des actifs nets.

3. TAXE D'ABONNEMENT

La SICAV est soumise à une taxe d'abonnement au taux de 0.05% par an sur la base de sa valeur nette d'inventaire à la fin du trimestre concerné ; la taxe est calculée et payable trimestriellement. Cette taxe d'abonnement est toutefois réduite à 0.01% pour :

- les compartiments ou classes d'actions réservés aux Investisseurs institutionnels, ou
- les compartiments dont l'objet exclusif est le placement collectif en instruments du marché monétaire et le placement de dépôts auprès d'institutions de crédit.

La taxe d'abonnement sera exonérée pour :

- la part des actifs de tout compartiment investie dans d'autres fonds d'investissement luxembourgeois soumis à la taxe d'abonnement ;
- tout compartiment (i) dont les actions sont réservées aux investisseurs institutionnels, (ii) dont l'objet exclusif est le placement collectif en instruments du marché monétaire et le placement de dépôts auprès d'institutions de crédit, (iii) dont l'échéance résiduelle pondérée du portefeuille est inférieure ou égale à 90 jours et (iv) qui a obtenu la note la plus élevée possible de la part d'une agence de notation reconnue. S'il existe plusieurs classes d'actions au sein du compartiment concerné, l'exemption n'est applicable qu'aux classes d'actions réservées aux investisseurs institutionnels ;
- tout compartiment dont les actions sont réservées (i) aux institutions de prévoyance professionnelle, ou à des véhicules d'investissement similaires, créés à l'initiative d'un ou de plusieurs employeurs au profit de leurs salariés ; et (ii) aux sociétés d'un ou de plusieurs employeurs qui investissent les fonds qu'elles détiennent afin de fournir des prestations de retraite à leurs employés ;
- tout compartiment dont la politique d'investissement prévoit qu'au moins 50% de ses actifs doivent être investis dans une ou plusieurs institutions de microfinance ; et
- tout compartiment (i) dont les titres sont cotés ou négociés sur au moins une bourse de valeurs ou un autre marché réglementé, en fonctionnement régulier, reconnu et ouvert au public, et (ii) dont l'objet exclusif est de reproduire la performance d'un ou de plusieurs indices. S'il existe plusieurs classes d'actions au sein du compartiment concerné, l'exemption n'est applicable qu'aux classes d'actions qui respectent les conditions énoncées au point (i) ci-dessus.

Taxe annuelle en Belgique

La SICAV est enregistrée en Belgique auprès de l'Autorité des services et marchés financiers, conformément à l'Article 154 de la Loi du 3 août 2012 relative aux marchés financiers. Les fonds autorisés à la distribution publique en Belgique sont soumis à une taxe annuelle de 0.0925% sur la VNI des actions distribuées en Belgique par des intermédiaires belges au 31 décembre de l'année précédente.

Cette taxe est comptabilisée sous le poste "Frais professionnels, frais de révision et autres frais" dans l'état des opérations et des variations des actifs nets.

4. COMMISSIONS DE GESTION

La SICAV a confié la fonction de gestion à la Société de Gestion qui l'a déléguée, pour chaque compartiment, à un ou plusieurs Gestionnaires.

Sous réserve de l'approbation préalable de la Société de Gestion, les Gestionnaires pourront nommer un ou plusieurs sous-gestionnaires, pouvant faire partie ou non du groupe Pictet, en vue d'assurer tout ou partie de la gestion de certains compartiments, tel que précisé dans les annexes du prospectus en vigueur de la SICAV.

La Société de Gestion peut se faire assister par un ou plusieurs Conseillers en investissement, internes ou externes au groupe Pictet, avec la mission de conseiller la Société de Gestion sur les opportunités d'investissement de la SICAV.

La Société de Gestion reçoit des compartiments des commissions de gestion destinées à rémunérer les Gestionnaires, les Sous-Gestionnaires, les Conseillers en investissement et les Distributeurs, le cas échéant. Cette commission est prélevée sur chaque compartiment, respectivement sur les classes d'actions, au prorata de leurs actifs nets.

Le Conseil d'Administration de la SICAV a décidé d'indiquer les taux pour les classes lancées et non encore lancées au 30 septembre 2024.

Lorsqu'un compartiment investit une part importante de ses actifs dans d'autres OPCVM et/ou d'autres OPC gérés directement ou par délégation par la même société de gestion ou par toute autre société à laquelle la société de gestion est liée dans le cadre d'une communauté de gestion ou de contrôle ou par une importante participation directe ou indirecte, le pourcentage maximal des commissions de gestion fixes qui peuvent être perçues au niveau des OPCVM et/ou des OPC cibles est de 1.6% auquel pourra le cas échéant s'ajouter une commission de maximum 20% de la performance de la VNI par action.

Le 14 juin 2017, le Parlement européen et le Conseil de l'Union européenne ont publié le Règlement 2017/1131 sur les fonds monétaires (le "Règlement MMF"), qui est entré en vigueur le 20 juillet 2018.

Au 30 septembre 2024, les compartiments suivants de la SICAV sont considérés comme des fonds monétaires à valeur liquidative variable et à court terme et relèvent de l'article 16.4 du Règlement MMF, mais investissent moins de 10% de leurs actifs dans d'autres fonds monétaires :

6. AUTRES FRAIS A PAYER

Au 30 septembre 2024, les autres frais à payer regroupent essentiellement les commissions de service, les taxes sur les plus-values et les frais de dépôt.

7. PRIX DE SOUSCRIPTION, DE RACHAT ET/OU DE CONVERSION

Le prix d'émission des actions de chaque compartiment est égal à la VNI de chaque action au sein du compartiment en question, telle que calculée sur la base du forward pricing le jour d'évaluation concerné. Ce prix peut être majoré des commissions payées aux intermédiaires financiers, lesquelles ne dépasseront pas 5% de la VNI par action pour le compartiment en question et seront payées aux intermédiaires financiers et/ou aux distributeurs (à l'exception de la Société de Gestion) qui participent à la distribution des actions de la SICAV. Les frais d'entrée et de sortie appliqués par les intermédiaires varieront en fonction de la sous-classe d'actions. Le prix d'émission sera majoré afin de couvrir les charges, taxes et autres droits de timbre dus.

Le prix de rachat des actions (ou sous-classe d'actions) de chaque compartiment est égal à la VNI de chaque action (ou chaque sous-classe d'actions) de ce compartiment, telle que calculée sur la base du "forward pricing" (à cours inconnu) le jour d'évaluation applicable. Une commission pouvant atteindre 1% de la VNI par action peut être déduite de ce montant et payée aux intermédiaires financiers et/ou aux distributeurs (à l'exception de la Société de Gestion). Les frais d'entrée et de sortie appliqués par les intermédiaires varieront en fonction de la sous-classe d'actions. Le prix de rachat sera réduit afin de couvrir les charges, taxes et autres droits de timbre éventuellement dus.

Dans des circonstances exceptionnelles comme, par exemple :

- des volumes de transactions importants,
- et/ou des perturbations sur les marchés,
- et dans tous les autres cas, si le Conseil d'Administration estime, à sa seule discrétion, que les intérêts des actionnaires existants (dans le cas d'émissions/conversions) ou des actionnaires restants (dans le cas de rachats/conversions) pourraient être lésés.

Le Conseil d'Administration de la SICAV sera en droit de prélever une "Commission de dilution" dans la limite de 2% de la VNI.

*** Depuis le 28 mars 2024 (date de lancement)

Le Conseil d'Administration de la SICAV sera habilité à apporter des corrections à la VNI, tel que décrit à la section "Calcul de la VNI" du Prospectus en vigueur.

8. SWING PRICING

Un mécanisme de swing pricing a été mis en place afin de protéger les intérêts des actionnaires existants, au moment de la réception des demandes de souscription et/ou de rachat pour un jour d'évaluation donné. En règle générale, les investisseurs entrants ou les actionnaires sortants supportent les coûts liés aux opérations de trading. Ces frais estimés sur la base d'un taux unique ou de la valeur effective peuvent être facturés distinctement ou en ajustant, à la hausse ou à la baisse, la valeur nette d'inventaire du compartiment concerné.

Le mécanisme de swing pricing peut être appliqué à tous les compartiments, à l'exception de certaines classes d'actions des fonds indexés. L'étendue de l'ajustement de prix est définie par le Conseil d'Administration de la SICAV. Le montant de l'ajustement peut varier d'un compartiment à l'autre et ne pourra en règle générale pas excéder 2% de la VNI par action initiale. Toute exception à ce montant est mentionnée dans les annexes relatives aux compartiments, le cas échéant.

Pour chaque compartiment disposant d'un mécanisme de swing pricing, un seuil d'ajustement dilutif prédéfini a été fixé sous la forme d'un pourcentage de la valeur nette d'inventaire ("VNI") du compartiment. Ce seuil d'ajustement dilutif prédéfini peut être égal à 0% (on parle alors de "full swing") ou différent de 0% (auquel cas on parlera de "partial swing").

Si pour un jour d'évaluation donné :

- les entrées nettes de capitaux dans un compartiment dépassent le seuil prédéfini, alors la VNI par action sera relevée. Les actionnaires souscrivant au compartiment supporteront ainsi les frais encourus par les opérations de trading déclenchées par leurs souscriptions en payant une VNI supérieure.
- les sorties nettes de capitaux dans un compartiment dépassent le seuil prédéfini, la VNI par action sera alors basculée vers le bas. Les actionnaires demandant le rachat de leurs actions du compartiment supporteront ainsi les frais encourus par les opérations de trading déclenchées par leurs rachats en recevant une VNI inférieure.

Le Conseil d'Administration de la SICAV peut décider d'augmenter la limite d'ajustement maximale (facturée séparément ou par ajustement de la valeur nette d'inventaire) indiquée dans le Prospectus dans des circonstances exceptionnelles et sur une base temporaire, afin de protéger les intérêts des Actionnaires.

Les compartiments suivants ont utilisé le mécanisme de swing pricing au cours de l'exercice clos le 30 septembre 2024 :

9. COMMISSIONS DE PERFORMANCE

Au sein de la SICAV, des commissions de performance sont d'application pour deux compartiments aux fins de la rémunération de leurs gestionnaires.

La commission de performance est calculée comme suit :

Le gestionnaire perçoit une commission de performance pour toutes les actions du compartiment, à l'exception des actions "X", provisionnée chaque jour d'évaluation et payée annuellement. Celle-ci est basée sur la VNI et correspond au pourcentage, indiqué dans le tableau ci-dessous, de la surperformance de la VNI par action (sa performance étant mesurée par rapport au "high water mark") par rapport à l'indice décrit dans le tableau ci-dessous pour chaque classe d'actions depuis le dernier paiement de la commission de performance.

* Jusqu'au 30 juillet 2024 (date de la fusion)

La commission de performance est calculée sur la base de la VNI par action après déduction de tous les frais, engagements et commissions de gestion (hors commission de performance) et ajustée afin de prendre en compte l'ensemble des souscriptions et rachats.

Toute première période de calcul (une période dure au moins 12 mois) commence à la date de lancement de la Classe concernée et se termine le dernier Jour d'évaluation de l'exercice en cours. Les périodes de calcul ultérieures commencent le dernier Jour d'évaluation de la période de calcul précédente et se terminent le dernier Jour d'évaluation de l'exercice suivant.

La cristallisation est annuelle.

La commission de performance est calculée sur la base de la surperformance de la VNI par action ajustée des souscriptions et des rachats au sein des classes d'actions concernées au cours de la période de calcul. Aucune commission de performance n'est due si la VNI par action avant commission de performance s'avère inférieure au high water mark pour la période de calcul en question.

Pour les compartiments ci-dessus, le high water mark correspond à la plus élevée des deux valeurs suivantes :

- la dernière VNI par action la plus élevée pour laquelle une commission de performance a été payée ; et
- la VNI par action initiale.

Les dividendes payés aux actionnaires sont déduits du "high water mark".

La période de référence correspond à l'exercice comptable de la SICAV.

Le calcul de la commission de performance est détaillé dans le prospectus en vigueur.

Pour l'exercice clôturé le 30 septembre 2024, la commission de performance s'est élevée à :

15. CREDIT DEFAULT SWAPS ("CDS")

Un CDS est un contrat financier bilatéral en vertu duquel une contrepartie (l'acheteur de la protection) paie une prime en échange de laquelle le vendeur de la protection s'engage à payer un certain montant dans l'hypothèse où l'émetteur de référence est confronté à un événement de crédit, tel que stipulé dans le contrat.

L'acheteur de la protection acquiert le droit de vendre une obligation spécifique, émise par l'émetteur de référence, à sa valeur nominale (ou à une autre valeur de référence ou prix d'exercice) lorsqu'un risque de crédit se produit. Les événements de crédit recouvrent communément la faillite, l'insolvabilité, la mise en redressement judiciaire/liquidation judiciaire, le report de dettes ou le défaut de paiement de dettes échues.

21. CONFLIT ENTRE L'UKRAINE ET LA RUSSIE

L'éclatement du conflit russo-ukrainien en février 2022 a eu des répercussions sur la performance des marchés financiers, qui ont été encore exacerbées par les sanctions, la dislocation des marchés et une piètre liquidité, notamment pour les valeurs russes et ukrainiennes, ce qui a rendu impossible la négociation ou l'évaluation de la majorité des titres russes (titres onshore, c'est-à-dire en RUB et UAH) ou le rapatriement des produits de vente en devise forte depuis un compte "S".

Dans ce contexte :

- Le Conseil d'Administration de la SICAV a attribué une valeur nulle aux titres russes en devise locale et en devise forte.
- Le Conseil d'Administration a attribué une valeur nulle aux comptes courants et de dépôt en RUB.

Cette décision pourra être modifiée en fonction de l'évolution de la situation.

La Société de Gestion continue de surveiller les expositions existantes à la Russie et à l'Ukraine, ainsi que les effets du conflit russo-ukrainien. Dans le cadre notamment des réunions régulières du Comité d'évaluation et du Comité des risques, les décisions prises tiennent compte de la situation actuelle et de son évolution. Ces décisions sont soumises à un examen régulier. Les principaux éléments pris en compte sont, entre autres :

- Les expositions directes et indirectes, ainsi que les effets de contagion susceptibles d'avoir un impact négatif sur les compartiments ;
- Les marchés et l'évaluation des actifs ;
- la prise en compte par l'équipe Portfolio Compliance des restrictions aux mouvements de capitaux et des sanctions prises en raison du conflit entre l'Ukraine et la Russie.

Le Conseil d'Administration de la SICAV a bon espoir qu'elle puisse poursuivre ses activités et suit de près la crise actuelle.

Informations spécifiques à Pictet - Russian Equities

Compte tenu du contexte évoqué ci-dessus, le Conseil d'Administration de la SICAV a décidé de suspendre le calcul de la valeur nette d'inventaire, la souscription et le rachat des actions du compartiment Pictet - Russian Equities à compter du 28 février 2022 (comme indiqué dans l'avis aux actionnaires daté du 25 février 2022) et de renoncer à la commission de gestion jusqu'à nouvel ordre.

Le Conseil d'Administration de la SICAV réexaminera la suspension à intervalles réguliers et toutes les mesures seront prises pour mettre fin à la Période de suspension dès que possible, dans le meilleur intérêt des actionnaires.

Dans la situation actuelle, il n'est pas possible de déterminer combien de temps durera la suspension du calcul officiel de la VNI (y compris de l'émission, du rachat et de la conversion des actions). Les informations comptables et la valeur nette d'inventaire relatives au compartiment, présentées dans les présents états financiers, ont été établies et calculées selon les principes comptables décrits dans la note 2. Cette valeur nette d'inventaire est une valeur technique et non publiée.

Toute décision ultérieure modifiant ce statut sera communiquée aux investisseurs en temps voulu.

23. EVENEMENTS POST-CLOTURE

Un nouveau Prospectus est entré en vigueur en octobre 2024.

Le Conseil d'Administration de la SICAV a décidé d'approuver la fusion entre les compartiments Pictet Sicav II - Dynamic Asset Allocation Fund et Pictet - Dynamic Allocation Fund avec effet au 15 octobre 2024.

Conformément à la "Directive pour le calcul et la publication du Total Expense Ratio ("TER") de placements collectifs de capitaux" du 16 mai 2008 (état au 5 août 2021) de l'Asset Management Association Switzerland ("AMAS"), la SICAV est tenue de publier un TER pour la dernière période de douze mois ("TER de l'AMAS").

Le TER se définit comme le total des frais d'exploitation (les frais d'exploitation consistent essentiellement en commissions de gestion et commissions de conseil en investissement, commissions de Banque dépositaire, intérêts et frais bancaires, commissions de service, commissions de performance, taxes et droits) rapporté à la VNI moyenne du compartiment/de la classe d'actions concerné(e) (calculée sur la base de la moyenne quotidienne des actifs nets de la période concernée) exprimé dans sa devise de référence.

La SICAV publie également le TER du Prêt de titres dont la méthode de calcul est identique à celle utilisée pour le TER de l'AMAS, tout en incluant les revenus d'intérêts sur le prêt de titres.

En outre, pour les nouvelles classes d'actions lancées au cours de la période, les frais opérationnels ont été annualisés comme énoncé au point 8 des Directives. Les montants ont été annualisés tandis que certains coûts fixes n'ont pas fait l'objet d'une répartition égale sur la période.

Pour autant que le compartiment investisse plus de 10% de ses actifs dans d'autres fonds d'investissement, un TER synthétique est calculé :

- en ajoutant au TER la somme des TER des fonds sous-jacents pondérés selon leur part dans l'actif net du compartiment correspondant à la date de référence. Si l'un des fonds cibles ne publie pas de TER, aucun TER synthétique ne sera calculé pour cette fraction d'investissement,
- en soustrayant l'impact des rétrocessions perçues, calculé en divisant le montant des rétrocessions par la moyenne des actifs.

Pour l'exercice allant du 1^{er} octobre 2023 au 30 septembre 2024, le TER était le suivant :

1. OPCVM INDICIELS

Au 30 septembre 2024, la SICAV comprend les 7 compartiments indicieux suivants :

Compartiment	Indice de référence	Devise	TE ex post (1)	Performance du compartiment (2)	Performance de l'indice de référence
Pictet - Europe Index (3)	MSCI EUROPE	EUR	0.21%	19.07%	18.80%
Pictet - USA Index	S&P 500 Comp	USD	0.03%	35.68%	35.76%
Pictet - Japan Index	MSCI JAPAN	JPY	0.05%	16.47%	16.52%
Pictet - Pacific Ex Japan Index	MSCI PACIFIC EX JAPAN	USD	0.08%	28.09%	28.20%
Pictet - Emerging Markets Index (4)	MSCI EM	USD	0.24%	25.21%	26.05%
Pictet - Euroland Index (5)	MSCI EMU	EUR	0.26%	20.68%	20.31%
Pictet - China Index (6)	MSCI CHINA	USD	0.25%	23.83%	23.89%

(1) L'erreur de suivi ex post est calculée comme l'écart-type d'une série de différences en pourcentage. Cette mesure indique la différence entre le rendement que l'investisseur reçoit et celui de l'indice de référence.

(2) La performance du compartiment est calculée sur la base d'une fréquence quotidienne et d'un rendement brut après frais de transactions, mais hors autres frais.

(3) L'écart positif par rapport à l'indice de référence correspond également aux dividendes, dont l'imposition est inférieure aux hypothèses prises en compte par MSCI dans son calcul de l'indice. Bien que MSCI applique les taux d'imposition des sociétés propres à chaque pays, ceux-ci peuvent différer du taux réel auquel chaque entreprise individuelle est soumise. Les principaux écarts de pondération du fonds en termes d'actions, de secteurs et de pays ont été maintenus en dessous de 0.06%. Le portefeuille contient 219 actions de l'indice de référence, l'une des composantes de l'indice MSCI EMU ayant été écartée afin de respecter la directive du groupe sur les restrictions en matière d'armes et de munitions.

(4) Depuis l'introduction en 2018 d'une taxe sur les plus-values en Inde (15% à court terme et 10% à long terme, applicable à toutes les actions indiennes), Pictet a mis en place une provision journalière applicable à la VNI du fonds. Cette provision est constituée lors des souscriptions et des rachats par les investisseurs entrants et sortants. Les titres russes détenus au sein du portefeuille (2.2% au 25.02.2022) ont été évalués à 0 après le 25.02.2022, alors que MSCI a retiré la Russie de ses indices le 09.03.2022.

(5) L'écart positif par rapport à l'indice de référence correspond également aux dividendes, dont l'imposition est inférieure aux hypothèses prises en compte par MSCI dans son calcul de l'indice. Bien que MSCI applique les taux d'imposition des sociétés propres à chaque pays, ceux-ci peuvent différer du taux réel auquel chaque entreprise individuelle est soumise.

(6) La volatilité de la performance relative de l'indice Pictet-China par rapport à son indice de référence est due à l'utilisation de devises différentes dans le cadre de l'évaluation des actions locales chinoises : la VNI du fonds est calculée sur la base du taux CNY/USD alors que le fournisseur de l'indice utilise le taux CNH/USD pour calculer l'indice de référence. Les écarts de pondérations les plus importants entre le fonds et l'indice de référence concernent des titres qui ont été exclus de l'univers d'investissement sur la base de critères de durabilité internes.

5. INFORMATIONS CONCERNANT L'ÉVALUATION DU RISQUE

Au 30 septembre 2024, les compartiments Pictet suivants ont recours à l'approche de la VaR (Value-at-Risk) pour surveiller leur exposition globale au risque. Tous les autres compartiments Pictet utilisent l'approche par les engagements pour surveiller leur exposition globale au risque.

La VaR peut être calculée grâce à l'approche de la VaR absolue ou de la VaR relative. Le traitement et la présentation des chiffres de VaR peuvent varier en fonction de l'approche retenue (absolue ou relative).

Approche de la VaR absolue

L'approche de la VaR absolue limite la VaR maximale qu'un compartiment peut afficher par rapport à sa Valeur nette d'inventaire. La limite réglementaire est fixée à 20%.

Le niveau de levier est également inclus. Il correspond à la somme des valeurs notionnelles des instruments financiers dérivés utilisés (CESR/10-788 - encadré 25). Les chiffres présentés se basent sur une moyenne des observations mensuelles couvrant la période allant du 1^{er} octobre 2023 au 30 septembre 2024.

Approche de la VaR relative

L'approche de la VaR relative est utilisée pour les compartiments qui suivent un portefeuille de référence reflétant leur stratégie d'investissement. La VaR relative d'un compartiment est exprimée en tant que multiple de la VaR du portefeuille de référence (indice de référence) et est plafonnée par la réglementation au double de la VaR de l'indice de référence.

Les observations de la VaR quotidienne (du 1^{er} octobre 2023 au 30 septembre 2024) des compartiments ont été systématiquement comparées aux observations de la VaR de leur indice de référence. Le ratio obtenu est appelé Ratio d'utilisation de la limite de VaR.

Par exemple, le Ratio d'utilisation de la limite de VaR de Pictet EUR Short Term High Yield s'est un jour élevé à 115.36%. Au jour concerné, les données suivantes ont été calculées :

- VaR du compartiment 4.58%
- VaR de l'indice de référence 3.97%
- Utilisation de la limite de VaR 115.36%

Ce ratio doit être mis en perspective avec la limite maximale autorisée par la Loi, à savoir 200% de la VaR de l'Indice de référence.

Commentaires d'ordre général

Toutes les mesures de VaR sont déterminées sur la base des paramètres suivants :

- Horizon de détention d'un mois ;
- Intervalle de confiance de 99% (ce qui signifie qu'il existe une probabilité de 1% que la valeur du portefeuille puisse connaître une baisse mensuelle plus importante que le pourcentage indiqué) ;
- Simulation de Monte Carlo, et ;
- 3.5 ans d'historique de données hebdomadaires pour déterminer les facteurs de risque. Hormis pour les données relatives au compartiment Pictet Chinese Local CCY Debt, qui ont recours à un horizon journalier d'un an soumis à une décroissance exponentielle.

Au 30 septembre 2024, l'échéance de tous les prêts de titres et TRS est considérée comme ouverte.

Garantie par nantissement

Dans le cadre d'opérations de prêts, les compartiments de la SICAV reçoivent une garantie par nantissement (sous la forme d'obligations émises ou garanties par un gouvernement ou une autorité gouvernementale régionale ou locale d'un Etat membre de l'OCDE, ou émises ou garanties par des entités locales, régionales ou internationales d'institutions ou d'organisations supranationales présentant une notation d'au moins AA et/ou d'obligations émises ou garanties par des émetteurs de premier plan offrant une liquidité adéquate).

Garantie sur accords de mise/prise en pension

Les opérations de mise/prise en pension sont par nature garanties (sous forme d'espèces ou d'obligations faisant partie de la stratégie d'investissement du Fonds).

Données sur le rendement et les coûts

Les compartiments perçoivent une rémunération sur ces opérations de prêts de titres. Cette rémunération est présentée dans l'état des opérations et des variations des actifs nets à la section "Intérêts sur prêts de titres". Une commission s'élevant à 20% des intérêts reçus est perçue par la Banque dépositaire, Bank Pictet & Cie (Europe) AG, succursale de Luxembourg, au titre des services qu'elle fournit à la SICAV dans le cadre des contrats de prêts de titres.

Dans le cadre de ces opérations de prêts de titres, les compartiments de la SICAV reçoivent une garantie (sous la forme d'obligations émises ou garanties par un gouvernement ou une autorité gouvernementale régionale ou locale d'un Etat membre de l'OCDE, ou émises ou garanties par des entités locales, régionales ou internationales d'institutions ou d'organisations supranationales présentant une notation d'au moins AA et/ou d'obligations émises ou garanties par des émetteurs de premier plan offrant une liquidité adéquate), dont la valeur cible au moment de la conclusion du contrat de prêt de titres est de 105% de la valeur de marché totale des titres prêtés.

Au cours de l'exercice clos le 30 septembre 2024, le Fonds a conclu des opérations de mise et de prise en pension.

Ces opérations sont principalement effectuées à des fins de financement, c'est-à-dire pour l'acquisition de titres et/ou la levée de fonds. Ainsi, le Fonds pourrait recevoir une rémunération sur les opérations de prise en pension et payer une rémunération sur les opérations de mise en pension.

Le 27 novembre 2019, le règlement (UE) 2019/2088 du Parlement européen et du Conseil sur la publication d'informations en matière de durabilité dans le secteur des services financiers ("SFDR") a été publié. Le SFDR vise à renforcer l'harmonisation de l'intégration des risques en matière de durabilité, de la prise en compte des incidences négatives en matière de durabilité, de la promotion des caractéristiques environnementales ou sociales et des investissements durables, ainsi qu'à renforcer la transparence envers les investisseurs finaux à ces égards, en exigeant des informations précontractuelles et des informations fournies en continu destinées aux investisseurs finaux.

Le SFDR fournit des définitions de haut niveau et différencie plusieurs catégories de produits, notamment les "produits relevant de l'article 8", qui sont des produits financiers promouvant, entre autres caractéristiques, des caractéristiques environnementales ou sociales, ou une combinaison de ces caractéristiques, pour autant que les sociétés dans lesquelles les investissements sont réalisés appliquent des pratiques de bonne gouvernance ("Produits relevant de l'article 8 du SFDR") et les "produits relevant de l'article 9", qui sont des produits financiers ayant l'investissement durable comme objectif ("Produits relevant de l'article 9 du SFDR").

Les compartiments suivants sont catégorisés comme des produits financiers relevant du champ d'application des articles suivants du SFDR au 30 septembre 2024 :

Modèle d'informations périodiques pour les produits financiers visés à l'article 8, paragraphes 1, 2 et 2bis du règlement (UE) 2019/2088 et à l'article 6, premier alinéa du règlement (UE) 2020/852

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Note: Pictet Asset Management a eu recours à un cadre de référence exclusif pour définir les investissements durables. Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

- Actionnariat actif:

Le fonds s'est engagé (dialogue collaboratif) avec la direction d'entreprises sélectionnées sur des questions ESG importantes.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

● **Profil ESG général**

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'indice de référence.

Le score ESG moyen pondéré du fonds a été de 7,67, contre 7,63 pour l'indice de référence. Un score plus élevé désigne un risque plus faible. Les scores vont de 0 à 10, 10 étant le meilleur.

● **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)

**Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. ● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Le fonds ne s'est pas engagé dans une proportion minimale d'investissements durables.

Toutefois, ex-post, le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 37,26%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 6,34%.

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

- **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

- (i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.
- (ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

- *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à «ne pas causer de préjudice important» en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a évalué ses participations d'entreprises en fonction d'une analyse des risques environnementaux, sociaux et de gouvernance dans le cadre des investissements du fonds. Les gestionnaires d'investissement, informés par la recherche interne et de tiers, dont les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. L'analyse de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille pour atteindre une approche à tendance positive dans le portefeuille.

(ii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences en collaboration avec d'autres équipes d'investissement et des tiers externes. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs.

Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iii) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'Investissement Responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées ou (iii) des pays soumis à des sanctions internationales; voyez également des informations détaillées sur les exclusions dans la politique d'investissement responsable de Pictet Asset Management.

Quelle était la proportion d'investissements liés à la durabilité?

43,60%

L'allocation des actifs décrit la part des investissements dans des actifs spécifiques.

● Quelle était l'allocation des actifs?

Le fonds était aligné à 95,76% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 4,24% dans Autres (#2 Autres). 43,60% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

La catégorie **#1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **#2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie **#1 Alignés sur les caractéristiques E/S** comprend:

- La sous-catégorie **#1A Durables** couvrant les investissements durables sur le plan environnemental et social.

- La sous-catégorie **#1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

Oui:

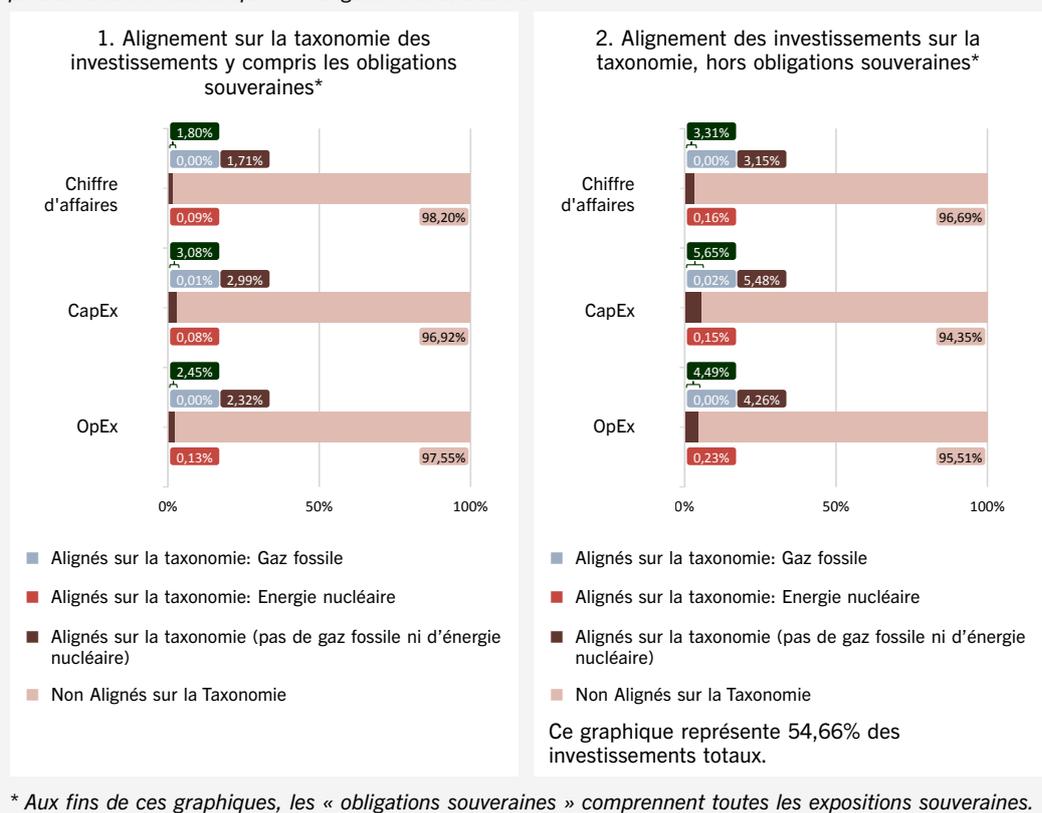

Dans le gaz fossile Dans l'énergie nucléaire

Non

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:
- du **chiffre d'affaires** pour refléter le «caractère écologique» actuel des sociétés bénéficiaires des investissements;
- des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple;
- des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

La part des investissements réalisés dans:

- Des activités habilitantes: 1,18%

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Le pourcentage d'investissements alignés sur la Taxonomie de l'UE durant la période de référence précédente était de 0,92%, contre 1,80% pour la période de référence actuelle.

Veillez noter que ce fonds n'avait pas d'engagement ex ante en matière de Taxonomie de l'UE.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

37,26%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social?

6,34%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

Au cours de la période de référence, les caractéristiques environnementales et/ou sociales ont été atteintes en suivant la stratégie d'investissement et en respectant les éléments contraignants.

Les éléments contraignants du fonds comprennent:

- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes nucléaires de pays qui ne sont pas signataires du Traité sur la non-prolifération des armes nucléaires (TNP), et dans la production d'autres armes controversées

- un profil ESG supérieur à celui de l'univers d'investissement
- analyse des critères ESG des titres éligibles couvrant au moins 90% de l'actif net ou du nombre d'émetteurs présents dans le portefeuille

En outre, le fonds s'est engagé (dialogue collaboratif) avec 26 entreprises au 30 septembre 2024.

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été atteintes?

Les caractéristiques environnementales et sociales de ce fonds incluaient:

- Orientation favorable:

Le fonds a augmenté la pondération des titres présentant de faibles risques en matière de durabilité et/ou a diminué celle des titres présentant des risques élevés en matière de durabilité et en conséquence, il a présenté un profil environnemental, social et de gouvernance (ESG) meilleur que celui de l'indice de référence. L'indice Bloomberg Euro-Aggregate Corporate a été utilisé pour mesurer l'approche à tendance positive; toutefois, aucun indice de référence n'a été désigné aux fins d'atteindre les caractéristiques environnementales ou sociales promues par le fonds.

- Exclusions fondées sur les normes et les valeurs:

Le fonds a exclu les émetteurs qui exercent des activités importantes ayant une incidence négative sur la société ou l'environnement, ou qui enfreignent gravement les normes internationales comme détaillé ci-dessous:

[2] La notion d'«État soutenant le terrorisme» est utilisée par le Département d'État américain pour désigner les pays qui ont prêté à plusieurs reprises leur soutien à des actes de terrorisme international.

[3] Des exclusions s'appliquent également aux entreprises dont le siège social est situé dans un pays exclu.

[4] Outre les exclusions strictes, Pictet Asset Management tient une liste de surveillance des pays nécessitant une diligence raisonnable supplémentaire de la part des équipes d'investissement avant l'investissement.

- Actionnariat actif:

Le fonds s'est engagé (dialogue collaboratif) avec la direction d'entreprises sélectionnées sur des questions ESG importantes.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

● **Profil ESG général**

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'indice de référence.

Le score ESG moyen pondéré du fonds a été de 8,21, contre 8,07 pour l'indice de référence. Un score plus élevé désigne un risque plus faible. Les scores vont de 0 à 10, 10 étant le meilleur.

● **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	3,17	3,06
Armement	0,04	0,05
Autres activités controversées	0,06	0,21
Eligible:	87,68	100,00
Couvert:	99,15	99,18

**Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.*

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

(i) PIN 10: Violations des principes du Pacte mondial des Nations unies et des Principes directeurs de l'Organisation de coopération et de développement économiques (OCDE) à l'intention des entreprises multinationales.

(ii) PIN 14: Exposition à des armes controversées (mines antipersonnel, armes à sous-munitions, armes chimiques et armes biologiques).

● **Engagement**

Le fonds s'est engagé (dialogue collaboratif) avec 6 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Le fonds ne s'est pas engagé dans une proportion minimale d'investissements durables.

Toutefois, ex-post, le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 18,00%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 19,27%.

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

- **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

- (i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.
- (ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

- *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à «ne pas causer de préjudice important» en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iii) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

37,26%

L'allocation des actifs décrit la part des investissements dans des actifs spécifiques.

● Quelle était l'allocation des actifs?

Le fonds était aligné à 96,65% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 3,35% dans Autres (#2 Autres). 37,26% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

La catégorie **#1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **#2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie **#1 Alignés sur les caractéristiques E/S** comprend:

- La sous-catégorie **#1A Durables** couvrant les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

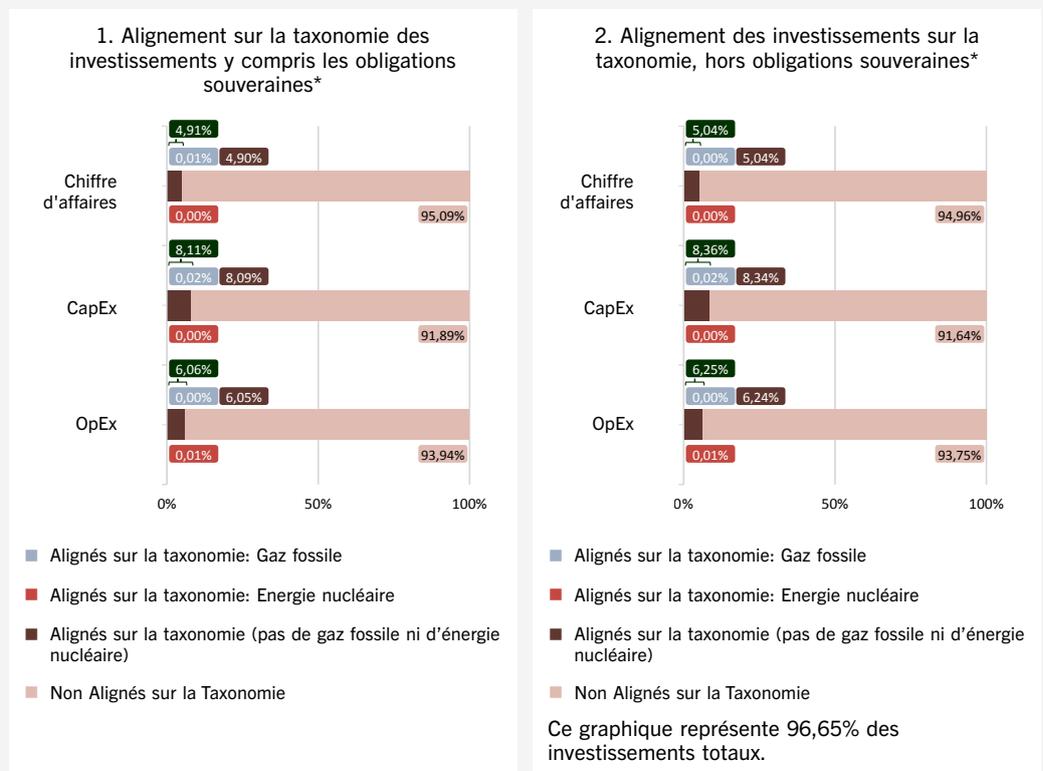

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:
 - du **chiffre d'affaires** pour refléter le «caractère écologique» actuel des sociétés bénéficiaires des investissements;
 - des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition verte par exemple;
 - des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

- Oui:
- Dans le gaz fossile
 - Dans l'énergie nucléaire
- Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

La part des investissements réalisés dans:

- Des activités transitoires: 0,25%
- Des activités habilitantes: 2,39%

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Le pourcentage d'investissements alignés sur la Taxonomie de l'UE durant la période de référence précédente était de 3,12%, contre 4,91% pour la période de référence actuelle.

Veillez noter que ce fonds n'avait pas d'engagement ex ante en matière de Taxonomie de l'UE.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

18,00%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social?

19,27%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

Au cours de la période de référence, les caractéristiques environnementales et/ou sociales ont été atteintes en suivant la stratégie d'investissement et en respectant les éléments contraignants.

Les éléments contraignants du fonds comprennent:

- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes nucléaires de pays qui ne sont pas signataires du Traité sur la non-prolifération des armes nucléaires (TNP), et dans la production d'autres armes controversées
 - tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, telles que l'extraction de charbon thermique et la production d'électricité, la production de pétrole et de gaz non conventionnels, les armements militaires et les armes légères, les produits du tabac, les opérations de jeux d'argent et la production de divertissement pour adultes. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur les seuils d'exclusion.
 - violent gravement les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption.
- un profil ESG supérieur à celui de l'indice de référence
- analyse des critères ESG des titres éligibles couvrant au moins 90% de l'actif net ou du nombre d'émetteurs présents dans le portefeuille

En outre, le fonds s'est engagé (dialogue collaboratif) avec 6 entreprises au 30 septembre 2024.

Quelle a été la performance de ce produit financier par rapport à l'indice de référence durable?

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

- Actionnariat actif:

Le fonds s'est engagé (dialogue collaboratif) avec des émetteurs souverains sélectionnés sur des sujets ESG au cours de la période de référence.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● Quelle a été la performance des indicateurs de durabilité?

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

- **Le pourcentage d'exposition du produit financier aux «investissements durables» tel que défini à l'article 2 (17) du SFDR:**

14,96%

- **L'exposition à des obligations labellisées vertes et/ou sociales**

Durant la période de référence, le fonds présentait une exposition de 9,01% aux obligations labellisées.

Les obligations labellisées incluent les obligations environnementales, sociales et de développement durable. La classification des obligations labellisées est fournie par l'émetteur obligataire et peut ne pas refléter notre point de vue interne.

- **Réduction de l'univers d'investissement en fonction des facteurs ESG**

Le fonds a réduit son univers d'investissement en supprimant au moins 20% des émetteurs présentant les risques les plus élevés en matière de durabilité et/ou des principales incidences négatives sur la société ou l'environnement.

Les risques de durabilité sont des risques ou des conditions liés à l'ESG qui pourraient avoir une incidence négative importante sur la valeur des investissements s'ils devaient se concrétiser. Les risques de durabilité incluaient, sans toutefois s'y limiter, le risque lié à la transition climatique, le risque climatique physique, le risque environnemental, le risque social, le risque de gouvernance. Des réexamens et des contrôles de risque périodiques sont instaurés pour un suivi de la mise en œuvre.

Les principales incidences négatives sont des effets négatifs, importants ou susceptibles d'être importants sur les facteurs de durabilité qui sont causés, aggravés par, ou directement liés aux décisions et conseils en matière d'investissement. Ces principales incidences négatives incluaient, entre autres, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption.

- **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Le fonds investit principalement dans des obligations d'État durant la période de référence. En cas d'investissements dans des obligations non souveraines et conformément à la politique d'exclusion de Pictet Asset Management décrite dans la Politique d'Investissement Responsable de

l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)

*Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. (ii) PIN 14: Exposition à des armes controversées (mines antipersonnel, armes à sous-munitions, armes chimiques et armes biologiques).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

Le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 12,26%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 2,70%.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

- (i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.
- (ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

- *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à «ne pas causer de préjudice important» en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs

sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne et des initiatives de collaboration avec les investisseurs institutionnels.

(iii) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'Investissement Responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées ou (iii) des pays soumis à des sanctions internationales; voyez également des informations détaillées sur les exclusions dans la politique d'investissement responsable de Pictet Asset Management.

Quelle était la proportion d'investissements liés à la durabilité?

14,96%

● Quelle était l'allocation des actifs?

Le fonds était aligné à 97,97% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 2,03% dans Autres (#2 Autres). 14,96% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

L'allocation des actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **#1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **#2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie **#1 Alignés sur les caractéristiques E/S** comprend:

- La sous-catégorie **#1A Durables** couvrant les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Non applicable.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

Oui:

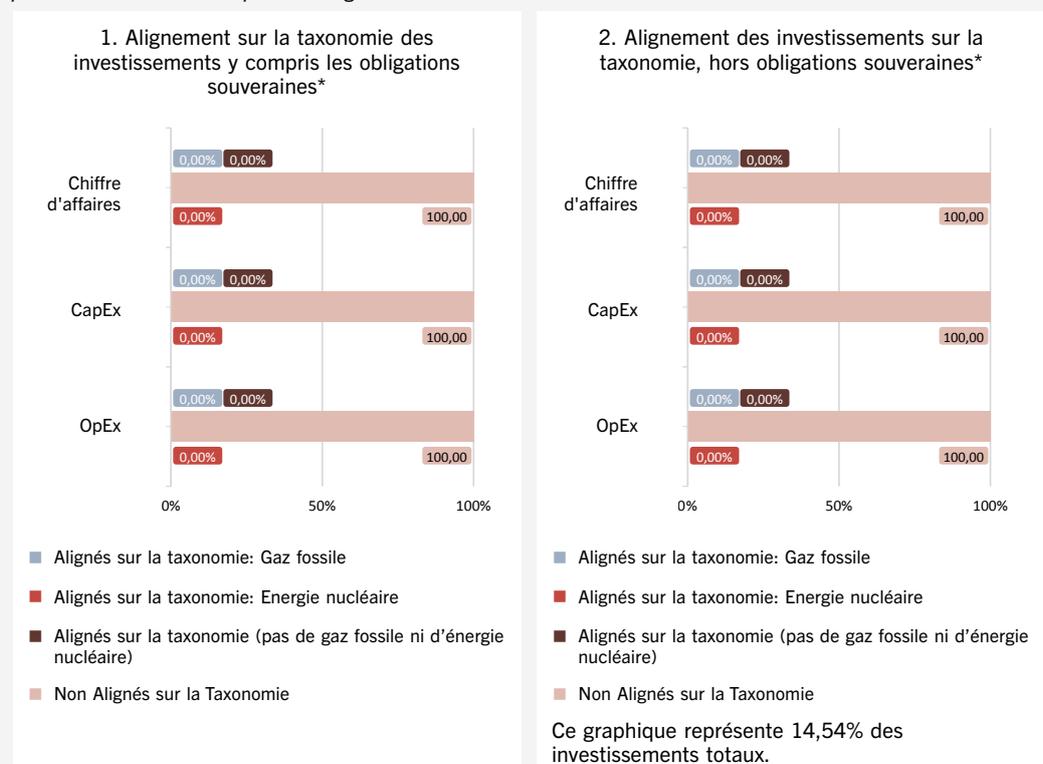

Dans le gaz fossile Dans l'énergie nucléaire

Non

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

Les activités alignées sur la taxonomie sont exprimées en pourcentage: - du **chiffre d'affaires** pour refléter le «caractère écologique» actuel des sociétés bénéficiaires des investissements; -des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple; - des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

- **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

Non applicable.

- **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Non applicable.

- Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?**

12,26%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

- Quelle était la part d'investissements durables sur le plan social?**

2,70%

- Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?**

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

Au cours de la période de référence, les caractéristiques environnementales et/ou sociales ont été atteintes en suivant la stratégie d'investissement et en respectant les éléments contraignants.

Les éléments contraignants du fonds comprennent:

- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes nucléaires de pays qui ne sont pas signataires du Traité sur la non-prolifération des armes nucléaires (TNP), et dans la production d'autres armes controversées
 - tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, telles que l'extraction de charbon thermique et la production d'électricité, la production de pétrole et de gaz non conventionnels, les armements militaires et les armes légères, les produits du tabac, les opérations de jeux d'argent et la production de divertissement pour adultes. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur les seuils d'exclusion.
 - violent gravement les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption.
- exclusions de pays soumis à des sanctions internationales
- analyse des critères ESG des titres éligibles couvrant au moins 90% de l'actif net ou du nombre d'émetteurs présents dans le portefeuille

Le fonds s'est engagé (dialogue collaboratif) avec 3 émetteurs souverains sur des thèmes liés à l'ESG (données au 30 septembre 2024).

Quelle a été la performance de ce produit financier par rapport à l'indice de référence durable?

Aucun indice de référence n'a été désigné aux fins d'atteindre les caractéristiques environnementales ou sociales promues par le fonds.

- **En quoi l'indice de référence différerait-il d'un indice de marché large?**
Non applicable.

- **Quelle a été la performance de ce produit financier au regard des indicateurs de durabilité visant à déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues?**
Non applicable.

- **Quelle a été la performance de ce produit financier par rapport à l'indice de référence?**

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été atteintes?

Les caractéristiques environnementales et sociales de ce fonds incluaient:

L'indice FTSE WBG All Maturities a été utilisé pour mesurer l'approche à tendance positive; toutefois, aucun indice de référence n'a été désigné aux fins d'atteindre les caractéristiques environnementales ou sociales promues par le fonds.

- Exclusions fondées sur les normes et les valeurs:

Le fonds a exclu les émetteurs qui exercent des activités importantes ayant une incidence négative sur la société ou l'environnement, ou qui enfreignent gravement les normes internationales comme détaillé ci-dessous:

Pays (i) classés dans la catégorie «alerte» du Fragile State Index ou (ii) soumis à des sanctions liées aux exportations infligées par l'UE	Liste de surveillance[4]

[1] En ce qui concerne les armes nucléaires, cette exclusion s'applique aux entreprises ayant leur siège social dans un pays n'ayant pas signé le Traité sur la non-prolifération des armes nucléaires (TNP) de 1968.

[2] La notion d'«État soutenant le terrorisme» est utilisée par le Département d'État américain pour désigner les pays qui ont prêté à plusieurs reprises leur soutien à des actes de terrorisme international.

[3] Des exclusions s'appliquent également aux entreprises dont le siège social est situé dans un pays exclu.

[4] Outre les exclusions strictes, Pictet Asset Management tient une liste de surveillance des pays nécessitant une diligence raisonnable supplémentaire de la part des équipes d'investissement avant l'investissement.

Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails. Notez que notre cadre d'exclusion a été mis à jour au cours de l'année 2024.

- Actionnariat actif:

Le fonds s'est engagé (dialogue collaboratif) avec la direction d'entreprises sélectionnées sur des questions ESG importantes.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

● **Profil ESG général**

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'indice de référence.

Le score ESG moyen pondéré du fonds a été de 6,82, contre 6,58 pour l'indice de référence. Un score plus élevé désigne un risque plus faible. Les scores vont de 0 à 10, 10 étant le meilleur.

● **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	1,00	0,00
Armement	0,00	0,00
Autres activités controversées	0,02	0,00
Eligible:	20,31	0,00
Couvert:	93,01	100,00

**Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.*

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

(i) PIN 10: Violations des principes du Pacte mondial des Nations unies et des Principes directeurs de l'Organisation de coopération et de développement économiques (OCDE) à l'intention des entreprises multinationales.

(ii) PIN 14: Exposition à des armes controversées (mines antipersonnel, armes à sous-munitions, armes chimiques et armes biologiques).

● **Engagement**

Le fonds s'est engagé (dialogue collaboratif) avec 8 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Le fonds ne s'est pas engagé dans une proportion minimale d'investissements durables.

Toutefois, ex-post, le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 33,76%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 1,53%.

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

- (i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.
- (ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

● *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à «ne pas causer de préjudice important» en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a évalué ses participations d'entreprises en fonction d'une analyse des risques environnementaux, sociaux et de gouvernance dans le cadre des investissements du fonds. Les gestionnaires d'investissement, informés par la recherche interne et de tiers, dont les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. L'analyse de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille pour atteindre une approche à tendance positive dans le portefeuille.

(ii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences en collaboration avec d'autres équipes d'investissement et des tiers externes. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs.

Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iii) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'Investissement Responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées ou (iii) des pays soumis à des sanctions internationales; voyez également des informations détaillées sur les exclusions dans la politique d'investissement responsable de Pictet Asset Management.

Quelle était la proportion d'investissements liés à la durabilité?

35,29%

● Quelle était l'allocation des actifs?

Le fonds était aligné à 94,58% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 5,42% dans Autres (#2 Autres). 35,29% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

La catégorie **#1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **#2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie **#1 Alignés sur les caractéristiques E/S** comprend:

- La sous-catégorie **#1A Durables** couvrant les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

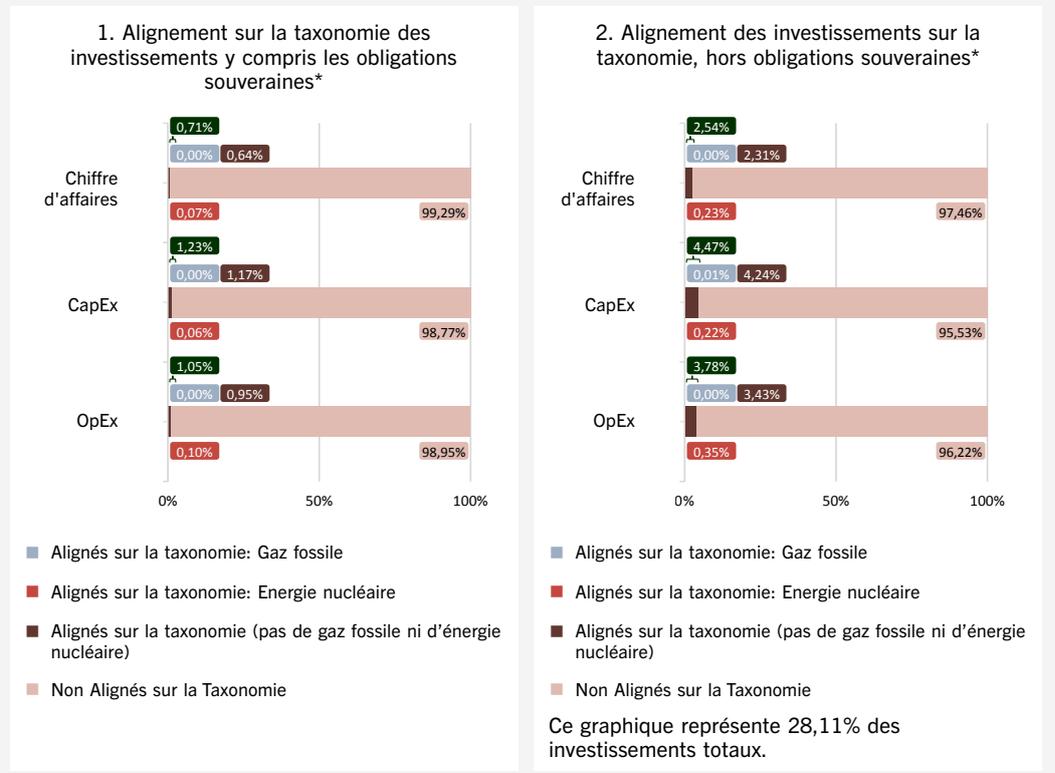

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:
 - du **chiffre d'affaires** pour refléter le «caractère écologique» actuel des sociétés bénéficiaires des investissements;
 - des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition verte par exemple;
 - des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

- Oui:
 Dans le gaz fossile Dans l'énergie nucléaire
 Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

Source: Pictet Asset Management, MSCI.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

La part des investissements réalisés dans:

- Des activités transitoires: 0,10%
- Des activités habilitantes: 0,48%

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Le pourcentage d'investissements alignés sur la Taxonomie de l'UE durant la période de référence précédente était de 0,32%, contre 0,71% pour la période de référence actuelle.

Veillez noter que ce fonds n'avait pas d'engagement ex ante en matière de Taxonomie de l'UE.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

33,76%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social?

1,53%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

Au cours de la période de référence, les caractéristiques environnementales et/ou sociales ont été atteintes en suivant la stratégie d'investissement et en respectant les éléments contraignants.

Les éléments contraignants du fonds comprennent:

- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes nucléaires de pays qui ne sont pas signataires du Traité sur la non-prolifération des armes nucléaires (TNP), et dans la production d'autres armes controversées
 - tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, telles que l'extraction de charbon thermique et la production d'électricité, la production de pétrole et de gaz non conventionnels, les armements militaires et les armes légères, les produits du tabac, les opérations de jeux d'argent et la production de divertissement pour adultes. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur les seuils d'exclusion.
 - violent gravement les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption.
- exclusions de pays soumis à des sanctions internationales
- un profil ESG supérieur à celui de l'univers d'investissement
- analyse des critères ESG des titres éligibles couvrant au moins 90% de l'actif net ou du nombre d'émetteurs présents dans le portefeuille

En outre, le fonds s'est engagé (dialogue collaboratif) avec 8 entreprises au 30 septembre 2024.

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Note: Pictet Asset Management a eu recours à un cadre de référence exclusif pour définir les investissements durables. Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

[2] La notion d'«État soutenant le terrorisme» est utilisée par le Département d'État américain pour désigner les pays qui ont prêté à plusieurs reprises leur soutien à des actes de terrorisme international.

[3] Des exclusions s'appliquent également aux entreprises dont le siège social est situé dans un pays exclu.

[4] Outre les exclusions strictes, Pictet Asset Management tient une liste de surveillance des pays nécessitant une diligence raisonnable supplémentaire de la part des équipes d'investissement avant l'investissement.

- Actionnariat actif:

Le fonds s'est engagé (dialogue collaboratif) avec la direction d'entreprises sélectionnées sur des questions ESG importantes.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● Quelle a été la performance des indicateurs de durabilité?

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

- **Le pourcentage d'exposition du produit financier aux «investissements durables» tel que défini à l'article 2 (17) du SFDR:**

49,20%

- **L'exposition à des obligations labellisées vertes et/ou sociales**

Durant la période de référence, le fonds présentait une exposition de 1,46% aux obligations labellisées.

Les obligations labellisées incluent les obligations environnementales, sociales et de développement durable. La classification des obligations labellisées est fournie par l'émetteur obligataire et peut ne pas refléter notre point de vue interne.

- **Profil ESG général**

Le score ESG moyen pondéré des obligations d'entreprises du fonds a été meilleur que celui de l'indice de référence.

Le score ESG moyen pondéré du fonds a été de 8,27, contre 7,72 pour l'indice de référence. Un score plus élevé désigne un risque plus faible. Les scores vont de 0 à 10, 10 étant le meilleur.

- **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	0,02	0,00
Armement	0,03	0,00
Autres activités controversées	0,00	0,00
Eligible:	43,66	0,00
Couvert:	97,37	100,00

**Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.*

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

(i) PIN 10: Violations des principes du Pacte mondial des Nations unies et des Principes directeurs de l'Organisation de coopération et de développement économiques (OCDE) à l'intention des entreprises multinationales.

(ii) PIN 14: Exposition à des armes controversées (mines antipersonnel, armes à sous-munitions, armes chimiques et armes biologiques).

- **Engagement**

Le fonds s'est engagé (dialogue collaboratif) avec 6 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

● **...et par rapport aux périodes précédentes?**

Non applicable.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

Le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 44,02%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 5,18%.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

(i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.

(ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexacts ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexacts ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

- *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à «ne pas causer de préjudice important» en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs

sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne et des initiatives de collaboration avec les investisseurs institutionnels.

(iii) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'Investissement Responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées ou (iii) des pays soumis à des sanctions internationales; voyez également des informations détaillées sur les exclusions dans la politique d'investissement responsable de Pictet Asset Management.

Quelle était la proportion d'investissements liés à la durabilité?

49,20%

● Quelle était l'allocation des actifs?

Le fonds était aligné à 98,73% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 1,27% dans Autres (#2 Autres). 49,20% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

L'allocation des actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **#1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **#2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie **#1 Alignés sur les caractéristiques E/S** comprend:

- La sous-catégorie **#1A Durables** couvrant les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

Oui:

Dans le gaz fossile Dans l'énergie nucléaire

Non

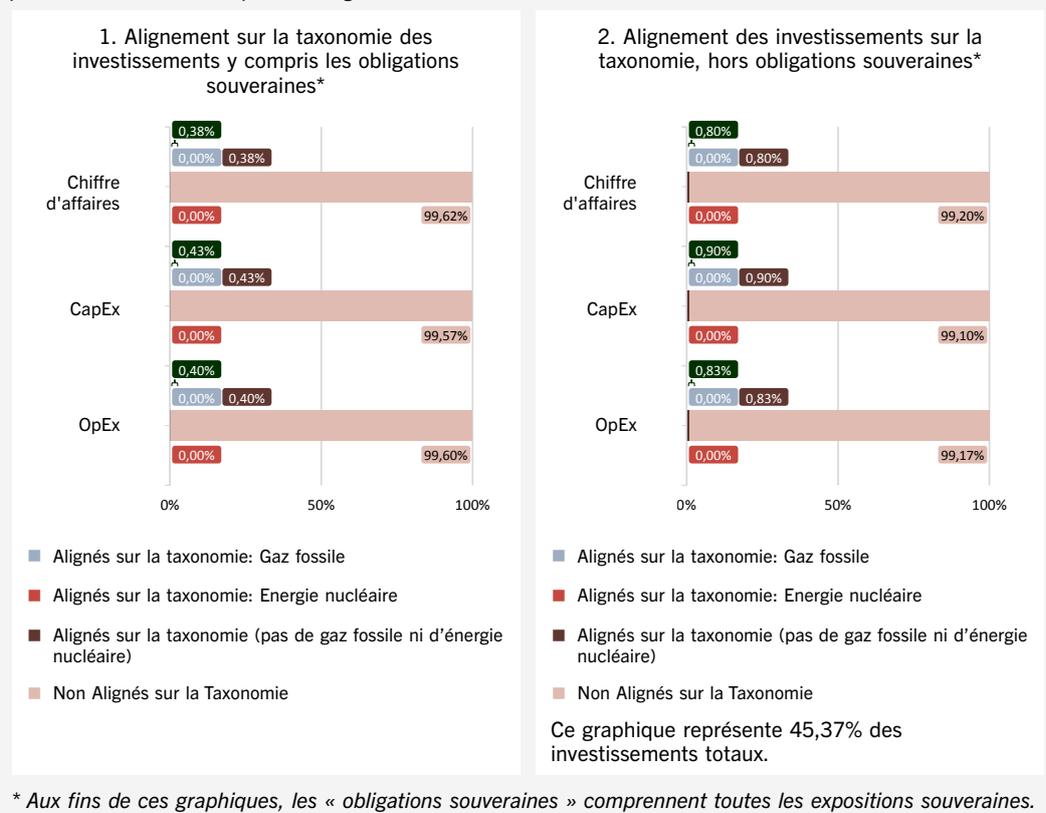

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:

- du **chiffre d'affaires** pour refléter le « caractère écologique » actuel des sociétés bénéficiaires des investissements;
- des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple;
- des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

La part des investissements réalisés dans:

- Des activités transitoires: 0,01%
- Des activités habilitantes: 0,21%

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Non applicable.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

44,02%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Note: Pictet Asset Management a eu recours à un cadre de référence exclusif pour définir les investissements durables. Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

- Actionnariat actif:

Le fonds s'est engagé (dialogue collaboratif) avec la direction d'entreprises sélectionnées sur des questions ESG importantes.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● Quelle a été la performance des indicateurs de durabilité?

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

● Profil ESG général

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'indice de référence.

Le score ESG moyen pondéré du fonds a été de 8,19, contre 8,16 pour l'indice de référence. Un score plus élevé désigne un risque plus faible. Les scores vont de 0 à 10, 10 étant le meilleur.

● Principales incidences négatives (PIN)

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	1,01	1,44
Armement	0,01	0,01
Autres activités controversées	0,00	0,22
Eligible:	91,11	95,88
Couvert:	90,41	95,61

**Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.*

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

(i) PIN 10: Violations des principes du Pacte mondial des Nations unies et des Principes directeurs de l'Organisation de coopération et de développement économiques (OCDE) à l'intention des entreprises multinationales.

(ii) PIN 14: Exposition à des armes controversées (mines antipersonnel, armes à sous-munitions, armes chimiques et armes biologiques).

● Engagement

Le fonds s'est engagé (dialogue collaboratif) avec 12 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

(**) L'exposition aux incidences négatives du produit est refondée sur la partie éligible du fonds. En 2024, les classes ont changé de «Non couvert» à «Couvert» et de «Non applicable» à «Eligible».

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Le fonds ne s'est pas engagé dans une proportion minimale d'investissements durables.

Toutefois, ex-post, le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 13,20%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 10,23%.

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

- (i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.
- (ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

● *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à «ne pas causer de préjudice important» en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iii) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

- La sous-catégorie #1A **Durables** couvrant les investissements durables sur le plan environnemental et social.
- La sous-catégorie #1B **Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques

contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹ ?**

Oui:

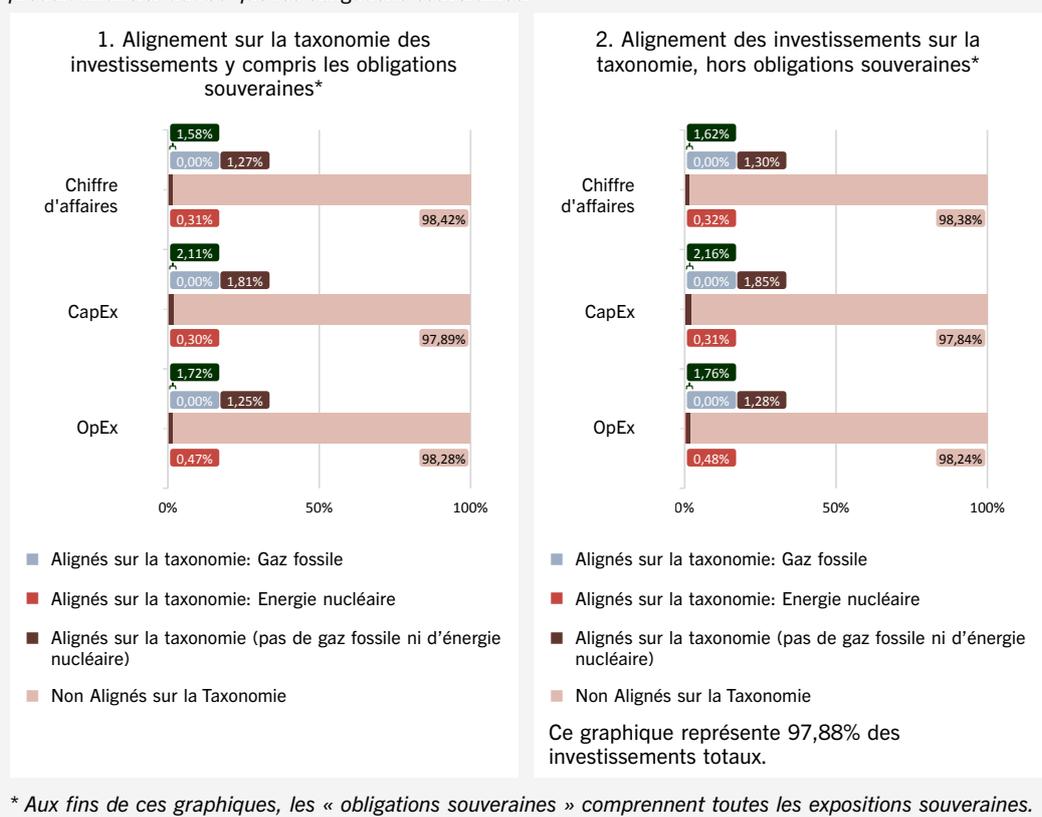

Dans le gaz fossile Dans l'énergie nucléaire

Non

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:
 - du **chiffre d'affaires** pour refléter le «caractère écologique» actuel des sociétés bénéficiaires des investissements;
 - des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple;
 - des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

La part des investissements réalisés dans:

- Des activités habilitantes: 0,44%

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Le pourcentage d'investissements alignés sur la Taxonomie de l'UE durant la période de référence précédente était de 0,23%, contre 1,58% pour la période de référence actuelle.

Veillez noter que ce fonds n'avait pas d'engagement ex ante en matière de Taxonomie de l'UE.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

13,20%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social?

10,23%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

Au cours de la période de référence, les caractéristiques environnementales et/ou sociales ont été atteintes en suivant la stratégie d'investissement et en respectant les éléments contraignants.

Les éléments contraignants du fonds comprennent:

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Les caractéristiques environnementales et sociales de ce fonds incluaient:

- Best-in-class / best effort:

Le Fonds a investi dans des titres d'émetteurs présentant un risque faible ou décroissant en matière de durabilité tout en évitant ceux qui présentent un risque élevé ou croissant en matière de durabilité, en réduisant l'univers d'investissement d'au moins 20%. - Actionnariat actif:

Le fonds s'est engagé (dialogue collaboratif) avec des émetteurs souverains sélectionnés sur des sujets ESG au cours de la période de référence.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● Quelle a été la performance des indicateurs de durabilité?

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

- **Le pourcentage d'exposition du produit financier aux «investissements durables» tel que défini à l'article 2 (17) du SFDR:**

21,51%

- **L'exposition à des obligations labellisées vertes et/ou sociales**

Durant la période de référence, le fonds présentait une exposition de 8,30% aux obligations labellisées.

Les obligations labellisées incluent les obligations environnementales, sociales et de développement durable. La classification des obligations labellisées est fournie par l'émetteur obligataire et peut ne pas refléter notre point de vue interne.

- **Réduction de l'univers d'investissement en fonction des facteurs ESG**

Le fonds a réduit son univers d'investissement en supprimant au moins 20% des émetteurs présentant les risques les plus élevés en matière de durabilité et/ou des principales incidences négatives sur la société ou l'environnement.

Les risques de durabilité sont des risques ou des conditions liés à l'ESG qui pourraient avoir une incidence négative importante sur la valeur des investissements s'ils devaient se concrétiser. Les risques de durabilité incluaient, sans toutefois s'y limiter, le risque lié à la transition climatique, le risque climatique physique, le risque environnemental, le risque social, le risque de gouvernance. Des réexamens et des contrôles de risque périodiques sont instaurés pour un suivi de la mise en œuvre.

Les principales incidences négatives sont des effets négatifs, importants ou susceptibles d'être importants sur les facteurs de durabilité qui sont causés, aggravés par, ou directement liés aux décisions et conseils en matière d'investissement. Ces principales incidences négatives incluaient, entre autres, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption.

- **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Le fonds investit principalement dans des obligations d'État durant la période de référence. En cas d'investissements dans des obligations non souveraines et conformément à la politique d'exclusion de Pictet Asset Management décrite dans la Politique d'Investissement Responsable de

l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

*Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

(i) PIN 10: Violations des principes du Pacte mondial des Nations unies et des Principes directeurs de l'Organisation de coopération et de développement économiques (OCDE) à l'intention des entreprises multinationales.

(ii) PIN 14: Exposition à des armes controversées (mines antipersonnel, armes à sous-munitions, armes chimiques et armes biologiques).

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

Le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 18,59%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 2,92%.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

- (i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.
- (ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

- *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à «ne pas causer de préjudice important» en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs

sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne et des initiatives de collaboration avec les investisseurs institutionnels.

(iii) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'Investissement Responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées ou (iii) des pays soumis à des sanctions internationales; voyez également des informations détaillées sur les exclusions dans la politique d'investissement responsable de Pictet Asset Management.

Quelle était la proportion d'investissements liés à la durabilité?

21,51%

● Quelle était l'allocation des actifs?

Le fonds était aligné à 98,54% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 1,46% dans Autres (#2 Autres). 21,51% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

L'allocation des actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **#1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **#2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie **#1 Alignés sur les caractéristiques E/S** comprend:

- La sous-catégorie **#1A Durables** couvrant les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Non applicable.

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

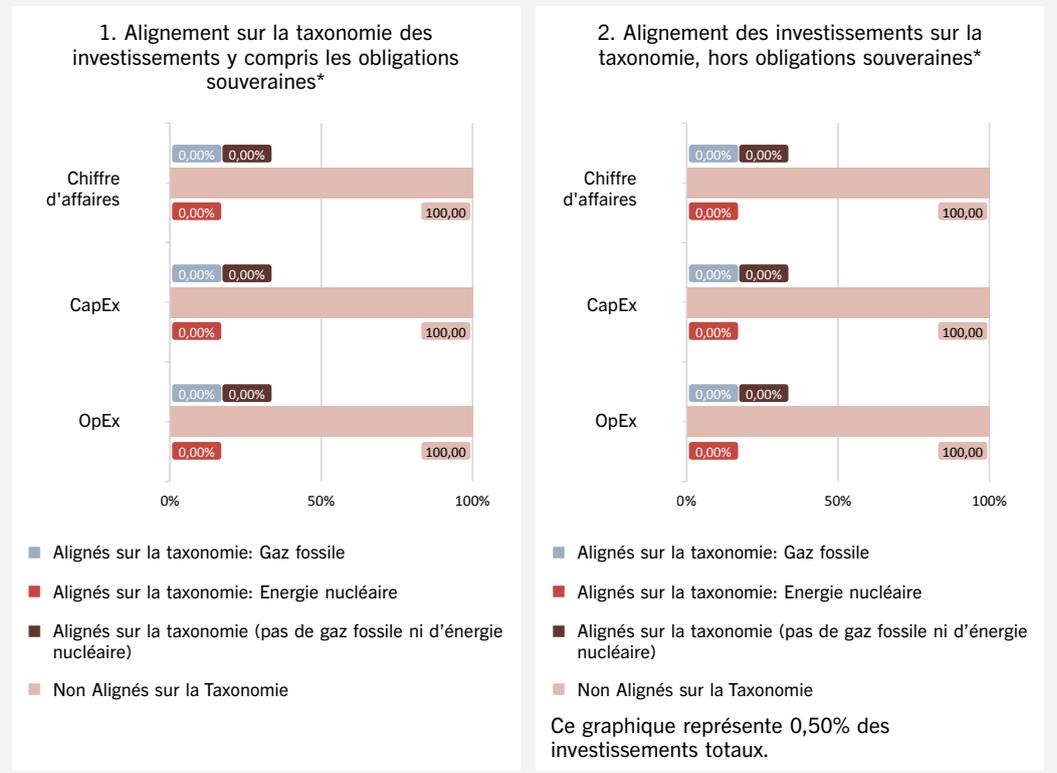

Les activités alignées sur la taxonomie sont exprimées en pourcentage:
 - du **chiffre d'affaires** pour refléter le «caractère écologique» actuel des sociétés bénéficiaires des investissements;
 - des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition verte par exemple;
 - des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

- Oui:
 Dans le gaz fossile Dans l'énergie nucléaire
 Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

Non applicable.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

- **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Non applicable.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

18,59%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social?

2,92%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

Au cours de la période de référence, les caractéristiques environnementales et/ou sociales ont été atteintes en suivant la stratégie d'investissement et en respectant les éléments contraignants.

Les éléments contraignants du fonds comprennent:

- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes nucléaires de pays qui ne sont pas signataires du Traité sur la non-prolifération des armes nucléaires (TNP), et dans la production d'autres armes controversées

- tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, telles que l'extraction de charbon thermique et la production d'électricité, la production de pétrole et de gaz non conventionnels, les armements militaires et les armes légères, les produits du tabac, les opérations de jeux d'argent et la production de divertissement pour adultes. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur les seuils d'exclusion.
- violent gravement les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption.
- exclusions de pays soumis à des sanctions internationales
- analyse des critères ESG des titres éligibles couvrant au moins 90% de l'actif net ou du nombre d'émetteurs présents dans le portefeuille

Le fonds s'est engagé (dialogue collaboratif) avec 3 émetteurs souverains sur des thèmes liés à l'ESG (données au 30 septembre 2024).

Aucun indice de référence n'a été désigné aux fins d'atteindre les caractéristiques environnementales ou sociales promues par le fonds.

- **En quoi l'indice de référence différerait-il d'un indice de marché large?**

Non applicable.

- **Quelle a été la performance de ce produit financier au regard des indicateurs de durabilité visant à déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues?**

Non applicable.

- **Quelle a été la performance de ce produit financier par rapport à l'indice de référence?**

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

- Orientation favorable:

Le fonds a augmenté la pondération des titres présentant de faibles risques en matière de durabilité et/ou a diminué celle des titres présentant des risques élevés en matière de durabilité et en conséquence, il a présenté un profil environnemental, social et de gouvernance (ESG) meilleur que celui de l'indice de référence. L'indice ICE BofA Developed Markets High Yield était utilisé pour mesurer l'approche à tendance positive; toutefois, aucun indice de référence n'a été désigné aux fins d'atteindre les caractéristiques environnementales ou sociales promues par le fonds.

- Exclusions fondées sur les normes et les valeurs:

Le fonds a exclu les émetteurs qui exercent des activités importantes ayant une incidence négative sur la société ou l'environnement, ou qui enfreignent gravement les normes internationales comme détaillé ci-dessous:

Le fonds s'est engagé (dialogue collaboratif) avec la direction d'entreprises sélectionnées sur des questions ESG importantes.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

● **Profil ESG général**

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'indice de référence.

Le score ESG moyen pondéré du fonds a été de 7,99, contre 7,89 pour l'indice de référence. Un score plus élevé désigne un risque plus faible. Les scores vont de 0 à 10, 10 étant le meilleur.

● **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

*Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

(i) PIN 10: Violations des principes du Pacte mondial des Nations unies et des Principes directeurs de l'Organisation de coopération et de développement économiques (OCDE) à l'intention des entreprises multinationales.

● **Engagement**

Le fonds s'est engagé (dialogue collaboratif) avec 6 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

Ces investissements représentaient 29,01%.

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

- (i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.
- (ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

● *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à «ne pas causer de préjudice important» en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iii) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

38,24%

● Quelle était l'allocation des actifs?

Le fonds était aligné à 98,68% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 1,32% dans Autres (#2 Autres). 38,24% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

La catégorie #1 **Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie #2 **Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie #1 **Alignés sur les caractéristiques E/S** comprend:

- La sous-catégorie #1A **Durables** couvrant les investissements durables sur le plan environnemental et social.

- La sous-catégorie #1B **Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

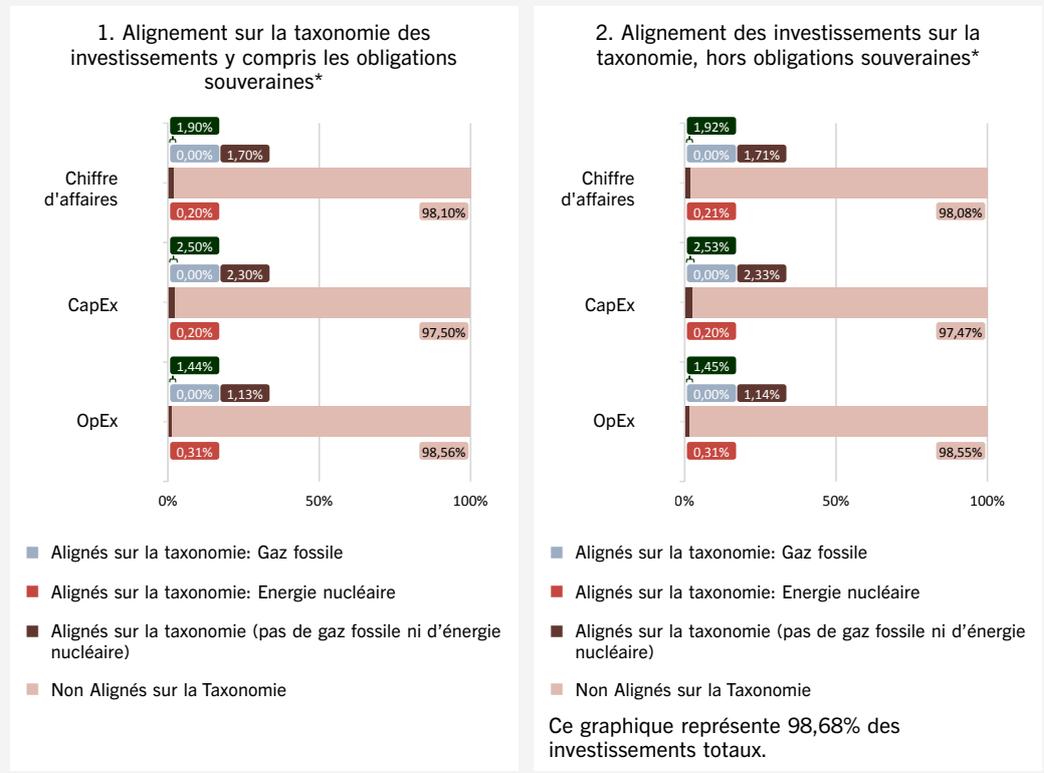

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:
 - du **chiffre d'affaires** pour refléter le «caractère écologique» actuel des sociétés bénéficiaires des investissements;
 - des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition verte par exemple;
 - des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

- Oui:
 Dans le gaz fossile Dans l'énergie nucléaire
 Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

La part des investissements réalisés dans:

- Des activités transitoires: 0,21%
- Des activités habilitantes: 0,55%

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Le pourcentage d'investissements alignés sur la Taxonomie de l'UE durant la période de référence précédente était de 1,42%, contre 1,90% pour la période de référence actuelle.

Veillez noter que ce fonds n'avait pas d'engagement ex ante en matière de Taxonomie de l'UE.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

9,23%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social?

29,01%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

Au cours de la période de référence, les caractéristiques environnementales et/ou sociales ont été atteintes en suivant la stratégie d'investissement et en respectant les éléments contraignants.

Les éléments contraignants du fonds comprennent:

- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes nucléaires de pays qui ne sont pas signataires du Traité sur la non-prolifération des armes nucléaires (TNP), et dans la production d'autres armes controversées
 - tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, telles que l'extraction de charbon thermique et la production d'électricité, la production de pétrole et de gaz non conventionnels, les armements militaires et les armes légères, les produits du tabac, les opérations de jeux d'argent et la production de divertissement pour adultes. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur les seuils d'exclusion.
 - violent gravement les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption.
- un profil ESG supérieur à celui de l'indice de référence
- analyse des critères ESG des titres éligibles couvrant au moins 90% de l'actif net ou du nombre d'émetteurs présents dans le portefeuille

En outre, le fonds s'est engagé (dialogue collaboratif) avec 6 entreprises au 30 septembre 2024.

Quelle a été la performance de ce produit financier par rapport à l'indice de référence durable?

OBJECTIF D'INVESTISSEMENT DURABLE

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

Dans quelle mesure l'objectif d'investissement durable de ce produit financier a-t-il été atteint?

Principaux moyens par lesquels le fonds a atteint son objectif durable:

- Impact positif:

Le fonds a produit un impact environnemental et/ou social positif en investissant principalement dans (i) des entreprises dont les activités concernent en grande partie des produits et services soutenant la transition énergétique, l'économie circulaire, l'efficacité énergétique, la qualité et l'approvisionnement en eau, les soins de santé et l'intégration sociale

(ii) des obligations labellisées ESG, y compris, mais sans s'y limiter, des obligations vertes et/ou des obligations sociales

(iii) des entreprises présentant une faible empreinte environnementale du point de vue notamment, mais pas exclusivement, de leur intensité carbone.

Aucun indice de référence n'a été désigné aux fins de la réalisation de l'objectif d'investissement durable.

Les titres éligibles comprenaient:

(i) des titres émis par des sociétés dont une part significative des activités (telle que mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) provient de ce type d'activités économiques

(ii) le cas échéant, des obligations labellisées vertes et/ou sociales émises par des entreprises ou des pays dont l'utilisation des recettes finance ce type d'activités économiques.

- Exclusions fondées sur les normes et les valeurs:

Le fonds a exclu les émetteurs qui exercent des activités importantes ayant une incidence négative sur la société ou l'environnement, ou qui enfreignent gravement les normes internationales comme détaillé ci-dessous:

- Obligations labellisées:

Le fonds a investi partiellement dans des obligations labellisées environnementales et/ou sociales.

- Intensité carbone:

Le fonds a investi dans des entreprises présentant une faible empreinte carbone du point de vue notamment, mais pas exclusivement, de leur intensité de carbone.

- Actionnariat actif:

Le fonds s'est engagé (dialogue collaboratif) avec la direction d'entreprises sélectionnées sur des questions ESG importantes.

- Investissements durables:

Pictet Asset Management a eu recours à un cadre exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

Le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 42,73%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 53,90%.

- **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

- **Le pourcentage d'exposition du produit financier aux «investissements durables» tel que défini à l'article 2 (17) du SFDR:**

96,63%

Les indicateurs de durabilité permettent de mesurer la manière dont les objectifs de durabilité de ce produit financier sont atteints.

- **L'exposition à des obligations labellisées vertes et/ou sociales**

Durant la période de référence, le fonds présentait une exposition de 39,16% aux obligations labellisées.

Les obligations labellisées incluent les obligations environnementales, sociales et de développement durable. La classification des obligations labellisées est fournie par l'émetteur obligataire et peut ne pas refléter notre point de vue interne.

- **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'investissement responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, comme détaillé ci-dessous:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	0,17	5,38
Armement	0,02	0,88
Autres activités controversées	0,01	1,25
Eligible:	87,00	99,99
Couvert:	99,34	98,27

**Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.*

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

(i) PIN 10: Violations des principes du Pacte mondial des Nations unies et des Principes directeurs de l'Organisation de coopération et de développement économiques (OCDE) à l'intention des entreprises multinationales.

(ii) PIN 14: Exposition à des armes controversées (mines antipersonnel, armes à sous-munitions, armes chimiques et armes biologiques).

- **Engagement**

Le fonds s'est engagé (dialogue collaboratif) avec 20 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

● **Dans quelle mesure les investissements durables n'ont-ils pas causé de préjudice important à un objectif d'investissement durable?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

(i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.

(ii) Les émetteurs associés à des controverses importantes et graves ont été exclus.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● **Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?**

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionariat actif.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de

Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance, et de l'exposition aux investissements durables, dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par l'investissement. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs.

Le cas échéant, nous avons eu un dialogue collaboratif avec les émetteurs afin de s'attaquer à des préoccupations ESG importantes, d'améliorer les pratiques des entreprises en matière de durabilité, ou de s'engager sur des sujets à incidence positive afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iii) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

96,63%

L'allocation des actifs décrit la part des investissements dans des actifs spécifiques.

● Quelle était l'allocation des actifs?

Le fonds a alloué 96,63% de ses actifs à des Investissements durables (#1 Durables) et 3,37% à des Investissements non durables (#2 Non durables). 42,73% de ses actifs sont alloués à des objectifs environnementaux et 53,90% à des objectifs sociaux.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres

d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.

- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹ ?**

Oui:

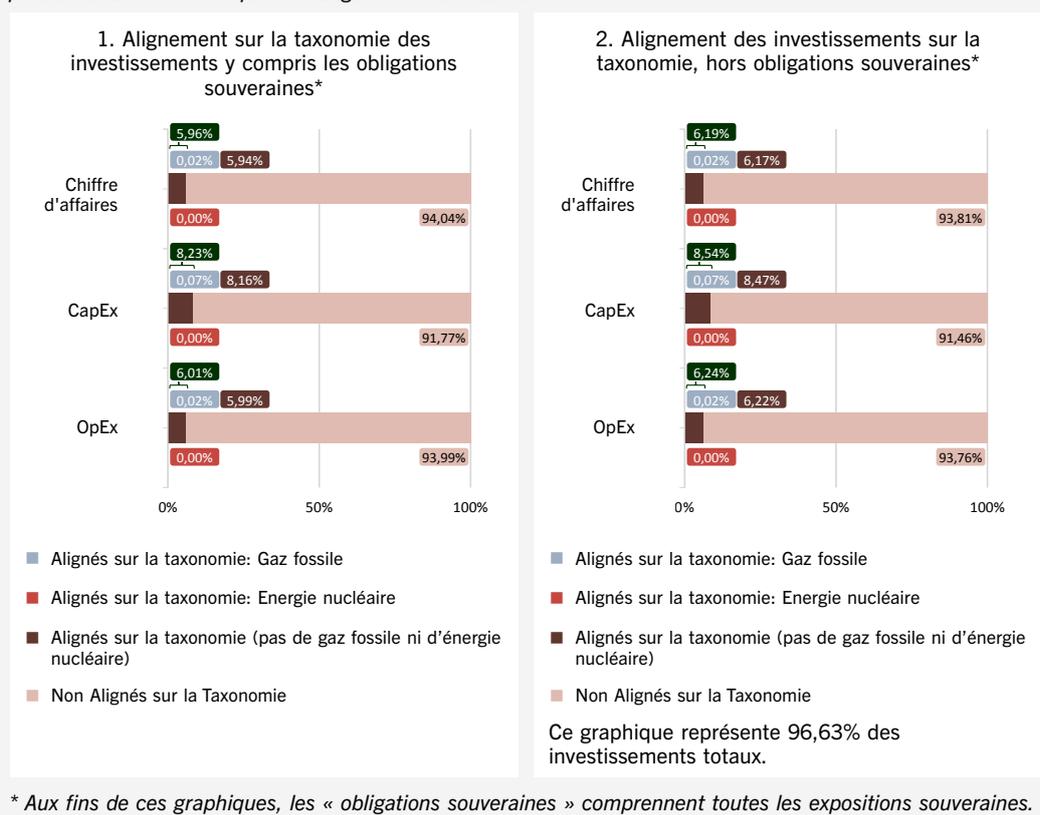

Dans le gaz fossile Dans l'énergie nucléaire

Non

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:
- du **chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires des investissements ;
- des **dépenses d'investissement** (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple.
- des **dépenses d'exploitation** (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

Source: Pictet Asset Management, MSCI.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

La part des investissements réalisés dans:

- Des activités transitoires: 0,05%
- Des activités habilitantes: 2,10%

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Le pourcentage d'investissements alignés sur la Taxonomie de l'UE durant la période de référence précédente était de 4,55%, contre 5,96% pour la période de référence actuelle.

Veillez noter que ce fonds n'avait pas d'engagement ex ante en matière de Taxonomie de l'UE.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

42,73%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères applicables** aux activités économiques durables sur le plan environnemental au titre de la taxonomie de l'UE.

Quelle était la part d'investissements durables sur le plan social?

53,90%

Quels étaient les investissements inclus dans la catégorie «non durables», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les investissements «non durables» du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour atteindre l'objectif d'investissement durable au cours de la période de référence?

Au cours de la période de référence, l'objectif d'investissement durable a été réalisé en suivant la stratégie d'investissement et en respectant les éléments contraignants.

Les éléments contraignants du fonds comprennent:

- des investissements dans des entreprises dont les activités concernent en grande partie, sans s'y limiter, des produits et services soutenant la transition énergétique, l'économie circulaire, l'efficacité énergétique, la qualité et l'approvisionnement en eau, les soins de santé et l'intégration sociale (comme mesuré par le chiffre d'affaires, la valeur de l'entreprise, les bénéfices avant intérêts et impôts, ou similaires)
- exposition minimale de 80% aux investissements durables, y compris, mais sans s'y limiter, les obligations labellisées comme environnementales et/ou sociales
- empreinte carbone inférieure à celle de l'indice de référence
- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes controversées, y compris les mines antipersonnel, les armes à sous-munition, les armes biologiques et chimiques et les armes nucléaires
 - tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, telles que l'extraction de charbon thermique et la production d'électricité, l'exploration et l'extraction de pétrole et de gaz non conventionnels, la production de pétrole et de gaz conventionnels, la production d'énergie nucléaire, les armements militaires, les produits et services liés aux armes, les armes légères, les boissons alcoolisées, la production de tabac, la production de divertissement pour adultes, les opérations de jeux d'argent et les équipements spécialisés, le développement et la croissance d'organismes génétiquement modifiés, la production et la vente au détail de pesticides, et la production et la distribution d'huile de palme. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur les secteurs exclus et sur les seuils d'exclusion
 - violent gravement les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption.
- analyse des critères ESG des titres éligibles couvrant au moins 90% de l'actif net ou du nombre d'émetteurs présents dans le portefeuille

En outre, le fonds s'est engagé (dialogue collaboratif) avec 20 entreprises au 30 septembre 2024.

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Note: Pictet Asset Management a eu recours à un cadre de référence exclusif pour définir les investissements durables. Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été atteintes?

Les caractéristiques environnementales et sociales de ce fonds incluaient:

- Actionnariat actif:

Le fonds s'est engagé (dialogue collaboratif) avec la direction d'entreprises sélectionnées sur des questions ESG importantes.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● Quelle a été la performance des indicateurs de durabilité?

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

● Profil ESG général

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'indice de référence.

Le score ESG moyen pondéré du fonds a été de 7,94, contre 7,90 pour l'indice de référence. Un score plus élevé désigne un risque plus faible. Les scores vont de 0 à 10, 10 étant le meilleur.

● Principales incidences négatives (PIN)

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	0,89	2,19
Armement	0,04	0,19
Autres activités controversées	0,08	2,54
Eligible:	93,97	99,84
Couvert:	73,01	79,01

**Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.*

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

(i) PIN 10: Violations des principes du Pacte mondial des Nations unies et des Principes directeurs de l'Organisation de coopération et de développement économiques (OCDE) à l'intention des entreprises multinationales.

(ii) PIN 14: Exposition à des armes controversées (mines antipersonnel, armes à sous-munitions, armes chimiques et armes biologiques).

● Engagement

Le fonds s'est engagé (dialogue collaboratif) avec 5 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

(*) Pour les seuils d'exclusion appliqués, voir le tableau «Exclusions d'entreprises sur la base des activités controversées et des seuils de chiffre d'affaires» ci-dessus.

(**) L'exposition aux incidences négatives du produit est refondée sur la partie éligible du fonds. En 2024, les classes ont changé de «Non couvert» à «Couvert» et de «Non applicable» à «Eligible».

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Le fonds ne s'est pas engagé dans une proportion minimale d'investissements durables.

Toutefois, ex-post, le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 12,36%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 16,17%.

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

- (i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.
- (ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

● *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à «ne pas causer de préjudice important» en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iii) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

28,53%

L'allocation des actifs décrit la part des investissements dans des actifs spécifiques.

● Quelle était l'allocation des actifs?

Le fonds était aligné à 92,95% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 7,05% dans Autres (#2 Autres). 28,53% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

La catégorie **#1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **#2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie **#1 Alignés sur les caractéristiques E/S** comprend:

- La sous-catégorie **#1A Durables** couvrant les investissements durables sur le plan environnemental et social.

- La sous-catégorie **#1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

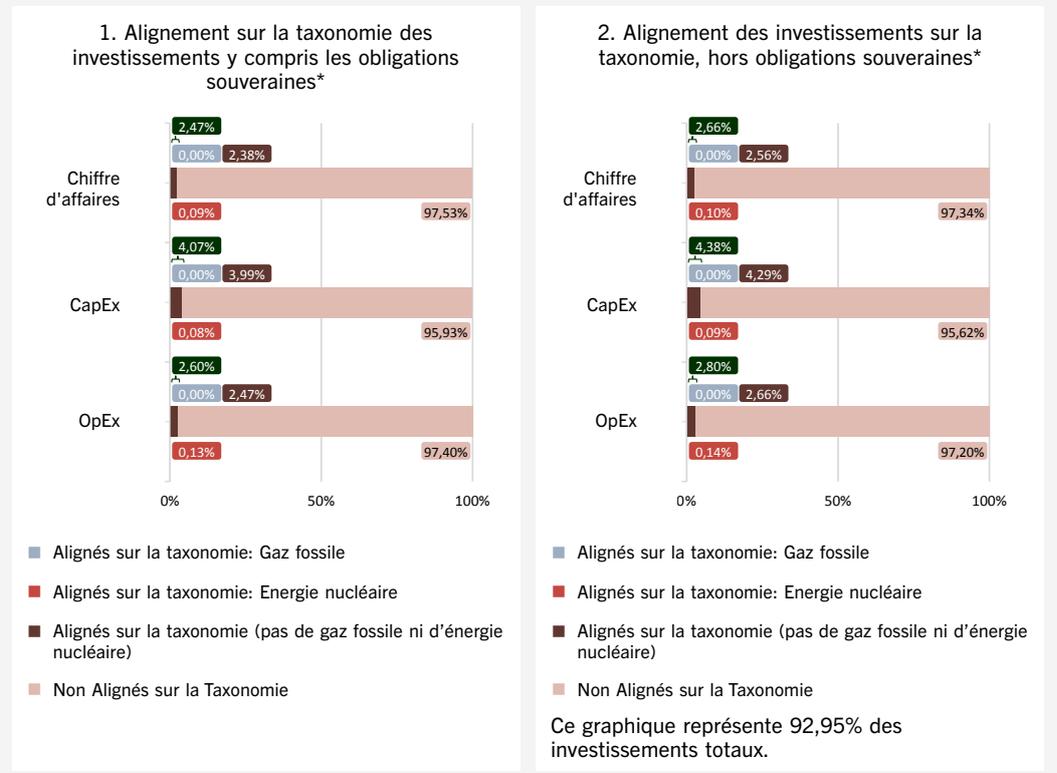

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:
 - du **chiffre d'affaires** pour refléter le «caractère écologique» actuel des sociétés bénéficiaires des investissements;
 - des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition verte par exemple;
 - des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

- Oui:
 Dans le gaz fossile Dans l'énergie nucléaire
 Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

La part des investissements réalisés dans:

- Des activités transitoires: 0,10%
- Des activités habilitantes: 1,12%

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Le pourcentage d'investissements alignés sur la Taxonomie de l'UE durant la période de référence précédente était de 1,45%, contre 2,47% pour la période de référence actuelle.

Veillez noter que ce fonds n'avait pas d'engagement ex ante en matière de Taxonomie de l'UE.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

12,36%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social?

16,17%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

Au cours de la période de référence, les caractéristiques environnementales et/ou sociales ont été atteintes en suivant la stratégie d'investissement et en respectant les éléments contraignants.

Les éléments contraignants du fonds comprennent:

- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes nucléaires de pays qui ne sont pas signataires du Traité sur la non-prolifération des armes nucléaires (TNP), et dans la production d'autres armes controversées
 - tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, telles que l'extraction de charbon thermique et la production d'électricité, la production de pétrole et de gaz non conventionnels, les armements militaires et les armes légères, les produits du tabac, les opérations de jeux d'argent et la production de divertissement pour adultes. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur les seuils d'exclusion.
 - violent gravement les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption.
- un profil ESG supérieur à celui de l'indice de référence
- analyse des critères ESG des titres éligibles couvrant au moins 90% de l'actif net ou du nombre d'émetteurs présents dans le portefeuille

En outre, le fonds s'est engagé (dialogue collaboratif) avec 5 entreprises au 30 septembre 2024.

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Note: Pictet Asset Management a eu recours à un cadre de référence exclusif pour définir les investissements durables. Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été atteintes?

Les caractéristiques environnementales et sociales de ce fonds incluaient:

- Orientation favorable:

Le fonds a augmenté la pondération des titres présentant de faibles risques en matière de durabilité et/ou a diminué celle des titres présentant des risques élevés en matière de durabilité et en conséquence, il a présenté un profil environnemental, social et de gouvernance (ESG) meilleur que celui de l'indice de référence. L'indice Bloomberg Euro-Aggregate Corporate 1-3 Years A-BBB a été utilisé pour mesurer l'approche à tendance positive; toutefois, aucun indice de référence n'a été désigné aux fins d'atteindre les caractéristiques environnementales ou sociales promues par le fonds.

- Exclusions fondées sur les normes et les valeurs:

Le fonds a exclu les émetteurs qui exercent des activités importantes ayant une incidence négative sur la société ou l'environnement, ou qui enfreignent gravement les normes internationales comme détaillé ci-dessous:

[2] La notion d'«État soutenant le terrorisme» est utilisée par le Département d'État américain pour désigner les pays qui ont prêté à plusieurs reprises leur soutien à des actes de terrorisme international.

[3] Des exclusions s'appliquent également aux entreprises dont le siège social est situé dans un pays exclu.

[4] Outre les exclusions strictes, Pictet Asset Management tient une liste de surveillance des pays nécessitant une diligence raisonnable supplémentaire de la part des équipes d'investissement avant l'investissement.

- Actionnariat actif:

Le fonds s'est engagé (dialogue collaboratif) avec la direction d'entreprises sélectionnées sur des questions ESG importantes.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● Quelle a été la performance des indicateurs de durabilité?

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

● Profil ESG général

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'indice de référence.

Le score ESG moyen pondéré du fonds a été de 8,14, contre 8,06 pour l'indice de référence. Un score plus élevé désigne un risque plus faible. Les scores vont de 0 à 10, 10 étant le meilleur.

● Principales incidences négatives (PIN)

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	2,45	2,81
Armement	0,04	0,33
Autres activités controversées	0,03	1,13
Eligible:	91,84	100,00
Couvert:	98,85	99,60

**Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.*

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

(i) PIN 10: Violations des principes du Pacte mondial des Nations unies et des Principes directeurs de l'Organisation de coopération et de développement économiques (OCDE) à l'intention des entreprises multinationales.

(ii) PIN 14: Exposition à des armes controversées (mines antipersonnel, armes à sous-munitions, armes chimiques et armes biologiques).

● Engagement

Le fonds s'est engagé (dialogue collaboratif) avec 18 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

(**) L'exposition aux incidences négatives du produit est refondée sur la partie éligible du fonds. En 2024, les classes ont changé de «Non couvert» à «Couvert» et de «Non applicable» à «Eligible».

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Le fonds ne s'est pas engagé dans une proportion minimale d'investissements durables.

Toutefois, ex-post, le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 18,50%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 18,66%.

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

- (i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.
- (ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

● *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à «ne pas causer de préjudice important» en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iii) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

37,16%

● Quelle était l'allocation des actifs?

Le fonds était aligné à 99,41% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 0,59% dans Autres (#2 Autres). 37,16% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

La catégorie **#1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **#2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie **#1 Alignés sur les caractéristiques E/S** comprend:

- La sous-catégorie **#1A Durables** couvrant les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

Oui:

Dans le gaz fossile Dans l'énergie nucléaire

Non

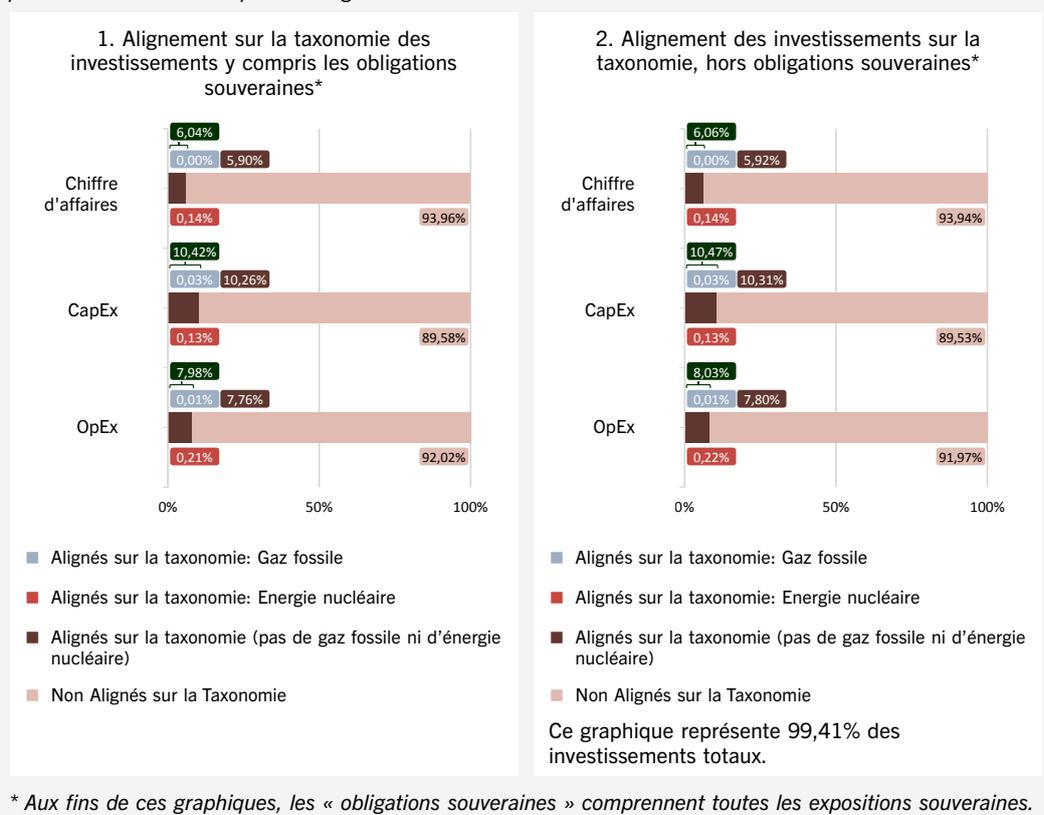

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:

- du **chiffre d'affaires** pour refléter le « caractère écologique » actuel des sociétés bénéficiaires des investissements;
- des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple;
- des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

La part des investissements réalisés dans:

- Des activités transitoires: 0,37%
- Des activités habilitantes: 3,29%

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Le pourcentage d'investissements alignés sur la Taxonomie de l'UE durant la période de référence précédente était de 2,80%, contre 6,04% pour la période de référence actuelle.

Veillez noter que ce fonds n'avait pas d'engagement ex ante en matière de Taxonomie de l'UE.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

18,50%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social?

18,66%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

Au cours de la période de référence, les caractéristiques environnementales et/ou sociales ont été atteintes en suivant la stratégie d'investissement et en respectant les éléments contraignants.

Les éléments contraignants du fonds comprennent:

- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes nucléaires de pays qui ne sont pas signataires du Traité sur la non-prolifération des armes nucléaires (TNP), et dans la production d'autres armes controversées
 - tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, telles que l'extraction de charbon thermique et la production d'électricité, la production de pétrole et de gaz non conventionnels, les armements militaires et les armes légères, les produits du tabac, les opérations de jeux d'argent et la production de divertissement pour adultes. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur les seuils d'exclusion.

En outre, le fonds s'est engagé (dialogue collaboratif) avec 18 entreprises au 30 septembre 2024.

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été atteintes?

Les caractéristiques environnementales et sociales de ce fonds incluaient:

- Orientation favorable:

Le fonds a augmenté la pondération des titres présentant de faibles risques en matière de durabilité et/ou a diminué celle des titres présentant des risques élevés en matière de durabilité et en conséquence, il a présenté un profil environnemental, social et de gouvernance (ESG) meilleur que celui de l'indice de référence. L'indice JP Morgan CEMBI Broad Diversified 1-3 Years a été utilisé pour mesurer l'approche à tendance positive; toutefois, aucun indice de référence n'a été désigné aux fins d'atteindre les caractéristiques environnementales ou sociales promues par le fonds.

- Exclusions fondées sur les normes et les valeurs:

Le fonds a exclu les émetteurs qui exercent des activités importantes ayant une incidence négative sur la société ou l'environnement, ou qui enfreignent gravement les normes internationales comme détaillé ci-dessous:

Exclusions d'entreprises sur la base des activités controversées et des seuils de chiffre d'affaires

[2] La notion d'«État soutenant le terrorisme» est utilisée par le Département d'État américain pour désigner les pays qui ont prêté à plusieurs reprises leur soutien à des actes de terrorisme international.

[3] Des exclusions s'appliquent également aux entreprises dont le siège social est situé dans un pays exclu.

[4] Outre les exclusions strictes, Pictet Asset Management tient une liste de surveillance des pays nécessitant une diligence raisonnable supplémentaire de la part des équipes d'investissement avant l'investissement.

- Actionnariat actif:

Le fonds s'est engagé (dialogue collaboratif) avec la direction d'entreprises sélectionnées sur des questions ESG importantes.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

● **Profil ESG général**

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'indice de référence.

Le score ESG moyen pondéré du fonds a été de 7,39, contre 7,33 pour l'indice de référence. Un score plus élevé désigne un risque plus faible. Les scores vont de 0 à 10, 10 étant le meilleur.

● **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	9,19	11,19
Armement	0,00	0,24
Autres activités controversées	0,05	3,73
Eligible:	95,07	100,00
Couvert:	95,19	99,35

**Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.*

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

(i) PIN 10: Violations des principes du Pacte mondial des Nations unies et des Principes directeurs de l'Organisation de coopération et de développement économiques (OCDE) à l'intention des entreprises multinationales.

(ii) PIN 14: Exposition à des armes controversées (mines antipersonnel, armes à sous-munitions, armes chimiques et armes biologiques).

● **Engagement**

Le fonds s'est engagé (dialogue collaboratif) avec 14 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Le fonds ne s'est pas engagé dans une proportion minimale d'investissements durables.

Toutefois, ex-post, le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 6,84%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 10,86%.

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

- (i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.
- (ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

● *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à «ne pas causer de préjudice important» en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iii) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

17,70%

L'allocation des actifs décrit la part des investissements dans des actifs spécifiques.

● Quelle était l'allocation des actifs?

Le fonds était aligné à 96,20% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 3,80% dans Autres (#2 Autres). 17,70% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

La catégorie **#1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **#2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie **#1 Alignés sur les caractéristiques E/S** comprend:

- La sous-catégorie **#1A Durables** couvrant les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

Oui:

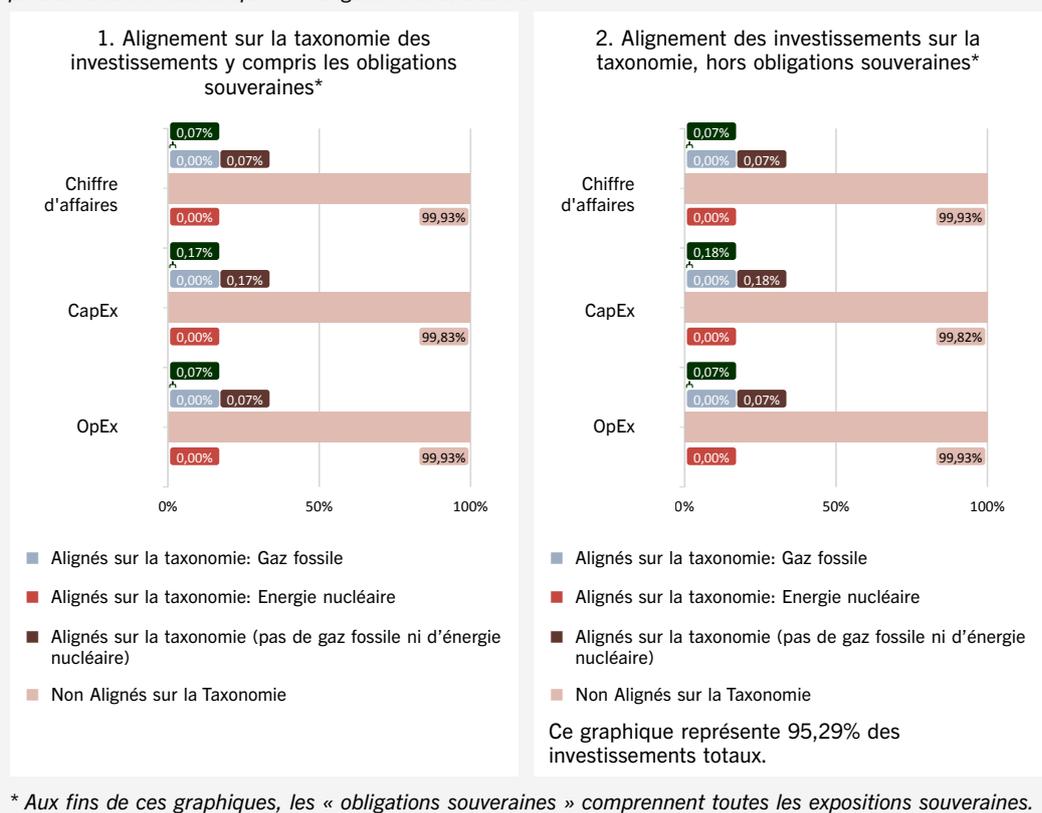

Dans le gaz fossile Dans l'énergie nucléaire

Non

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:
- du **chiffre d'affaires** pour refléter le «caractère écologique» actuel des sociétés bénéficiaires des investissements;
- des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple;
- des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Le pourcentage d'investissements alignés sur la Taxonomie de l'UE durant la période de référence précédente était de 0,00%, contre 0,07% pour la période de référence actuelle.

Veillez noter que ce fonds n'avait pas d'engagement ex ante en matière de Taxonomie de l'UE.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

6,84%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social?

10,86%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Le fonds a exclu les émetteurs qui exercent des activités importantes ayant une incidence négative sur la société ou l'environnement, ou qui enfreignent gravement les normes internationales comme détaillé ci-dessous:

- Actionnariat actif:

Le fonds s'est engagé (dialogue collaboratif) avec la direction d'entreprises sélectionnées sur des questions ESG importantes.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

● **Profil ESG général**

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'indice de référence.

Le score ESG moyen pondéré du fonds a été de 6,62, contre 6,20 pour l'indice de référence. Un score plus élevé désigne un risque plus faible. Les scores vont de 0 à 10, 10 étant le meilleur.

● **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	0,19	0,21
Armement	0,00	0,00
Autres activités controversées	0,00	0,00
Eligible:	78,95	71,44
Couvert:	78,22	77,90

**Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.*

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

(i) PIN 10: Violations des principes du Pacte mondial des Nations unies et des Principes directeurs de l'Organisation de coopération et de développement économiques (OCDE) à l'intention des entreprises multinationales.

(ii) PIN 14: Exposition à des armes controversées (mines antipersonnel, armes à sous-munitions, armes chimiques et armes biologiques).

● **Engagement**

Le fonds s'est engagé (dialogue collaboratif) avec 5 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

● **...et par rapport aux périodes précédentes?**

Non applicable.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Le fonds ne s'est pas engagé dans une proportion minimale d'investissements durables.

Toutefois, ex-post, le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 6,41%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 1,94%.

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

(i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.

(ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● **Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?**

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme

Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à « ne pas causer de préjudice important » en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne et des initiatives de collaboration avec les investisseurs institutionnels.

(iii) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'Investissement Responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de

travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées ou (iii) des pays soumis à des sanctions internationales; voyez également des informations détaillées sur les exclusions dans la politique d'investissement responsable de Pictet Asset Management.

Quelle était la proportion d'investissements liés à la durabilité?

8,35%

● Quelle était l'allocation des actifs?

Le fonds était aligné à 99,26% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 0,74% dans Autres (#2 Autres). 8,35% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

L'allocation des actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **#1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **#2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie **#1 Alignés sur les caractéristiques E/S** comprend:

- La sous-catégorie **#1A Durables** couvrant les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

Oui:

Dans le gaz fossile Dans l'énergie nucléaire

Non

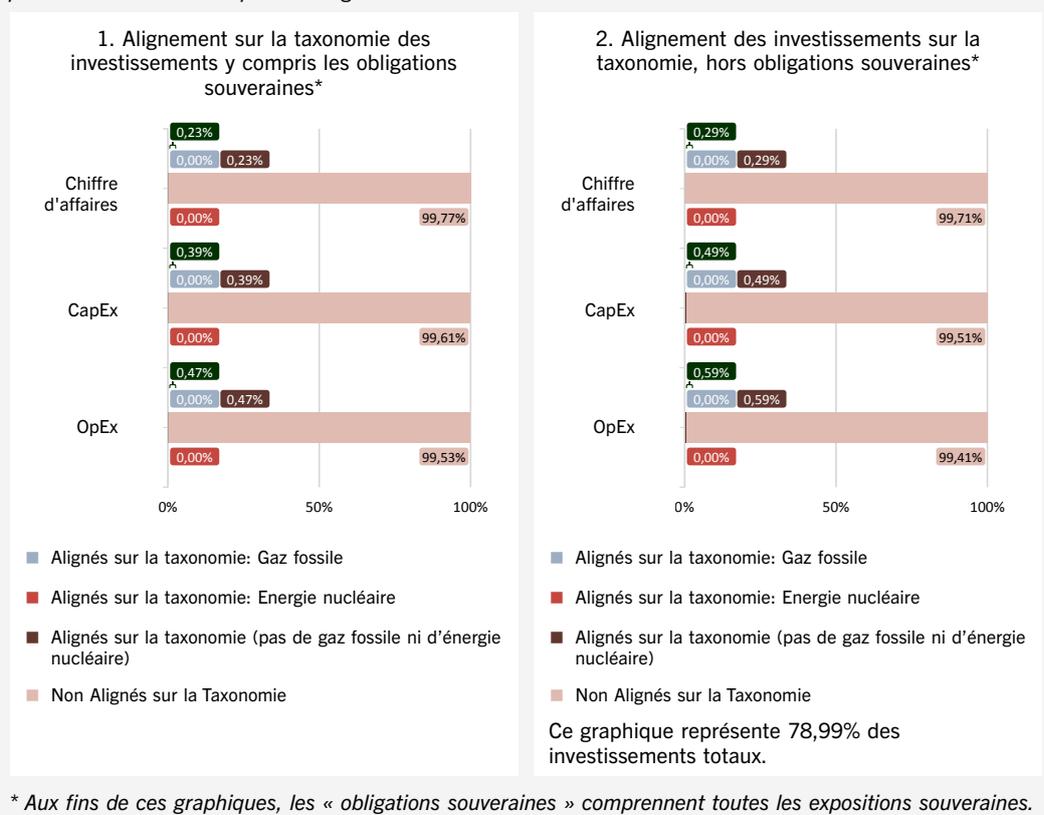

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:

- du **chiffre d'affaires** pour refléter le « caractère écologique » actuel des sociétés bénéficiaires des investissements;
- des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple;
- des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

La part des investissements réalisés dans:

- Des activités transitoires: 0,00%
- Des activités habilitantes: 0,22%

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Non applicable.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

6,41%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

 Le symbole représente des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social?

1,94%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

Au cours de la période de référence, les caractéristiques environnementales et/ou sociales ont été atteintes en suivant la stratégie d'investissement et en respectant les éléments contraignants.

Les éléments contraignants du fonds comprennent:

- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes nucléaires de pays qui ne sont pas signataires du Traité sur la non-prolifération des armes nucléaires (TNP), et dans la production d'autres armes controversées
 - tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, telles que l'extraction de charbon thermique et la production d'électricité, la production de pétrole et de gaz non conventionnels, les armements militaires et les armes légères, les produits du tabac, les opérations de jeux d'argent et la production de divertissement pour adultes. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur les seuils d'exclusion.
 - violent gravement les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption.
- exclusions de pays soumis à des sanctions internationales
- un profil ESG supérieur à celui de l'indice de référence
- analyse des critères ESG des titres éligibles couvrant au moins 90% de l'actif net ou du nombre d'émetteurs présents dans le portefeuille

En outre, le fonds s'est engagé (dialogue collaboratif) avec 5 entreprises au 30 septembre 2024.

Quelle a été la performance de ce produit financier par rapport à l'indice de référence durable?

Aucun indice de référence n'a été désigné aux fins d'atteindre les caractéristiques environnementales ou sociales promues par le fonds.

Les indices de référence sont des indices permettant de mesurer si le produit financier atteint les caractéristiques environnementales ou sociales qu'il promet.

- **En quoi l'indice de référence différerait-il d'un indice de marché large?**
Non applicable.
- **Quelle a été la performance de ce produit financier au regard des indicateurs de durabilité visant à déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues?**

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Note: Pictet Asset Management a eu recours à un cadre de référence exclusif pour définir les investissements durables. Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été atteintes?

Les caractéristiques environnementales et sociales de ce fonds incluaient:

- Orientation favorable:

Le fonds a augmenté la pondération des obligations d'entreprises présentant de faibles risques en matière de durabilité et/ou a diminué celle des obligations d'entreprises présentant des risques élevés en matière de durabilité et en conséquence, les obligations d'entreprises qu'il détient présentent un profil ESG meilleur que celui des obligations d'entreprises de l'univers d'investissement.

Aucun indice de référence n'a été désigné aux fins d'atteindre les caractéristiques environnementales ou sociales promues par le fonds.

- Actionnariat actif:

Le fonds s'est engagé (dialogue collaboratif) avec la direction d'entreprises sélectionnées sur des questions ESG importantes.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

● **Profil ESG général**

Le score ESG moyen pondéré des obligations d'entreprises du fonds a été meilleur que celui des obligations d'entreprises de l'univers d'investissement.

Le score ESG moyen pondéré du fonds a été de 22,03, contre 25,82 pour l'univers d'investissement. Un score plus faible désigne un risque plus faible. Les scores vont de 0 à 100, 0 étant le meilleur.

● **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	1,73	N/A
Armement	0,01	N/A
Autres activités controversées	0,03	N/A

*Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

(i) PIN 10: Violations des principes du Pacte mondial des Nations unies et des Principes directeurs de l'Organisation de coopération et de développement économiques (OCDE) à l'intention des entreprises multinationales.

(ii) PIN 14: Exposition à des armes controversées (mines antipersonnel, armes à sous-munitions, armes chimiques et armes biologiques).

● **Engagement**

Le fonds s'est engagé (dialogue collaboratif) avec 8 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Le fonds ne s'est pas engagé dans une proportion minimale d'investissements durables.

Toutefois, ex-post, le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 25,38%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 2,38%.

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

- (i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.
- (ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

● *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à «ne pas causer de préjudice important» en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a évalué ses participations d'entreprises en fonction d'une analyse des risques environnementaux, sociaux et de gouvernance dans le cadre des investissements du fonds. Les gestionnaires d'investissement, informés par la recherche interne et de tiers, dont les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. L'analyse de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille pour atteindre une approche à tendance positive dans le portefeuille.

(ii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences en collaboration avec d'autres équipes d'investissement et des tiers externes. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs.

Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iii) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'Investissement Responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées ou (iii) des pays soumis à des sanctions internationales; voyez également des informations détaillées sur les exclusions dans la politique d'investissement responsable de Pictet Asset Management.

Quelle était la proportion d'investissements liés à la durabilité?

27,76%

● Quelle était l'allocation des actifs?

Le fonds était aligné à 95,27% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 4,73% dans Autres (#2 Autres). 27,76% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

La catégorie **#1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **#2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie **#1 Alignés sur les caractéristiques E/S** comprend:

- La sous-catégorie **#1A Durables** couvrant les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

Oui:

Dans le gaz fossile Dans l'énergie nucléaire

Non

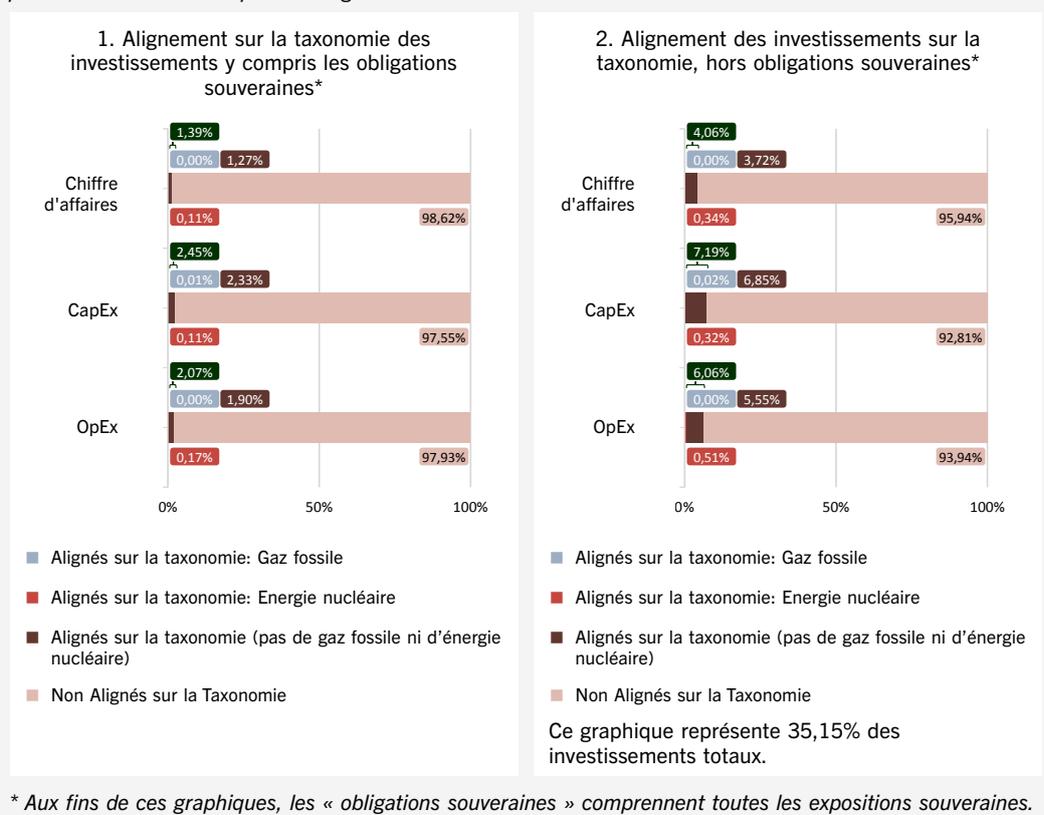

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:

- du **chiffre d'affaires** pour refléter le « caractère écologique » actuel des sociétés bénéficiaires des investissements;
- des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple;
- des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

La part des investissements réalisés dans:

- Des activités transitoires: 0,17%
- Des activités habilitantes: 0,97%

Les activités habilitantes permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les activités transitoires sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Le pourcentage d'investissements alignés sur la Taxonomie de l'UE durant la période de référence précédente était de 0,64%, contre 1,39% pour la période de référence actuelle.

Veillez noter que ce fonds n'avait pas d'engagement ex ante en matière de Taxonomie de l'UE.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

25,38%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social?

2,38%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

Au cours de la période de référence, les caractéristiques environnementales et/ou sociales ont été atteintes en suivant la stratégie d'investissement et en respectant les éléments contraignants.

Les éléments contraignants du fonds comprennent:

- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes nucléaires de pays qui ne sont pas signataires du Traité sur la non-prolifération des armes nucléaires (TNP), et dans la production d'autres armes controversées
 - tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, telles que l'extraction de charbon thermique et la production d'électricité, la production de pétrole et de gaz non conventionnels, les armements militaires et les armes légères, les produits du tabac, les opérations de jeux d'argent et la production de divertissement pour adultes. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur les seuils d'exclusion.

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Note: Pictet Asset Management a eu recours à un cadre de référence exclusif pour définir les investissements durables. Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

- Actionnariat actif:

Le fonds s'est engagé (dialogue collaboratif) avec des émetteurs souverains sélectionnés sur des sujets ESG au cours de la période de référence.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● Quelle a été la performance des indicateurs de durabilité?

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

- **Le pourcentage d'exposition du produit financier aux «investissements durables» tel que défini à l'article 2 (17) du SFDR:**

21,90%

- **L'exposition à des obligations labellisées vertes et/ou sociales**

Durant la période de référence, le fonds présentait une exposition de 13,27% aux obligations labellisées.

Les obligations labellisées incluent les obligations environnementales, sociales et de développement durable. La classification des obligations labellisées est fournie par l'émetteur obligataire et peut ne pas refléter notre point de vue interne.

- **Réduction de l'univers d'investissement en fonction des facteurs ESG**

Le fonds a réduit son univers d'investissement en supprimant au moins 20% des émetteurs présentant les risques les plus élevés en matière de durabilité et/ou des principales incidences négatives sur la société ou l'environnement.

Les risques de durabilité sont des risques ou des conditions liés à l'ESG qui pourraient avoir une incidence négative importante sur la valeur des investissements s'ils devaient se concrétiser. Les risques de durabilité incluaient, sans toutefois s'y limiter, le risque lié à la transition climatique, le risque climatique physique, le risque environnemental, le risque social, le risque de gouvernance. Des réexamens et des contrôles de risque périodiques sont instaurés pour un suivi de la mise en œuvre.

Les principales incidences négatives sont des effets négatifs, importants ou susceptibles d'être importants sur les facteurs de durabilité qui sont causés, aggravés par, ou directement liés aux décisions et conseils en matière d'investissement. Ces principales incidences négatives incluaient, entre autres, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption.

- **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Le fonds investit principalement dans des obligations d'État durant la période de référence. En cas d'investissements dans des obligations non souveraines et conformément à la politique d'exclusion de Pictet Asset Management décrite dans la Politique d'Investissement Responsable de

l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	0,07	2,34

Autres activités controversées	0,00	0,02
Eligible:	8,87	8,16
Couvert:	76,84	99,41

*Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

(i) PIN 10: Violations des principes du Pacte mondial des Nations unies et des Principes directeurs de l'Organisation de coopération et de développement économiques (OCDE) à l'intention des entreprises multinationales.

(ii) PIN 14: Exposition à des armes controversées (mines antipersonnel, armes à sous-munitions, armes chimiques et armes biologiques).

(**) L'exposition aux incidences négatives du produit est refondée sur la partie éligible du fonds. En 2024, les classes ont changé de «Non couvert» à «Couvert» et de «Non applicable» à «Eligible».

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

Le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 18,57%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 3,32%.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

- (i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.
- (ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

- *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à «ne pas causer de préjudice important» en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs

sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne et des initiatives de collaboration avec les investisseurs institutionnels.

(iii) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'Investissement Responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées ou (iii) des pays soumis à des sanctions internationales; voyez également des informations détaillées sur les exclusions dans la politique d'investissement responsable de Pictet Asset Management.

- La sous-catégorie **#1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables. Le fonds a été aligné sur la Taxonomie de l'UE sur la base des dépenses d'investissement (CapEx).

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Le fonds a été aligné sur la Taxonomie de l'UE sur la base des dépenses d'investissement (CapEx).

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

Oui:

Dans le gaz fossile Dans l'énergie nucléaire

Non

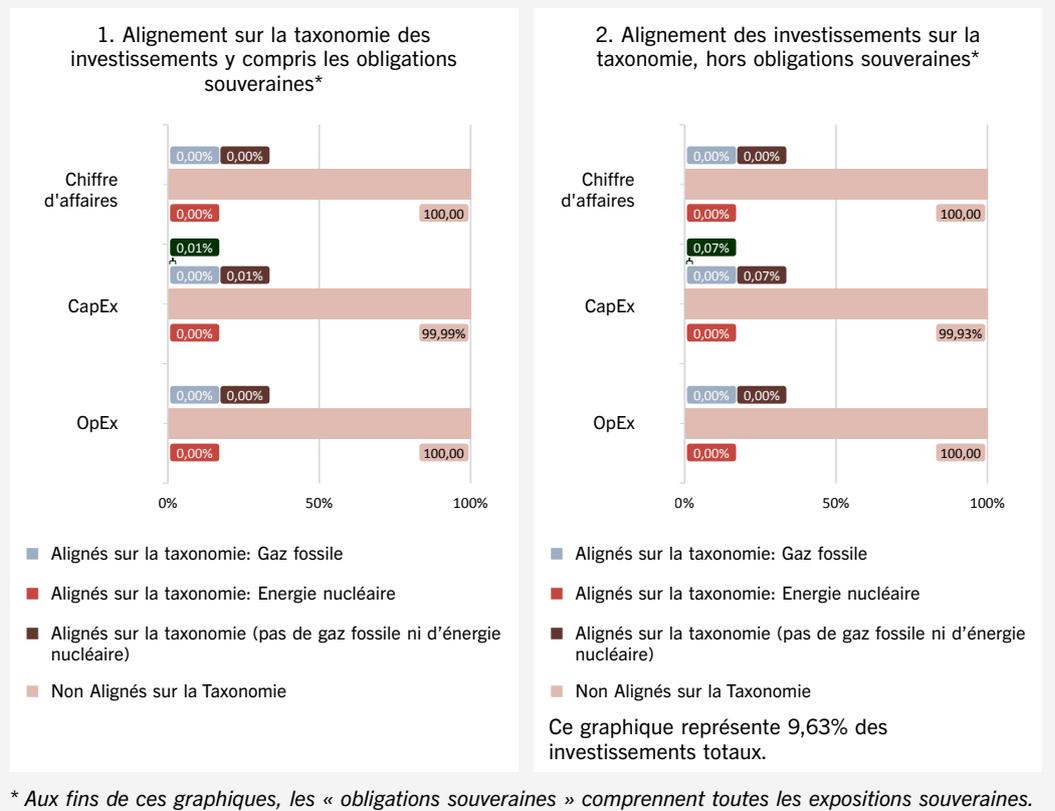

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:

- du **chiffre d'affaires** pour refléter le « caractère écologique » actuel des sociétés bénéficiaires des investissements;
- des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple;
- des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

- **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**
Non applicable.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

- **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**
Non applicable.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

18,57%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social?

3,32%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

Les éléments contraignants du fonds comprennent:

- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes nucléaires de pays qui ne sont pas signataires du Traité sur la non-prolifération des armes nucléaires (TNP), et dans la production d'autres armes controversées

OBJECTIF D'INVESTISSEMENT DURABLE

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Note: Pictet Asset Management a eu recours à un cadre de référence exclusif pour définir les investissements durables. Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

Dans quelle mesure l'objectif d'investissement durable de ce produit financier a-t-il été atteint?

Principaux moyens par lesquels le fonds a atteint son objectif durable:

- Impact positif:

Le fonds a produit un impact environnemental positif en investissant dans des pays à faible exposition aux émissions de carbone afin de soutenir les objectifs à long terme en matière de réchauffement climatique de l'Accord de Paris (adoptés au titre de la Convention-cadre des Nations Unies sur les changements climatiques visant à limiter le réchauffement climatique).

Aucun indice de référence n'a été désigné aux fins de la réalisation de l'objectif d'investissement durable.

Le fonds a investi principalement dans des obligations et autres titres de créance:

- émis ou garantis par des gouvernements ou par des pouvoirs régionaux ou locaux possédant, au moment de l'acquisition, une notation de crédit au moins égale à B- attribuée par Standard & Poor's ou une notation équivalente attribuée par d'autres agences de notation reconnues. À défaut d'une notation officielle, les Gestionnaires ont acquis des valeurs mobilières présentant des critères de qualité identiques;
- de pays qui réduisent leurs émissions de gaz à effet de serre et leur intensité carbone (hors gestion des terres et sylviculture); ou
- de pays qui, de l'avis du gestionnaire, sont en train de mettre en œuvre des politiques susceptibles d'aboutir à une réduction significative des émissions de CO2, par exemple de pays en train d'adopter des législations en matière de politiques relatives au carbone qui ne transparaissent pas encore dans les données

Les investissements susmentionnés incluent des Obligations labellisées ESG.

Les titres éligibles comprenaient:

- de pays qui réduisent leurs émissions de gaz à effet de serre et leur intensité carbone (hors gestion des terres et sylviculture) ou qui sont en train de mettre en œuvre de telles politiques

(ii) le cas échéant, des obligations labellisées vertes et/ou sociales émises par des entreprises ou des pays dont l'utilisation des recettes finance ce type d'activités économiques.

- Inclusion:

Le fonds a investi partiellement dans des obligations labellisées environnementales.

- Exclusions fondées sur les normes et les valeurs:

Le fonds a exclu les émetteurs qui exercent des activités importantes ayant une incidence négative sur la société ou l'environnement, ou qui enfreignent gravement les normes internationales comme détaillé ci-dessous:

Veillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails. Notez que notre cadre d'exclusion a été mis à jour au cours de l'année 2024.

- Actionnariat actif:

Au cours de la période de référence, il n'y a eu aucune activité d'engagement (dialogue collaboratif) avec des émetteurs souverains sur des sujets ESG.

- Investissements durables:

Pictet Asset Management a eu recours à un cadre exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

Le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 96,20%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 0,35%.

Les indicateurs de durabilité permettent de mesurer la manière dont les objectifs de durabilité de ce produit financier sont atteints.

● Quelle a été la performance des indicateurs de durabilité?

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

● L'exposition à des obligations labellisées vertes et/ou sociales

Durant la période de référence, le fonds présentait une exposition de 38,53% aux obligations labellisées.

Les obligations labellisées incluent les obligations environnementales, sociales et de développement durable. La classification des obligations labellisées est fournie par l'émetteur obligataire et peut ne pas refléter notre point de vue interne.

● L'empreinte carbone moyenne au niveau du portefeuille, à la fois en termes d'émissions totales de carbone et d'émissions de carbone par PIB, en intégrant la contribution de la gestion des terres (UTCATF) dans notre mesure des émissions

0,23 KtCo2e/PIB EUR

Telle que mesurée par la réduction des émissions totales de CO2 du pays en kilotonnes au cours des quatre dernières années et par l'amélioration de l'efficacité en matière de CO2, c'est-à-dire les émissions totales de CO2 en kilotonnes par milliard de dollars de PIB au cours des quatre dernières années.

● Principales incidences négatives (PIN)

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Le fonds investit principalement dans des obligations d'État durant la période de référence. En cas d'investissements dans des obligations non souveraines et conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, comme détaillé ci-dessous:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	0,00	0,00
Armement	0,00	0,00
Autres activités controversées	0,00	0,00
Eligible:	1,74	0,00
Couvert:	100,00	100,00

*Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

(i) PIN 10: Violations des principes du Pacte mondial des Nations unies et des Principes directeurs de l'Organisation de coopération et de développement économiques (OCDE) à l'intention des entreprises multinationales.

(ii) PIN 14: Exposition à des armes controversées (mines antipersonnel, armes à sous-munitions, armes chimiques et armes biologiques).

● **Dans quelle mesure les investissements durables n'ont-ils pas causé de préjudice important à un objectif d'investissement durable?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

(i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.

(ii) Les émetteurs associés à des controverses importantes et graves ont été exclus.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● **Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?**

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions

d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds investit principalement dans des obligations d'État durant la période de référence.

En cas d'investissements dans des obligations non souveraines, le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux dans le cadre du système de notation du fonds. Les scores sont déterminés à partir d'un examen quantitatif basé sur des données sur les émissions de carbone et sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives, principalement les émissions de carbone - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'Investissement Responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées ou (iii) des pays soumis à des sanctions internationales; voyez également des informations détaillées sur les exclusions dans la politique d'investissement responsable de Pictet Asset Management.

Quelle était la proportion d'investissements liés à la durabilité?

96,55%

L'allocation des actifs décrit la part des investissements dans des actifs spécifiques.

● Quelle était l'allocation des actifs?

Le fonds a alloué 96,55% de ses actifs à des Investissements durables (#1 Durables) et 3,45% à des Investissements non durables (#2 Non durables). 96,20% de ses actifs sont alloués à des objectifs environnementaux et 0,35% à des objectifs sociaux.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Non applicable.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

Oui:

Dans le gaz fossile Dans l'énergie nucléaire

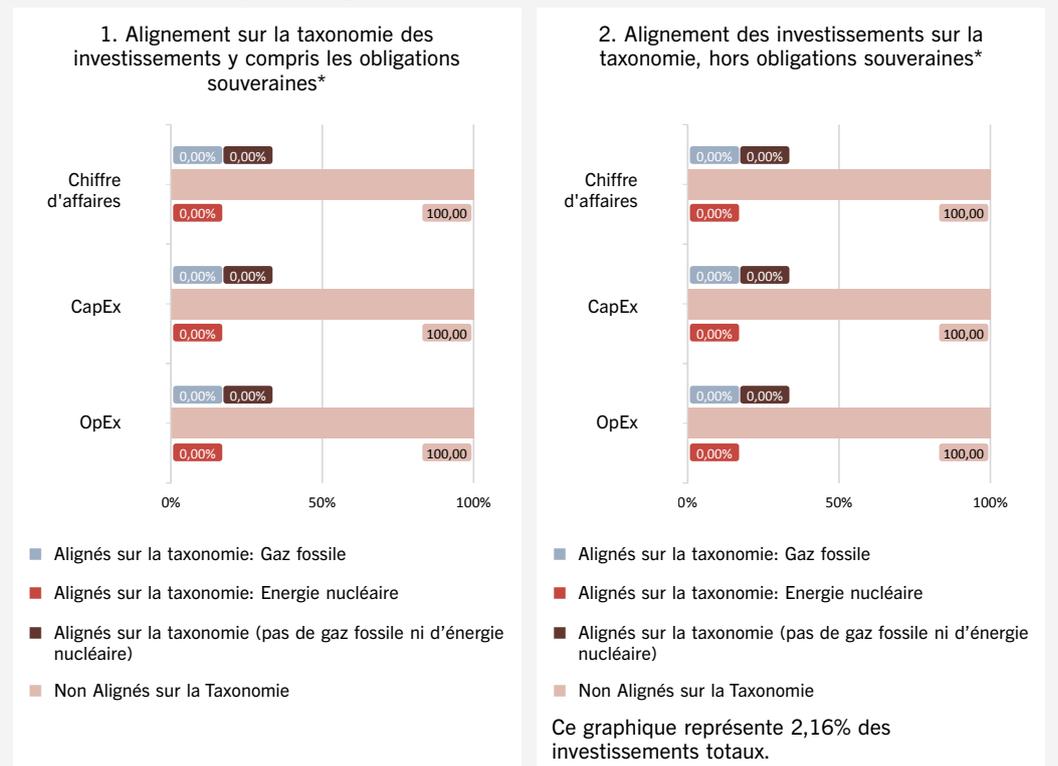

Non

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:

- du **chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires des investissements ;
- des **dépenses d'investissement** (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple.
- des **dépenses d'exploitation** (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

Non applicable.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Le pourcentage d'investissements alignés sur la Taxonomie de l'UE durant la période de référence précédente était de 1,38%, contre 0,00% pour la période de référence actuelle.

Veillez noter que ce fonds n'avait pas d'engagement ex ante en matière de Taxonomie de l'UE.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

96,20%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères applicables** aux activités économiques durables sur le plan environnemental au titre de la taxonomie de l'UE.

Quelle était la part d'investissements durables sur le plan social?

0,35%

Quels étaient les investissements inclus dans la catégorie «non durables», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les investissements «non durables» du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour atteindre l'objectif d'investissement durable au cours de la période de référence?

Les éléments contraignants du fonds comprennent:

- des investissements en obligations et autres créances:
 - de pays qui réduisent leurs émissions de gaz à effet de serre et leur intensité carbone (hors gestion des terres et sylviculture); ou
 - de pays qui, de l'avis du gestionnaire, sont en train de mettre en œuvre des politiques susceptibles d'aboutir à une réduction significative des émissions de CO2, par exemple de pays en train d'adopter des législations en matière de politiques relatives au carbone qui ne transparaissent pas encore dans les données.
- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes controversées, y compris les mines antipersonnel, les armes à sous-munition, les armes biologiques et chimiques et les armes nucléaires
 - tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, telles que l'extraction de charbon thermique et la production d'électricité, l'exploration et l'extraction de pétrole et de gaz non conventionnels, la production de pétrole et de gaz conventionnels, la production d'énergie nucléaire, les armements militaires, les produits et services liés aux armes, les armes légères, les boissons alcoolisées, la production de tabac, la production de divertissement pour adultes, les opérations de jeux d'argent et les équipements spécialisés, le développement et la croissance d'organismes génétiquement modifiés, la production et la vente au détail de pesticides, et la production et la distribution d'huile de palme. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur les secteurs exclus et sur les seuils d'exclusion.
 - violent gravement les normes internationales, y compris les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption
- exclusions de pays soumis à des sanctions internationales
- analyse des critères ESG des titres éligibles couvrant au moins 90% de l'actif net ou du nombre d'émetteurs présents dans le portefeuille

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

(i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.

(ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● **Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?**

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à « ne pas causer de préjudice important » en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) vote par procuration

Le fonds a suivi les directives en matière de vote de Pictet Asset Management qui ont été conçues pour soutenir une culture solide de gouvernance d'entreprise, une gestion efficace des thématiques environnementales et sociales et un reporting complet conforme à des normes crédibles. Ces directives visent également à soutenir les organes de gouvernance mondiaux reconnus qui promeuvent des pratiques commerciales durables en faveur de la gestion de l'environnement, de pratiques de travail équitables, de la non-discrimination et de la protection des droits de l'homme. Toutes les activités de vote du fonds ont été enregistrées et peuvent être communiquées sur demande.

(iii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les

géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iv) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

43,45%

● Quelle était l'allocation des actifs?

Le fonds était aligné à 98,53% sur les caractéristiques E/S (#1 Aligné sur les caractéristiques E/S) et investi à 1,47% dans Autres (#2 Autres). 43,45% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

L'allocation des actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **#1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **#2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie **#1 Alignés sur les caractéristiques E/S** comprend:

- La sous-catégorie **#1A Durables** couvrant les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

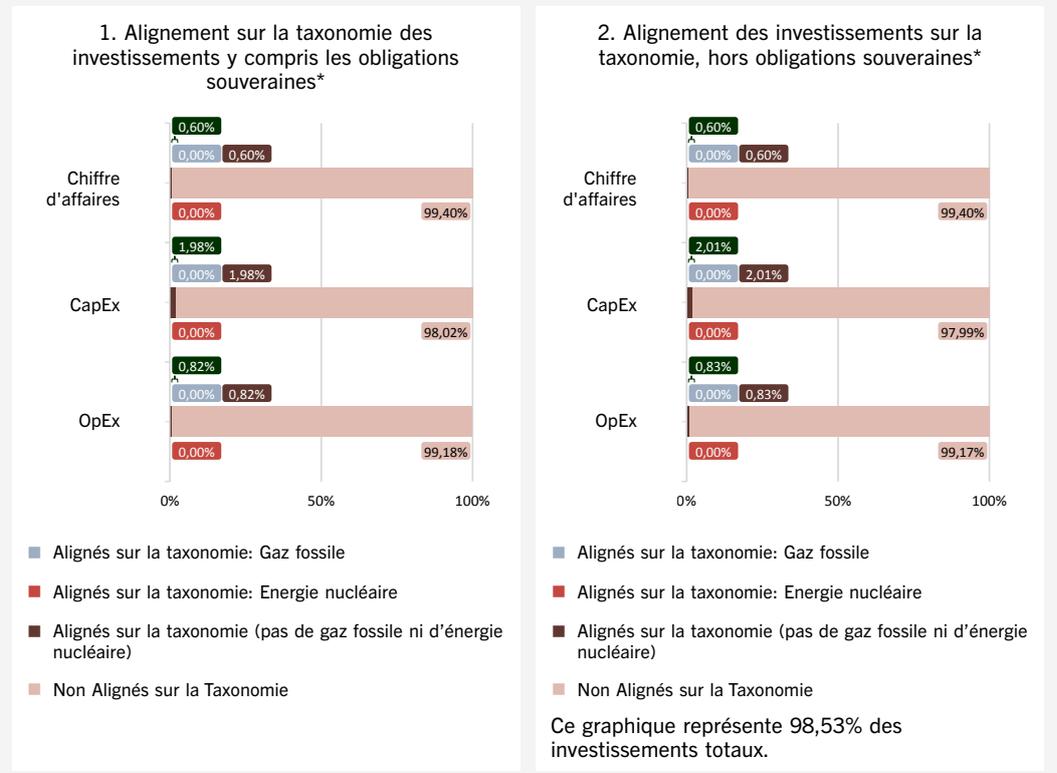

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:
 - du **chiffre d'affaires** pour refléter le «caractère écologique» actuel des sociétés bénéficiaires des investissements;
 - des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition verte par exemple;
 - des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

- Oui:
 Dans le gaz fossile Dans l'énergie nucléaire
 Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

La part des investissements réalisés dans:

- Des activités transitoires: 0,00%
- Des activités habilitantes: 0,59%

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Le pourcentage d'investissements alignés sur la Taxonomie de l'UE durant la période de référence précédente était de 0,44%, contre 0,60% pour la période de référence actuelle.

Veillez noter que ce fonds n'avait pas d'engagement ex ante en matière de Taxonomie de l'UE.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

5,16%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social?

38,29%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

Au cours de la période de référence, les caractéristiques environnementales et/ou sociales ont été atteintes en suivant la stratégie d'investissement et en respectant les éléments contraignants.

Les éléments contraignants du fonds comprennent:

- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes nucléaires de pays qui ne sont pas signataires du Traité sur la non-prolifération des armes nucléaires (TNP), et dans la production d'autres armes controversées
 - tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, telles que l'extraction de charbon thermique et la production d'électricité, la production de pétrole et de gaz non conventionnels, les armements militaires et les armes légères, les produits du tabac, les opérations de jeux d'argent et la production de divertissement pour adultes. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur les seuils d'exclusion.
 - violent gravement les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption.
- un profil ESG supérieur à celui de l'indice de référence
- analyse des critères ESG des titres éligibles couvrant au moins 90% de l'actif net ou du nombre d'émetteurs présents dans le portefeuille

En outre, le fonds s'est engagé (dialogue collaboratif) avec 9 entreprises au 30 septembre 2024.

Quelle a été la performance de ce produit financier par rapport à l'indice de référence durable?

● **En quoi l'indice de référence différerait-il d'un indice de marché large?**

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Note: Pictet Asset Management a eu recours à un cadre de référence exclusif pour définir les investissements durables. Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été atteintes?

Les caractéristiques environnementales et sociales de ce fonds incluaient:

- Orientation favorable:

Le fonds a augmenté la pondération des titres présentant de faibles risques en matière de durabilité et/ou a diminué celle des titres présentant des risques élevés en matière de durabilité et en conséquence, il a présenté un profil environnemental, social et de gouvernance (ESG) meilleur que celui de l'indice de référence. L'indice MSCI EM a été utilisé pour mesurer l'approche à tendance positive; toutefois, aucun indice de référence n'a été désigné aux fins d'atteindre les caractéristiques environnementales ou sociales promues par le fonds.

- Exclusions fondées sur les normes et les valeurs:

Le fonds a exclu les émetteurs qui exercent des activités importantes ayant une incidence négative sur la société ou l'environnement, ou qui enfreignent gravement les normes internationales comme détaillé ci-dessous:

Veillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails. Notez que notre cadre d'exclusion a été mis à jour au cours de l'année 2024.

- Actionnariat actif:

Le fonds a exercé ses droits de vote méthodiquement et s'est engagé (dialogue collaboratif) avec la direction des entreprises sélectionnées sur des questions ESG importantes.

- **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

- **Profil ESG général**

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'indice de référence.

Le score ESG moyen pondéré du fonds a été de 7,86, contre 7,67 pour l'indice de référence. Un score plus élevé désigne un risque plus faible. Les scores vont de 0 à 10, 10 étant le meilleur.

- **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	2,01	0,00
Armement	0,07	0,00
Autres activités controversées	0,04	0,00

**Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

(i) PIN 10: Violations des principes du Pacte mondial des Nations unies et des Principes directeurs de l'Organisation de coopération et de développement économiques (OCDE) à l'intention des entreprises multinationales.

(ii) PIN 14: Exposition à des armes controversées (mines antipersonnel, armes à sous-munitions, armes chimiques et armes biologiques).

● Engagement

Le fonds s'est engagé (dialogue collaboratif) avec 16 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

(*) Pour les seuils d'exclusion appliqués, voir le tableau «Exclusions d'entreprises sur la base des activités controversées et des seuils de chiffre d'affaires» ci-dessus.

(**) L'exposition aux incidences négatives du produit est refondée sur la partie éligible du fonds. En 2024, les classes ont changé de «Non couvert» à «Couvert» et de «Non applicable» à «Eligible».

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Le fonds ne s'est pas engagé dans une proportion minimale d'investissements durables.

Toutefois, ex-post, le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 15,50%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 17,07%.

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

(i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.

(ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● **Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?**

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à « ne pas causer de préjudice important » en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) vote par procuration

Le fonds a suivi les directives en matière de vote de Pictet Asset Management qui ont été conçues pour soutenir une culture solide de gouvernance d'entreprise, une gestion efficace des thématiques environnementales et sociales et un reporting complet conforme à des normes crédibles. Ces directives visent également à soutenir les organes de gouvernance mondiaux reconnus qui promeuvent des pratiques commerciales durables en faveur de la gérance de l'environnement, de pratiques de travail équitables, de la non-discrimination et de la protection des droits de l'homme. Toutes les activités de vote du fonds ont été enregistrées et peuvent être communiquées sur demande.

(iii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les

géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iv) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

32,57%

● Quelle était l'allocation des actifs?

Le fonds était aligné à 96,93% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 3,07% dans Autres (#2 Autres). 32,57% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

L'allocation des actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **#1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **#2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie **#1 Alignés sur les caractéristiques E/S** comprend:

- La sous-catégorie **#1A Durables** couvrant les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables. Le fonds a été aligné sur la Taxonomie de l'UE sur la base des dépenses d'investissement (CapEx).

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Le fonds a été aligné sur la Taxonomie de l'UE sur la base des dépenses d'investissement (CapEx).

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?

Oui:

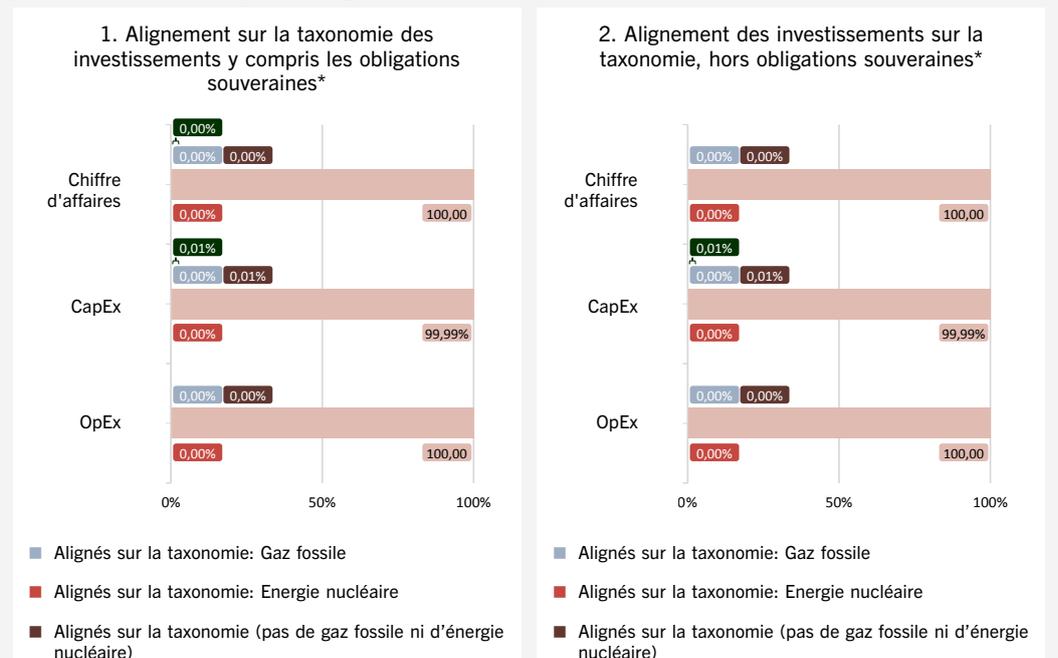

Dans le gaz fossile Dans l'énergie nucléaire

Non

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:
- du **chiffre d'affaires** pour refléter le «caractère écologique» actuel des sociétés bénéficiaires des investissements;
- des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple;
- des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

■ Non Alignés sur la Taxonomie

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

Non applicable.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Non applicable.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

15,50%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social?

17,07%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité

et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

 - tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, telles que l'extraction de charbon thermique et la production d'électricité, la production de pétrole et de gaz non conventionnels, les armements militaires et les armes légères, les produits du tabac, les opérations de jeux d'argent et la production de divertissement pour adultes. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur les seuils d'exclusion.

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Note: Pictet Asset Management a eu recours à un cadre de référence exclusif pour définir les investissements durables. Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

- Actionnariat actif:

Le fonds a exercé ses droits de vote méthodiquement et s'est engagé (dialogue collaboratif) avec la direction des entreprises sélectionnées sur des questions ESG importantes.

- **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

- **Le pourcentage d'exposition du produit financier aux «investissements durables» tel que défini à l'article 2 (17) du SFDR:**

45,69%

- **Réduction de l'univers d'investissement en fonction des facteurs ESG**

Le fonds a réduit son univers d'investissement en supprimant au moins 20% des émetteurs présentant les risques les plus élevés en matière de durabilité et/ou des principales incidences négatives sur la société ou l'environnement.

Les risques de durabilité sont des risques ou des conditions liés à l'ESG qui pourraient avoir une incidence négative importante sur la valeur des investissements s'ils devaient se concrétiser. Les risques de durabilité incluaient, sans toutefois s'y limiter, le risque lié à la transition climatique, le risque climatique physique, le risque environnemental, le risque social, le risque de gouvernance. Des réexamens et des contrôles de risque périodiques sont instaurés pour un suivi de la mise en œuvre.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

Les principales incidences négatives sont des effets négatifs, importants ou susceptibles d'être importants sur les facteurs de durabilité qui sont causés, aggravés par, ou directement liés aux décisions et conseils en matière d'investissement. Ces principales incidences négatives incluaient, entre autres, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption.

- **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	0,00	3,86
Armement	0,04	1,30
Autres activités controversées	0,00	1,46
Eligible:	99,80	100,00
Couvert:	100,00	99,95

**Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.*

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

(i) PIN 10: Violations des principes du Pacte mondial des Nations unies et des Principes directeurs de l'Organisation de coopération et de développement économiques (OCDE) à l'intention des entreprises multinationales.

(ii) PIN 14: Exposition à des armes controversées (mines antipersonnel, armes à sous-munitions, armes chimiques et armes biologiques).

- **Engagement**

Le fonds s'est engagé (dialogue collaboratif) avec 12 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les

interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

(*) Pour les seuils d'exclusion appliqués, voir le tableau «Exclusions d'entreprises sur la base des activités controversées et des seuils de chiffre d'affaires» ci-dessus.

(**) L'exposition aux incidences négatives du produit est refondée sur la partie éligible du fonds. En 2024, les classes ont changé de «Non couvert» à «Couvert» et de «Non applicable» à «Eligible».

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

Le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 4,78%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 40,91%.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

- (i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.
- (ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● **Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?**

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions

environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à « ne pas causer de préjudice important » en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) vote par procuration

Le fonds a suivi les directives en matière de vote de Pictet Asset Management qui ont été conçues pour soutenir une culture solide de gouvernance d'entreprise, une gestion efficace des thématiques environnementales et sociales et un reporting complet conforme à des normes crédibles. Ces directives visent également à soutenir les organes de gouvernance mondiaux reconnus qui promeuvent des pratiques commerciales durables en faveur de la gérance de l'environnement, de pratiques de travail équitables, de la non-discrimination et de la protection des droits de l'homme. Toutes les activités de vote du fonds ont été enregistrées et peuvent être communiquées sur demande.

(iii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iv) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

45,69%

● Quelle était l'allocation des actifs?

Le fonds était aligné à 99,80% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 0,20% dans Autres (#2 Autres). 45,69% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

L'allocation des actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **#1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **#2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie **#1 Alignés sur les caractéristiques E/S** comprend:

- La sous-catégorie **#1A Durables** couvrant les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:

 -des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple;
 - des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Note: Pictet Asset Management a eu recours à un cadre de référence exclusif pour définir les investissements durables. Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été atteintes?

Les caractéristiques environnementales et sociales de ce fonds incluaient:

- Orientation favorable:

Le fonds a augmenté la pondération des titres présentant de faibles risques en matière de durabilité et/ou a diminué celle des titres présentant des risques élevés en matière de durabilité et en conséquence, il a présenté un profil environnemental, social et de gouvernance (ESG) meilleur que celui de l'indice de référence. L'indice MSCI AC World a été utilisé pour mesurer l'approche à tendance positive; toutefois, aucun indice de référence n'a été désigné aux fins d'atteindre les caractéristiques environnementales ou sociales promues par le fonds.

- Exclusions fondées sur les normes et les valeurs:

Le fonds a exclu les émetteurs qui exercent des activités importantes ayant une incidence négative sur la société ou l'environnement, ou qui enfreignent gravement les normes internationales comme détaillé ci-dessous:

- Actionnariat actif:

Le fonds a exercé ses droits de vote méthodiquement et s'est engagé (dialogue collaboratif) avec la direction des entreprises sélectionnées sur des questions ESG importantes.

- **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

- **Le pourcentage d'exposition du produit financier aux «investissements durables» tel que défini à l'article 2 (17) du SFDR:**

44,82%

- **Profil ESG général**

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'indice de référence.

Le score ESG moyen pondéré du fonds a été de -0,31, contre -0,37 pour l'indice de référence. Un score plus élevé désigne un risque plus faible. Les scores vont de -2 à 0, 0 étant le meilleur.

- **Principales incidences négatives (PIN)**

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	0,00	3,53
Armement	0,10	0,97
Autres activités controversées	0,00	0,84
Eligible:	96,52	100,00
Couvert:	100,00	99,65

**Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.*

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

(i) PIN 10: Violations des principes du Pacte mondial des Nations unies et des Principes directeurs de l'Organisation de coopération et de développement économiques (OCDE) à l'intention des entreprises multinationales.

(ii) PIN 14: Exposition à des armes controversées (mines antipersonnel, armes à sous-munitions, armes chimiques et armes biologiques).

• Droits de vote

Durant la période de référence, le fonds a voté à 35 assemblées générales sur 35 assemblées avec vote (100,00%). Nous avons voté «contre» (y compris les «abstentions» ou «refus») une résolution au moins à 60,00% des assemblées.

En ce qui concerne les questions environnementales et/ou sociales, nous avons voté pour 0 résolution de la direction sur 0, et pour 36 résolutions d'actionnaires sur 51.

• Engagement

Le fonds s'est engagé (dialogue collaboratif) avec 9 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

Le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 29,52%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 15,30%.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

(i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.

(ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● **Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?**

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à « ne pas causer de préjudice important » en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques et opportunités sur les plans environnemental, social et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) vote par procuration

Le fonds a suivi les directives en matière de vote de Pictet Asset Management qui ont été conçues pour soutenir une culture solide de gouvernance d'entreprise, une gestion efficace des thématiques environnementales et sociales et un reporting complet conforme à des normes crédibles. Ces directives visent également à soutenir les organes de gouvernance mondiaux reconnus qui promeuvent des pratiques commerciales durables en faveur de la gérance de l'environnement, de pratiques de travail équitables, de la non-discrimination et de la protection des droits de l'homme. Toutes les activités de vote du fonds ont été enregistrées et peuvent être communiquées sur demande.

(iii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs.

Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de

nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iv) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

44,82%

L'allocation des actifs décrit la part des investissements dans des actifs spécifiques.

● Quelle était l'allocation des actifs?

Le fonds était aligné à 96,81% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 3,19% dans Autres (#2 Autres). 44,82% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

La catégorie #1 Alignés sur les caractéristiques E/S inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie #2 **Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie #1 **Alignés sur les caractéristiques E/S** comprend:

- La sous-catégorie #1A **Durables** couvrant les investissements durables sur le plan environnemental et social.
- La sous-catégorie #1B **Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

Oui:

Dans le gaz fossile Dans l'énergie nucléaire

Non

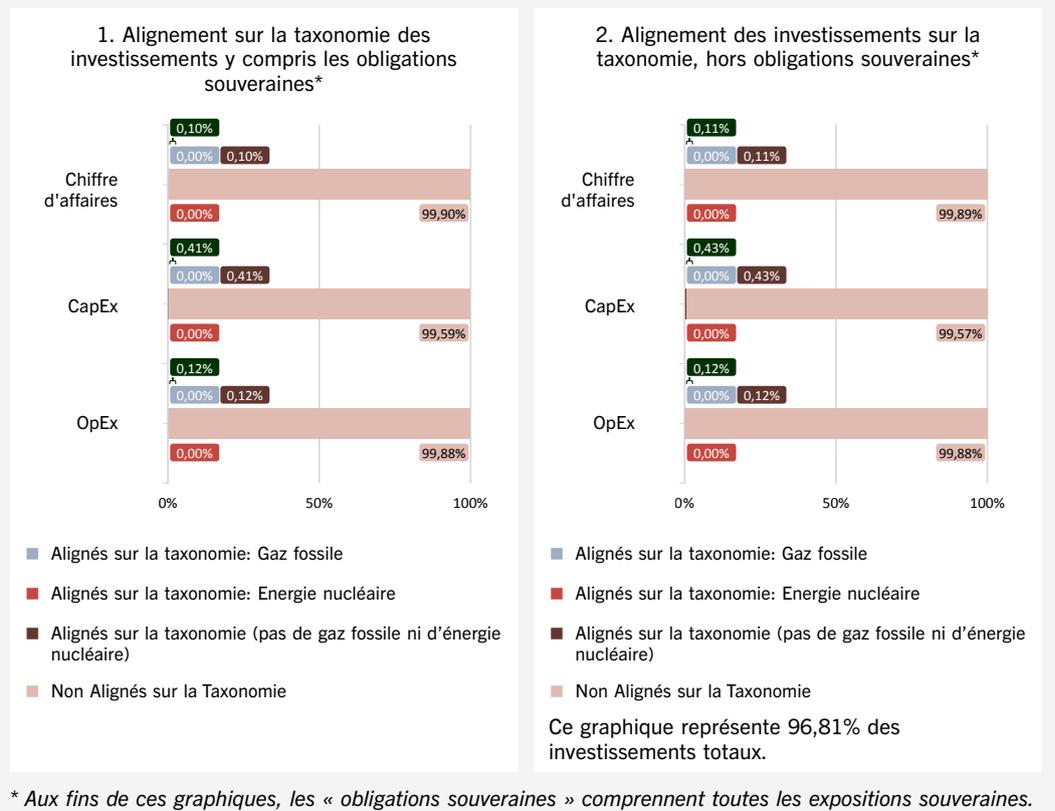

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:

- du **chiffre d'affaires** pour refléter le « caractère écologique » actuel des sociétés bénéficiaires des investissements;
- des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple;
- des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

La part des investissements réalisés dans:

- Des activités transitoires: 0,00%
- Des activités habilitantes: 0,10%

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Le pourcentage d'investissements alignés sur la Taxonomie de l'UE durant la période de référence précédente était de 0,05%, contre 0,10% pour la période de référence actuelle.

Veillez noter que ce fonds n'avait pas d'engagement ex ante en matière de Taxonomie de l'UE.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

29,52%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social?

15,30%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

Au cours de la période de référence, les caractéristiques environnementales et/ou sociales ont été atteintes en suivant la stratégie d'investissement et en respectant les éléments contraignants.

OBJECTIF D'INVESTISSEMENT DURABLE

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Note: Pictet Asset Management a eu recours à un cadre de référence exclusif pour définir les investissements durables. Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

Dans quelle mesure l'objectif d'investissement durable de ce produit financier a-t-il été atteint?

Principaux moyens par lesquels le fonds a atteint son objectif durable:

- Impact positif:

Le fonds a produit un impact social positif en investissant au moins deux tiers du total de son actif/de son patrimoine dans des entreprises qui soutiennent la santé des personnes par une capacité d'innovation élevée. De meilleures thérapies peuvent apporter une véritable valeur aux patients comme aux systèmes de santé. Ces entreprises répondent à d'importants besoins médicaux non satisfaits et réduisent les pressions sur les budgets de santé en réduisant le nombre des admissions à l'hôpital ou en facilitant la gestion des symptômes.

Aucun indice de référence n'a été désigné aux fins de la réalisation de l'objectif d'investissement durable.

Le fonds a investi principalement dans des entreprises dont les activités concernent en grande partie les nouveaux mécanismes d'action permettant de guérir ou de gérer des maladies précédemment difficiles à traiter, des plateformes technologiques, des outils de recherche et des services dans la chaîne de valeur des biotechnologies ainsi que l'amélioration des thérapies ou médicaments, ainsi que d'autres activités économiques pertinentes.

Les titres éligibles comprenaient les actions émises par des sociétés dont une part significative des activités (telle que mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) provient de ce type d'activités économiques.

- Exclusions fondées sur les normes et les valeurs:

Le fonds a exclu les émetteurs qui exercent des activités importantes ayant une incidence négative sur la société ou l'environnement, ou qui enfreignent gravement les normes internationales comme détaillé ci-dessous:

Graves controverses au sujet du Pacte mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales. Exclus[2]

[1] En ce qui concerne les armes nucléaires, cette exclusion s'applique aux entreprises ayant leur siège social dans un pays n'ayant pas signé le Traité sur la non-prolifération des armes nucléaires (TNP) de 1968.

[2] S'applique uniquement aux Investissements durables.

Veillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails. Notez que notre cadre d'exclusion a été mis à jour au cours de l'année 2024.

En plus des exclusions susmentionnées basées sur la politique d'Investissement Responsable de Pictet Asset Management, la stratégie a appliqué des limites d'exclusion plus strictes fondées sur des directives internes.

- **Actionnariat actif:**

Le fonds a exercé méthodiquement ses droits de vote. Le fonds s'est également engagé (dialogue collaboratif) avec la direction d'entreprises sélectionnées sur des questions ESG importantes.

- **Investissements durables:**

Pictet Asset Management a eu recours à un cadre exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

Le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs sociaux tels que:

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 98,67%.

- **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

- **Le pourcentage d'exposition du produit financier aux «investissements durables» tel que défini à l'article 2 (17) du SFDR:**

98,67%

- **Profil ESG général**

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'indice de référence.

Le score ESG moyen pondéré du fonds a été de 0,79, contre 0,02 pour l'indice de référence. Un score plus élevé désigne un risque plus faible. Les scores vont de -2 à 1, 1 étant le meilleur.

- **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Les indicateurs de durabilité permettent de mesurer la manière dont les objectifs de durabilité de ce produit financier sont atteints.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'investissement responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, comme détaillé ci-dessous:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	0,00	3,53
Armement	0,00	0,97
Autres activités controversées	0,00	0,84
Eligible:	98,67	100,00
Couvert:	98,87	99,65

*Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

• Engagement

Le fonds s'est engagé (dialogue collaboratif) avec 17 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

● **Dans quelle mesure les investissements durables n'ont-ils pas causé de préjudice important à un objectif d'investissement durable?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

(i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.

(ii) Les émetteurs associés à des controverses importantes et graves ont été exclus.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

● *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques et opportunités sur les plans environnemental, social et de gouvernance, et de l'exposition aux investissements durables, dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) vote par procuration

Le fonds a suivi les directives en matière de vote de Pictet Asset Management qui ont été conçues pour soutenir une culture solide de gouvernance d'entreprise, une gestion efficace des thématiques environnementales et sociales et un reporting complet conforme à des normes crédibles. Ces directives visent également à soutenir les organes de gouvernance mondiaux reconnus qui promeuvent des pratiques commerciales durables en faveur de la gérance de l'environnement, de pratiques de travail équitables, de la non-discrimination et de la protection des droits de l'homme. Toutes les activités de vote du fonds ont été enregistrées et peuvent être communiquées sur demande.

(iii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous avons eu un dialogue collaboratif avec les émetteurs afin de s'attaquer à des préoccupations ESG importantes, d'améliorer les pratiques des entreprises en matière de durabilité, ou de s'engager sur des sujets à incidence positive afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iv) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

98,67%

● Quelle était l'allocation des actifs?

Le fonds a alloué 98,67% de ses actifs à des Investissements durables (#1 Durables) et 1,33% à des Investissements non durables (#2 Non durables). 0,00% de ses actifs sont alloués à des objectifs environnementaux et 98,67% à des objectifs sociaux.

N°1 Durable couvre les investissements durables aux objectifs environnementaux ou sociaux.

N°2 Non durable inclut les investissements qui ne répondent pas à la définition des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.

● Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Non applicable.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?

Oui:

Dans le gaz fossile Dans l'énergie nucléaire

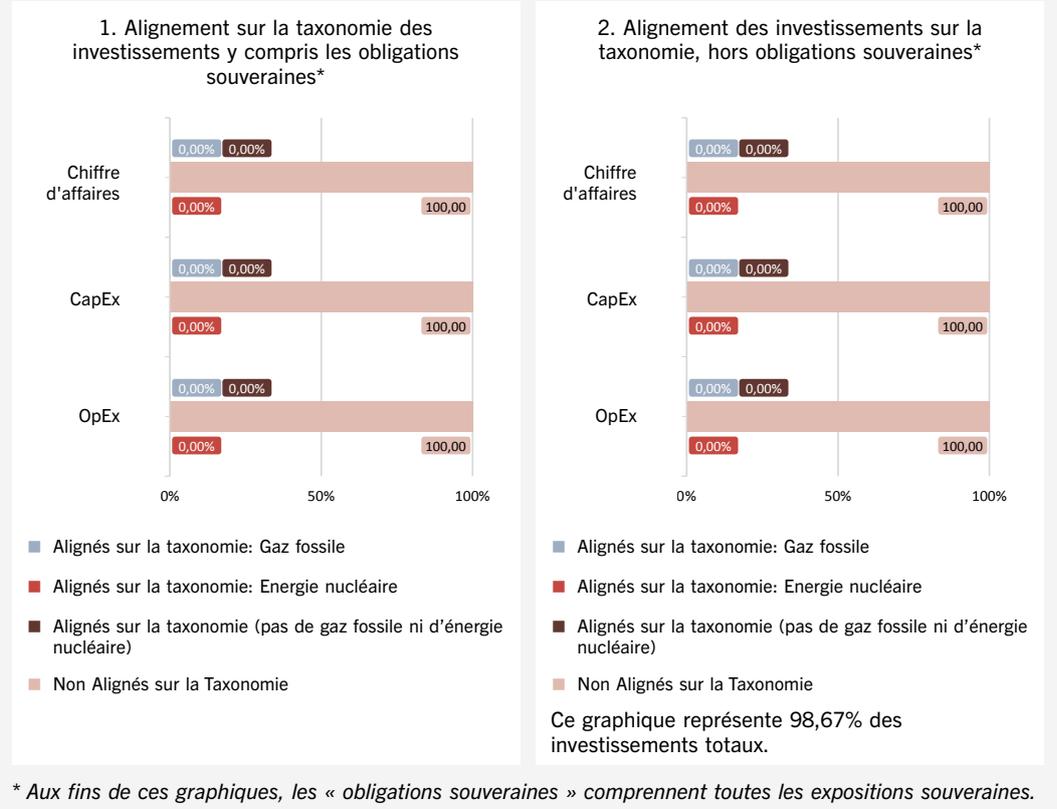

Non

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:
 - du **chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires des investissements ;
 - des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple.
 - des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

Non applicable.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Non applicable.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés

sur la taxonomie de l'UE?

0,00%

Le symbole représente des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères applicables aux activités économiques durables sur le plan environnemental au titre de la taxonomie de l'UE.

Quelle était la part d'investissements durables sur le plan social?

98,67%

Quels étaient les investissements inclus dans la catégorie «non durables», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les investissements «non durables» du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour atteindre l'objectif d'investissement durable au cours de la période de référence?

Au cours de la période de référence, l'objectif d'investissement durable a été réalisé en suivant la stratégie d'investissement et en respectant les éléments contraignants.

Les éléments contraignants du fonds comprennent:

- au moins 80% d'investissements durables, c'est-à-dire d'investissements dans des entreprises exposées de manière significative à des activités telles que de nouveaux mécanismes d'action offrant des remèdes potentiels ou la gestion de maladies qui étaient difficiles à traiter auparavant, des plateformes technologiques, des outils de recherche et des services dans la chaîne de valeur de la biotechnologie ainsi que l'amélioration des traitements ou des médicaments et d'autres activités économiques pertinentes (comme mesuré par le revenu, la valeur de l'entreprise, les bénéfices avant intérêts et impôts, ou similaires)
- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes controversées, y compris les mines antipersonnel, les armes à sous-munition, les armes biologiques et chimiques, les armes nucléaires et l'uranium appauvri
 - tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, telles que l'extraction de charbon thermique et la production d'électricité, l'exploration et l'extraction de pétrole et de gaz non conventionnels, la production de pétrole et de gaz conventionnels, la production d'énergie nucléaire, les armements militaires, les produits et services liés aux armes, les armes légères, les boissons alcoolisées, la production de tabac, la production de divertissement pour adultes, les opérations de jeux d'argent et les équipements spécialisés, le développement et la croissance d'organismes génétiquement modifiés, la production et la vente au détail de pesticides, et la production et la distribution d'huile de palme. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur les secteurs exclus et sur les seuils d'exclusion
 - violent gravement les normes internationales, y compris les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption
- un profil ESG supérieur à celui de l'indice de référence

- analyse des critères ESG des titres éligibles couvrant au moins 90% de l'actif net ou du nombre d'émetteurs présents dans le portefeuille

En outre, le fonds s'est engagé (dialogue collaboratif) avec 17 entreprises au 30 septembre 2024.

Quelle a été la performance de ce produit financier par rapport à l'indice de référence durable?

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

<input type="checkbox"/> Il a réalisé des investissements durables ayant un objectif social: ___%	<input type="checkbox"/> Il promouvait des caractéristiques E/S, mais n'a pas réalisé d'investissements durables

Note: Pictet Asset Management a eu recours à un cadre de référence exclusif pour définir les investissements durables. Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été atteintes?

Les caractéristiques environnementales et sociales de ce fonds incluaient:

- Orientation favorable:

Le fonds a augmenté la pondération des titres présentant de faibles risques en matière de durabilité et/ou a diminué celle des titres présentant des risques élevés en matière de durabilité et en conséquence, il a présenté un profil environnemental, social et de gouvernance (ESG) meilleur que celui de l'indice de référence. L'indice MSCI AC World a été utilisé pour mesurer l'approche à tendance positive; toutefois, aucun indice de référence n'a été désigné aux fins d'atteindre les caractéristiques environnementales ou sociales promues par le fonds.

- Exclusions fondées sur les normes et les valeurs:

Le fonds a exclu les émetteurs qui exercent des activités importantes ayant une incidence négative sur la société ou l'environnement, ou qui enfreignent gravement les normes internationales comme détaillé ci-dessous:

- Actionnariat actif:

Le fonds a exercé ses droits de vote méthodiquement et s'est engagé (dialogue collaboratif) avec la direction des entreprises sélectionnées sur des questions ESG importantes.

- **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

- **Le pourcentage d'exposition du produit financier aux «investissements durables» tel que défini à l'article 2 (17) du SFDR:**

25,28%

- **Profil ESG général**

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'indice de référence.

Le score ESG moyen pondéré du fonds a été de -0,32, contre -0,37 pour l'indice de référence. Un score plus élevé désigne un risque plus faible. Les scores vont de -2 à 0, 0 étant le meilleur.

- **Principales incidences négatives (PIN)**

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	0,00	3,53
Armement	0,04	0,97
Autres activités controversées	0,15	0,84
Eligible:	98,15	100,00
Couvert:	99,19	99,65

**Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.*

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

• Engagement

Le fonds s'est engagé (dialogue collaboratif) avec 12 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

Le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 1,81%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 23,46%.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

(i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.

(ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● **Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?**

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionariat actif.

Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à « ne pas causer de préjudice important » en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques et opportunités sur les plans environnemental, social et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) vote par procuration

Le fonds a suivi les directives en matière de vote de Pictet Asset Management qui ont été conçues pour soutenir une culture solide de gouvernance d'entreprise, une gestion efficace des thématiques environnementales et sociales et un reporting complet conforme à des normes crédibles. Ces directives visent également à soutenir les organes de gouvernance mondiaux reconnus qui promeuvent des pratiques commerciales durables en faveur de la gérance de l'environnement, de pratiques de travail équitables, de la non-discrimination et de la protection des droits de l'homme. Toutes les activités de vote du fonds ont été enregistrées et peuvent être communiquées sur demande.

(iii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs.

Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de

nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iv) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

25,28%

● Quelle était l'allocation des actifs?

Le fonds était aligné à 98,19% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 1,81% dans Autres (#2 Autres). 25,28% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

L'allocation des actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **#1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **#2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie **#1 Alignés sur les caractéristiques E/S** comprend:

- La sous-catégorie **#1A Durables** couvrant les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables. Le fonds a été aligné sur la Taxonomie de l'UE sur la base des CapEx et OpEx.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Le fonds a été aligné sur la Taxonomie de l'UE sur la base des CapEx et OpEx.

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?

Oui:

Dans le gaz fossile Dans l'énergie nucléaire

Non

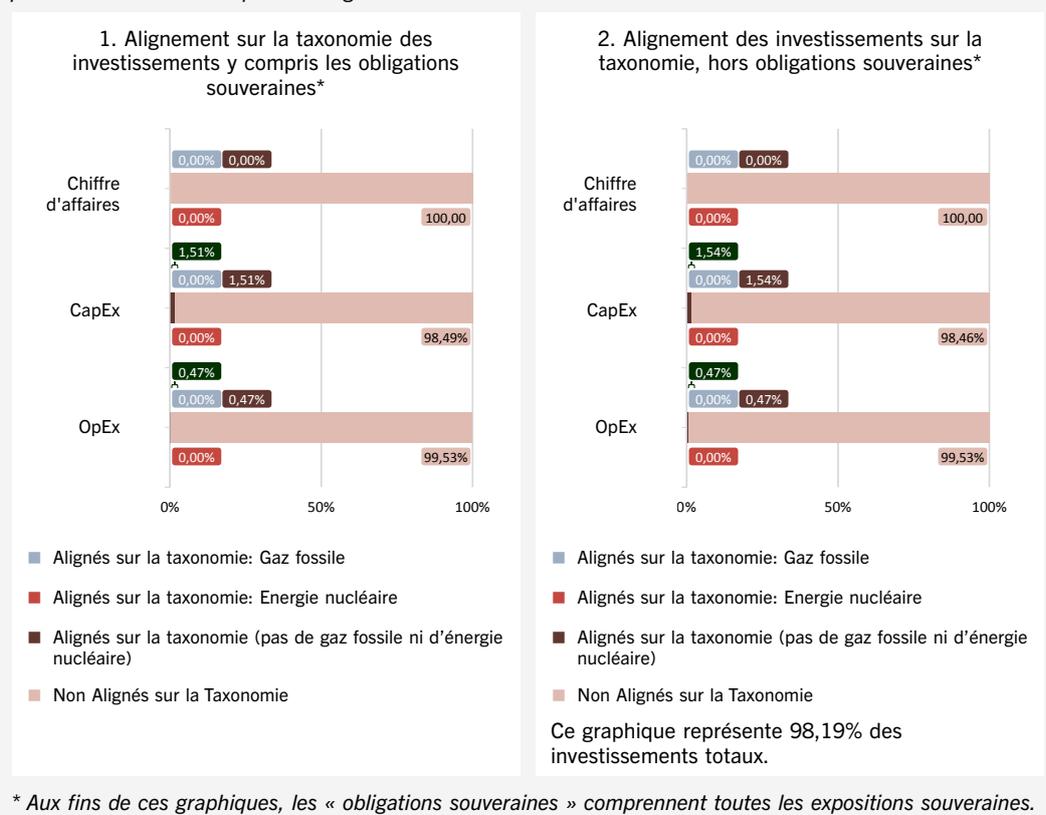

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:

- du **chiffre d'affaires** pour refléter le « caractère écologique » actuel des sociétés bénéficiaires des investissements;
- des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple;
- des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

Source: Pictet Asset Management, MSCI.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

- **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**
Non applicable.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

- **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**
Non applicable.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

1,81%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social?

23,46%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

Au cours de la période de référence, les caractéristiques environnementales et/ou sociales ont été atteintes en suivant la stratégie d'investissement et en respectant les éléments contraignants.

Les éléments contraignants du fonds comprennent:

- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes controversées, y compris les mines antipersonnel, les armes à sous-munition, les armes biologiques et chimiques, les armes nucléaires et l'uranium appauvri

OBJECTIF D'INVESTISSEMENT DURABLE

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Note: Pictet Asset Management a eu recours à un cadre de référence exclusif pour définir les investissements durables. Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

Dans quelle mesure l'objectif d'investissement durable de ce produit financier a-t-il été atteint?

Principaux moyens par lesquels le fonds a atteint son objectif durable:

- Impact positif:

Le fonds a produit un impact environnemental et/ou social positif en investissant au moins deux tiers du total de son actif/de son patrimoine dans des entreprises actives dans le secteur de l'eau et qui apportent des solutions aux problèmes liés à l'eau dans le monde entier. Le fonds a ciblé les entreprises qui créent des technologies pour améliorer la qualité de l'eau, maximiser l'efficacité de l'utilisation de l'eau ou augmenter le nombre de ménages raccordés à l'eau courante.

Aucun indice de référence n'a été désigné aux fins de la réalisation de l'objectif d'investissement durable.

Le fonds a investi principalement dans des entreprises dont les activités concernent en grande partie, mais sans s'y limiter, la production d'eau, le conditionnement et la désalinisation de l'eau, les fournisseurs d'eau, le transport et la distribution, la collecte et le traitement des eaux usées, des eaux

d'égout et des déchets solides, liquides et chimiques, les centrales de traitement des eaux usées et la fourniture d'équipement, la consultance et les services d'ingénierie dans le domaine de l'eau, ainsi que d'autres activités économiques pertinentes.

Les sociétés visées pour le secteur de l'air seront notamment les sociétés chargées du contrôle de la qualité de l'air, les sociétés fournissant les équipements nécessaires à la filtration de l'air ainsi que les sociétés fabriquant les catalyseurs pour véhicules.

Les titres éligibles comprenaient les actions émises par des sociétés dont une part significative des activités (telle que mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) provient de ce type d'activités économiques.

Veillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails. Notez que notre cadre d'exclusion a été mis à jour au cours de l'année 2024.

En plus des exclusions susmentionnées basées sur la politique d'Investissement Responsable de Pictet Asset Management, la stratégie a appliqué des limites d'exclusion plus strictes fondées sur des directives internes.

- **Actionnariat actif:**

Le fonds a exercé méthodiquement ses droits de vote. Le fonds s'est également engagé (dialogue collaboratif) avec la direction d'entreprises sélectionnées sur des questions ESG importantes.

- **Investissements durables:**

Pictet Asset Management a eu recours à un cadre exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

Le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 30,99%.

- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 67,94%.

- **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

- **Le pourcentage d'exposition du produit financier aux «investissements durables» tel que défini à l'article 2 (17) du SFDR:**

98,93%

- **Profil ESG général**

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'indice de référence après avoir retiré les 20% d'émetteurs ayant les notes ESG les plus faibles..

Le score ESG moyen pondéré du fonds a été de 0,61, contre 0,18 pour l'indice de référence. Un score plus élevé désigne un risque ESG plus faible. Les scores vont de -2 à 1, 1 étant le meilleur.

- **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Les indicateurs de durabilité permettent de mesurer la manière dont les objectifs de durabilité de ce produit financier sont atteints.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'investissement responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, comme détaillé ci-dessous:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	0,04	3,53
Armement	0,19	0,97
Autres activités controversées	0,01	0,84

Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.

• Engagement

Le fonds s'est engagé (dialogue collaboratif) avec 22 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

(*) Pour les seuils d'exclusion appliqués, voir le tableau «Exclusions d'entreprises sur la base des activités controversées et des seuils de chiffre d'affaires» ci-dessus.

(**) L'exposition aux incidences négatives du produit est refundée sur la partie éligible du fonds. En 2024, les classes ont changé de «Non couvert» à «Couvert» et de «Non applicable» à «Eligible».

● **Dans quelle mesure les investissements durables n'ont-ils pas causé de préjudice important à un objectif d'investissement durable?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

(i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.

(ii) Les émetteurs associés à des controverses importantes et graves ont été exclus.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

● *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques et opportunités sur les plans environnemental, social et de gouvernance, et de l'exposition aux investissements durables, dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) vote par procuration

Le fonds a suivi les directives en matière de vote de Pictet Asset Management qui ont été conçues pour soutenir une culture solide de gouvernance d'entreprise, une gestion efficace des thématiques environnementales et sociales et un reporting complet conforme à des normes crédibles. Ces directives visent également à soutenir les organes de gouvernance mondiaux reconnus qui promeuvent des pratiques commerciales durables en faveur de la gérance de l'environnement, de pratiques de travail équitables, de la non-discrimination et de la protection des droits de l'homme. Toutes les activités de vote du fonds ont été enregistrées et peuvent être communiquées sur demande.

(iii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous avons eu un dialogue collaboratif avec les émetteurs afin de s'attaquer à des préoccupations ESG importantes, d'améliorer les pratiques des entreprises en matière de durabilité, ou de s'engager sur des sujets à incidence positive afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iv) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

98,93%

● Quelle était l'allocation des actifs?

Le fonds a alloué 98,93% de ses actifs à des Investissements durables (#1 Durables) et 1,07% à des Investissements non durables (#2 Non durables). 30,99% de ses actifs sont alloués à des objectifs environnementaux et 67,94% à des objectifs sociaux.

N°1 Durable couvre les investissements durables aux objectifs environnementaux ou sociaux.

N°2 Non durable inclut les investissements qui ne répondent pas à la définition des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

● **Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?**

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

Oui:

Dans le gaz fossile Dans l'énergie nucléaire

Non

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles

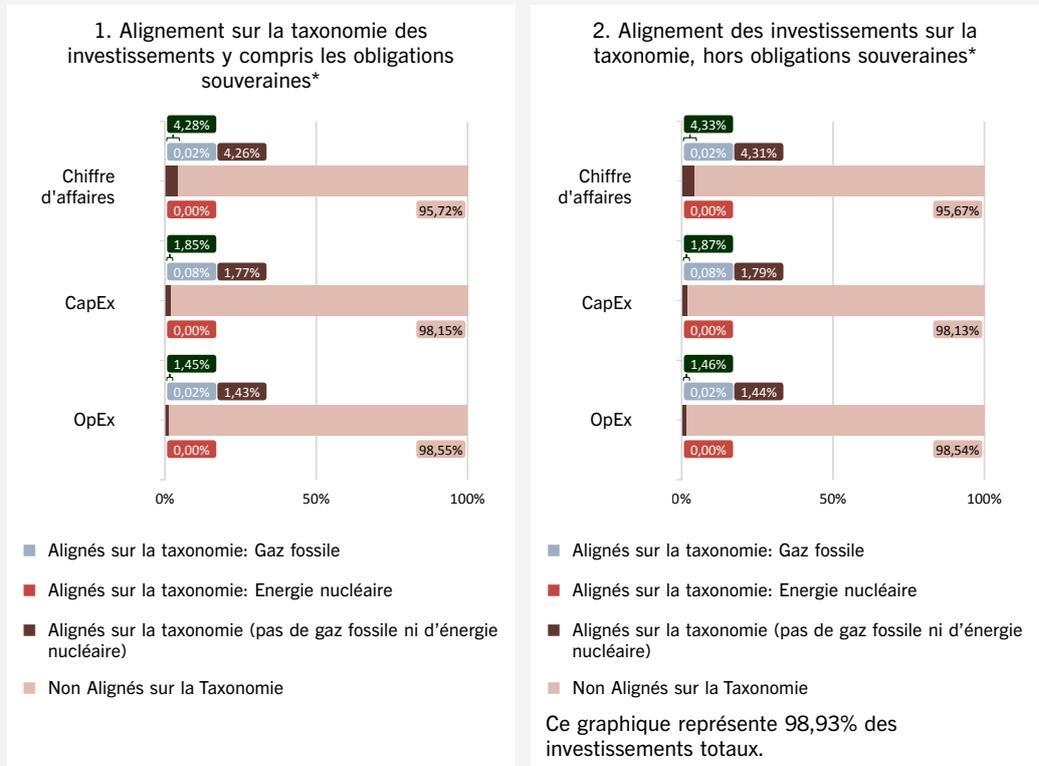

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

exhaustives de sûreté et de gestion des déchets.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:

- du **chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires des investissements ;
- des **dépenses d'investissement** (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple.
- des **dépenses d'exploitation** (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

La part des investissements réalisés dans:

- Des activités transitoires: 0,02%
- Des activités habilitantes: 0,25%

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Le pourcentage d'investissements alignés sur la Taxonomie de l'UE durant la période de référence précédente était de 3,31%, contre 4,28% pour la période de référence actuelle.

Veillez noter que ce fonds n'avait pas d'engagement ex ante en matière de Taxonomie de l'UE.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

30,99%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères applicables** aux activités économiques durables sur le plan environnemental au titre de la taxonomie de l'UE.

Quelle était la part d'investissements durables sur le plan social?

67,94%

Quels étaient les investissements inclus dans la catégorie «non durables», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les investissements «non durables» du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été atteintes?

Les caractéristiques environnementales et sociales de ce fonds incluaient:

L'indice Topix a été utilisé pour mesurer l'approche à tendance positive; toutefois, aucun indice de référence n'a été désigné aux fins d'atteindre les caractéristiques environnementales ou sociales promues par le fonds.

- Exclusions fondées sur les normes et les valeurs:

Le fonds a exclu les émetteurs qui exercent des activités importantes ayant une incidence négative sur la société ou l'environnement, ou qui enfreignent gravement les normes internationales comme détaillé ci-dessous:

- **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

- **Le pourcentage d'exposition du produit financier aux «investissements durables» tel que défini à l'article 2 (17) du SFDR:**

- **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

• Engagement

Le fonds s'est engagé (dialogue collaboratif) avec 21 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

(*) Pour les seuils d'exclusion appliqués, voir le tableau «Exclusions d'entreprises sur la base des activités controversées et des seuils de chiffre d'affaires» ci-dessus.

(**) L'exposition aux incidences négatives du produit est refondée sur la partie éligible du fonds. En 2024, les classes ont changé de «Non couvert» à «Couvert» et de «Non applicable» à «Eligible».

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

Le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 18,35%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 29,98%.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

(i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.

(ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● **Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?**

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionariat actif.

Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à « ne pas causer de préjudice important » en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) vote par procuration

Le fonds a suivi les directives en matière de vote de Pictet Asset Management qui ont été conçues pour soutenir une culture solide de gouvernance d'entreprise, une gestion efficace des thématiques environnementales et sociales et un reporting complet conforme à des normes crédibles. Ces directives visent également à soutenir les organes de gouvernance mondiaux reconnus qui promeuvent des pratiques commerciales durables en faveur de la gérance de l'environnement, de pratiques de travail équitables, de la non-discrimination et de la protection des droits de l'homme. Toutes les activités de vote du fonds ont été enregistrées et peuvent être communiquées sur demande.

(iii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les

géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iv) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Non applicable.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

Oui:

Dans le gaz fossile Dans l'énergie nucléaire

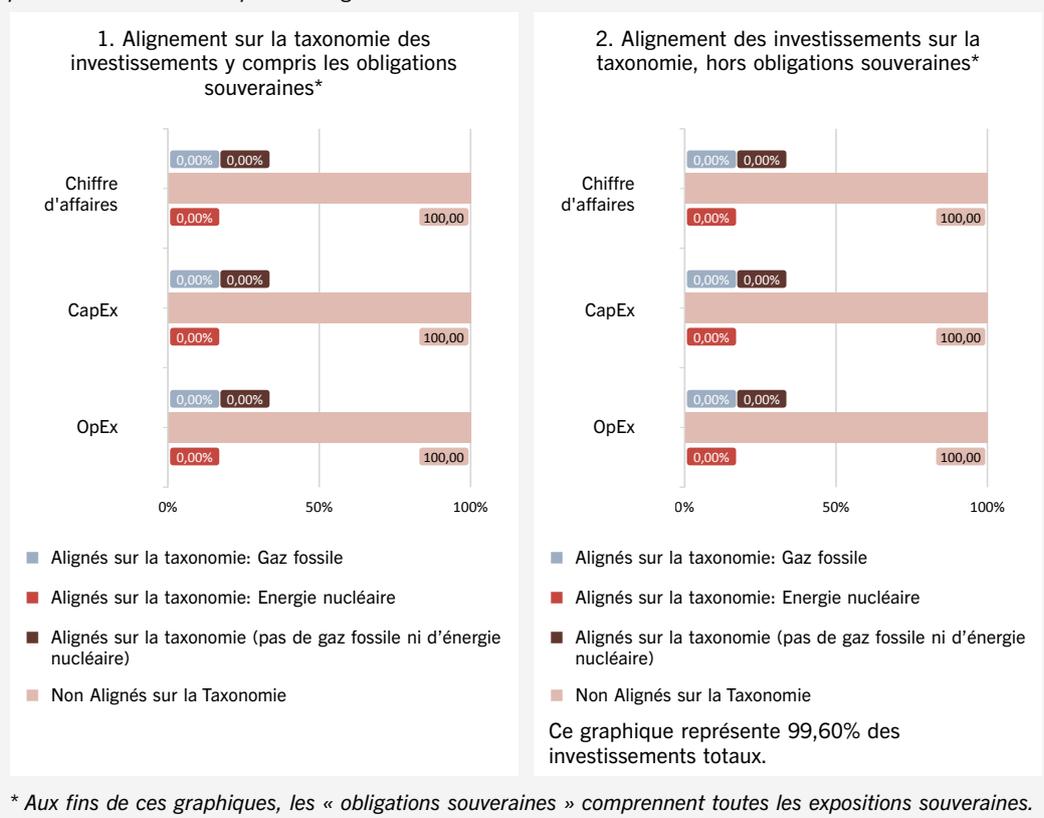

Non

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:
 - du **chiffre d'affaires** pour refléter le « caractère écologique » actuel des sociétés bénéficiaires des investissements;
 - des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple;
 - des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

- **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**
Non applicable.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

- **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**
Non applicable.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

sur la taxonomie de l'UE?

18,35%

Quelle était la part d'investissements durables sur le plan social?

29,98%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Les éléments contraignants du fonds comprennent:

- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes nucléaires de pays qui ne sont pas signataires du Traité sur la non-prolifération des armes nucléaires (TNP), et dans la production d'autres armes controversées

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

• Engagement

Le fonds s'est engagé (dialogue collaboratif) avec 11 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Le fonds ne s'est pas engagé dans une proportion minimale d'investissements durables.

Toutefois, ex-post, le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 18,31%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 23,04%.

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

(i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.

(ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● **Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?**

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à « ne pas causer de préjudice important » en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) vote par procuration

Le fonds a suivi les directives en matière de vote de Pictet Asset Management qui ont été conçues pour soutenir une culture solide de gouvernance d'entreprise, une gestion efficace des thématiques environnementales et sociales et un reporting complet conforme à des normes crédibles. Ces directives visent également à soutenir les organes de gouvernance mondiaux reconnus qui promeuvent des pratiques commerciales durables en faveur de la gérance de l'environnement, de pratiques de travail équitables, de la non-discrimination et de la protection des droits de l'homme. Toutes les activités de vote du fonds ont été enregistrées et peuvent être communiquées sur demande.

(iii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les

géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iv) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Non applicable.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

Oui:

Dans le gaz fossile Dans l'énergie nucléaire

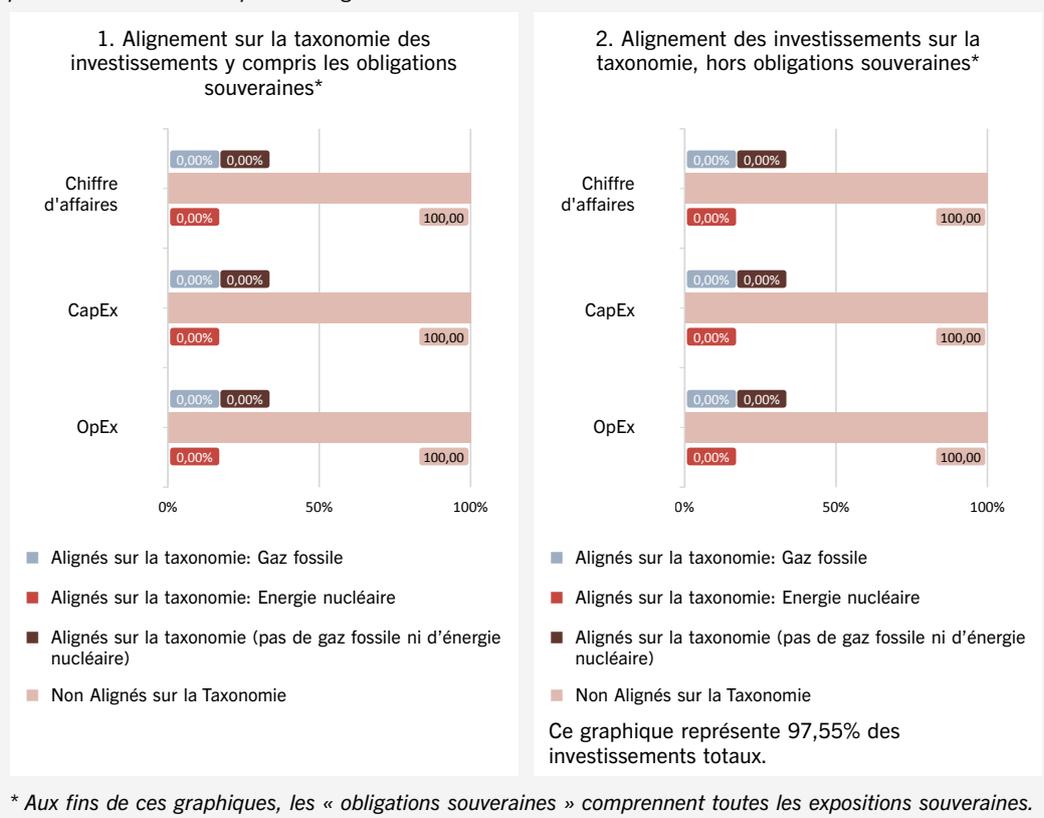

Non

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:
 - du **chiffre d'affaires** pour refléter le « caractère écologique » actuel des sociétés bénéficiaires des investissements;
 - des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple;
 - des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

- **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**
Non applicable.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

- **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**
Non applicable.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés

Le symbole représente des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

sur la taxonomie de l'UE?

18,31%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Quelle était la part d'investissements durables sur le plan social?

23,04%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

Au cours de la période de référence, les caractéristiques environnementales et/ou sociales ont été atteintes en suivant la stratégie d'investissement et en respectant les éléments contraignants.

Les éléments contraignants du fonds comprennent:

- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes nucléaires de pays qui ne sont pas signataires du Traité sur la non-prolifération des armes nucléaires (TNP), et dans la production d'autres armes controversées
 - tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, telles que l'extraction de charbon thermique et la production d'électricité, la production de pétrole et de gaz non conventionnels, les armements militaires et les armes légères, les produits du tabac, les opérations de jeux d'argent et la production de divertissement pour adultes. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur les seuils d'exclusion.
 - violent gravement les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption.
- un profil ESG supérieur à celui de l'indice de référence
- analyse des critères ESG des titres éligibles couvrant au moins 90% de l'actif net ou du nombre d'émetteurs présents dans le portefeuille

En outre, le fonds s'est engagé (dialogue collaboratif) avec 11 entreprises au 30 septembre 2024.

Quelle a été la performance de ce produit financier par rapport à l'indice de référence durable?

Aucun indice de référence n'a été désigné aux fins d'atteindre les caractéristiques environnementales ou sociales promues par le fonds.

Les indices de référence sont des indices permettant de mesurer si le produit financier atteint les caractéristiques environnementales ou sociales qu'il promet.

- **En quoi l'indice de référence différerait-il d'un indice de marché large?**
Non applicable.
- **Quelle a été la performance de ce produit financier au regard des indicateurs de durabilité visant à déterminer l'alignement de l'indice de référence sur les caractéristiques environnementales ou sociales promues?**
Non applicable.
- **Quelle a été la performance de ce produit financier par rapport à l'indice de référence?**
Non applicable.

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

- Actionnariat actif:

- **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

- **Profil ESG général**

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'indice de référence.

Le score ESG moyen pondéré du fonds a été de 7,62, contre 7,38 pour l'indice de référence. Un score plus élevé désigne un risque plus faible. Les scores vont de 0 à 10, 10 étant le meilleur.

- **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	0,06	3,27
Armement	0,00	0,04
Autres activités controversées	0,04	0,11
Eligible:	97,69	100,00
Couvert:	100,00	99,94

**Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. • Engagement

Le fonds s'est engagé (dialogue collaboratif) avec 10 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

(**) L'exposition aux incidences négatives du produit est refondée sur la partie éligible du fonds. En 2024, les classes ont changé de «Non couvert» à «Couvert» et de «Non applicable» à «Eligible».

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Le fonds ne s'est pas engagé dans une proportion minimale d'investissements durables.

Toutefois, ex-post, le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 10,91%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 21,45%.

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

(i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.

(ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● **Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?**

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à « ne pas causer de préjudice important » en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) vote par procuration

Le fonds a suivi les directives en matière de vote de Pictet Asset Management qui ont été conçues pour soutenir une culture solide de gouvernance d'entreprise, une gestion efficace des thématiques environnementales et sociales et un reporting complet conforme à des normes crédibles. Ces directives visent également à soutenir les organes de gouvernance mondiaux reconnus qui promeuvent des pratiques commerciales durables en faveur de la gérance de l'environnement, de pratiques de travail équitables, de la non-discrimination et de la protection des droits de l'homme. Toutes les activités de vote du fonds ont été enregistrées et peuvent être communiquées sur demande.

(iii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les

géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iv) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

32,36%

L'allocation des actifs décrit la part des investissements dans des actifs spécifiques.

● Quelle était l'allocation des actifs?

Le fonds était aligné à 97,69% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 2,31% dans Autres (#2 Autres). 32,36% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

La catégorie **#1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **#2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie **#1 Alignés sur les caractéristiques E/S** comprend:

- La sous-catégorie **#1A Durables** couvrant les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Non applicable.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

Oui:

Dans le gaz fossile Dans l'énergie nucléaire

Non

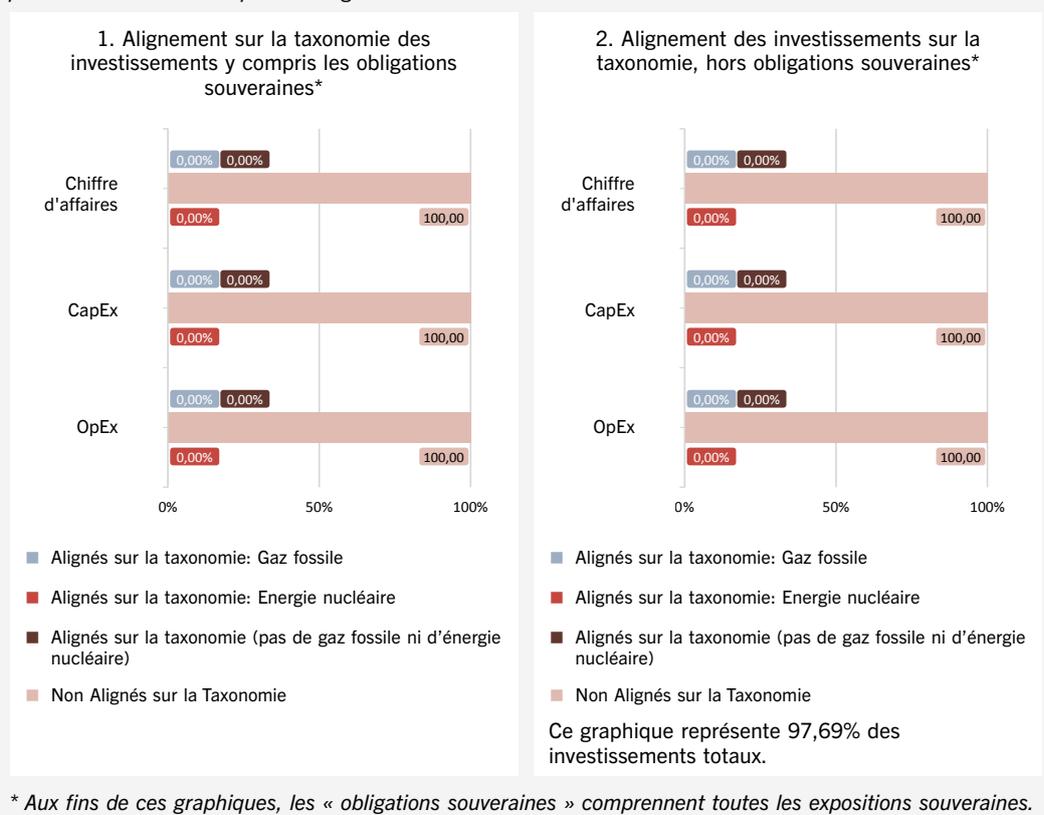

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:

- du **chiffre d'affaires** pour refléter le « caractère écologique » actuel des sociétés bénéficiaires des investissements;
- des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple;
- des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**
Non applicable.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**
Non applicable.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés

Le symbole représente des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

sur la taxonomie de l'UE?

10,91%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Quelle était la part d'investissements durables sur le plan social?

21,45%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

Au cours de la période de référence, les caractéristiques environnementales et/ou sociales ont été atteintes en suivant la stratégie d'investissement et en respectant les éléments contraignants.

Les éléments contraignants du fonds comprennent:

- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes nucléaires de pays qui ne sont pas signataires du Traité sur la non-prolifération des armes nucléaires (TNP), et dans la production d'autres armes controversées
 - tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, telles que l'extraction de charbon thermique et la production d'électricité, la production de pétrole et de gaz non conventionnels, les armements militaires et les armes légères, les produits du tabac, les opérations de jeux d'argent et la production de divertissement pour adultes. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur les seuils d'exclusion.

- un profil ESG supérieur à celui de l'indice de référence
- analyse des critères ESG des titres éligibles couvrant au moins 90% de l'actif net ou du nombre d'émetteurs présents dans le portefeuille

En outre, le fonds s'est engagé (dialogue collaboratif) avec 10 entreprises au 30 septembre 2024.

Quelle a été la performance de ce produit financier par rapport à l'indice de référence durable?

Les indices de référence sont des indices permettant de mesurer si le produit financier atteint les caractéristiques environnementales ou sociales qu'il promet.

- **En quoi l'indice de référence différerait-il d'un indice de marché large?**

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Note: Pictet Asset Management a eu recours à un cadre de référence exclusif pour définir les investissements durables. Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été atteintes?

Les caractéristiques environnementales et sociales de ce fonds incluaient:

- **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

- **Le pourcentage d'exposition du produit financier aux «investissements durables» tel que défini à l'article 2 (17) du SFDR:**

- **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

• Engagement

Le fonds s'est engagé (dialogue collaboratif) avec 12 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

(*) Pour les seuils d'exclusion appliqués, voir le tableau «Exclusions d'entreprises sur la base des activités controversées et des seuils de chiffre d'affaires» ci-dessus.

(**) L'exposition aux incidences négatives du produit est refondée sur la partie éligible du fonds. En 2024, les classes ont changé de «Non couvert» à «Couvert» et de «Non applicable» à «Eligible».

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

Le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 18,36%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 27,85%.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

(i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.

(ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● **Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?**

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à « ne pas causer de préjudice important » en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) vote par procuration

Le fonds a suivi les directives en matière de vote de Pictet Asset Management qui ont été conçues pour soutenir une culture solide de gouvernance d'entreprise, une gestion efficace des thématiques environnementales et sociales et un reporting complet conforme à des normes crédibles. Ces directives visent également à soutenir les organes de gouvernance mondiaux reconnus qui promeuvent des pratiques commerciales durables en faveur de la gérance de l'environnement, de pratiques de travail équitables, de la non-discrimination et de la protection des droits de l'homme. Toutes les activités de vote du fonds ont été enregistrées et peuvent être communiquées sur demande.

(iii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les

géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iv) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Non applicable.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

Oui:

Dans le gaz fossile Dans l'énergie nucléaire

Non

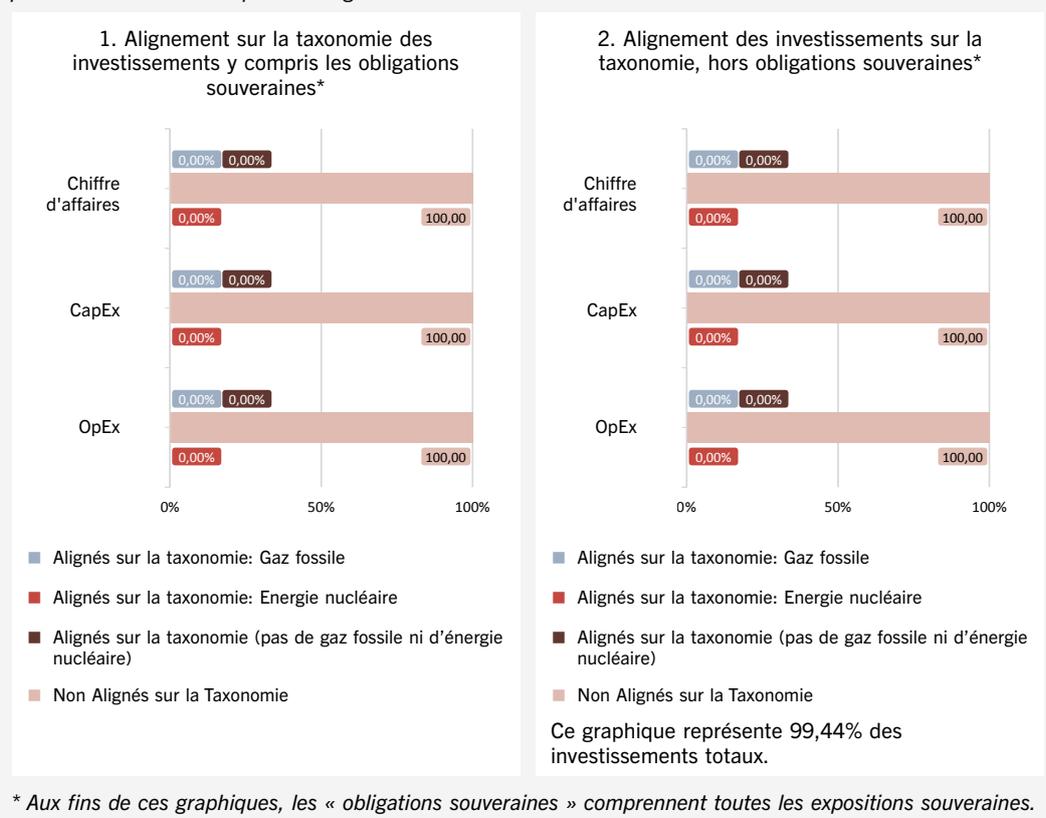

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:

- du **chiffre d'affaires** pour refléter le « caractère écologique » actuel des sociétés bénéficiaires des investissements;
- des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple;
- des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

- **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**
Non applicable.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

- **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**
Non applicable.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

sur la taxonomie de l'UE?

18,36%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Quelle était la part d'investissements durables sur le plan social?

27,85%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

OBJECTIF D'INVESTISSEMENT DURABLE

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Note: Pictet Asset Management a eu recours à un cadre de référence exclusif pour définir les investissements durables. Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

Principaux moyens par lesquels le fonds a atteint son objectif durable:

- Impact positif:

Le fonds a produit un impact social positif en investissant principalement dans des entreprises qui soutiennent la santé des personnes. Pour protéger l'avenir des services de santé dans le monde entier, une meilleure prévention et des traitements plus efficaces sont nécessaires. Aucun indice de référence n'a été désigné aux fins de la réalisation de l'objectif d'investissement durable.

Le fonds a investi principalement dans des entreprises dont les activités concernent en grande partie l'augmentation de la durée de vie en bonne santé des personnes, la préservation de la santé des personnes par la promotion de vies actives ou d'environnements sains, le rétablissement de la santé ou l'amélioration de la qualité de vie, le financement de la santé ou l'amélioration de l'efficacité du système de santé, ainsi que d'autres activités économiques pertinentes.

Les titres éligibles comprenaient les actions émises par des sociétés dont une part significative des activités (telle que mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) provient de ce type d'activités économiques.

98,13%

- **Profil ESG général**

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'indice de référence.

Le score ESG moyen pondéré du fonds a été de 0,67, contre 0,02 pour l'indice de référence. Un score plus élevé désigne un risque plus faible. Les scores vont de -2 à 1, 1 étant le meilleur.

- **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Les indicateurs de durabilité permettent de mesurer la manière dont les objectifs de durabilité de ce produit financier sont atteints.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'investissement responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, comme détaillé ci-dessous:

(*) Pour les seuils d'exclusion appliqués, voir le tableau «Exclusions d'entreprises sur la base des activités controversées et des seuils de chiffre d'affaires» ci-dessus.

(**) L'exposition aux incidences négatives du produit est refundée sur la partie éligible du fonds. En 2024, les classes ont changé de «Non couvert» à «Couvert» et de «Non applicable» à «Eligible».

● **Dans quelle mesure les investissements durables n'ont-ils pas causé de préjudice important à un objectif d'investissement durable?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

(i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.

(ii) Les émetteurs associés à des controverses importantes et graves ont été exclus.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

● *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques et opportunités sur les plans environnemental, social et de gouvernance, et de l'exposition aux investissements durables, dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) vote par procuration

Le fonds a suivi les directives en matière de vote de Pictet Asset Management qui ont été conçues pour soutenir une culture solide de gouvernance d'entreprise, une gestion efficace des thématiques environnementales et sociales et un reporting complet conforme à des normes crédibles. Ces directives visent également à soutenir les organes de gouvernance mondiaux reconnus qui promeuvent des pratiques commerciales durables en faveur de la gérance de l'environnement, de pratiques de travail équitables, de la non-discrimination et de la protection des droits de l'homme. Toutes les activités de vote du fonds ont été enregistrées et peuvent être communiquées sur demande.

(iii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous avons eu un dialogue collaboratif avec les émetteurs afin de s'attaquer à des préoccupations ESG importantes, d'améliorer les pratiques des entreprises en matière de durabilité, ou de s'engager sur des sujets à incidence positive afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iv) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

98,13%

● Quelle était l'allocation des actifs?

Le fonds a alloué 98,13% de ses actifs à des Investissements durables (#1 Durables) et 1,87% à des Investissements non durables (#2 Non durables). 3,97% de ses actifs sont alloués à des objectifs environnementaux et 94,16% à des objectifs sociaux.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

● **Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?**

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

Oui:

Dans le gaz fossile Dans l'énergie nucléaire

Non

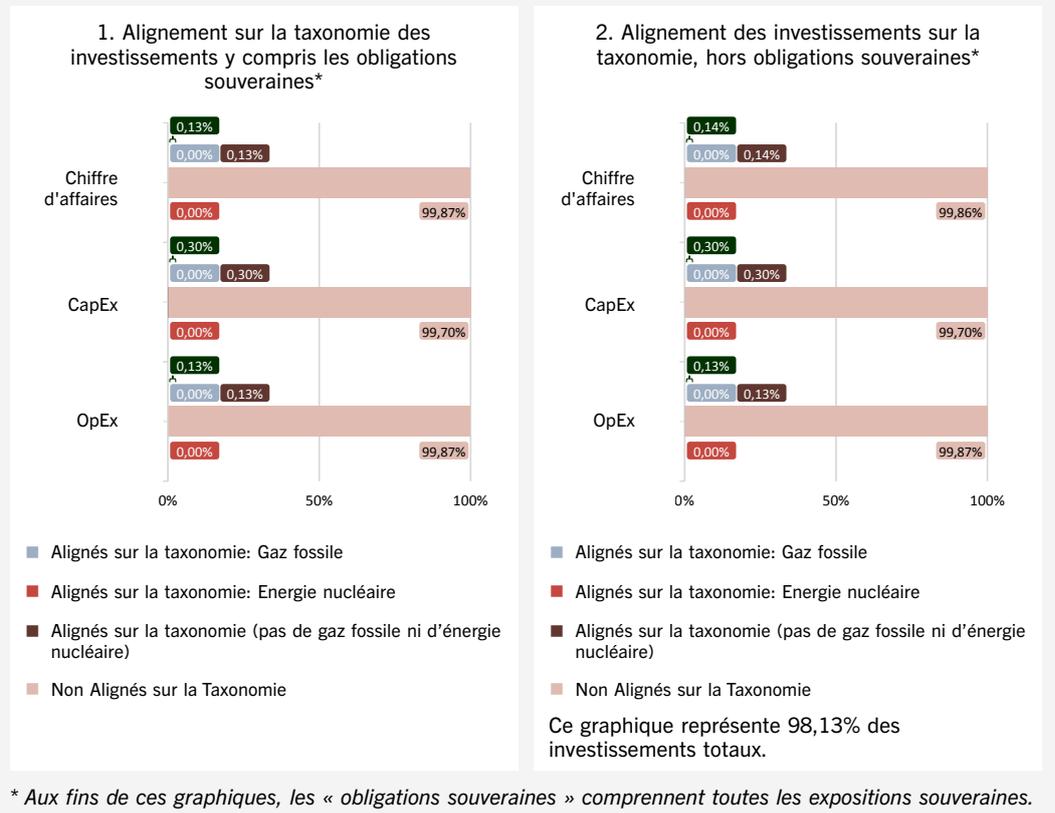

Pour respecter la Taxonomie de l'UE, les critères pour le gaz fossile incluent des limites d'émissions et le passage à des énergies renouvelables ou des carburants sobres en carbone d'ici fin

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

2035. Pour l'énergie nucléaire, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:
 - du **chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires des investissements ;
 - des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple.
 - des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

3,97%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères applicables** aux activités économiques durables sur le plan environnemental au titre de la taxonomie de l'UE.

Quelle était la part d'investissements durables sur le plan social?

94,16%

Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. - **Actionnariat actif:**

Le fonds a exercé ses droits de vote méthodiquement et s'est engagé (dialogue collaboratif) avec la direction des entreprises sélectionnées sur des questions ESG importantes.

- **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

- **Le pourcentage d'exposition du produit financier aux «investissements durables» tel que défini à l'article 2 (17) du SFDR:**

97,93%

- **Profil ESG général**

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'indice de référence.

Il convient de noter que le fonds a été classé Article 8 - Incidence positive pour 2024 (précédemment Article 8 - Approche à tendance positive).

- **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

Le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 37,01%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 60,92%.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

(i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.

(ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

- *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à «ne pas causer de préjudice important» en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques et opportunités sur les plans environnemental, social et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) vote par procuration

Le fonds a suivi les directives en matière de vote de Pictet Asset Management qui ont été conçues pour soutenir une culture solide de gouvernance d'entreprise, une gestion efficace des thématiques environnementales et sociales et un reporting complet conforme à des normes crédibles. Ces directives

visent également à soutenir les organes de gouvernance mondiaux reconnus qui promeuvent des pratiques commerciales durables en faveur de la gérance de l'environnement, de pratiques de travail équitables, de la non-discrimination et de la protection des droits de l'homme. Toutes les activités de vote du fonds ont été enregistrées et peuvent être communiquées sur demande.

(iii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs.

Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iv) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Non applicable.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

Oui:

Dans le gaz fossile Dans l'énergie nucléaire

Non

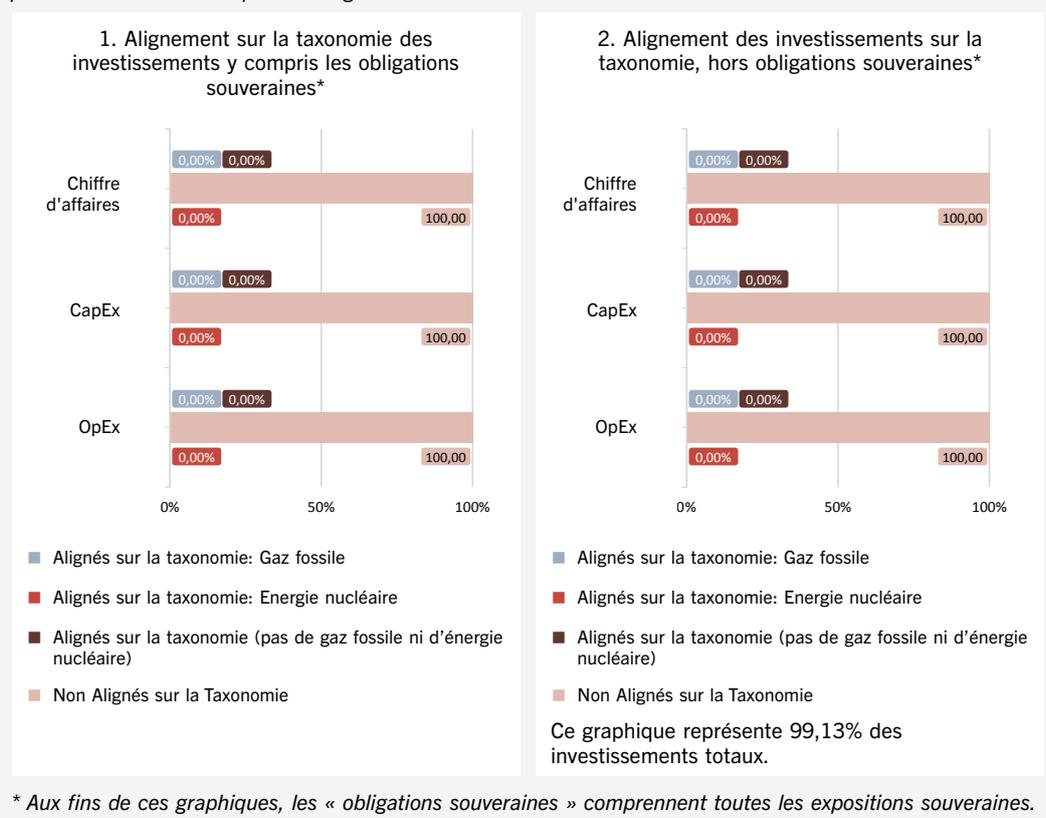

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:

- du **chiffre d'affaires** pour refléter le « caractère écologique » actuel des sociétés bénéficiaires des investissements;
- des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple;
- des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

- **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**
Non applicable.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

- **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**
Le pourcentage d'investissements alignés sur la Taxonomie de l'UE durant la période de référence précédente était de 0,05%, contre 0,00% pour la période de référence actuelle.

Veillez noter que ce fonds n'avait pas d'engagement ex ante en matière de Taxonomie de l'UE.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

37,01%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social?

60,92%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

Au cours de la période de référence, les caractéristiques environnementales et/ou sociales ont été atteintes en suivant la stratégie d'investissement et en respectant les éléments contraignants.

Les éléments contraignants du fonds comprennent:

- au moins 51% d'investissements durables, c'est-à-dire des investissements dans des entreprises qui fournissent des produits de sûreté et de sécurité pour les systèmes, les personnes ou les organisations (comme mesuré par le chiffre d'affaires, la valeur de l'entreprise, le bénéfice avant intérêts et impôts, ou similaire).
- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes controversées, y compris les mines antipersonnel, les armes à sous-munition, les armes biologiques et chimiques, les armes nucléaires et l'uranium appauvri
 - tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, telles que l'extraction de charbon thermique et la production d'électricité, l'exploration et l'extraction de pétrole et de gaz non conventionnels, la production de pétrole et de gaz conventionnels, la production d'énergie nucléaire, les armements militaires, les produits et services liés aux armes, les armes légères, les boissons alcoolisées, la production de tabac, la production de divertissement pour adultes, les opérations de jeux d'argent et les équipements spécialisés, le développement et la croissance d'organismes génétiquement modifiés, la production et la vente au détail de pesticides, et la production et la distribution d'huile de palme. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur les secteurs exclus et sur les seuils d'exclusion.
 - violent gravement les normes internationales, y compris les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption

- un profil ESG supérieur à celui de l'indice de référence
- analyse des critères ESG des titres éligibles couvrant au moins 90% de l'actif net ou du nombre d'émetteurs présents dans le portefeuille

En outre, le fonds s'est engagé (dialogue collaboratif) avec 14 entreprises au 30 septembre 2024.

OBJECTIF D'INVESTISSEMENT DURABLE

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Note: Pictet Asset Management a eu recours à un cadre de référence exclusif pour définir les investissements durables. Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

Dans quelle mesure l'objectif d'investissement durable de ce produit financier a-t-il été atteint?

Principaux moyens par lesquels le fonds a atteint son objectif durable:

- Impact positif:

Le Compartiment a produit un impact environnemental positif en investissant au moins deux tiers du total de son actif/de son patrimoine dans des actions émises par des entreprises qui soutiennent une transition structurée vers une économie durable à faible intensité de carbone, contribuant à réduire les émissions de gaz à effet de serre et la pollution atmosphérique.

Aucun indice de référence n'a été désigné aux fins de la réalisation de l'objectif d'investissement durable.

Le fonds a investi principalement dans des entreprises dont les activités concernent en grande partie, mais sans s'y limiter, les énergies renouvelables, les technologies qui réduisent les émissions de CO2 ou la consommation d'énergie dans l'industrie, les bâtiments ou les transports, les technologies et

infrastructures de facilitation essentielles à la transition vers une économie à faible intensité de carbone, comme le stockage d'énergie, les semi-conducteurs électriques, les investissements dans le réseau électrique, ainsi que d'autres activités économiques pertinentes.

Les titres éligibles comprenaient les actions émises par des sociétés dont une part significative des activités (telle que mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) provient de ce type d'activités économiques.

- Exclusions fondées sur les normes et les valeurs:

Le fonds a exclu les émetteurs qui exercent des activités importantes ayant une incidence négative sur la société ou l'environnement, ou qui enfreignent gravement les normes internationales comme détaillé ci-dessous:

Veillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails. Notez que notre cadre d'exclusion a été mis à jour au cours de l'année 2024.

En plus des exclusions susmentionnées basées sur la politique d'Investissement Responsable de Pictet Asset Management, la stratégie a appliqué des limites d'exclusion plus strictes fondées sur des directives internes.

- **Actionnariat actif:**

Le fonds a exercé méthodiquement ses droits de vote. Le fonds s'est également engagé (dialogue collaboratif) avec la direction d'entreprises sélectionnées sur des questions ESG importantes.

- **Investissements durables:**

Pictet Asset Management a eu recours à un cadre exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

Le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 83,40%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 14,62%.

- **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

- **Le pourcentage d'exposition du produit financier aux «investissements durables» tel que défini à l'article 2 (17) du SFDR:**

98,03%

- **Le pourcentage du portefeuille du produit financier aligné sur la taxonomie de l'UE:**

7,83%

- **Profil ESG général**

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'indice de référence après avoir retiré les 20% d'émetteurs ayant les notes ESG les plus faibles..

Le score ESG moyen pondéré du fonds a été de 0,42, contre 0,18 pour l'indice de référence. Un score plus élevé désigne un risque ESG plus faible. Les scores vont de -2 à 1, 1 étant le meilleur.

- **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'investissement responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, comme détaillé ci-dessous:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	1,52	3,53
Armement	0,36	0,96
Autres activités controversées	0,00	0,84
Eligible:	98,02	100,00

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

• Engagement

Le fonds s'est engagé (dialogue collaboratif) avec 14 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

(*) Pour les seuils d'exclusion appliqués, voir le tableau «Exclusions d'entreprises sur la base des activités controversées et des seuils de chiffre d'affaires» ci-dessus.

(**) L'exposition aux incidences négatives du produit est refondée sur la partie éligible du fonds. En 2024, les classes ont changé de «Non couvert» à «Couvert» et de «Non applicable» à «Eligible».

- **Dans quelle mesure les investissements durables n'ont-ils pas causé de préjudice important à un objectif d'investissement durable?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

(i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.

(ii) Les émetteurs associés à des controverses importantes et graves ont été exclus.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

- *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques et opportunités sur les plans environnemental, social et de gouvernance, et de l'exposition aux investissements durables, dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) vote par procuration

Le fonds a suivi les directives en matière de vote de Pictet Asset Management qui ont été conçues pour soutenir une culture solide de gouvernance d'entreprise, une gestion efficace des thématiques environnementales et sociales et un reporting complet conforme à des normes crédibles. Ces directives visent également à soutenir les organes de gouvernance mondiaux reconnus qui promeuvent des pratiques commerciales durables en faveur de la gérance de l'environnement, de pratiques de travail équitables, de la non-discrimination et de la protection des droits de l'homme. Toutes les activités de vote du fonds ont été enregistrées et peuvent être communiquées sur demande.

(iii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous avons eu un dialogue collaboratif avec les émetteurs afin de s'attaquer à des préoccupations ESG importantes, d'améliorer les pratiques des entreprises en matière de durabilité, ou de s'engager sur des sujets à incidence positive afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iv) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

98,03%

L'allocation des actifs décrit la part des investissements dans des actifs spécifiques.

● Quelle était l'allocation des actifs?

Le fonds a alloué 98,03% de ses actifs à des Investissements durables (#1 Durables) et 1,97% à des Investissements non durables (#2 Non durables). 83,40% de ses actifs sont alloués à des objectifs environnementaux et 14,62% à des objectifs sociaux.

N°1 Durable couvre les investissements durables aux objectifs environnementaux ou sociaux.

N°2 Non durable inclut les investissements qui ne répondent pas à la définition des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

Oui:

Dans le gaz fossile Dans l'énergie nucléaire

Non

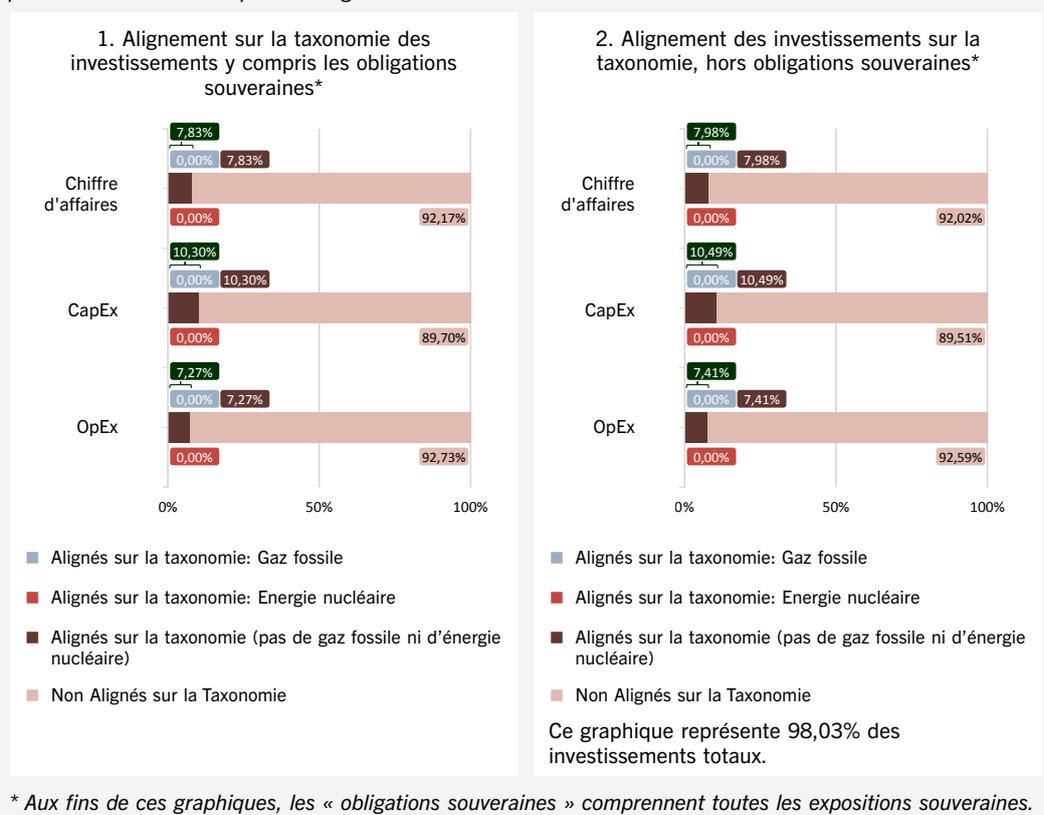

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:

- du **chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires des investissements ;
- des **dépenses d'investissement** (CapEx) pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple.
- des **dépenses d'exploitation** (OpEx) pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

Source: Pictet Asset Management, MSCI.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

La part des investissements réalisés dans:

- Des activités transitoires: 0,00%
- Des activités habilitantes: 3,57%

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Le pourcentage d'investissements alignés sur la Taxonomie de l'UE durant la période de référence précédente était de 9,27%, contre 7,83% pour la période de référence actuelle.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

83,40%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

 Le symbole représente des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères applicables aux activités économiques durables sur le plan environnemental au titre de la taxonomie de l'UE.

Quelle était la part d'investissements durables sur le plan social?

14,62%

Quels étaient les investissements inclus dans la catégorie «non durables», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les investissements «non durables» du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour atteindre l'objectif d'investissement durable au cours de la période de référence?

Au cours de la période de référence, l'objectif d'investissement durable a été réalisé en suivant la stratégie d'investissement et en respectant les éléments contraignants.

Les éléments contraignants du fonds comprennent:

- au moins 80% d'investissements durables, c'est-à-dire des investissements dans des entreprises exposées de manière significative à des activités telles que les énergies renouvelables, les technologies qui réduisent les émissions de CO2 ou la consommation d'énergie dans l'industrie, les bâtiments ou les transports, les technologies et infrastructures habilitantes essentielles à la transition vers une économie à faible intensité de carbone, comme le stockage d'énergie, les semi-conducteurs électriques, les investissements dans le réseau électrique, ainsi que d'autres activités économiques pertinentes (comme mesuré par le chiffre d'affaires, la valeur de l'entreprise, les bénéfices avant intérêts et impôts, ou similaires)
- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes controversées, y compris les mines antipersonnel, les armes à sous-munition, les armes biologiques et chimiques, les armes nucléaires et l'uranium appauvri
 - tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, telles que l'extraction de charbon thermique et la production d'électricité, l'exploration et l'extraction de pétrole et de gaz non conventionnels, la production de pétrole et de gaz conventionnels, la production d'énergie nucléaire, les armements militaires, les produits et services liés aux armes, les armes légères, les boissons alcoolisées, la production de tabac, la production de divertissement pour adultes, les opérations de jeux d'argent et les équipements spécialisés, le développement et la croissance d'organismes génétiquement modifiés, la production et la vente au détail de pesticides, et la production et la distribution d'huile de palme. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur les secteurs exclus et sur les seuils d'exclusion.

- violent gravement les normes internationales, y compris les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption
- un profil ESG supérieur à celui de l'indice de référence après élimination des 20% d'émetteurs présentant les moins bonnes caractéristiques ESG
- analyse des critères ESG des titres éligibles couvrant au moins 90% de l'actif net ou du nombre d'émetteurs présents dans le portefeuille

En outre, le fonds s'est engagé (dialogue collaboratif) avec 14 entreprises au 30 septembre 2024.

OBJECTIF D'INVESTISSEMENT DURABLE

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Note: Pictet Asset Management a eu recours à un cadre de référence exclusif pour définir les investissements durables. Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

Dans quelle mesure l'objectif d'investissement durable de ce produit financier a-t-il été atteint?

Principaux moyens par lesquels le fonds a atteint son objectif durable:

- Impact positif:

Le fonds a produit un impact environnemental et/ou social positif en investissant au moins deux tiers du total de son actif/de son patrimoine dans des entreprises qui contribuent à résoudre les défis environnementaux du monde entier par une gestion des forêts et des matériaux à base de bois durables. La gestion durable des forêts et de la chaîne de valeur des fibres de bois joue un rôle essentiel dans la capture du carbone atmosphérique (CO2). Les forêts gérées de manière durable sont également des réservoirs de biodiversité, et elles aident à sauvegarder les sols et les ressources en eau. Le bois est le matériau de base utilisé pour une variété croissance de matériaux biologiques susceptibles de remplacer les plastiques et autres matériaux non biodégradables, et ils sont essentiels dans un modèle d'économie circulaire.

Aucun indice de référence n'a été désigné aux fins de la réalisation de l'objectif d'investissement durable.

Le fonds a investi dans des entreprises dont les activités concernent en grande partie, mais sans s'y limiter, le financement, la plantation et la gestion de forêts et de zones boisées et/ou le traitement, la production et la distribution de matériaux à base de bois et de fibre de bois ainsi que des produits et services connexes tout au long de la chaîne de valeur forestière, ainsi que d'autres activités économiques pertinentes.

Les titres éligibles comprenaient les actions émises par des sociétés dont une part significative des activités (telle que mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) provient de ce type d'activités économiques.

- **Actionnariat actif:**

Le fonds a exercé méthodiquement ses droits de vote. Le fonds s'est également engagé (dialogue collaboratif) avec la direction d'entreprises sélectionnées sur des questions ESG importantes.

Le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

Ces investissements représentaient 27,00%.

- **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

- **Le pourcentage d'exposition du produit financier aux «investissements durables» tel que défini à l'article 2 (17) du SFDR:**

97,42%

- **Profil ESG général**

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'indice de référence après avoir retiré les 20% d'émetteurs ayant les notes ESG les plus faibles..

Le score ESG moyen pondéré du fonds a été de 0,65, contre 0,18 pour l'indice de référence. Un score plus élevé désigne un risque ESG plus faible. Les scores vont de -2 à 1, 1 étant le meilleur.

- **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Les indicateurs de durabilité permettent de mesurer la manière dont les objectifs de durabilité de ce produit financier sont atteints.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'investissement responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, comme détaillé ci-dessous:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	0,09	3,53
Armement	0,00	0,97
Autres activités controversées	0,05	0,84
Eligible:	97,27	100,00
Couvert:	99,02	99,65

*Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.

• Engagement

Le fonds s'est engagé (dialogue collaboratif) avec 9 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

(*) Pour les seuils d'exclusion appliqués, voir le tableau «Exclusions d'entreprises sur la base des activités controversées et des seuils de chiffre d'affaires» ci-dessus.

(**) L'exposition aux incidences négatives du produit est refundée sur la partie éligible du fonds. En 2024, les classes ont changé de «Non couvert» à «Couvert» et de «Non applicable» à «Eligible».

● **Dans quelle mesure les investissements durables n'ont-ils pas causé de préjudice important à un objectif d'investissement durable?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

(i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.

(ii) Les émetteurs associés à des controverses importantes et graves ont été exclus.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

● *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques et opportunités sur les plans environnemental, social et de gouvernance, et de l'exposition aux investissements durables, dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) vote par procuration

Le fonds a suivi les directives en matière de vote de Pictet Asset Management qui ont été conçues pour soutenir une culture solide de gouvernance d'entreprise, une gestion efficace des thématiques environnementales et sociales et un reporting complet conforme à des normes crédibles. Ces directives visent également à soutenir les organes de gouvernance mondiaux reconnus qui promeuvent des pratiques commerciales durables en faveur de la gérance de l'environnement, de pratiques de travail équitables, de la non-discrimination et de la protection des droits de l'homme. Toutes les activités de vote du fonds ont été enregistrées et peuvent être communiquées sur demande.

(iii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous avons eu un dialogue collaboratif avec les émetteurs afin de s'attaquer à des préoccupations ESG importantes, d'améliorer les pratiques des entreprises en matière de durabilité, ou de s'engager sur des sujets à incidence positive afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iv) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

97,42%

● Quelle était l'allocation des actifs?

Le fonds a alloué 97,42% de ses actifs à des Investissements durables (#1 Durables) et 2,58% à des Investissements non durables (#2 Non durables). 70,42% de ses actifs sont alloués à des objectifs environnementaux et 27,00% à des objectifs sociaux.

N°1 Durable couvre les investissements durables aux objectifs environnementaux ou sociaux.

N°2 Non durable inclut les investissements qui ne répondent pas à la définition des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

● **Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?**

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

Oui:

Dans le gaz fossile Dans l'énergie nucléaire

Non

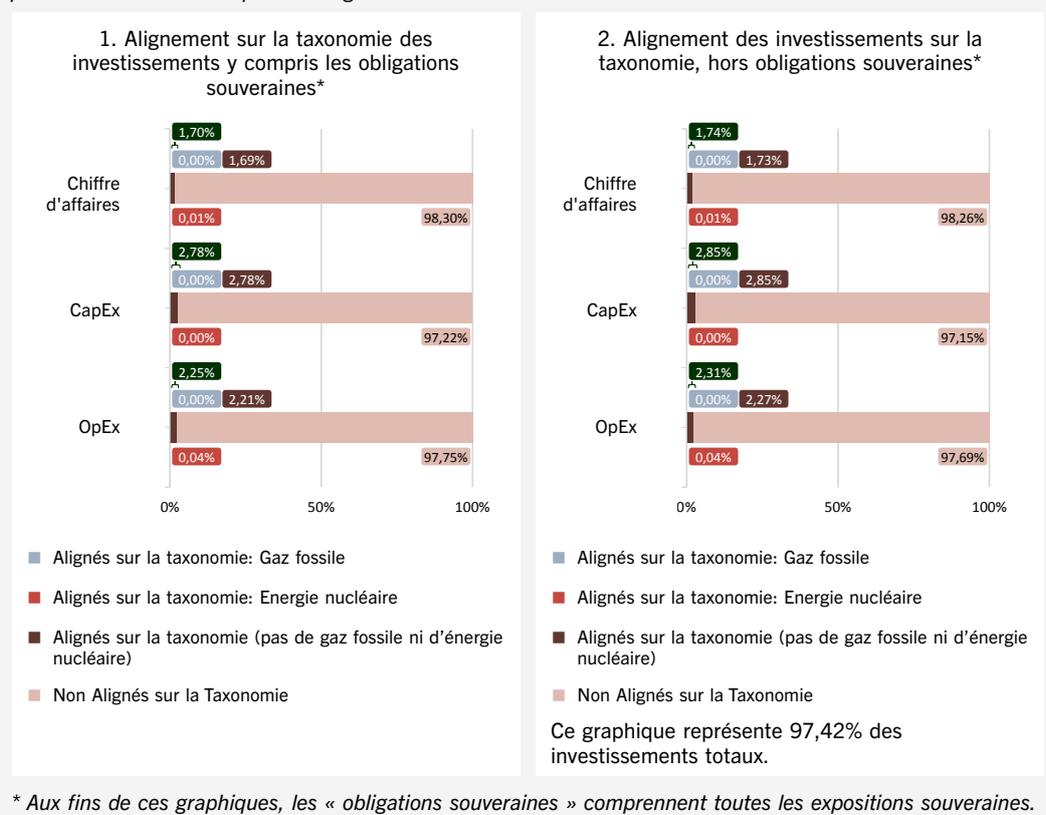

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:

- du **chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires des investissements ;
- des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple.
- des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. OBJECTIF D'INVESTISSEMENT DURABLE

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Note: Pictet Asset Management a eu recours à un cadre de référence exclusif pour définir les investissements durables. Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

Dans quelle mesure l'objectif d'investissement durable de ce produit financier a-t-il été atteint?

Principaux moyens par lesquels le fonds a atteint son objectif durable:

- Impact positif:

Le fonds a produit un impact environnemental et/ou social positif en investissant principalement dans des entreprises qui contribuent à la chaîne valeur de la nutrition ou qui en profitent, notamment en ce qui concerne la qualité de la nutrition, l'accès à la nutrition et la durabilité de la production alimentaire. Ces entreprises contribuent à garantir l'approvisionnement alimentaire et améliorent la santé humaine et celle de la planète en contribuant à une évolution favorable de notre alimentation et à la sécurité alimentaire mondiale. Elles contribuent également à réduire les incidences environnementales négatives par rapport à l'agriculture traditionnelle et à réduire les déchets alimentaires.

Aucun indice de référence n'a été désigné aux fins de la réalisation de l'objectif d'investissement durable.

Le fonds a investi principalement dans des entreprises dont les activités concernent en grande partie les technologies agricoles, l'agriculture ou l'aquaculture durables, les produits, ingrédients et compléments alimentaires, la logistique alimentaire telle que la distribution, les solutions de gestion des déchets alimentaires, la sécurité alimentaire ainsi que d'autres activités économiques pertinentes.

Les titres éligibles comprenaient les actions émises par des sociétés dont une part significative des activités (telle que mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) provient de ce type d'activités économiques.

- Exclusions fondées sur les normes et les valeurs:

- **Actionnariat actif:**

Le fonds a exercé méthodiquement ses droits de vote. Le fonds s'est également engagé (dialogue collaboratif) avec la direction d'entreprises sélectionnées sur des questions ESG importantes.

- **Investissements durables:**

Pictet Asset Management a eu recours à un cadre exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

Le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

- **Le pourcentage d'exposition du produit financier aux «investissements durables» tel que défini à l'article 2 (17) du SFDR:**

99,14%

- **Profil ESG général**

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'indice de référence après avoir retiré les 20% d'émetteurs ayant les notes ESG les plus faibles..

Le score ESG moyen pondéré du fonds a été de 0,57, contre 0,18 pour l'indice de référence. Un score plus élevé désigne un risque ESG plus faible. Les scores vont de -2 à 1, 1 étant le meilleur.

- **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'investissement responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, comme détaillé ci-dessous:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	0,00	3,53
Armement	0,00	0,97
Autres activités controversées	0,26	0,84
Eligible:	98,96	100,00
Couvert:	99,98	99,65

*Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

• Engagement

Le fonds s'est engagé (dialogue collaboratif) avec 20 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

(*) Pour les seuils d'exclusion appliqués, voir le tableau «Exclusions d'entreprises sur la base des activités controversées et des seuils de chiffre d'affaires» ci-dessus.

(**) L'exposition aux incidences négatives du produit est refundée sur la partie éligible du fonds. En 2024, les classes ont changé de «Non couvert» à «Couvert» et de «Non applicable» à «Eligible».

- **Dans quelle mesure les investissements durables n'ont-ils pas causé de préjudice important à un objectif d'investissement durable?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

(i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.

(ii) Les émetteurs associés à des controverses importantes et graves ont été exclus.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

- *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques et opportunités sur les plans environnemental, social et de gouvernance, et de l'exposition aux investissements durables, dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) vote par procuration

Le fonds a suivi les directives en matière de vote de Pictet Asset Management qui ont été conçues pour soutenir une culture solide de gouvernance d'entreprise, une gestion efficace des thématiques environnementales et sociales et un reporting complet conforme à des normes crédibles. Ces directives visent également à soutenir les organes de gouvernance mondiaux reconnus qui promeuvent des pratiques commerciales durables en faveur de la gérance de l'environnement, de pratiques de travail équitables, de la non-discrimination et de la protection des droits de l'homme. Toutes les activités de vote du fonds ont été enregistrées et peuvent être communiquées sur demande.

(iii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous avons eu un dialogue collaboratif avec les émetteurs afin de s'attaquer à des préoccupations ESG importantes, d'améliorer les pratiques des entreprises en matière de durabilité, ou de s'engager sur des sujets à incidence positive afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iv) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

99,14%

● Quelle était l'allocation des actifs?

Le fonds a alloué 99,14% de ses actifs à des Investissements durables (#1 Durables) et 0,86% à des Investissements non durables (#2 Non durables). 40,09% de ses actifs sont alloués à des objectifs environnementaux et 59,04% à des objectifs sociaux.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies

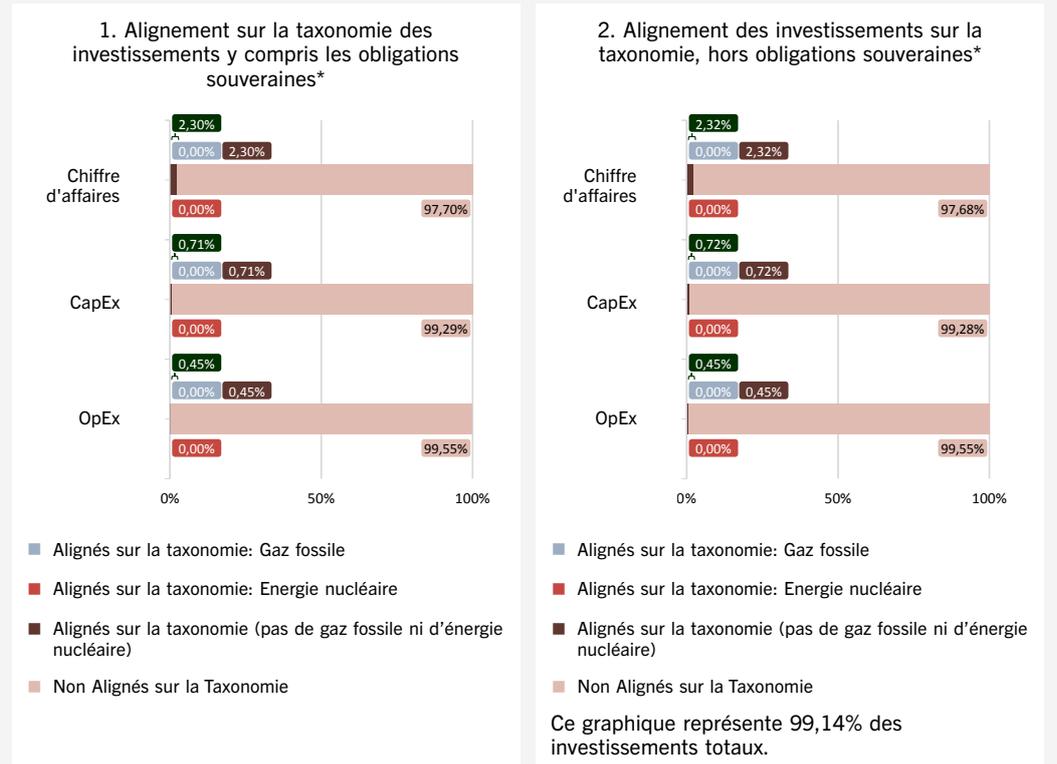

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:

- du **chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires des investissements ;
- des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple.
- des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. ● Quelle a été la performance des indicateurs de durabilité?

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

- **Le pourcentage d'exposition du produit financier aux «investissements durables» tel que défini à l'article 2 (17) du SFDR:**

83,06%

- **Profil ESG général**

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'indice de référence.

Le score ESG moyen pondéré du fonds a été de 0,48, contre 0,02 pour l'indice de référence. Un score plus élevé désigne un risque plus faible. Les scores vont de -2 à 1, 1 étant le meilleur.

- **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. ● Engagement

Le fonds s'est engagé (dialogue collaboratif) avec 122 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

Le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 33,11%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 49,96%.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

- (i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.
- (ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes,

inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

- *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à « ne pas causer de préjudice important » en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

- (i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques et opportunités sur les plans environnemental, social et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les

entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) vote par procuration

Le fonds a suivi les directives en matière de vote de Pictet Asset Management qui ont été conçues pour soutenir une culture solide de gouvernance d'entreprise, une gestion efficace des thématiques environnementales et sociales et un reporting complet conforme à des normes crédibles. Ces directives visent également à soutenir les organes de gouvernance mondiaux reconnus qui promeuvent des pratiques commerciales durables en faveur de la gérance de l'environnement, de pratiques de travail équitables, de la non-discrimination et de la protection des droits de l'homme. Toutes les activités de vote du fonds ont été enregistrées et peuvent être communiquées sur demande.

(iii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs.

Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iv) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

83,06%

L'allocation des actifs décrit la part des investissements dans des actifs spécifiques.

● Quelle était l'allocation des actifs?

Le fonds était aligné à 97,88% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 2,12% dans Autres (#2 Autres). 83,06% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

- **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

Oui:

Dans le gaz fossile Dans l'énergie nucléaire

Non

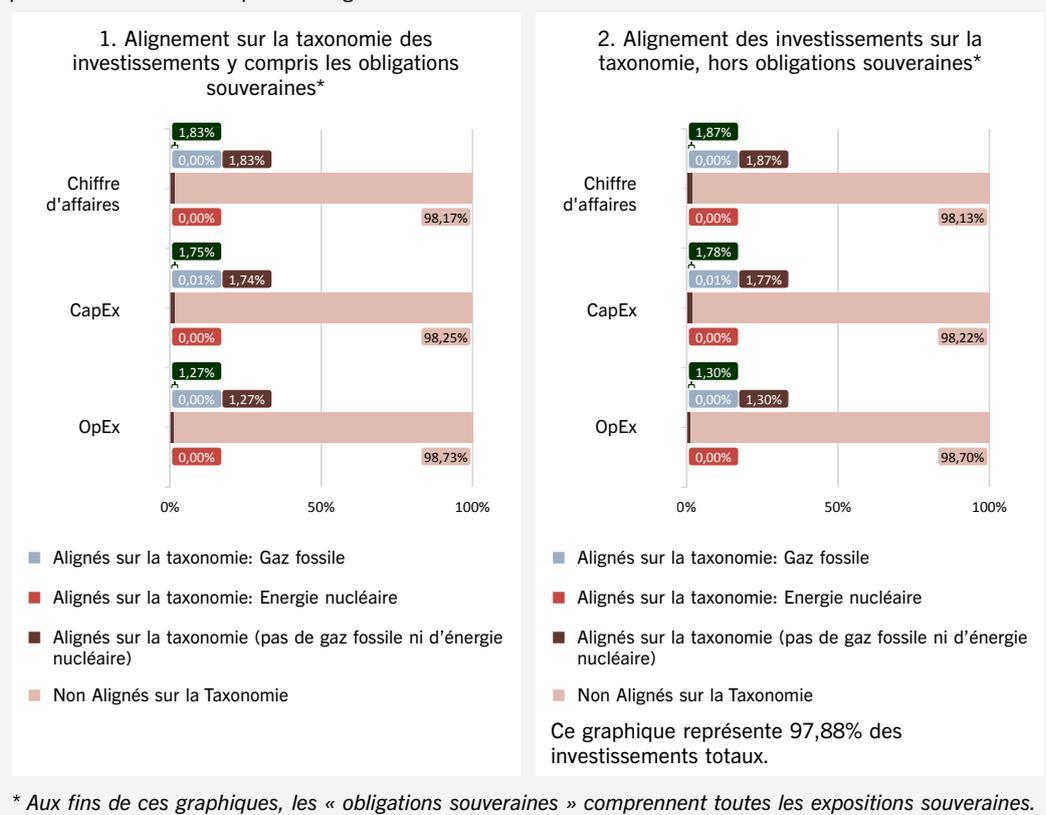

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:

- du **chiffre d'affaires** pour refléter le « caractère écologique » actuel des sociétés bénéficiaires des investissements;
- des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple;
- des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

La part des investissements réalisés dans:

- Des activités transitoires: 0,00%
- Des activités habilitantes: 0,60%

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Le pourcentage d'investissements alignés sur la Taxonomie de l'UE durant la période de référence précédente était de 1,66%, contre 1,83% pour la période de référence actuelle.

Veillez noter que ce fonds n'avait pas d'engagement ex ante en matière de Taxonomie de l'UE.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

33,11%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui ne tiennent pas compte des critères en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social?

49,96%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

Au cours de la période de référence, les caractéristiques environnementales et/ou sociales ont été atteintes en suivant la stratégie d'investissement et en respectant les éléments contraignants.

Les éléments contraignants du fonds comprennent:

- au moins 51% d'investissements durables, c'est-à-dire d'investissements dans des entreprises exposées de manière significative à des activités telles que les produits et services soutenant la transition énergétique, l'économie circulaire, l'efficacité énergétique, la qualité et l'approvisionnement en eau, la foresterie durable, les villes durables, la nutrition, la santé humaine et les traitements, l'épanouissement personnel et la sécurité, ainsi que d'autres activités économiques pertinentes (comme mesuré par le chiffre d'affaires, la valeur de l'entreprise, les bénéfices avant intérêts et impôts, ou similaires)
- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes controversées, y compris les mines antipersonnel, les armes à sous-munition, les armes biologiques et chimiques, les armes nucléaires et l'uranium appauvri
 - tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, telles que l'extraction de charbon thermique et la production d'électricité, l'exploration et l'extraction de pétrole et de gaz non conventionnels, la production de pétrole et de gaz conventionnels, la production d'énergie nucléaire, les armements militaires, les produits et services liés aux armes, les armes légères, les boissons alcoolisées, la production de tabac, la production de divertissement pour adultes, les opérations de jeux d'argent et les équipements spécialisés, le développement et la croissance d'organismes génétiquement modifiés, la production et la vente au détail de pesticides, et la production et la distribution d'huile de palme. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur les secteurs exclus et sur les seuils d'exclusion.

- violent gravement les normes internationales, y compris les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption
 - un profil ESG supérieur à celui de l'indice de référence
 - analyse des critères ESG des titres éligibles couvrant au moins 90% de l'actif net ou du nombre d'émetteurs présents dans le portefeuille
- En outre, le fonds s'est engagé (dialogue collaboratif) avec 122 entreprises au 30 septembre 2024.

OBJECTIF D'INVESTISSEMENT DURABLE

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Note: Pictet Asset Management a eu recours à un cadre de référence exclusif pour définir les investissements durables. Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

Dans quelle mesure l'objectif d'investissement durable de ce produit financier a-t-il été atteint?

Principaux moyens par lesquels le fonds a atteint son objectif durable:

- Impact positif:

Ce fonds a produit un impact environnemental et/ou social positif en investissant principalement dans des entreprises à faible empreinte environnementale qui contribuent à résoudre les problèmes environnementaux dans le monde entier en proposant des produits et services dans la chaîne de valeur environnementale. Ces produits et services sont nécessaires pour soutenir la transition vers une économie à plus faible intensité de carbone, un modèle d'économie circulaire, pour contrôler et empêcher la pollution ou, par exemple, pour protéger les ressources rares telles que l'eau.

Aucun indice de référence n'a été désigné aux fins de la réalisation de l'objectif d'investissement durable.

Le fonds a investi principalement dans des sociétés dont une part importante des activités est liée, sans s'y limiter, à l'efficacité énergétique, aux énergies renouvelables, à la lutte contre la pollution, à l'approvisionnement et à la technologie de l'eau, à la gestion et au recyclage des déchets, à l'agriculture et à la sylviculture durables, à l'économie dématérialisée et à d'autres activités économiques pertinentes.

Les titres éligibles comprenaient les actions émises par des sociétés dont une part significative des activités (telle que mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) provient de ce type d'activités économiques.

- Exclusions fondées sur les normes et les valeurs:

Le fonds a exclu les émetteurs qui exercent des activités importantes ayant une incidence négative sur la société ou l'environnement, ou qui enfreignent gravement les normes internationales comme détaillé ci-dessous:

Le fonds a exercé méthodiquement ses droits de vote. Le fonds s'est également engagé (dialogue collaboratif) avec la direction d'entreprises sélectionnées sur des questions ESG importantes.

- **Investissements durables:**

Pictet Asset Management a eu recours à un cadre exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

Le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

- **Le pourcentage d'exposition du produit financier aux «investissements durables» tel que défini à l'article 2 (17) du SFDR:**

98,74%

- **Profil ESG général**

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'indice de référence après avoir retiré les 20% d'émetteurs ayant les notes ESG les plus faibles..

Le score ESG moyen pondéré du fonds a été de 0,56, contre 0,18 pour l'indice de référence. Un score plus élevé désigne un risque ESG plus faible. Les scores vont de -2 à 1, 1 étant le meilleur.

- **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Les indicateurs de durabilité permettent de mesurer la manière dont les objectifs de durabilité de ce produit financier sont atteints.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'investissement responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, comme détaillé ci-dessous:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	0,01	3,53
Armement	0,27	0,97
Autres activités controversées	0,01	0,84
Eligible:	98,68	100,00

*Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

• Engagement

Le fonds s'est engagé (dialogue collaboratif) avec 17 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

(*) Pour les seuils d'exclusion appliqués, voir le tableau «Exclusions d'entreprises sur la base des activités controversées et des seuils de chiffre d'affaires» ci-dessus.

(**) L'exposition aux incidences négatives du produit est refundée sur la partie éligible du fonds. En 2024, les classes ont changé de «Non couvert» à «Couvert» et de «Non applicable» à «Eligible».

● **Dans quelle mesure les investissements durables n'ont-ils pas causé de préjudice important à un objectif d'investissement durable?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

(i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.

(ii) Les émetteurs associés à des controverses importantes et graves ont été exclus.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

● *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques et opportunités sur les plans environnemental, social et de gouvernance, et de l'exposition aux investissements durables, dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) vote par procuration

Le fonds a suivi les directives en matière de vote de Pictet Asset Management qui ont été conçues pour soutenir une culture solide de gouvernance d'entreprise, une gestion efficace des thématiques environnementales et sociales et un reporting complet conforme à des normes crédibles. Ces directives visent également à soutenir les organes de gouvernance mondiaux reconnus qui promeuvent des pratiques commerciales durables en faveur de la gérance de l'environnement, de pratiques de travail équitables, de la non-discrimination et de la protection des droits de l'homme. Toutes les activités de vote du fonds ont été enregistrées et peuvent être communiquées sur demande.

(iii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous avons eu un dialogue collaboratif avec les émetteurs afin de s'attaquer à des préoccupations ESG importantes, d'améliorer les pratiques des entreprises en matière de durabilité, ou de s'engager sur des sujets à incidence positive afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iv) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

98,74%

● Quelle était l'allocation des actifs?

Le fonds a alloué 98,74% de ses actifs à des Investissements durables (#1 Durables) et 1,26% à des Investissements non durables (#2 Non durables). 72,91% de ses actifs sont alloués à des objectifs environnementaux et 25,83% à des objectifs sociaux.

N°1 Durable couvre les investissements durables aux objectifs environnementaux ou sociaux.

N°2 Non durable inclut les investissements qui ne répondent pas à la définition des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

● **Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?**

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

Non

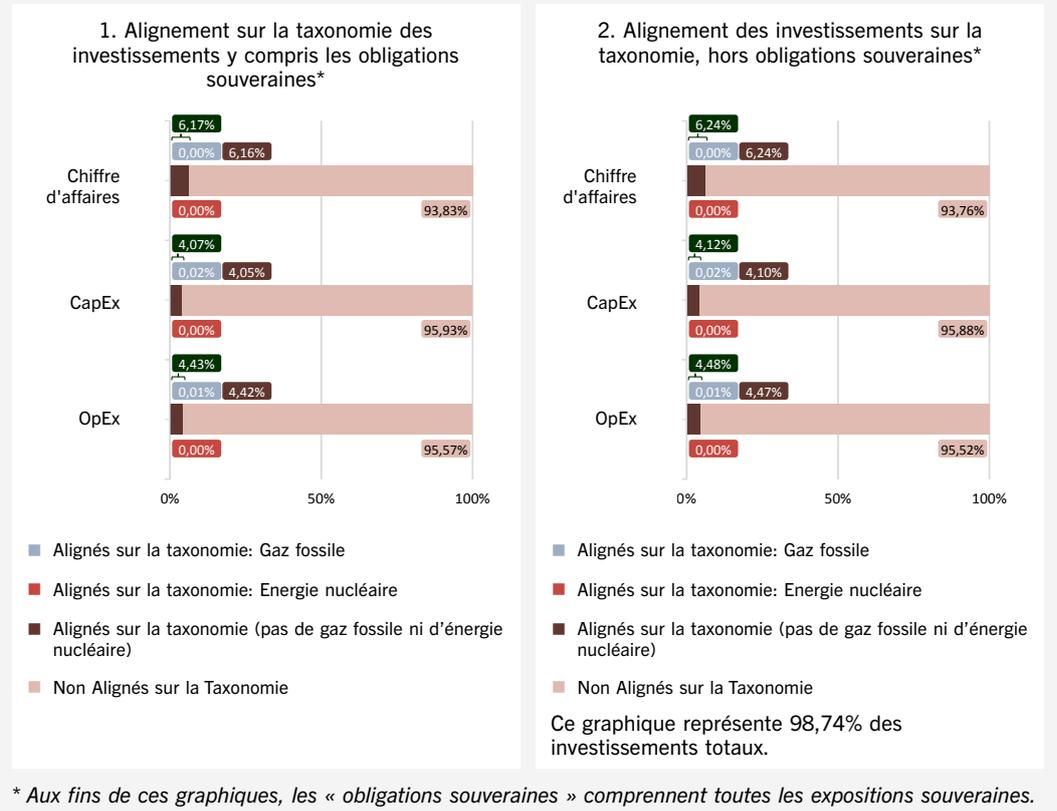

Pour respecter la Taxonomie de l'UE, les critères pour le gaz fossile incluent des limites d'émissions et le passage à des énergies renouvelables ou des carburants sobres en carbone d'ici fin

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

2035. Pour l'énergie nucléaire, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:
 - du **chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires des investissements ;
 - des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple.
 -des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

- Actionnariat actif:

Le fonds a exercé ses droits de vote méthodiquement et s'est engagé (dialogue collaboratif) avec la direction des entreprises sélectionnées sur des questions ESG importantes.

● **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

- **Le pourcentage d'exposition du produit financier aux «investissements durables» tel que défini à l'article 2 (17) du SFDR:**

96,57%

- **Profil ESG général**

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'indice de référence.

Le score ESG moyen pondéré du fonds a été de 0,62, contre 0,02 pour l'indice de référence. Un score plus élevé désigne un risque plus faible. Les scores vont de -2 à 1, 1 étant le meilleur.

- **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	0,00	3,53
Armement	0,05	0,97
Autres activités controversées	0,00	0,84
Eligible:	98,83	100,00
Couvert:	99,91	99,65

*Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

(i) PIN 10: Violations des principes du Pacte mondial des Nations unies et des Principes directeurs de l'Organisation de coopération et de développement économiques (OCDE) à l'intention des entreprises multinationales.

(ii) PIN 14: Exposition à des armes controversées (mines antipersonnel, armes à sous-munitions, armes chimiques et armes biologiques).

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

- **Droits de vote**

Durant la période de référence, le fonds a voté à 40 assemblées générales sur 40 assemblées avec vote (100,00%). Nous avons voté «contre» (y compris les «abstentions» ou «refus») une résolution au moins à 32,50% des assemblées.

- **Engagement**

Le fonds s'est engagé (dialogue collaboratif) avec 12 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

(**) L'exposition aux incidences négatives du produit est refondée sur la partie éligible du fonds. En 2024, les classes ont changé de «Non couvert» à «Couvert» et de «Non applicable» à «Éligible».

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

Le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 32,52%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 64,05%.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

(i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.

(ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

- *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à «ne pas causer de préjudice important» en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques et opportunités sur les plans environnemental, social et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) vote par procuration

Le fonds a suivi les directives en matière de vote de Pictet Asset Management qui ont été conçues pour soutenir une culture solide de gouvernance d'entreprise, une gestion efficace des thématiques environnementales et sociales et un reporting complet conforme à des normes crédibles. Ces directives

visent également à soutenir les organes de gouvernance mondiaux reconnus qui promeuvent des pratiques commerciales durables en faveur de la gérance de l'environnement, de pratiques de travail équitables, de la non-discrimination et de la protection des droits de l'homme. Toutes les activités de vote du fonds ont été enregistrées et peuvent être communiquées sur demande.

(iii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs.

Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iv) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

96,57%

L'allocation des actifs décrit la part des investissements dans des actifs spécifiques.

● Quelle était l'allocation des actifs?

Le fonds était aligné à 98,77% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 1,23% dans Autres (#2 Autres). 96,57% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

La catégorie **#1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **#2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie **#1 Alignés sur les caractéristiques E/S** comprend:

- La sous-catégorie **#1A Durables** couvrant les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

● **Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?**

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

Oui:

Dans le gaz fossile Dans l'énergie nucléaire

Non

Pour respecter la Taxonomie de l'UE, les critères pour le gaz fossile incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'énergie nucléaire, les critères incluent des règles

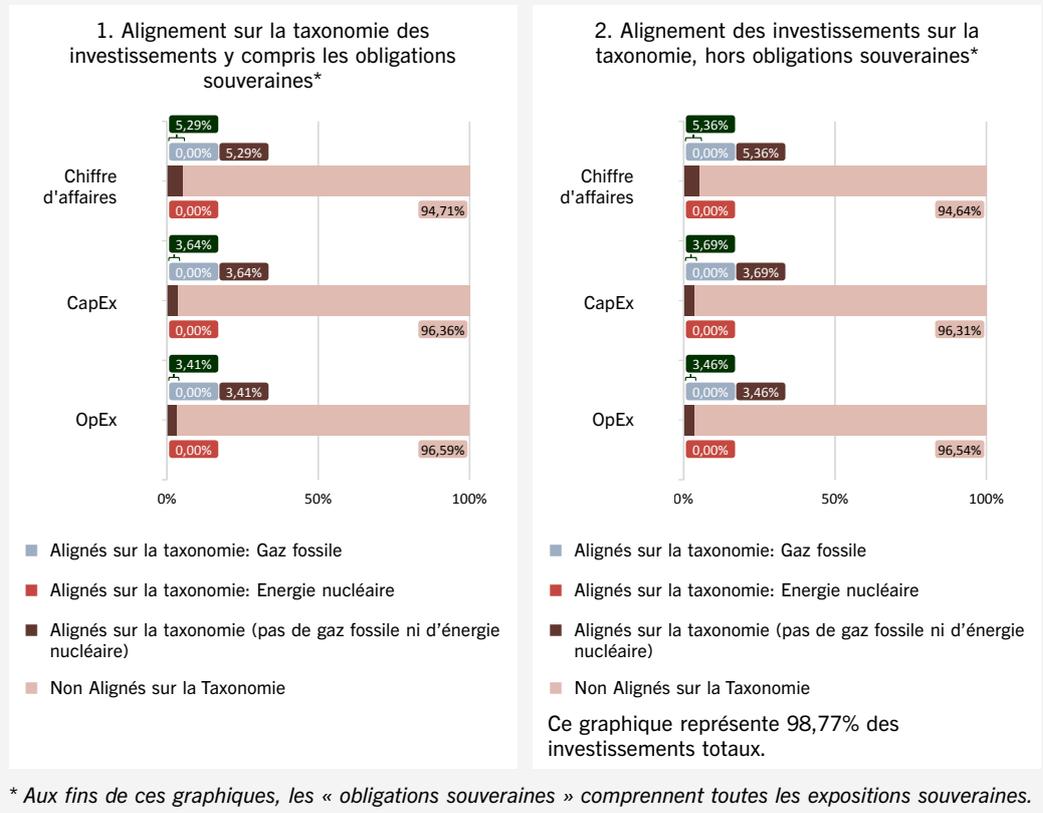

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

exhaustives de sûreté et de gestion des déchets.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:

- du **chiffre d'affaires** pour refléter le « caractère écologique » actuel des sociétés bénéficiaires des investissements;
- des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple;
- des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

- Actionnariat actif:

Le fonds a exercé ses droits de vote méthodiquement et s'est engagé (dialogue collaboratif) avec la direction des entreprises sélectionnées sur des questions ESG importantes.

- **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

- **Le pourcentage d'exposition du produit financier aux «investissements durables» tel que défini à l'article 2 (17) du SFDR:**

49,49%

- **Réduction de l'univers d'investissement en fonction des facteurs ESG**

Le fonds a réduit son univers d'investissement en supprimant au moins 20% des émetteurs présentant les risques les plus élevés en matière de durabilité et/ou des principales incidences négatives sur la société ou l'environnement.

Les risques de durabilité sont des risques ou des conditions liés à l'ESG qui pourraient avoir une incidence négative importante sur la valeur des investissements s'ils devaient se concrétiser. Les risques de durabilité incluaient, sans toutefois s'y limiter, le risque lié à la transition climatique, le risque climatique physique, le risque environnemental, le risque social, le risque de gouvernance. Des réexamens et des contrôles de risque périodiques sont instaurés pour un suivi de la mise en œuvre.

Les principales incidences négatives sont des effets négatifs, importants ou susceptibles d'être importants sur les facteurs de durabilité qui sont causés, aggravés par, ou directement liés aux décisions et conseils en matière d'investissement. Ces principales incidences négatives incluaient, entre autres, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption.

- **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	0,01	3,51
Armement	0,10	1,03
Autres activités controversées	0,00	0,89
Eligible:	99,74	100,00

**Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

(i) PIN 10: Violations des principes du Pacte mondial des Nations unies et des Principes directeurs de l'Organisation de coopération et de développement économiques (OCDE) à l'intention des entreprises multinationales.

(ii) PIN 14: Exposition à des armes controversées (mines antipersonnel, armes à sous-munitions, armes chimiques et armes biologiques).

- **Droits de vote**

- **Engagement**

Le fonds s'est engagé (dialogue collaboratif) avec 21 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les

interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

Le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 9,13%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 40,36%.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

- (i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.
- (ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● **Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?**

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions

environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à « ne pas causer de préjudice important » en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) vote par procuration

Le fonds a suivi les directives en matière de vote de Pictet Asset Management qui ont été conçues pour soutenir une culture solide de gouvernance d'entreprise, une gestion efficace des thématiques environnementales et sociales et un reporting complet conforme à des normes crédibles. Ces directives visent également à soutenir les organes de gouvernance mondiaux reconnus qui promeuvent des pratiques commerciales durables en faveur de la gérance de l'environnement, de pratiques de travail équitables, de la non-discrimination et de la protection des droits de l'homme. Toutes les activités de vote du fonds ont été enregistrées et peuvent être communiquées sur demande.

(iii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iv) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

49,49%

● Quelle était l'allocation des actifs?

Le fonds était aligné à 99,74% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 0,26% dans Autres (#2 Autres). 49,49% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

L'allocation des actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **#1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **#2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie **#1 Alignés sur les caractéristiques E/S** comprend:

- La sous-catégorie **#1A Durables** couvrant les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Le pourcentage d'investissements alignés sur la Taxonomie de l'UE durant la période de référence précédente était de 0,06%, contre 0,05% pour la période de référence actuelle.

Veillez noter que ce fonds n'avait pas d'engagement ex ante en matière de Taxonomie de l'UE.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

9,13%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social?

40,36%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

Au cours de la période de référence, les caractéristiques environnementales et/ou sociales ont été atteintes en suivant la stratégie d'investissement et en respectant les éléments contraignants.

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Note: Pictet Asset Management a eu recours à un cadre de référence exclusif pour définir les investissements durables. Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

- Actionnariat actif:

Le fonds a exercé ses droits de vote méthodiquement et s'est engagé (dialogue collaboratif) avec la direction des entreprises sélectionnées sur des questions ESG importantes.

● Quelle a été la performance des indicateurs de durabilité?

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

- **Le pourcentage d'exposition du produit financier aux «investissements durables» tel que défini à l'article 2 (17) du SFDR:**

75,12%

- **Profil ESG général**

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'indice de référence.

Le score ESG moyen pondéré du fonds a été de 0,23, contre -0,08 pour l'indice de référence. Un score plus élevé désigne un risque plus faible. Les scores vont de -2 à 1, 1 étant le meilleur.

Il convient de noter que le fonds a été classé Article 8 - Incidence positive pour 2024 (précédemment Article 8 - Approche à tendance positive).

- **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	0,00	3,53
Armement	0,19	0,97
Autres activités controversées	0,00	0,84
Eligible:	96,33	100,00
Couvert:	100,00	99,65

**Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.*

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

- **Engagement**

Le fonds s'est engagé (dialogue collaboratif) avec 11 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

(*) Pour les seuils d'exclusion appliqués, voir le tableau «Exclusions d'entreprises sur la base des activités controversées et des seuils de chiffre d'affaires» ci-dessus.

(**) L'exposition aux incidences négatives du produit est refondée sur la partie éligible du fonds. En 2024, les classes ont changé de «Non couvert» à «Couvert» et de «Non applicable» à «Eligible».

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

Le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 62,11%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 13,01%.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

- (i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.
- (ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

● *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à «ne pas causer de préjudice important» en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques et opportunités sur les plans environnemental, social et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) vote par procuration

Le fonds a suivi les directives en matière de vote de Pictet Asset Management qui ont été conçues pour soutenir une culture solide de gouvernance d'entreprise, une gestion efficace des thématiques environnementales et sociales et un reporting complet conforme à des normes crédibles. Ces directives visent également à soutenir les organes de gouvernance mondiaux reconnus qui promeuvent des pratiques commerciales durables en faveur de la gérance de l'environnement, de pratiques de travail équitables, de la non-discrimination et de la protection des droits de l'homme. Toutes les activités de vote du fonds ont été enregistrées et peuvent être communiquées sur demande.

(iii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs.

Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iv) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

75,12%

L'allocation des actifs décrit la part des investissements dans des actifs spécifiques.

● Quelle était l'allocation des actifs?

Le fonds était aligné à 96,33% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 3,67% dans Autres (#2 Autres). 75,12% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

La catégorie #1 **Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie #2 **Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie #1 **Alignés sur les caractéristiques E/S** comprend:

- La sous-catégorie #1A **Durables** couvrant les investissements durables sur le plan environnemental et social.

- La sous-catégorie #1B **Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

● **Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?**

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:
 - du **chiffre d'affaires** pour refléter le « caractère écologique » actuel des sociétés bénéficiaires des investissements;
 - des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple;
 - des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. - Actionnariat actif:

Le fonds a exercé ses droits de vote méthodiquement et s'est engagé (dialogue collaboratif) avec la direction des entreprises sélectionnées sur des questions ESG importantes.

● Quelle a été la performance des indicateurs de durabilité?

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

- **Le pourcentage d'exposition du produit financier aux «investissements durables» tel que défini à l'article 2 (17) du SFDR:**

82,22%

- **Profil ESG général**

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'indice de référence.

Le score ESG moyen pondéré du fonds a été de 0,38, contre 0,02 pour l'indice de référence. Un score plus élevé désigne un risque plus faible. Les scores vont de -2 à 1, 1 étant le meilleur.

- **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)

Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. ● Engagement

Le fonds s'est engagé (dialogue collaboratif) avec 22 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

Le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 39,76%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 42,46%.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

- (i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.
- (ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes,

inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

- *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à « ne pas causer de préjudice important » en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

- (i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques et opportunités sur les plans environnemental, social et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les

entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) vote par procuration

Le fonds a suivi les directives en matière de vote de Pictet Asset Management qui ont été conçues pour soutenir une culture solide de gouvernance d'entreprise, une gestion efficace des thématiques environnementales et sociales et un reporting complet conforme à des normes crédibles. Ces directives visent également à soutenir les organes de gouvernance mondiaux reconnus qui promeuvent des pratiques commerciales durables en faveur de la gérance de l'environnement, de pratiques de travail équitables, de la non-discrimination et de la protection des droits de l'homme. Toutes les activités de vote du fonds ont été enregistrées et peuvent être communiquées sur demande.

(iii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs.

Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iv) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

82,22%

L'allocation des actifs décrit la part des investissements dans des actifs spécifiques.

● Quelle était l'allocation des actifs?

Le fonds était aligné à 98,30% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 1,70% dans Autres (#2 Autres). 82,22% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

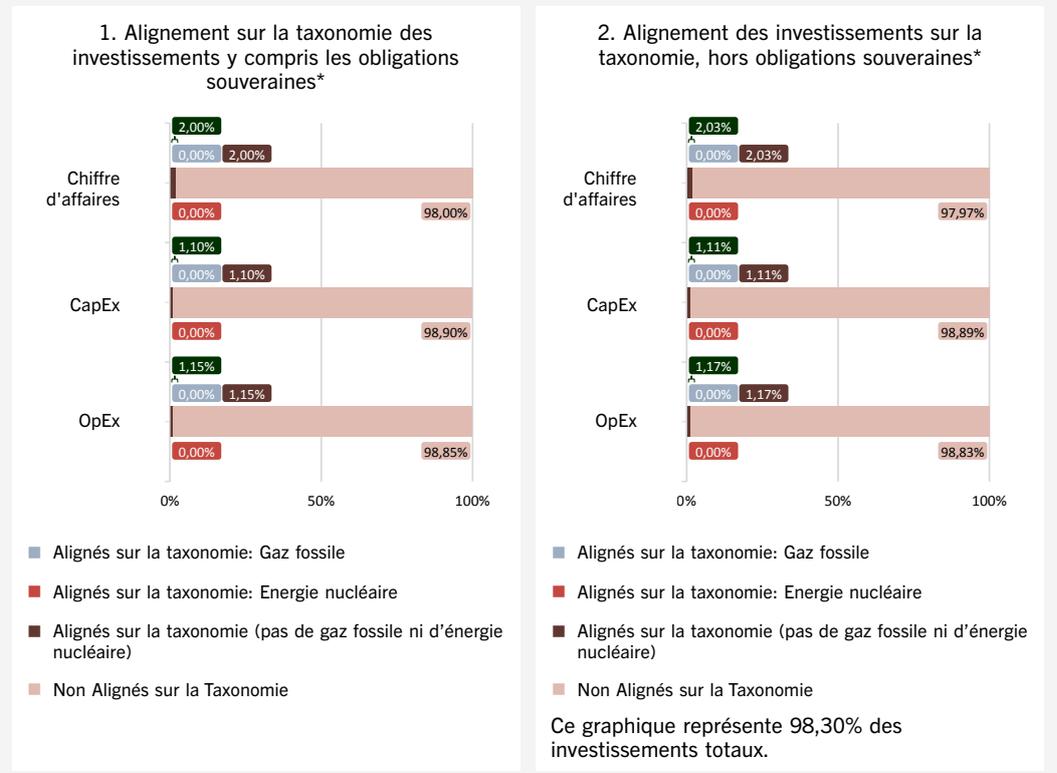

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:
 - du **chiffre d'affaires** pour refléter le «caractère écologique» actuel des sociétés bénéficiaires des investissements;
 - des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition verte par exemple;
 - des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

- Oui:
 Dans le gaz fossile Dans l'énergie nucléaire
 Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

La part des investissements réalisés dans:

- Des activités transitoires: 0,00%
- Des activités habilitantes: 0,60%

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Le pourcentage d'investissements alignés sur la Taxonomie de l'UE durant la période de référence précédente était de 1,31%, contre 2,00% pour la période de référence actuelle.

Veillez noter que ce fonds n'avait pas d'engagement ex ante en matière de Taxonomie de l'UE.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

39,76%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social?

42,46%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

Au cours de la période de référence, les caractéristiques environnementales et/ou sociales ont été atteintes en suivant la stratégie d'investissement et en respectant les éléments contraignants.

Les éléments contraignants du fonds comprennent:

- au moins 51% d'investissements durables, c'est-à-dire d'investissements dans des entreprises exposées de manière significative à des activités telles que les produits et services soutenant la transition énergétique, l'économie circulaire, l'efficacité énergétique, la qualité et l'approvisionnement en eau, la foresterie durable, les villes durables, la nutrition, la santé humaine et les traitements, l'épanouissement personnel et la sécurité, ainsi que d'autres activités économiques pertinentes (comme mesuré par le chiffre d'affaires, la valeur de l'entreprise, les bénéfices avant intérêts et impôts, ou similaires)
- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes controversées, y compris les mines antipersonnel, les armes à sous-munition, les armes biologiques et chimiques, les armes nucléaires et l'uranium appauvri
 - tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, telles que l'extraction de charbon thermique et la production d'électricité, l'exploration et l'extraction de pétrole et de gaz non conventionnels, la production de pétrole et de gaz conventionnels, la production d'énergie nucléaire, les armements militaires, les produits et services liés aux armes, les armes légères, les boissons alcoolisées, la production de tabac, la production de divertissement pour adultes, les opérations de jeux d'argent et les équipements spécialisés, le développement et la croissance d'organismes génétiquement modifiés, la production et la vente au détail de pesticides, et la production et la distribution d'huile de palme. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur les secteurs exclus et sur les seuils d'exclusion.

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

- Actionnariat actif:

Le fonds a exercé ses droits de vote méthodiquement et s'est engagé (dialogue collaboratif) avec la direction des entreprises sélectionnées sur des questions ESG importantes.

● Quelle a été la performance des indicateurs de durabilité?

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

- **Le pourcentage d'exposition du produit financier aux «investissements durables» tel que défini à l'article 2 (17) du SFDR:**

72,42%

- **Profil ESG général**

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'indice de référence.

Le score ESG moyen pondéré du fonds a été de 0,44, contre 0,02 pour l'indice de référence. Un score plus élevé désigne un risque plus faible. Les scores vont de -2 à 1, 1 étant le meilleur.

- **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	0,00	3,53
Armement	0,00	0,97
Autres activités controversées	0,19	0,84
Eligible:	99,28	100,00
Couvert:	100,00	99,65

*Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

(i) PIN 10: Violations des principes du Pacte mondial des Nations unies et des Principes directeurs de l'Organisation de coopération et de développement économiques (OCDE) à l'intention des entreprises multinationales.

(ii) PIN 14: Exposition à des armes controversées (mines antipersonnel, armes à sous-munitions, armes chimiques et armes biologiques).

- **Droits de vote**

Durant la période de référence, le fonds a voté à 32 assemblées générales sur 32 assemblées avec vote (100,00%). Nous avons voté «contre» (y compris les «abstentions» ou «refus») une résolution au moins à 43,75% des assemblées.

En ce qui concerne les questions environnementales et/ou sociales, nous avons voté pour 2 résolutions de la direction sur 2, et pour 6 résolutions d'actionnaires sur 12.

● Engagement

Le fonds s'est engagé (dialogue collaboratif) avec 5 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

Le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 4,68%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 67,73%.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

- (i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.
- (ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes,

inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

- *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à « ne pas causer de préjudice important » en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

- (i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques et opportunités sur les plans environnemental, social et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les

entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) vote par procuration

Le fonds a suivi les directives en matière de vote de Pictet Asset Management qui ont été conçues pour soutenir une culture solide de gouvernance d'entreprise, une gestion efficace des thématiques environnementales et sociales et un reporting complet conforme à des normes crédibles. Ces directives visent également à soutenir les organes de gouvernance mondiaux reconnus qui promeuvent des pratiques commerciales durables en faveur de la gérance de l'environnement, de pratiques de travail équitables, de la non-discrimination et de la protection des droits de l'homme. Toutes les activités de vote du fonds ont été enregistrées et peuvent être communiquées sur demande.

(iii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs.

Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iv) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

72,42%

L'allocation des actifs décrit la part des investissements dans des actifs spécifiques.

● **Quelle était l'allocation des actifs?**

Le fonds était aligné à 99,28% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 0,72% dans Autres (#2 Autres). 72,42% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Non applicable.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

Oui:

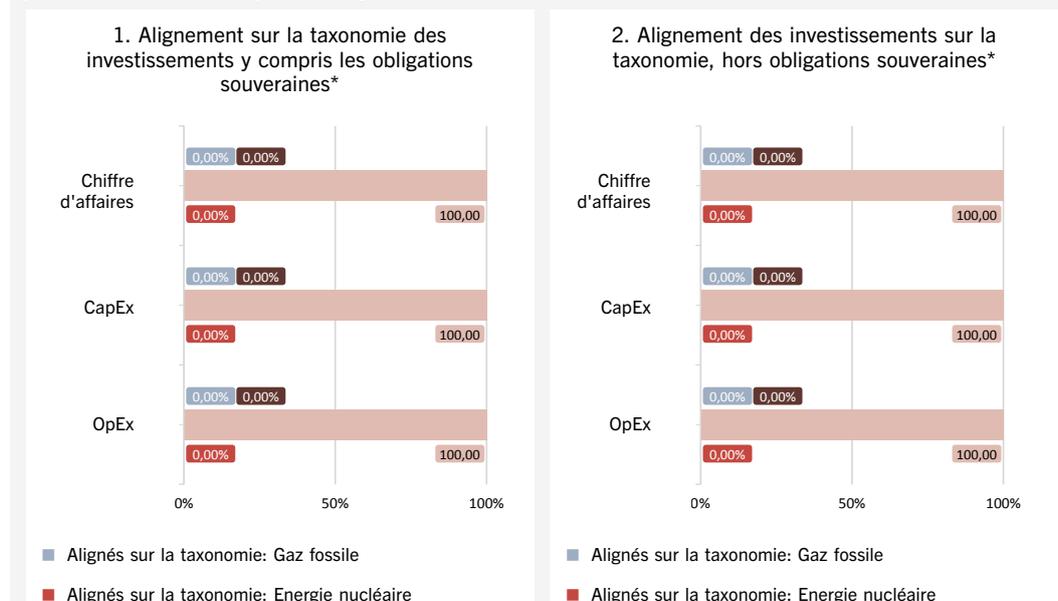

Dans le gaz fossile Dans l'énergie nucléaire

Non

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

Les activités alignées sur la taxonomie de l'UE sont exprimées en pourcentage:
- du **chiffre d'affaires** pour refléter le «caractère écologique» actuel des sociétés bénéficiaires des investissements;
- des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple;
- des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

- Alignés sur la taxonomie (pas de gaz fossile ni d'énergie nucléaire)
- Non Alignés sur la Taxonomie

- Alignés sur la taxonomie (pas de gaz fossile ni d'énergie nucléaire)
- Non Alignés sur la Taxonomie

Ce graphique représente 99,28% des investissements totaux.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

Non applicable.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Non applicable.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

4,68%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social?

67,73%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité

et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur les secteurs exclus et sur les seuils d'exclusion.
 - violent gravement les normes internationales, y compris les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption
- un profil ESG supérieur à celui de l'indice de référence
- analyse des critères ESG des titres éligibles couvrant au moins 90% de l'actif net ou du nombre d'émetteurs présents dans le portefeuille

En outre, le fonds s'est engagé (dialogue collaboratif) avec 5 entreprises au 30 septembre 2024.

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Note: Pictet Asset Management a eu recours à un cadre de référence exclusif pour définir les investissements durables. Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

- Actionnariat actif:

Le fonds a exercé ses droits de vote méthodiquement et s'est engagé (dialogue collaboratif) avec la direction des entreprises sélectionnées sur des questions ESG importantes.

- **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

- **Le pourcentage d'exposition du produit financier aux «investissements durables» tel que défini à l'article 2 (17) du SFDR:**

55,95%

- **Degré d'alignement sur les ODD**

Le compartiment a utilisé un indicateur systématique exclusif basé sur une technologie de traitement du langage naturel pour estimer l'alignement des produits et services de chaque émetteur sur tous les ODD pertinents. Les résultats de cet indicateur sont fournis dans la documentation de présentation du niveau de stratégie.

- **Réduction de l'univers d'investissement en fonction des facteurs ESG**

Le fonds a réduit son univers d'investissement en supprimant au moins 20% des émetteurs présentant les risques les plus élevés en matière de durabilité et/ou des principales incidences négatives sur la société ou l'environnement.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

Les risques de durabilité sont des risques ou des conditions liés à l'ESG qui pourraient avoir une incidence négative importante sur la valeur des investissements s'ils devaient se concrétiser. Les risques de durabilité incluaient, sans toutefois s'y limiter, le risque lié à la transition climatique, le risque climatique physique, le risque environnemental, le risque social, le risque de gouvernance. Des réexamens et des contrôles de risque périodiques sont instaurés pour un suivi de la mise en œuvre.

Les principales incidences négatives sont des effets négatifs, importants ou susceptibles d'être importants sur les facteurs de durabilité qui sont causés, aggravés par, ou directement liés aux décisions et conseils en matière d'investissement. Ces principales incidences négatives incluaient, entre autres, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption.

- **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	2,62	3,53
Armement	0,20	0,97
Autres activités controversées	0,00	0,84
Eligible:	99,45	100,00
Couvert:	100,00	99,65

**Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.*

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

(i) PIN 10: Violations des principes du Pacte mondial des Nations unies et des Principes directeurs de l'Organisation de coopération et de développement économiques (OCDE) à l'intention des entreprises multinationales.

(ii) PIN 14: Exposition à des armes controversées (mines antipersonnel, armes à sous-munitions, armes chimiques et armes biologiques).

- **Droits de vote**

- **Engagement**

Le fonds s'est engagé (dialogue collaboratif) avec 18 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

Les résultats individuels des émetteurs ont été combinés, sur une base sectorielle relative, pour fournir une évaluation de portefeuille de l'alignement sur les ODD - montrant l'alignement global positif, négatif et moyen sur les 14 ODD pertinents. L'alignement sur les ODD au niveau du portefeuille est indiqué chaque trimestre dans la documentation relative au rapport sur les compartiments. ● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

Le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 31,51%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 24,44%.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

- (i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.
- (ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une

stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

- *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à «ne pas causer de préjudice important» en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies

par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) vote par procuration

Le fonds a suivi les directives en matière de vote de Pictet Asset Management qui ont été conçues pour soutenir une culture solide de gouvernance d'entreprise, une gestion efficace des thématiques environnementales et sociales et un reporting complet conforme à des normes crédibles. Ces directives visent également à soutenir les organes de gouvernance mondiaux reconnus qui promeuvent des pratiques commerciales durables en faveur de la gérance de l'environnement, de pratiques de travail équitables, de la non-discrimination et de la protection des droits de l'homme. Toutes les activités de vote du fonds ont été enregistrées et peuvent être communiquées sur demande.

(iii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iv) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

55,95%

L'allocation des actifs décrit la part des investissements dans des actifs spécifiques.

● **Quelle était l'allocation des actifs?**

Le fonds était aligné à 99,45% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 0,55% dans Autres (#2 Autres). 55,95% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

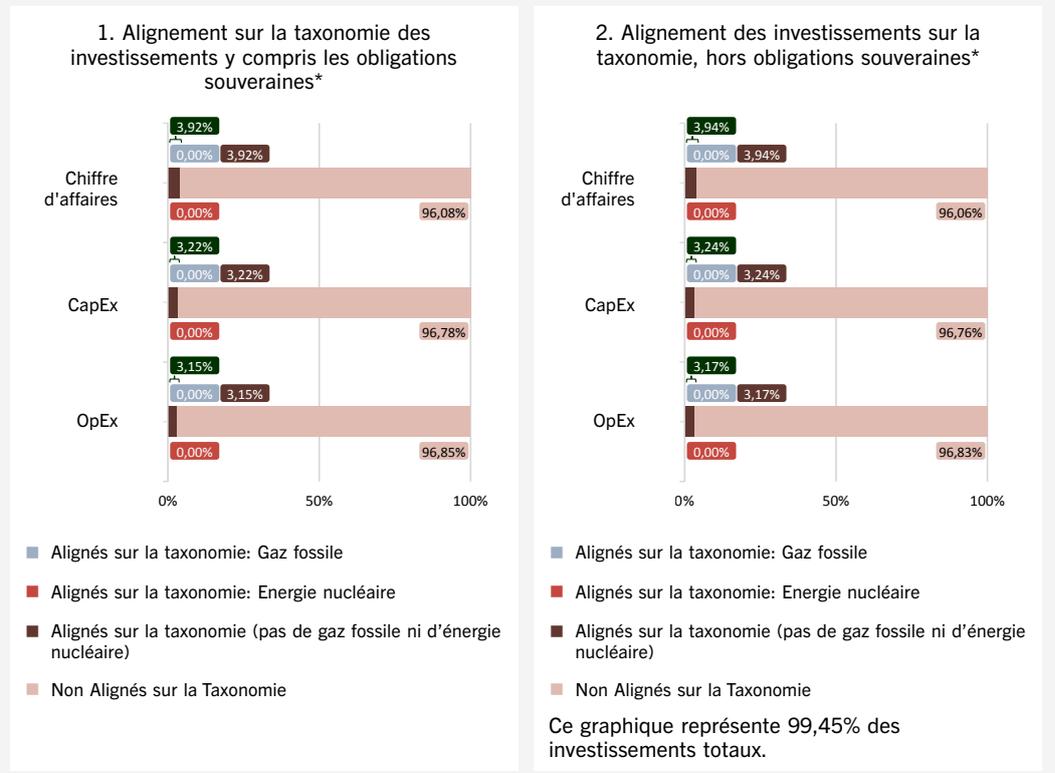

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:
 - du **chiffre d'affaires** pour refléter le «caractère écologique» actuel des sociétés bénéficiaires des investissements;
 - des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition verte par exemple;
 - des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

- Oui:
 Dans le gaz fossile Dans l'énergie nucléaire
 Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

La part des investissements réalisés dans:

- Des activités transitoires: 0,00%
- Des activités habilitantes: 0,28%

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Le pourcentage d'investissements alignés sur la Taxonomie de l'UE durant la période de référence précédente était de 2,38%, contre 3,92% pour la période de référence actuelle.

Veillez noter que ce fonds n'avait pas d'engagement ex ante en matière de Taxonomie de l'UE.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

31,51%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social?

24,44%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

Au cours de la période de référence, les caractéristiques environnementales et/ou sociales ont été atteintes en suivant la stratégie d'investissement et en respectant les éléments contraignants.

Les éléments contraignants du fonds comprennent:

- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes nucléaires de pays qui ne sont pas signataires du Traité sur la non-prolifération des armes nucléaires (TNP), et dans la production d'autres armes controversées
 - tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, telles que l'extraction de charbon thermique et la production d'électricité, la production de pétrole et de gaz non conventionnels, les armements militaires et les armes légères, les produits du tabac, les opérations de jeux d'argent et la production de divertissement pour adultes. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur les seuils d'exclusion.
 - violent gravement les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption.
- analyse des critères ESG des titres éligibles couvrant au moins 90% de l'actif net ou du nombre d'émetteurs présents dans le portefeuille

En outre, le fonds s'est engagé (dialogue collaboratif) avec 18 entreprises au 30 septembre 2024.

OBJECTIF D'INVESTISSEMENT DURABLE

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Note: Pictet Asset Management a eu recours à un cadre de référence exclusif pour définir les investissements durables. Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

Dans quelle mesure l'objectif d'investissement durable de ce produit financier a-t-il été atteint?

Principaux moyens par lesquels le fonds a atteint son objectif durable:

- Impact positif:

Le fonds a produit un impact environnemental et/ou social positif en investissant principalement dans des entreprises à faible empreinte environnementale dont les produits et services contribuent à résoudre deux problèmes environnementaux étroitement liés: la biodiversité et l'économie circulaire.

Aucun indice de référence n'a été désigné aux fins de la réalisation de l'objectif d'investissement durable.

Le fonds a investi principalement dans des entreprises dont les activités concernent en grande partie, mais sans s'y limiter, les ressources renouvelables, l'éco-conception, la production optimisée, le cycle biologique, la consommation intelligente, la valorisation des déchets et d'autres activités économiques pertinentes.

Les titres éligibles comprenaient les actions émises par des sociétés dont une part significative des activités (telle que mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) provient de ce type d'activités économiques.

- Exclusions fondées sur les normes et les valeurs:

Le fonds a exclu les émetteurs qui exercent des activités importantes ayant une incidence négative sur la société ou l'environnement, ou qui enfreignent gravement les normes internationales comme détaillé ci-dessous:

Veillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails. Notez que notre cadre d'exclusion a été mis à jour au cours de l'année 2024.

En plus des exclusions susmentionnées basées sur la politique d'Investissement Responsable de Pictet Asset Management, la stratégie a appliqué des limites d'exclusion plus strictes fondées sur des directives internes.

- **Actionnariat actif:**

Le fonds a exercé méthodiquement ses droits de vote. Le fonds s'est également engagé (dialogue collaboratif) avec la direction d'entreprises sélectionnées sur des questions ESG importantes.

- **Investissements durables:**

Pictet Asset Management a eu recours à un cadre exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

Le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 59,85%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 38,27%.

- **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

- **Le pourcentage d'exposition du produit financier aux «investissements durables» tel que défini à l'article 2 (17) du SFDR:**

98,12%

- **Profil ESG général**

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'indice de référence.

Le score ESG moyen pondéré du fonds a été de 0,58, contre 0,02 pour l'indice de référence. Un score plus élevé désigne un risque plus faible. Les scores vont de -2 à 1, 1 étant le meilleur.

- **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Les indicateurs de durabilité permettent de mesurer la manière dont les objectifs de durabilité de ce produit financier sont atteints.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'investissement responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, comme détaillé ci-dessous:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	0,01	3,53
Armement	0,03	0,97
Autres activités controversées	0,06	0,84
Eligible:	98,12	100,00
Couvert:	100,00	99,65

*Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

(i) PIN 10: Violations des principes du Pacte mondial des Nations unies et des Principes directeurs de l'Organisation de coopération et de développement économiques (OCDE) à l'intention des entreprises multinationales.

(ii) PIN 14: Exposition à des armes controversées (mines antipersonnel, armes à sous-munitions, armes chimiques et armes biologiques).

• Engagement

Le fonds s'est engagé (dialogue collaboratif) avec 22 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

(*) Pour les seuils d'exclusion appliqués, voir le tableau «Exclusions d'entreprises sur la base des activités controversées et des seuils de chiffre d'affaires» ci-dessus.

(**) L'exposition aux incidences négatives du produit est refundée sur la partie éligible du fonds. En 2024, les classes ont changé de «Non couvert» à «Couvert» et de «Non applicable» à «Eligible».

● **Dans quelle mesure les investissements durables n'ont-ils pas causé de préjudice important à un objectif d'investissement durable?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

(i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.

(ii) Les émetteurs associés à des controverses importantes et graves ont été exclus.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

● *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques et opportunités sur les plans environnemental, social et de gouvernance, et de l'exposition aux investissements durables, dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) vote par procuration

Le fonds a suivi les directives en matière de vote de Pictet Asset Management qui ont été conçues pour soutenir une culture solide de gouvernance d'entreprise, une gestion efficace des thématiques environnementales et sociales et un reporting complet conforme à des normes crédibles. Ces directives visent également à soutenir les organes de gouvernance mondiaux reconnus qui promeuvent des pratiques commerciales durables en faveur de la gérance de l'environnement, de pratiques de travail équitables, de la non-discrimination et de la protection des droits de l'homme. Toutes les activités de vote du fonds ont été enregistrées et peuvent être communiquées sur demande.

(iii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous avons eu un dialogue collaboratif avec les émetteurs afin de s'attaquer à des préoccupations ESG importantes, d'améliorer les pratiques des entreprises en matière de durabilité, ou de s'engager sur des sujets à incidence positive afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iv) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

98,12%

● Quelle était l'allocation des actifs?

Le fonds a alloué 98,12% de ses actifs à des Investissements durables (#1 Durables) et 1,88% à des Investissements non durables (#2 Non durables). 59,85% de ses actifs sont alloués à des objectifs environnementaux et 38,27% à des objectifs sociaux.

N°1 Durable couvre les investissements durables aux objectifs environnementaux ou sociaux.

N°2 Non durable inclut les investissements qui ne répondent pas à la définition des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

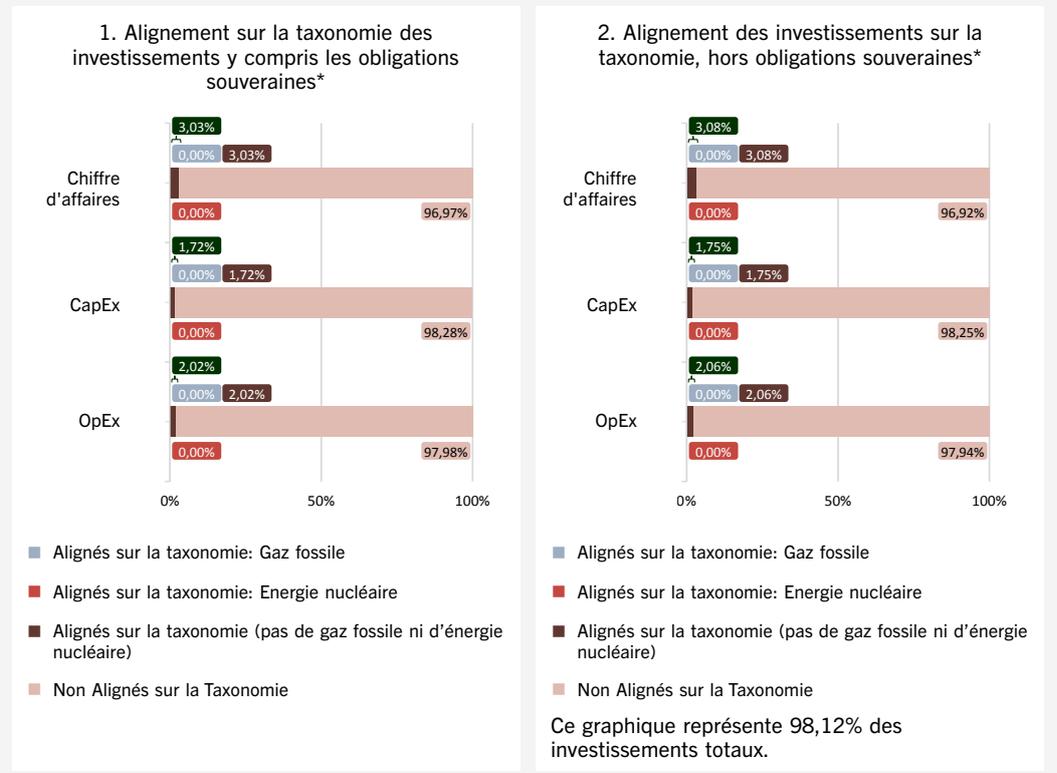

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:
 - du **chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires des investissements ;
 - des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple.
 - des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

- Oui:
 Dans le gaz fossile Dans l'énergie nucléaire
 Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

La part des investissements réalisés dans:

- Des activités transitoires: 0,00%
- Des activités habilitantes: 1,27%

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Le pourcentage d'investissements alignés sur la Taxonomie de l'UE durant la période de référence précédente était de 3,33%, contre 3,03% pour la période de référence actuelle.

Veillez noter que ce fonds n'avait pas d'engagement ex ante en matière de Taxonomie de l'UE.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

59,85%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères applicables** aux activités économiques durables sur le plan environnemental au titre de la taxonomie de l'UE.

Quelle était la part d'investissements durables sur le plan social?

38,27%

Quels étaient les investissements inclus dans la catégorie «non durables», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les investissements «non durables» du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour atteindre l'objectif d'investissement durable au cours de la période de référence?

Au cours de la période de référence, l'objectif d'investissement durable a été réalisé en suivant la stratégie d'investissement et en respectant les éléments contraignants.

- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes controversées, y compris les mines antipersonnel, les armes à sous-munition, les armes biologiques et chimiques, les armes nucléaires et l'uranium appauvri
 - tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, telles que l'extraction de charbon thermique et la production d'électricité, l'exploration et l'extraction de pétrole et de gaz non conventionnels, la production de pétrole et de gaz conventionnels, la production d'énergie nucléaire, les armements militaires, les produits et services liés aux armes, les armes légères, les boissons alcoolisées, la production de tabac, la production de divertissement pour adultes, les opérations de jeux d'argent et les équipements spécialisés, le développement et la croissance d'organismes génétiquement modifiés, la production et la vente au détail de pesticides, et la production et la distribution d'huile de palme. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur les secteurs exclus et sur les seuils d'exclusion

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La taxonomie de l'UE est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Note: Pictet Asset Management a eu recours à un cadre de référence exclusif pour définir les investissements durables. Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

Dans quelle mesure l'objectif d'investissement durable de ce produit financier a-t-il été atteint?

Principaux moyens par lesquels le fonds a atteint son objectif durable:

- Impact positif:

Ce fonds a produit un impact environnemental et/ou social positif en investissant principalement dans des entreprises chinoises à faible empreinte environnementale qui contribuent à résoudre les problèmes environnementaux dans le monde entier en proposant des produits et services dans la chaîne de valeur environnementale. Ces produits et services sont nécessaires pour soutenir la transition vers une économie à plus faible intensité de carbone, un modèle d'économie circulaire, pour contrôler et empêcher la pollution ou, par exemple, pour protéger les ressources rares telles que l'eau.

Aucun indice de référence n'a été désigné aux fins de la réalisation de l'objectif d'investissement durable.

Le fonds a investi principalement dans des sociétés dont une part importante des activités est liée, sans s'y limiter, aux énergies renouvelables, aux transports verts, à la décarbonation industrielle, à l'efficacité des ressources et à la protection de l'environnement.

Les titres éligibles comprenaient les actions émises par des sociétés dont une part significative des activités (telle que mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) provient de ce type d'activités économiques.

- Exclusions fondées sur les normes et les valeurs:

Le fonds a exclu les émetteurs qui exercent des activités importantes ayant une incidence négative sur la société ou l'environnement, ou qui enfreignent gravement les normes internationales comme détaillé ci-dessous:

[2] S'applique uniquement aux Investissements durables.

Veillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails. Notez que notre cadre d'exclusion a été mis à jour au cours de l'année 2024.

En plus des exclusions susmentionnées basées sur la politique d'Investissement Responsable de Pictet Asset Management, la stratégie a appliqué des limites d'exclusion plus strictes fondées sur des directives internes.

- **Actionnariat actif:**

Le fonds a exercé méthodiquement ses droits de vote. Le fonds s'est également engagé (dialogue collaboratif) avec la direction d'entreprises sélectionnées sur des questions ESG importantes.

- **Investissements durables:**

Pictet Asset Management a eu recours à un cadre exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

Le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 77,79%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 17,99%.

- **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

- **Le pourcentage d'exposition du produit financier aux «investissements durables» tel que défini à l'article 2 (17) du SFDR:**

95,78%

- **Profil ESG général**

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'indice de référence après avoir retiré les 20% d'émetteurs ayant les notes ESG les plus faibles..

Le score ESG moyen pondéré du fonds a été de 0,60, contre 0,09 pour l'indice de référence. Un score plus élevé désigne un risque ESG plus faible. Les scores vont de -2 à 1, 1 étant le meilleur.

- **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Les indicateurs de durabilité permettent de mesurer la manière dont les objectifs de durabilité de ce produit financier sont atteints.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'investissement responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, comme détaillé ci-dessous:

• Engagement

Le fonds s'est engagé (dialogue collaboratif) avec 2 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

(*) Pour les seuils d'exclusion appliqués, voir le tableau «Exclusions d'entreprises sur la base des activités controversées et des seuils de chiffre d'affaires» ci-dessus.

(**) L'exposition aux incidences négatives du produit est refondée sur la partie éligible du fonds. En 2024, les classes ont changé de «Non couvert» à «Couvert» et de «Non applicable» à «Eligible».

● **Dans quelle mesure les investissements durables n'ont-ils pas causé de préjudice important à un objectif d'investissement durable?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

(i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.

(ii) Les émetteurs associés à des controverses importantes et graves ont été exclus.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

● *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques et opportunités sur les plans environnemental, social et de gouvernance, et de l'exposition aux investissements durables, dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) vote par procuration

Le fonds a suivi les directives en matière de vote de Pictet Asset Management qui ont été conçues pour soutenir une culture solide de gouvernance d'entreprise, une gestion efficace des thématiques environnementales et sociales et un reporting complet conforme à des normes crédibles. Ces directives visent également à soutenir les organes de gouvernance mondiaux reconnus qui promeuvent des pratiques commerciales durables en faveur de la gérance de l'environnement, de pratiques de travail équitables, de la non-discrimination et de la protection des droits de l'homme. Toutes les activités de vote du fonds ont été enregistrées et peuvent être communiquées sur demande.

(iii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous avons eu un dialogue collaboratif avec les émetteurs afin de s'attaquer à des préoccupations ESG importantes, d'améliorer les pratiques des entreprises en matière de durabilité, ou de s'engager sur des sujets à incidence positive afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iv) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

95,78%

● Quelle était l'allocation des actifs?

Le fonds a alloué 95,78% de ses actifs à des Investissements durables (#1 Durables) et 4,22% à des Investissements non durables (#2 Non durables). 77,79% de ses actifs sont alloués à des objectifs environnementaux et 17,99% à des objectifs sociaux.

N°1 Durable couvre les investissements durables aux objectifs environnementaux ou sociaux.

N°2 Non durable inclut les investissements qui ne répondent pas à la définition des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

● **Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?**

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

Oui:

Dans le gaz fossile Dans l'énergie nucléaire

Non

Pour respecter la Taxonomie de l'UE, les critères pour le gaz fossile incluent des limites d'émissions et le passage à des énergies renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'énergie

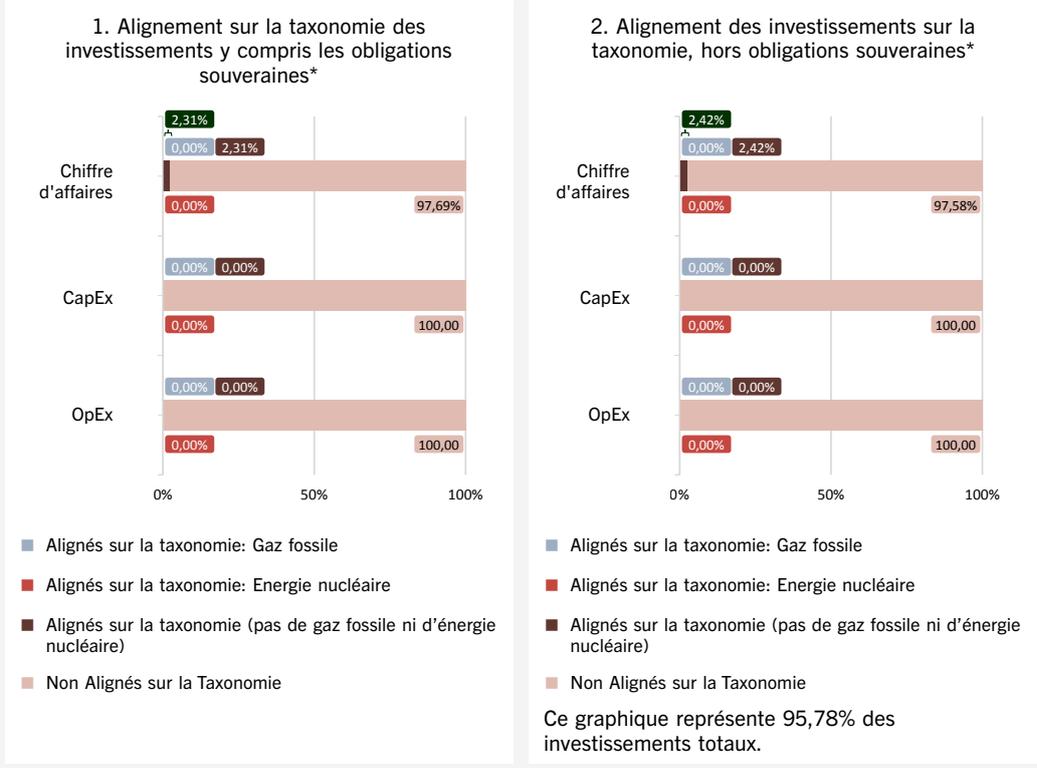

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

nucléaire, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:

- du **chiffre d'affaires** pour refléter la part des revenus provenant des activités vertes des sociétés bénéficiaires des investissements ;
- des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte, par exemple.
- des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Le pourcentage d'investissements alignés sur la Taxonomie de l'UE durant la période de référence précédente était de 1,48%, contre 2,31% pour la période de référence actuelle.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

77,79%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères applicables** aux activités économiques durables sur le plan environnemental au titre de la taxonomie de l'UE.

Quelle était la part d'investissements durables sur le plan social?

17,99%

Quels étaient les investissements inclus dans la catégorie «non durables», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Note: Pictet Asset Management a eu recours à un cadre de référence exclusif pour définir les investissements durables. Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été atteintes?

Les caractéristiques environnementales et sociales de ce fonds incluaient:

- Orientation favorable:

Le fonds a augmenté la pondération des titres présentant de faibles risques en matière de durabilité et/ou a diminué celle des titres présentant des risques élevés en matière de durabilité et en conséquence, il a présenté un profil environnemental, social et de gouvernance (ESG) meilleur que celui de l'indice de référence. L'indice MSCI World a été utilisé pour mesurer l'approche à tendance positive; toutefois, aucun indice de référence n'a été désigné aux fins d'atteindre les caractéristiques environnementales ou sociales promues par le fonds.

- Exclusions fondées sur les normes et les valeurs:

Le fonds a exclu les émetteurs qui exercent des activités importantes ayant une incidence négative sur la société ou l'environnement, ou qui enfreignent gravement les normes internationales comme détaillé ci-dessous:

- Actionnariat actif:

Le fonds a exercé ses droits de vote méthodiquement et s'est engagé (dialogue collaboratif) avec la direction des entreprises sélectionnées sur des questions ESG importantes.

- **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

- **Profil ESG général**

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'indice de référence.

Le score ESG moyen pondéré du fonds a été de 7,98, contre 7,95 pour l'indice de référence. Un score plus élevé désigne un risque plus faible. Les scores vont de 0 à 10, 10 étant le meilleur.

- **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	3,84	3,45
Armement	0,29	1,03
Autres activités controversées	0,10	0,88
Eligible:	99,60	100,00
Couvert:	99,66	99,66

*Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et la gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

(i) PIN 10: Violations des principes du Pacte mondial des Nations unies et des Principes directeurs de l'Organisation de coopération et de développement économiques (OCDE) à l'intention des entreprises multinationales.

(ii) PIN 14: Exposition à des armes controversées (mines antipersonnel, armes à sous-munitions, armes chimiques et armes biologiques).

● Droits de vote

En ce qui concerne les questions environnementales et/ou sociales, nous avons voté pour 43 résolutions de la direction sur 47, et pour 41 résolutions d'actionnaires sur 67.

● Engagement

Le fonds s'est engagé (dialogue collaboratif) avec 63 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

● ...et par rapport aux périodes précédentes?

Non applicable.

● Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?

Le fonds ne s'est pas engagé dans une proportion minimale d'investissements durables.

Toutefois, ex-post, le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 17,21%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 27,40%.

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

(i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.

(ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à « ne pas causer de préjudice important » en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) vote par procuration

Le fonds a suivi les directives en matière de vote de Pictet Asset Management qui ont été conçues pour soutenir une culture solide de gouvernance d'entreprise, une gestion efficace des thématiques environnementales et sociales et un reporting complet conforme à des normes crédibles. Ces directives visent également à soutenir les organes de gouvernance mondiaux reconnus qui promeuvent des pratiques commerciales durables en faveur de la gérance de l'environnement, de pratiques de travail équitables, de la non-discrimination et de la protection des droits de l'homme. Toutes les activités de vote du fonds ont été enregistrées et peuvent être communiquées sur demande.

(iii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iv) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

44,62%

L'allocation des actifs décrit la part des investissements dans des actifs spécifiques.

● Quelle était l'allocation des actifs?

Le fonds était aligné à 98,60% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 1,40% dans Autres (#2 Autres). 44,62% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

La catégorie **#1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **#2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie **#1 Alignés sur les caractéristiques E/S** comprend:

- La sous-catégorie **#1A Durables** couvrant les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

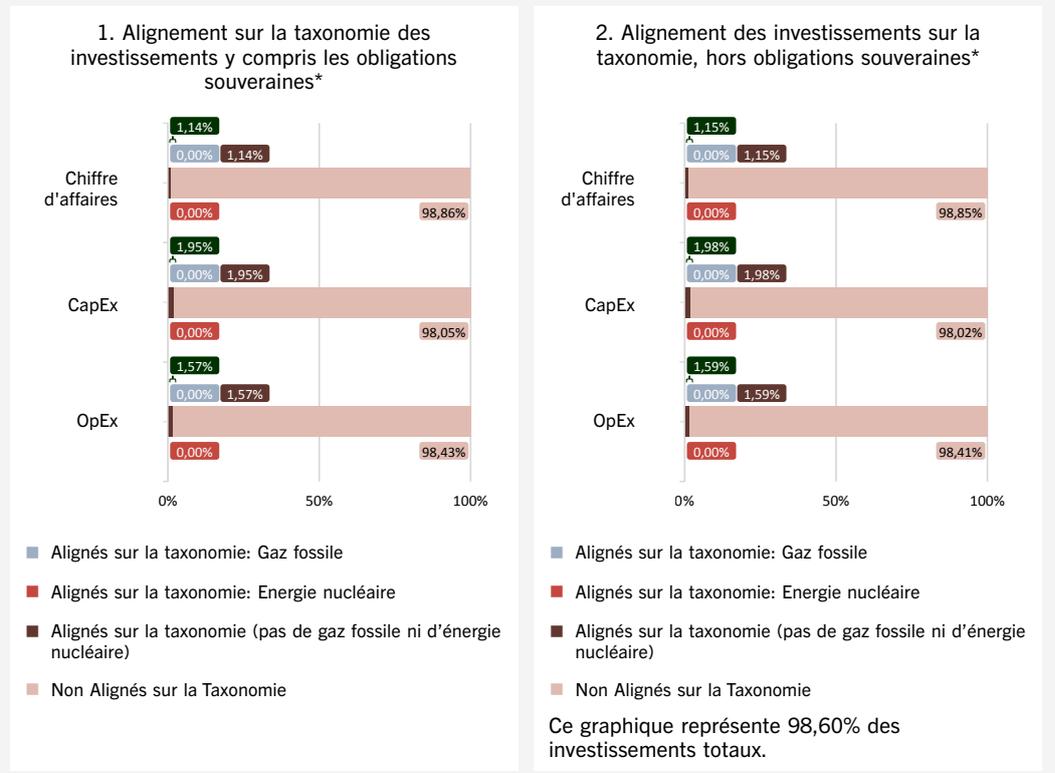

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:
 - du **chiffre d'affaires** pour refléter le «caractère écologique» actuel des sociétés bénéficiaires des investissements;
 - des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition verte par exemple;
 - des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

- Oui:
 Dans le gaz fossile Dans l'énergie nucléaire
 Non

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

Source: Pictet Asset Management, MSCI.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

La part des investissements réalisés dans:

- Des activités transitoires: 0,03%
- Des activités habilitantes: 0,83%

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

- **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Non applicable.

- Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?**

17,21%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Note: Pictet Asset Management a eu recours à un cadre de référence exclusif pour définir les investissements durables. Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

Le vote par procuration et le processus d'engagement (dialogue collaboratif) étaient principalement menés par des professionnels de l'investissement au sein de plusieurs équipes d'investissement chez Pictet Asset Management, avec le soutien d'une équipe ESG centrale.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● Quelle a été la performance des indicateurs de durabilité?

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

● Profil ESG général

Le score ESG moyen pondéré du fonds a été meilleur que celui de l'univers d'investissement.

Le score ESG moyen pondéré du fonds a été de 5,21, contre 5,00 pour l'univers d'investissement. Un score plus élevé désigne un risque plus faible. Les scores vont de 0 à 10, 10 étant le meilleur.

● Principales incidences négatives (PIN)

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	1,45	N/A
Armement	0,09	N/A
Autres activités controversées	0,11	N/A
Eligible:	52,50	N/A
Couvert:	97,25	N/A

**Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

● Engagement

Le fonds s'est engagé (dialogue collaboratif) avec 246 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un

objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

(*) Pour les seuils d'exclusion appliqués, voir le tableau «Exclusions d'entreprises sur la base des activités controversées et des seuils de chiffre d'affaires» ci-dessus.

(**) L'exposition aux incidences négatives du produit est refondée sur la partie éligible du fonds. En 2024, les classes ont changé de «Non couvert» à «Couvert» et de «Non applicable» à «Eligible».

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Le fonds ne s'est pas engagé dans une proportion minimale d'investissements durables.

Toutefois, ex-post, le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 21,18%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 13,70%.

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

(i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.

(ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● **Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?**

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur

les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à « ne pas causer de préjudice important » en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) vote par procuration

Le fonds a suivi les directives en matière de vote de Pictet Asset Management qui ont été conçues pour soutenir une culture solide de gouvernance d'entreprise, une gestion efficace des thématiques environnementales et sociales et un reporting complet conforme à des normes crédibles. Ces directives visent également à soutenir les organes de gouvernance mondiaux reconnus qui promeuvent des pratiques commerciales durables en faveur de la gérance de l'environnement, de pratiques de travail équitables, de la non-discrimination et de la protection des droits de l'homme. Toutes les activités de vote du fonds ont été enregistrées et peuvent être communiquées sur demande.

(iii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs.

Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

Le vote par procuration et le processus d'engagement (dialogue collaboratif) ont été principalement menés par des professionnels de l'investissement au sein de plusieurs équipes d'investissement de Pictet Asset Management, avec le soutien d'une équipe ESG centrale.

(iv) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

34,88%

● Quelle était l'allocation des actifs?

Le fonds était aligné à 92,72% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 7,28% dans Autres (#2 Autres). 34,88% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

L'allocation des actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **#1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **#2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie **#1 Alignés sur les caractéristiques E/S** comprend:

- La sous-catégorie **#1A Durables** couvrant les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

Source: Pictet Asset Management, GICS/MSCI. Les données d'exposition sont exprimées en moyenne pondérée trimestrielle.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-

ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

Oui:

Dans le gaz fossile Dans l'énergie nucléaire

Non

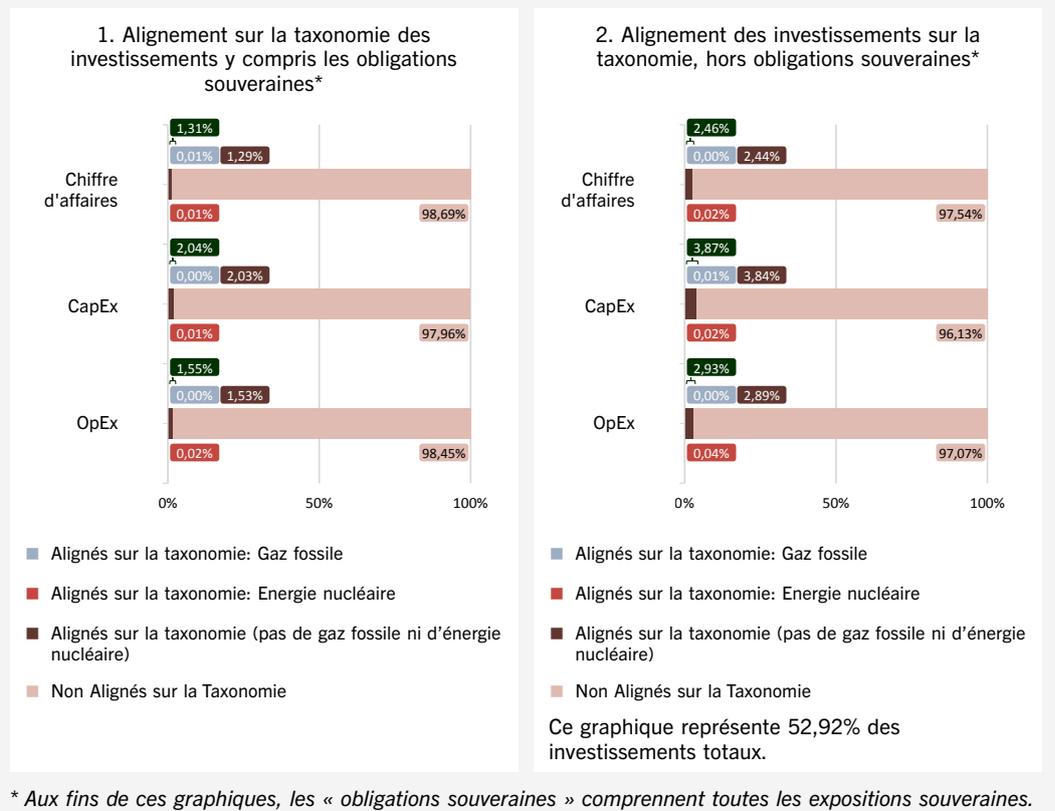

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:

- du **chiffre d'affaires** pour refléter le « caractère écologique » actuel des sociétés bénéficiaires des investissements;
- des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple;
- des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

La part des investissements réalisés dans:

- Des activités transitoires: 0,07%
- Des activités habilitantes: 0,70%

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Le pourcentage d'investissements alignés sur la Taxonomie de l'UE durant la période de référence précédente était de 0,74%, contre 1,31% pour la période de référence actuelle.

Veillez noter que ce fonds n'avait pas d'engagement ex ante en matière de Taxonomie de l'UE.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

21,18%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social?

13,70%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

Au cours de la période de référence, les caractéristiques environnementales et/ou sociales ont été atteintes en suivant la stratégie d'investissement et en respectant les éléments contraignants.

Les éléments contraignants du fonds comprennent:

- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes nucléaires de pays qui ne sont pas signataires du Traité sur la non-prolifération des armes nucléaires (TNP), et dans la production d'autres armes controversées
 - tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, telles que l'extraction de charbon thermique et la production d'électricité, la production de pétrole et de gaz non conventionnels, les armements militaires et les armes légères, les produits du tabac, les opérations de jeux d'argent et la production de divertissement pour adultes. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur les seuils d'exclusion.
 - violent gravement les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption.
- exclusions de pays soumis à des sanctions internationales
- un profil ESG supérieur à celui de l'univers d'investissement
- analyse des critères ESG des titres éligibles couvrant au moins 90% de l'actif net ou du nombre d'émetteurs présents dans le portefeuille

En outre, le fonds s'est engagé (dialogue collaboratif) avec 246 entreprises au 30 septembre 2023.

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été atteintes?

Les caractéristiques environnementales et sociales de ce fonds incluaient:

- Orientation favorable:

Le fonds a augmenté la pondération des titres présentant de faibles risques en matière de durabilité et/ou a diminué celle des titres présentant des risques élevés en matière de durabilité, ce qui lui permet de présenter un profil environnemental, social et de gouvernance (ESG) meilleur que celui d'un portefeuille neutre. Un portefeuille neutre présenterait un score de risque ESG «moyen».

Aucun indice de référence n'a été désigné aux fins d'atteindre les caractéristiques environnementales ou sociales promues par le fonds.

- Exclusions fondées sur les normes et les valeurs:

Le fonds a exclu les émetteurs qui exercent des activités importantes ayant une incidence négative sur la société ou l'environnement, ou qui enfreignent gravement les normes internationales comme détaillé ci-dessous:

[2] La notion d'«État soutenant le terrorisme» est utilisée par le Département d'État américain pour désigner les pays qui ont prêté à plusieurs reprises leur soutien à des actes de terrorisme international.

[3] Des exclusions s'appliquent également aux entreprises dont le siège social est situé dans un pays exclu.

[4] Outre les exclusions strictes, Pictet Asset Management tient une liste de surveillance des pays nécessitant une diligence raisonnable supplémentaire de la part des équipes d'investissement avant l'investissement.

- Actionnariat actif:

Le fonds s'est engagé (dialogue collaboratif) avec la direction d'entreprises sélectionnées sur des questions ESG importantes.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

● **Profil ESG général**

L'exposition du fonds était de 50,32% contre 0,00% pour le portefeuille neutre.

L'exposition varie de -100% à 100%, 100% étant la meilleure. Pour réaliser une tendance positive, l'exposition du fonds doit toujours être supérieure à 0%.

● **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	0,17	N/A
Armement	0,01	N/A
Autres activités controversées	0,01	N/A
Eligible:	71,62	N/A
Couvert:	96,96	N/A

*Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

(i) PIN 10: Violations des principes du Pacte mondial des Nations unies et des Principes directeurs de l'Organisation de coopération et de développement économiques (OCDE) à l'intention des entreprises multinationales.

(ii) PIN 14: Exposition à des armes controversées (mines antipersonnel, armes à sous-munitions, armes chimiques et armes biologiques).

● **Engagement**

Le fonds s'est engagé (dialogue collaboratif) avec 7 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Le fonds ne s'est pas engagé dans une proportion minimale d'investissements durables.

Toutefois, ex-post, le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 7,36%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 8,45%.

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

- (i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.
- (ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

● *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à «ne pas causer de préjudice important» en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iii) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

15,80%

L'allocation des actifs décrit la part des investissements dans des actifs spécifiques.

● Quelle était l'allocation des actifs?

Le fonds était aligné à 92,66% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 7,34% dans Autres (#2 Autres). 15,80% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

La catégorie **#1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **#2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie **#1 Alignés sur les caractéristiques E/S** comprend:

- La sous-catégorie **#1A Durables** couvrant les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹ ?**

Oui:

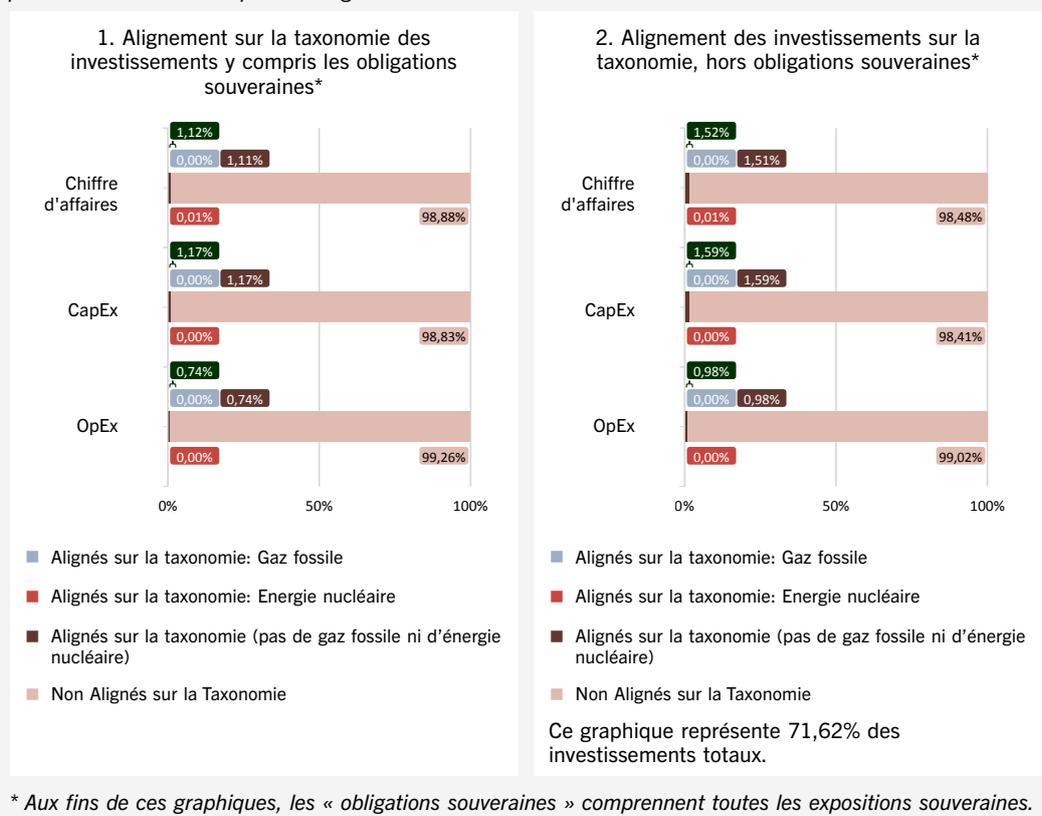

Dans le gaz fossile Dans l'énergie nucléaire

Non

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:
 - du **chiffre d'affaires** pour refléter le «caractère écologique» actuel des sociétés bénéficiaires des investissements;
 - des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple;
 - des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

Source: Pictet Asset Management, MSCI.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

La part des investissements réalisés dans:

- Des activités transitoires: 0,03%
- Des activités habilitantes: 0,79%

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Le pourcentage d'investissements alignés sur la Taxonomie de l'UE durant la période de référence précédente était de 1,16%, contre 1,12% pour la période de référence actuelle.

Veillez noter que ce fonds n'avait pas d'engagement ex ante en matière de Taxonomie de l'UE.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

7,36%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social?

8,45%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

Au cours de la période de référence, les caractéristiques environnementales et/ou sociales ont été atteintes en suivant la stratégie d'investissement et en respectant les éléments contraignants.

Les éléments contraignants du fonds comprennent:

- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes nucléaires de pays qui ne sont pas signataires du Traité sur la non-prolifération des armes nucléaires (TNP), et dans la production d'autres armes controversées
 - tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, telles que l'extraction de charbon thermique et la production d'électricité, la production de pétrole et de gaz non conventionnels, les armements militaires et les armes légères, les produits du tabac, les opérations de jeux d'argent et la production de divertissement pour adultes. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur les seuils d'exclusion.
 - violent gravement les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption.
- la surpondération des titres présentant de faibles risques en matière de durabilité
- analyse des critères ESG des titres éligibles couvrant au moins 80% de l'actif net ou du nombre d'émetteurs présents dans le portefeuille

En outre, le fonds s'est engagé (dialogue collaboratif) avec 7 entreprises au 30 septembre 2024.

Quelle a été la performance de ce produit financier par rapport à l'indice de référence durable?

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été atteintes?

Les caractéristiques environnementales et sociales de ce fonds incluaient:

- Orientation favorable:

Le fonds a augmenté la pondération des titres présentant de faibles risques en matière de durabilité et/ou a diminué celle des titres présentant des risques élevés en matière de durabilité, ce qui lui permet de présenter un profil environnemental, social et de gouvernance (ESG) meilleur que celui d'un portefeuille neutre. Un portefeuille neutre présenterait un score de risque ESG «moyen».

Aucun indice de référence n'a été désigné aux fins d'atteindre les caractéristiques environnementales ou sociales promues par le fonds.

- Exclusions fondées sur les normes et les valeurs:

Le fonds a exclu les émetteurs qui exercent des activités importantes ayant une incidence négative sur la société ou l'environnement, ou qui enfreignent gravement les normes internationales comme détaillé ci-dessous:

Exclusions d'entreprises sur la base des activités controversées et des seuils de chiffre d'affaires

Exclusions par pays

Pays (i) considérés comme des États soutenant le terrorisme au sens défini par l'Office of Foreign Assets Control[2] ou (ii) soumis à des sanctions financières de l'UE ciblant des banques centrales et/ou des entreprises publiques (<i>state-owned enterprises</i> , SOE)	Exclus[3]
Pays (i) considérés comme «en état d'alerte élevée» ou «en état d'alerte très élevée» selon l'Indice des États fragiles, ou (ii) touchés par des conflits violents au sens défini par la Banque mondiale	Exclus[3]
Pays (i) classés dans la catégorie «alerte» du Fragile State Index ou (ii) soumis à des sanctions liées aux exportations infligées par l'UE	Liste de surveillance[4]

[1] En ce qui concerne les armes nucléaires, cette exclusion s'applique aux entreprises ayant leur siège social dans un pays n'ayant pas signé le Traité sur la non-prolifération des armes nucléaires (TNP) de 1968.

[2] La notion d'«État soutenant le terrorisme» est utilisée par le Département d'État américain pour désigner les pays qui ont prêté à plusieurs reprises leur soutien à des actes de terrorisme international.

[3] Des exclusions s'appliquent également aux entreprises dont le siège social est situé dans un pays exclu.

[4] Outre les exclusions strictes, Pictet Asset Management tient une liste de surveillance des pays nécessitant une diligence raisonnable supplémentaire de la part des équipes d'investissement avant l'investissement.

Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails. Notez que notre cadre d'exclusion a été mis à jour au cours de l'année 2024.

- Actionnariat actif:

Le fonds s'est engagé (dialogue collaboratif) avec la direction d'entreprises sélectionnées sur des questions ESG importantes.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

● **Profil ESG général**

L'exposition du fonds était de 52,55% contre 0,00% pour le portefeuille neutre.

L'exposition varie de -100% à 100%, 100% étant la meilleure. Pour réaliser une tendance positive, l'exposition du fonds doit toujours être supérieure à 0%.

● **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	0,09	N/A
Armement	0,01	N/A
Autres activités controversées	0,01	N/A
Eligible:	71,65	N/A
Couvert:	98,61	N/A

**Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.*

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

(i) PIN 10: Violations des principes du Pacte mondial des Nations unies et des Principes directeurs de l'Organisation de coopération et de développement économiques (OCDE) à l'intention des entreprises multinationales.

(ii) PIN 14: Exposition à des armes controversées (mines antipersonnel, armes à sous-munitions, armes chimiques et armes biologiques).

● **Engagement**

Le fonds s'est engagé (dialogue collaboratif) avec 13 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Le fonds ne s'est pas engagé dans une proportion minimale d'investissements durables.

Toutefois, ex-post, le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 4,64%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 5,71%.

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

- (i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.
- (ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

● *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à «ne pas causer de préjudice important» en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iii) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

10,35%

● Quelle était l'allocation des actifs?

Le fonds était aligné à 91,55% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 8,45% dans Autres (#2 Autres). 10,35% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

La catégorie **#1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **#2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie **#1 Alignés sur les caractéristiques E/S** comprend:

- La sous-catégorie **#1A Durables** couvrant les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

● **Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?**

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

Oui:

Dans le gaz fossile Dans l'énergie nucléaire

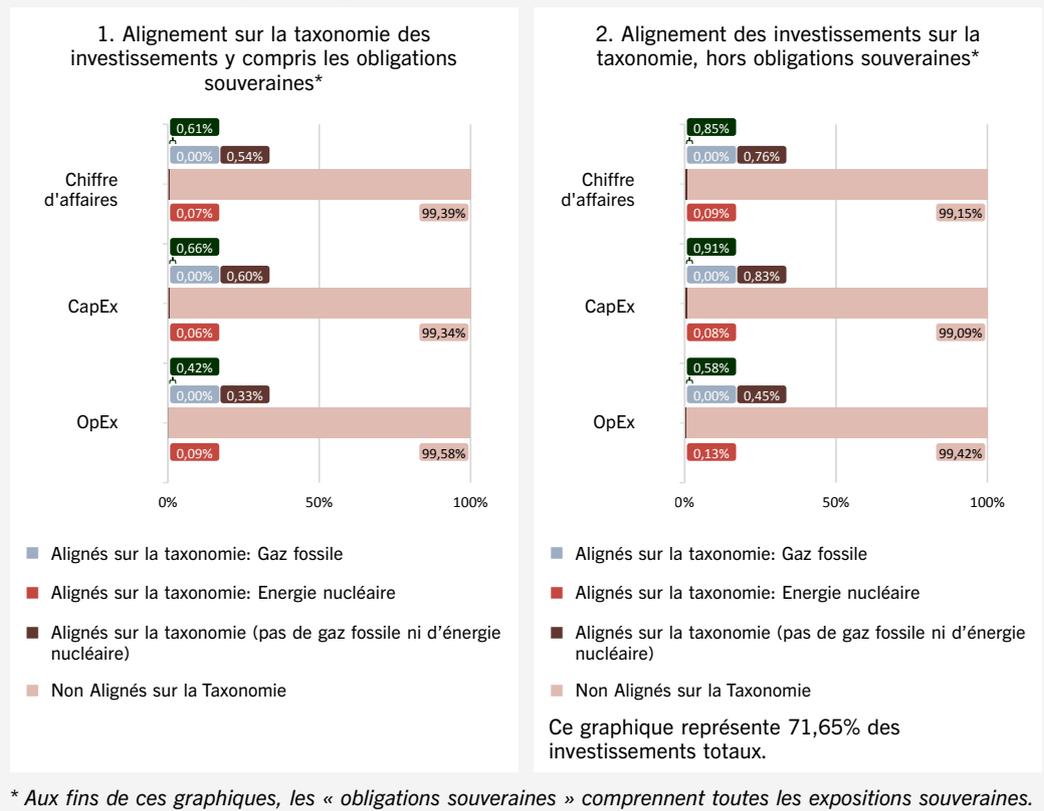

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Non

passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'énergie nucléaire, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:
 - du **chiffre d'affaires** pour refléter le «caractère écologique» actuel des sociétés bénéficiaires des investissements;
 - des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple;
 - des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

La part des investissements réalisés dans:

- Des activités transitoires: 0,07%
- Des activités habilitantes: 0,33%

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre

correspondent aux meilleures performances réalisables.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Le pourcentage d'investissements alignés sur la Taxonomie de l'UE durant la période de référence précédente était de 0,33%, contre 0,61% pour la période de référence actuelle.

Veillez noter que ce fonds n'avait pas d'engagement ex ante en matière de Taxonomie de l'UE.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

4,64%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social?

5,71%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

Au cours de la période de référence, les caractéristiques environnementales et/ou sociales ont été atteintes en suivant la stratégie d'investissement et en respectant les éléments contraignants.

Les éléments contraignants du fonds comprennent:

- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes nucléaires de pays qui ne sont pas signataires du Traité sur la non-prolifération des armes nucléaires (TNP), et dans la production d'autres armes controversées
 - tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, telles que l'extraction de charbon thermique et la production d'électricité, la production de pétrole et de gaz non conventionnels, les armements militaires et les armes légères, les produits du tabac, les opérations de jeux d'argent et la production de divertissement pour adultes. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur les seuils d'exclusion.

- violent gravement les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption.
- la surpondération des titres présentant de faibles risques en matière de durabilité
- analyse des critères ESG des titres éligibles couvrant au moins 80% de l'actif net ou du nombre d'émetteurs présents dans le portefeuille

En outre, le fonds s'est engagé (dialogue collaboratif) avec 13 entreprises au 30 septembre 2024.

Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été atteintes?

Les caractéristiques environnementales et sociales de ce fonds incluaient:

- Orientation favorable:

Le fonds a augmenté la pondération des titres présentant de faibles risques en matière de durabilité et/ou a diminué celle des titres présentant des risques élevés en matière de durabilité, ce qui lui permet de présenter un profil environnemental, social et de gouvernance (ESG) meilleur que celui d'un portefeuille neutre. Un portefeuille neutre présenterait un score de risque ESG «moyen».

Aucun indice de référence n'a été désigné aux fins d'atteindre les caractéristiques environnementales ou sociales promues par le fonds.

- Exclusions fondées sur les normes et les valeurs:

Le fonds a exclu les émetteurs qui exercent des activités importantes ayant une incidence négative sur la société ou l'environnement, ou qui enfreignent gravement les normes internationales comme détaillé ci-dessous:

[2] La notion d'«État soutenant le terrorisme» est utilisée par le Département d'État américain pour désigner les pays qui ont prêté à plusieurs reprises leur soutien à des actes de terrorisme international.

[3] Des exclusions s'appliquent également aux entreprises dont le siège social est situé dans un pays exclu.

[4] Outre les exclusions strictes, Pictet Asset Management tient une liste de surveillance des pays nécessitant une diligence raisonnable supplémentaire de la part des équipes d'investissement avant l'investissement.

- Actionnariat actif:

Le fonds s'est engagé (dialogue collaboratif) avec la direction d'entreprises sélectionnées sur des questions ESG importantes.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

● **Profil ESG général**

L'exposition du fonds était de 54,51% contre 0,00% pour le portefeuille neutre.

L'exposition varie de -100% à 100%, 100% étant la meilleure. Pour réaliser une tendance positive, l'exposition du fonds doit toujours être supérieure à 0%.

● **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	0,09	N/A
Armement	0,01	N/A
Autres activités controversées	0,01	N/A
Eligible:	73,94	N/A
Couvert:	98,58	N/A

**Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.*

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

(i) PIN 10: Violations des principes du Pacte mondial des Nations unies et des Principes directeurs de l'Organisation de coopération et de développement économiques (OCDE) à l'intention des entreprises multinationales.

(ii) PIN 14: Exposition à des armes controversées (mines antipersonnel, armes à sous-munitions, armes chimiques et armes biologiques).

● **Engagement**

Le fonds s'est engagé (dialogue collaboratif) avec 12 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

(**) L'exposition aux incidences négatives du produit est refondée sur la partie éligible du fonds. En 2024, les classes ont changé de «Non couvert» à «Couvert» et de «Non applicable» à «Eligible».

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Le fonds ne s'est pas engagé dans une proportion minimale d'investissements durables.

Toutefois, ex-post, le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 5,37%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 5,48%.

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

- (i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.
- (ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

● *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à «ne pas causer de préjudice important» en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iii) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Source: Pictet Asset Management. Les données d'exposition sont exprimées en moyenne pondérée trimestrielle.

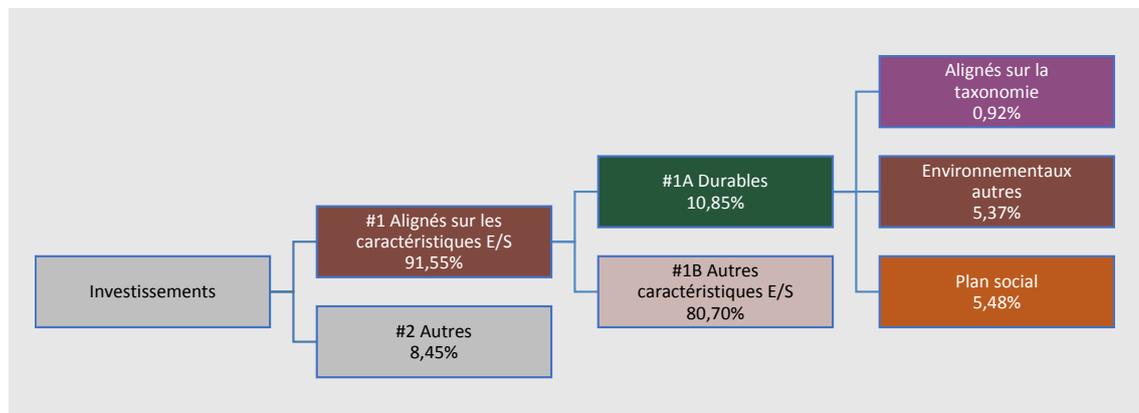

Quelle était la proportion d'investissements liés à la durabilité?

10,85%

● Quelle était l'allocation des actifs?

Le fonds était aligné à 91,55% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 8,45% dans Autres (#2 Autres). 10,85% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

La catégorie **#1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **#2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie **#1 Alignés sur les caractéristiques E/S** comprend:

- La sous-catégorie **#1A Durables** couvrant les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹ ?**

Oui:

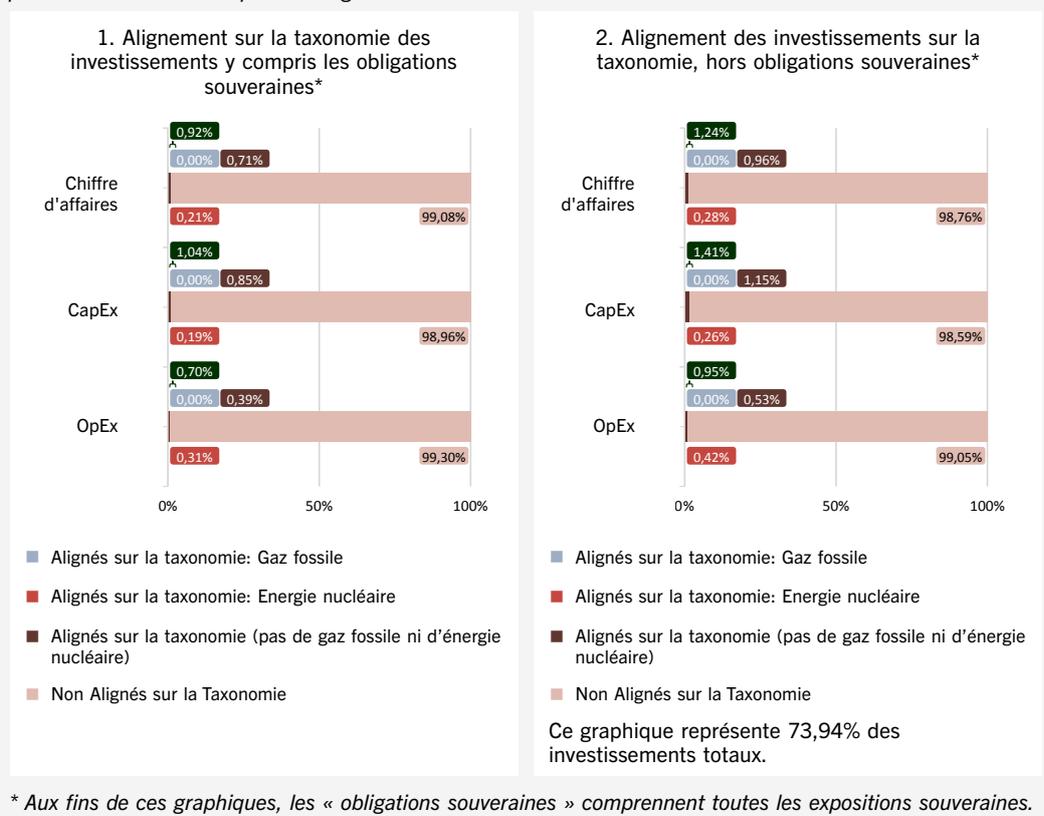

Dans le gaz fossile Dans l'énergie nucléaire

Non

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:
 - du **chiffre d'affaires** pour refléter le «caractère écologique» actuel des sociétés bénéficiaires des investissements;
 -des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple;
 - des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

La part des investissements réalisés dans:

- Des activités transitoires: 0,22%

Veillez noter que ce fonds n'avait pas d'engagement ex ante en matière de Taxonomie de l'UE.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

5,37%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social?

5,48%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur les seuils d'exclusion.

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Note: Pictet Asset Management a eu recours à un cadre de référence exclusif pour définir les investissements durables. Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur le Cadre d'investissement durable.

Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été atteintes?

Les caractéristiques environnementales et sociales de ce fonds incluaient:

- Orientation favorable:

Le fonds a augmenté la pondération des titres présentant de faibles risques en matière de durabilité et/ou a diminué celle des titres présentant des risques élevés en matière de durabilité, ce qui lui permet de présenter un profil environnemental, social et de gouvernance (ESG) meilleur que celui d'un portefeuille neutre. Un portefeuille neutre présenterait un score de risque ESG «moyen».

Aucun indice de référence n'a été désigné aux fins d'atteindre les caractéristiques environnementales ou sociales promues par le fonds.

- Exclusions fondées sur les normes et les valeurs:

Le fonds a exclu les émetteurs qui exercent des activités importantes ayant une incidence négative sur la société ou l'environnement, ou qui enfreignent gravement les normes internationales comme détaillé ci-dessous:

Pays (i) classés dans la catégorie «alerte» du Fragile State Index ou (ii) soumis à des sanctions liées aux exportations infligées par l'UE	Liste de surveillance[4]

[1] En ce qui concerne les armes nucléaires, cette exclusion s'applique aux entreprises ayant leur siège social dans un pays n'ayant pas signé le Traité sur la non-prolifération des armes nucléaires (TNP) de 1968.

[2] La notion d'«État soutenant le terrorisme» est utilisée par le Département d'État américain pour désigner les pays qui ont prêté à plusieurs reprises leur soutien à des actes de terrorisme international.

[3] Des exclusions s'appliquent également aux entreprises dont le siège social est situé dans un pays exclu.

[4] Outre les exclusions strictes, Pictet Asset Management tient une liste de surveillance des pays nécessitant une diligence raisonnable supplémentaire de la part des équipes d'investissement avant l'investissement.

Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails. Notez que notre cadre d'exclusion a été mis à jour au cours de l'année 2024.

- Actionnariat actif:

Le fonds s'est engagé (dialogue collaboratif) avec la direction d'entreprises sélectionnées sur des questions ESG importantes.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● **Quelle a été la performance des indicateurs de durabilité?**

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

● **Profil ESG général**

L'exposition du fonds était de 57,27% contre 0,00% pour le portefeuille neutre.

L'exposition varie de -100% à 100%, 100% étant la meilleure. Pour réaliser une tendance positive, l'exposition du fonds doit toujours être supérieure à 0%.

● **Principales incidences négatives (PIN)**

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	0,09	N/A
Armement	0,04	N/A
Autres activités controversées	0,00	N/A
Eligible:	55,78	N/A
Couvert:	98,75	N/A

**Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.*

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

(i) PIN 10: Violations des principes du Pacte mondial des Nations unies et des Principes directeurs de l'Organisation de coopération et de développement économiques (OCDE) à l'intention des entreprises multinationales.

(ii) PIN 14: Exposition à des armes controversées (mines antipersonnel, armes à sous-munitions, armes chimiques et armes biologiques).

● **Engagement**

Le fonds s'est engagé (dialogue collaboratif) avec 5 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

(*) Pour les seuils d'exclusion appliqués, voir le tableau «Exclusions d'entreprises sur la base des activités controversées et des seuils de chiffre d'affaires» ci-dessus.

(**) L'exposition aux incidences négatives du produit est refondée sur la partie éligible du fonds. En 2024, les classes ont changé de «Non couvert» à «Couvert» et de «Non applicable» à «Eligible».

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Le fonds ne s'est pas engagé dans une proportion minimale d'investissements durables.

Toutefois, ex-post, le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 14,72%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 5,36%.

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

- (i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.
- (ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

● **Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?**

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

● **Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?**

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à «ne pas causer de préjudice important» en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iii) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

20,08%

● Quelle était l'allocation des actifs?

Le fonds était aligné à 91,42% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 8,58% dans Autres (#2 Autres). 20,08% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

La catégorie #1 **Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie #2 **Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie #1 **Alignés sur les caractéristiques E/S** comprend:

- La sous-catégorie #1A **Durables** couvrant les investissements durables sur le plan environnemental et social.
- La sous-catégorie #1B **Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹ ?**

Oui:

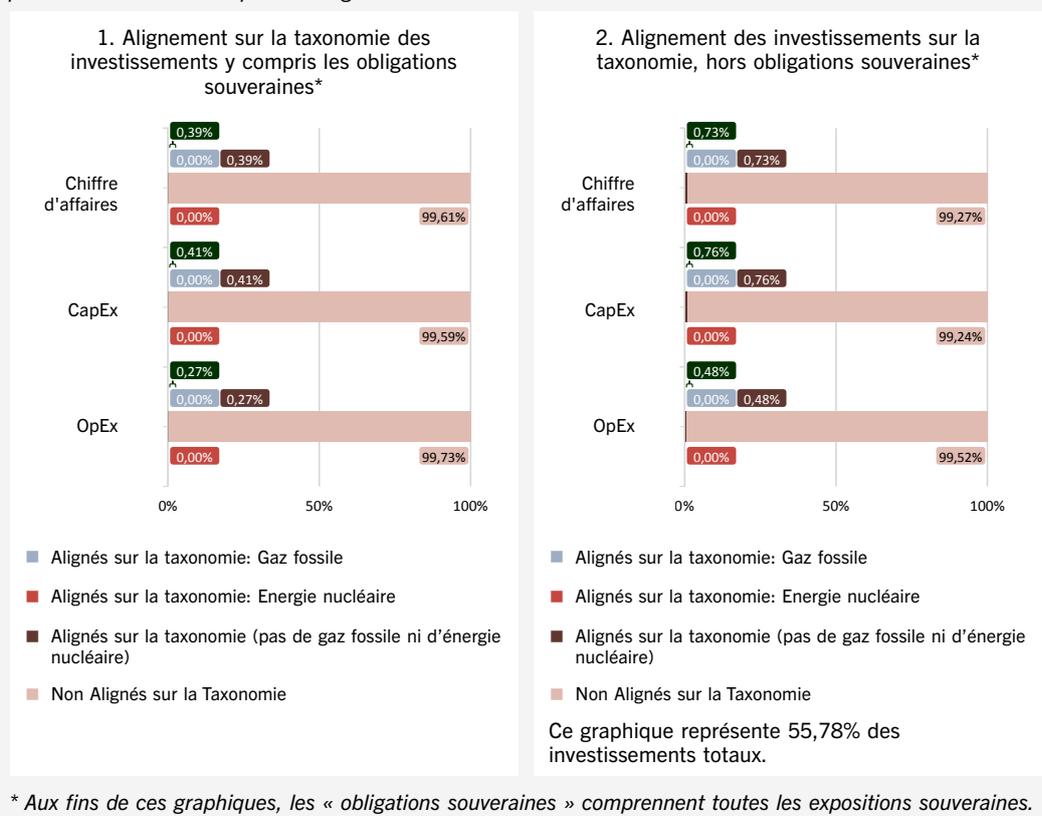

Dans le gaz fossile Dans l'énergie nucléaire

Non

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:
 - du **chiffre d'affaires** pour refléter le «caractère écologique» actuel des sociétés bénéficiaires des investissements;
 - des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple;
 - des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

Source: Pictet Asset Management, MSCI.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

La part des investissements réalisés dans:

- Des activités transitoires: 0,01%
- Des activités habilitantes: 0,26%

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Le pourcentage d'investissements alignés sur la Taxonomie de l'UE durant la période de référence précédente était de 0,97%, contre 0,39% pour la période de référence actuelle.

Veillez noter que ce fonds n'avait pas d'engagement ex ante en matière de Taxonomie de l'UE.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

14,72%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social?

5,36%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

Au cours de la période de référence, les caractéristiques environnementales et/ou sociales ont été atteintes en suivant la stratégie d'investissement et en respectant les éléments contraignants.

Les éléments contraignants du fonds comprennent:

- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes nucléaires de pays qui ne sont pas signataires du Traité sur la non-prolifération des armes nucléaires (TNP), et dans la production d'autres armes controversées

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Les chiffres relatifs aux investissements durables ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisée, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux. Dans quelle mesure les caractéristiques environnementales et/ou sociales promues par ce produit financier ont-elles été atteintes?

Les caractéristiques environnementales et sociales de ce fonds incluaient:

- Orientation favorable:

Le fonds a augmenté la pondération des titres présentant de faibles risques en matière de durabilité et/ou a diminué celle des titres présentant des risques élevés en matière de durabilité, ce qui lui permet de présenter un profil environnemental, social et de gouvernance (ESG) meilleur que celui d'un portefeuille neutre. Un portefeuille neutre présenterait un score de risque ESG «moyen».

Aucun indice de référence n'a été désigné aux fins d'atteindre les caractéristiques environnementales ou sociales promues par le fonds.

- Exclusions fondées sur les normes et les valeurs:

Le fonds a exclu les émetteurs qui exercent des activités importantes ayant une incidence négative sur la société ou l'environnement, ou qui enfreignent gravement les normes internationales comme détaillé ci-dessous:

Exclusions d'entreprises sur la base des activités controversées et des seuils de chiffre d'affaires

Pays (i) considérés comme «en état d'alerte élevée» ou «en état d'alerte très élevée» selon l'Indice des États fragiles, ou (ii) touchés par des conflits violents au sens défini par la Banque mondiale	Exclus[3]
Pays (i) classés dans la catégorie «alerte» du Fragile State Index ou (ii) soumis à des sanctions liées aux exportations infligées par l'UE	Liste de surveillance[4]

[1] En ce qui concerne les armes nucléaires, cette exclusion s'applique aux entreprises ayant leur siège social dans un pays n'ayant pas signé le Traité sur la non-prolifération des armes nucléaires (TNP) de 1968.

[2] La notion d'«État soutenant le terrorisme» est utilisée par le Département d'État américain pour désigner les pays qui ont prêté à plusieurs reprises leur soutien à des actes de terrorisme international.

[3] Des exclusions s'appliquent également aux entreprises dont le siège social est situé dans un pays exclu.

[4] Outre les exclusions strictes, Pictet Asset Management tient une liste de surveillance des pays nécessitant une diligence raisonnable supplémentaire de la part des équipes d'investissement avant l'investissement.

Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails. Notez que notre cadre d'exclusion a été mis à jour au cours de l'année 2024.

- Actionnariat actif:

Le fonds s'est engagé (dialogue collaboratif) avec la direction d'entreprises sélectionnées sur des questions ESG importantes.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● Quelle a été la performance des indicateurs de durabilité?

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

● Profil ESG général

L'exposition du fonds était de 52,56% contre 0,00% pour le portefeuille neutre.

L'exposition varie de -100% à 100%, 100% étant la meilleure. Pour réaliser une tendance positive, l'exposition du fonds doit toujours être supérieure à 0%.

● Principales incidences négatives (PIN)

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Conformément à la politique d'exclusion de Pictet Asset Management décrite dans la politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	0,06	N/A
Armement	0,02	N/A
Autres activités controversées	0,00	N/A
Eligible:	75,89	N/A
Couvert:	99,33	N/A

**Les combustibles fossiles et l'énergie nucléaire comprennent l'extraction du charbon thermique et la production d'électricité, la production et l'extraction de pétrole et de gaz, l'extraction de pétrole bitumineux, l'exploitation pétrolière et gazière offshore en Arctique et la production d'électricité nucléaire. Les armes comprennent les contrats militaires (armes et services liés aux armes), les armes de petit calibre pour les clients civils (armes d'assaut/autres), les armes de petit calibre pour les clients militaires/maintien de l'ordre, et les composants clés des armes de petit calibre. Les autres activités controversées comprennent la production de tabac, la production de divertissements pour adultes, l'exploitation d'activités liées aux jeux d'argent, le développement ou la culture d'OGM, la production ou la vente au détail de pesticides. Les expositions sont basées sur des données de tiers et peuvent ne pas refléter notre point de vue interne. Pictet Asset Management conserve un pouvoir discrétionnaire absolu quant à la mise en oeuvre des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas, dans les cas où ces informations sont jugées incorrectes ou incomplètes.*

En outre, le fonds a exclu les émetteurs qui étaient exposés aux:

(i) PIN 10: Violations des principes du Pacte mondial des Nations unies et des Principes directeurs de l'Organisation de coopération et de développement économiques (OCDE) à l'intention des entreprises multinationales.

(ii) PIN 14: Exposition à des armes controversées (mines antipersonnel, armes à sous-munitions, armes chimiques et armes biologiques).

● Engagement

Le fonds s'est engagé (dialogue collaboratif) avec 9 entreprises sur des thèmes liés à l'ESG (sur la base des entreprises en portefeuille au 30.09.2024). Il s'agit notamment de dialogues menés en interne, d'initiatives de collaboration avec les investisseurs et de services d'engagement de tiers. Pour être considéré comme un engagement, un dialogue avec une entreprise ciblée doit avoir un objectif clair et mesurable dans un horizon temporel prédéfini. Il convient de noter que les interactions de routine ou de suivi ne sont pas toutes considérées comme des engagements dans notre évaluation, même si elles impliquent les membres de la direction ou le Conseil d'administration.

(**) L'exposition aux incidences négatives du produit est refondée sur la partie éligible du fonds. En 2024, les classes ont changé de «Non couvert» à «Couvert» et de «Non applicable» à «Eligible».

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Le fonds ne s'est pas engagé dans une proportion minimale d'investissements durables.

Toutefois, ex-post, le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 3,96%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 5,71%.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

(i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.

(ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

● *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

● *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à « ne pas causer de préjudice important » en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) engagement

Les interactions avec les émetteurs ont pris la forme de discussions individuelles, d'assemblées des actionnaires et des détenteurs d'obligations, de roadshows pour les investisseurs et/ou de téléconférences. Les objectifs de ces interactions étaient d'évaluer une organisation, de vérifier que la stratégie a été mise en œuvre conformément à nos attentes et de nous assurer que les émetteurs étaient en bonne voie pour atteindre leurs objectifs. Le cas échéant, nous nous sommes engagés (dialogue collaboratif) avec les émetteurs sur les principales thématiques ESG comme les objectifs de réduction GES, les améliorations en termes de gouvernance, et sur un éventail de controverses environnementales, sociales ou de gouvernance, afin de nous assurer qu'ils les comprenaient et les géraient correctement à court, moyen et long terme. Nos activités en matière d'engagement combinaient des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

(iii) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'investissement responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées.

Quelle était la proportion d'investissements liés à la durabilité?

9,67%

● Quelle était l'allocation des actifs?

Le fonds était aligné à 90,93% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 9,07% dans Autres (#2 Autres). 9,67% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

La catégorie **#1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **#2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie **#1 Alignés sur les caractéristiques E/S** comprend:

- La sous-catégorie **#1A Durables** couvrant les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.
- Les investissements alignés sur la taxonomie verte de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail». Etant donné que le cadre exclusif de Pictet Asset Management utilisé pour définir les investissements durables exige qu'une société émettrice ait une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques contribuant aux objectifs environnementaux ou sociaux, tous les émetteurs ayant déclaré s'aligner sur la taxonomie de l'UE ne sont pas automatiquement considérés comme des investissements durables.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Le fonds a réalisé des investissements dans des activités économiques qui ont contribué aux objectifs environnementaux tels que définis à l'article 9 du règlement (UE) 2020/852.

Les investissements alignés sur la taxonomie de l'UE ont été calculés sur une base pondérée par le revenu (à savoir que les pondérations des titres sont multipliées par la part de revenus tirés d'activités économiques qui contribuent aux objectifs environnementaux pertinents) et ne peuvent être consolidés avec d'autres chiffres suivant une approche discrète ou «pass/fail».

Les données relatives à l'alignement sur la taxonomie verte de l'UE proviennent de rapports accessibles au public.

Les procédures de contrôle ont été mises en œuvre pour vérifier à tout moment le respect de l'article 3 du règlement sur la taxonomie de l'UE.

Les données fournies n'ont pas été vérifiées par un auditeur externe ou révisées par un tiers indépendant.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

Oui:

Dans le gaz fossile Dans l'énergie nucléaire

Non

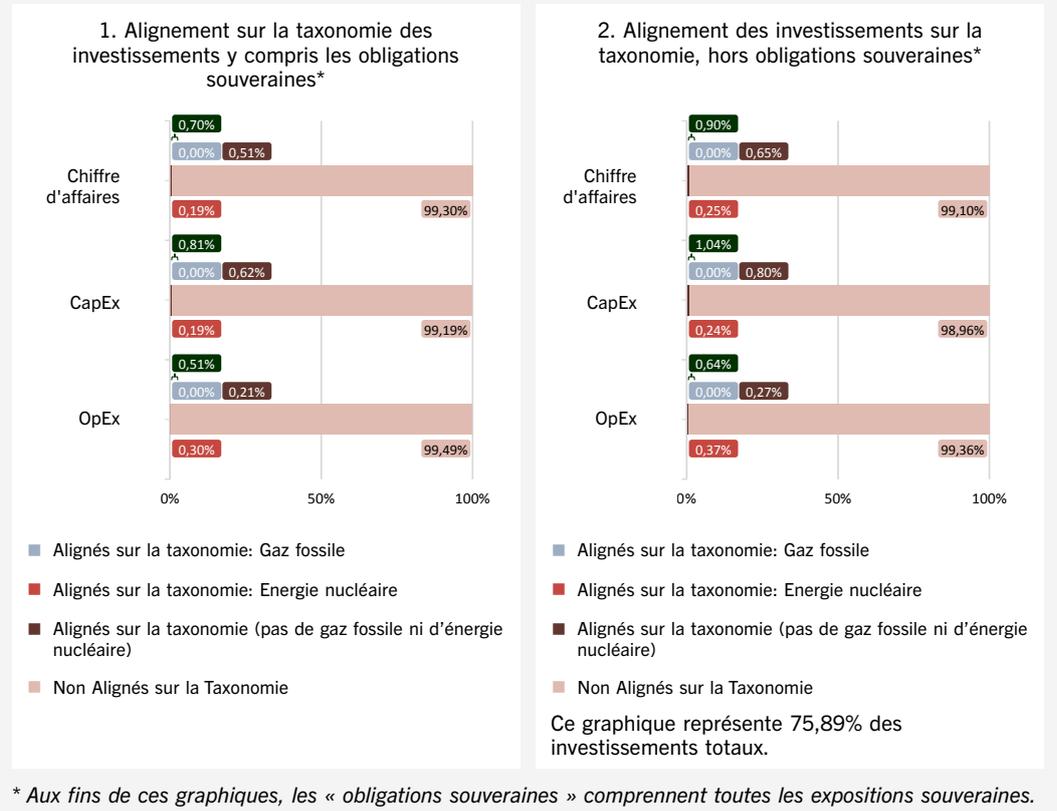

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

2035. Pour l'énergie nucléaire, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:
 - du **chiffre d'affaires** pour refléter le «caractère écologique» actuel des sociétés bénéficiaires des investissements;
 -des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple;
 - des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

● **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

La part des investissements réalisés dans:

- Des activités transitoires: 0,21%
- Des activités habilitantes: 0,11%

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

● **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Le pourcentage d'investissements alignés sur la Taxonomie de l'UE durant la période de référence précédente était de 0,34%, contre 0,70% pour la période de référence actuelle.

Veillez noter que ce fonds n'avait pas d'engagement ex ante en matière de Taxonomie de l'UE.

Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?

3,96%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

Quelle était la part d'investissements durables sur le plan social?

5,71%

Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Les caractéristiques environnementales et sociales de ce fonds incluaient:

- Actionnariat actif:

Aucun dialogue collaboratif n'a été mené durant la période de référence.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● Quelle a été la performance des indicateurs de durabilité?

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

● Réduction de l'univers d'investissement en fonction des facteurs ESG

Le fonds a réduit son univers d'investissement en supprimant au moins 20% des émetteurs présentant les risques les plus élevés en matière de durabilité et/ou des principales incidences négatives sur la société ou l'environnement.

Les risques de durabilité sont des risques ou des conditions liés à l'ESG qui pourraient avoir une incidence négative importante sur la valeur des investissements s'ils devaient se concrétiser. Les risques de durabilité incluaient, sans toutefois s'y limiter, le risque lié à la transition climatique, le risque climatique physique, le risque environnemental, le risque social, le risque de gouvernance. Des réexamens et des contrôles de risque périodiques sont instaurés pour un suivi de la mise en œuvre.

Les principales incidences négatives sont des effets négatifs, importants ou susceptibles d'être importants sur les facteurs de durabilité qui sont causés, aggravés par, ou directement liés aux décisions et conseils en matière d'investissement. Ces principales incidences négatives incluaient, entre autres, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption.

● Principales incidences négatives (PIN)

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Le fonds investit principalement dans des obligations d'État durant la période de référence. En cas d'investissements dans des obligations non souveraines et conformément à la politique d'exclusion de Pictet Asset Management décrite dans la Politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

Activités controversées (moyenne pondérée des revenus de l'entreprise, en %)*:

	Fonds (%)	Indice de référence (%)
Combustibles fossiles et énergie nucléaire	0,00	N/A
Armement	0,00	N/A
Autres activités controversées	0,00	N/A
Eligible:	36,13	N/A

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Le fonds ne s'est pas engagé dans une proportion minimale d'investissements durables.

Toutefois, ex-post, le fonds a investi dans des titres finançant des activités économiques qui ont contribué de manière substantielle aux objectifs environnementaux et/ou sociaux tels que:

Environnementaux

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 20,33%.

Plan social

- Vie saine
- Eau, assainissement & logement
- Education & émancipation économique
- Sécurité & connectivité

Ces investissements représentaient 0,29%.

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

- **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

- (i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.
- (ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires). Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

- *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Le fonds investit principalement dans des obligations d'État durant la période de référence.

En cas d'investissements dans des obligations non souveraines, le fonds a exclu les émetteurs qui ont fait l'objet de controverses importantes ou graves dans des domaines tels que les droits de l'Homme, les normes de travail, la protection de l'environnement et la lutte contre la corruption, ou la violation des Principes du Pacte Mondial des Nations Unies ou des Principes directeurs de l'OCDE à l'intention des entreprises multinationales.

La taxonomie de l'UE établit un principe consistant à «ne pas causer de préjudice important» en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'Investissement Responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées ou (iii) des pays soumis à des sanctions internationales; voyez également des informations détaillées sur les exclusions dans la politique d'investissement responsable de Pictet Asset Management.

L'allocation des actifs décrit la part des investissements dans des actifs spécifiques.

● **Quelle était l'allocation des actifs?**

Le fonds était aligné à 93,37% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 6,63% dans Autres (#2 Autres). 20,61% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

La catégorie **#1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **#2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie **#1 Alignés sur les caractéristiques E/S** comprend :

- La sous-catégorie **#1A Durables** couvrant les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», «Environnementaux autres» et «Sociaux» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-ils alignés sur la taxonomie de l'UE?

Non applicable.

● **Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?**

Oui:

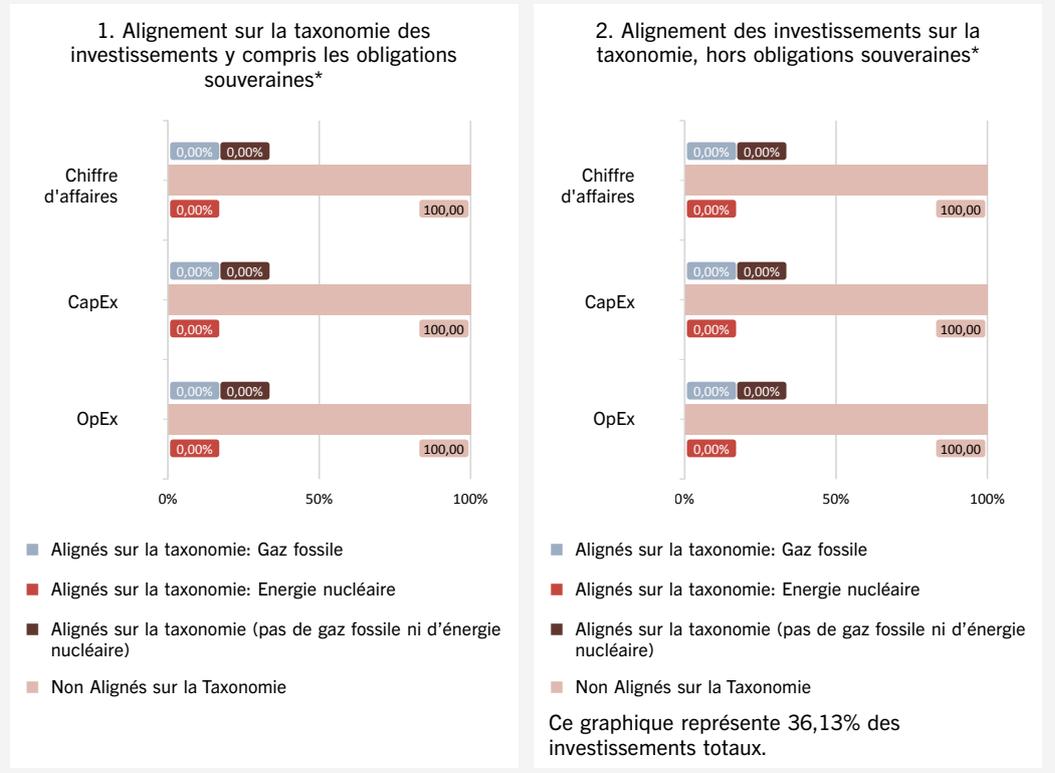

Dans le gaz fossile Dans l'énergie nucléaire

Non

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

Les activités alignées sur la taxonomie sont exprimées en pourcentage:
 - du **chiffre d'affaires** pour refléter le «caractère écologique» actuel des sociétés bénéficiaires des investissements;
 - des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple;
 - des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

* Aux fins de ces graphiques, les « obligations souveraines » comprennent toutes les expositions souveraines.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

- **Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?**

Non applicable.

- **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Non applicable.

- Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?**

20,33%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

- Quelle était la part d'investissements durables sur le plan social?**

0,29%

- Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?**

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?

Au cours de la période de référence, les caractéristiques environnementales et/ou sociales ont été atteintes en suivant la stratégie d'investissement et en respectant les éléments contraignants.

Les éléments contraignants du fonds comprennent:

- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes nucléaires de pays qui ne sont pas signataires du Traité sur la non-prolifération des armes nucléaires (TNP), et dans la production d'autres armes controversées
 - tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, telles que l'extraction de charbon thermique et la production d'électricité, la production de pétrole et de gaz non conventionnels, les armements militaires et les armes légères, les produits du tabac, les opérations de jeux d'argent et la production de divertissement pour adultes. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur les seuils d'exclusion.
 - violent gravement les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption.
- exclusions de pays soumis à des sanctions internationales
- analyse des critères ESG des titres éligibles couvrant au moins 90% de l'actif net ou du nombre d'émetteurs présents dans le portefeuille

CARACTÉRISTIQUES ENVIRONNEMENTALES ET/OU SOCIALES

Par **investissement durable**, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La **taxonomie de l'UE** est un système de classification institué par le règlement (UE) 2020/852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement ne dresse pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

- Actionnariat actif:

Aucun dialogue collaboratif n'a été mené durant la période de référence.

Les indicateurs de durabilité évaluent la mesure dans laquelle les caractéristiques environnementales ou sociales promues par le produit financier sont atteintes.

● Quelle a été la performance des indicateurs de durabilité?

Les indicateurs de durabilité ont performé comme suit durant la période sous revue:

● Réduction de l'univers d'investissement en fonction des facteurs ESG

Le fonds a réduit son univers d'investissement en supprimant au moins 20% des émetteurs présentant les risques les plus élevés en matière de durabilité et/ou des principales incidences négatives sur la société ou l'environnement.

Les risques de durabilité sont des risques ou des conditions liés à l'ESG qui pourraient avoir une incidence négative importante sur la valeur des investissements s'ils devaient se concrétiser. Les risques de durabilité incluaient, sans toutefois s'y limiter, le risque lié à la transition climatique, le risque climatique physique, le risque environnemental, le risque social, le risque de gouvernance. Des réexamens et des contrôles de risque périodiques sont instaurés pour un suivi de la mise en œuvre.

Les principales incidences négatives sont des effets négatifs, importants ou susceptibles d'être importants sur les facteurs de durabilité qui sont causés, aggravés par, ou directement liés aux décisions et conseils en matière d'investissement. Ces principales incidences négatives incluaient, entre autres, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption.

● Principales incidences négatives (PIN)

Le fonds a pris en considération les principales incidences négatives (PIN) sur les facteurs de durabilité par le biais essentiellement de l'exclusion des émetteurs associés à un comportement ou des activités controversés. Les exclusions ont permis au fonds d'écarter les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement. La façon dont les exclusions sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

Le fonds investit principalement dans des obligations d'État durant la période de référence. En cas d'investissements dans des obligations non souveraines et conformément à la politique d'exclusion de Pictet Asset Management décrite dans la Politique d'Investissement Responsable de l'entreprise (voir le tableau ci-dessus pour les activités exclues et les seuils d'exclusion appliqués), le fonds n'a pas été exposé à des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement:

● **Quels étaient les objectifs des investissements durables que le produit financier entendait notamment réaliser et comment les investissements durables effectués y ont-ils contribué?**

Le fonds ne s'est pas engagé dans une proportion minimale d'investissements durables.

Toutefois, ex post, le fonds a investi dans des titres finançant des activités économiques qui contribuent de manière substantielle aux objectifs environnementaux tels que:

- Décarbonation
- Efficacité & circularité
- Gestion du capital naturel

Ces investissements représentaient 15,42%.

Pictet Asset Management a eu recours à un cadre de référence exclusif et aux objectifs de la Taxonomie de l'UE pour définir les investissements durables.

● **Dans quelle mesure les investissements durables que le produit financier a notamment réalisés n'ont-ils pas causé de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social?**

Pour éviter que les investissements durables ne causent de préjudice important à tout autre objectif environnemental ou social, le fonds a appliqué les critères d'examen technique suivants dans la mesure du possible:

- (i) Exclusion des émetteurs qui exercent des activités importantes ayant des incidences négatives sur la société ou l'environnement.
- (ii) Les émetteurs associés à des controverses importantes et graves n'ont pas été considérés comme des Investissements durables.

Les informations ont été obtenues auprès de fournisseurs tiers et/ou par le biais de la recherche interne. Les informations ESG de fournisseurs de données tiers peuvent être incomplètes, inexactes ou indisponibles. Par conséquent, il y avait un risque que le Gestionnaire d'Investissement évalue un titre ou un émetteur de manière incorrecte, ce qui aurait entraîné l'inclusion ou l'exclusion incorrecte d'un titre dans le fonds. Des données ESG incomplètes, inexactes ou indisponibles peuvent également constituer une limite méthodologique à une stratégie d'investissement non financière (telle que l'application de critères ESG ou similaires).

Lorsqu'un risque a été identifié, le Gestionnaire d'Investissement s'est efforcé de l'atténuer en procédant à sa propre évaluation. Si les caractéristiques ESG d'un titre détenu par le fonds ont changé, entraînant la vente du titre, le Gestionnaire d'Investissement n'accepte aucune responsabilité en lien avec ce changement.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption et les actes de corruption.

- *Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération?*

Le fonds a surveillé tous les indicateurs obligatoires, et deux facultatifs, des Principales incidences négatives lorsque nous disposons de données solides. La qualité des données disponibles devrait s'améliorer au fil du temps.

Le fonds a pris en compte et, dans la mesure du possible, atténué les principales incidences négatives de ses investissements sur la société et l'environnement qui étaient considérées comme significatives pour la stratégie d'investissement en combinant des décisions relatives à la gestion du portefeuille, l'exclusion d'émetteurs associés à un comportement ou des activités controversés et les activités d'actionnariat actif.

Les exclusions ont permis au fonds d'écartier les activités économiques et les comportements qui, eu égard aux normes internationales, ont une incidence négative importante sur la société ou l'environnement.

Les activités d'actionnariat actif visaient à influencer positivement les performances ESG de l'émetteur et à protéger ou à accroître la valeur des investissements. Le dialogue collaboratif était mené par l'équipe d'investissement, soit de manière indépendante, soit dans le cadre d'une initiative au niveau de Pictet, ou était mené par un tiers.

La façon dont les exclusions et les initiatives prises au niveau de l'entité sont liées aux PIN et à leurs indicateurs y afférents est précisée dans la Politique d'investissement responsable de Pictet Asset Management.

- *Les investissements durables étaient-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'homme?*

Non applicable.

La taxonomie de l'UE établit un principe consistant à «ne pas causer de préjudice important» en vertu duquel les investissements alignés sur la taxonomie ne devraient pas causer de préjudice important aux objectifs de la taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'Union.

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Comment ce produit financier a-t-il pris en considération les principales incidences négatives sur les facteurs de durabilité?

Le fonds a pris en compte et, dans la mesure du possible, a atténué les incidences négatives qui étaient considérées comme significatives pour la stratégie d'investissement. Ces incidences négatives incluaient, sans s'y limiter, les émissions GES, la pollution de l'air, la perte de biodiversité, les rejets dans l'eau, les déchets dangereux/radioactifs, les questions sociales et de personnel et la corruption et les actes de corruption, et ont été abordées par le biais d'une combinaison de:

(i) décisions en termes de gestion de portefeuille

L'équipe d'investissement a attribué un score aux participations en fonction d'une évaluation des risques environnementaux, sociaux et de gouvernance dans le cadre du système de notation du fonds. Les scores sont déterminés sur une base qualitative par les gestionnaires d'investissement, qui s'appuient sur la recherche fondamentale et les données ESG quantitatives - y compris les données sur les Principales incidences négatives, les données ESG fournies par les entreprises et les données fournies par des fournisseurs de données ESG tiers. Le processus de notation de l'équipe d'investissement a été un élément clé du processus de construction du portefeuille du compartiment, déterminant les pondérations cibles dans le portefeuille.

(ii) exclusion des émetteurs associés à un comportement ou des activités controversés

Le fonds n'a pas été exposé à (i) des entreprises qui tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement telles que définies dans la politique d'Investissement Responsable de Pictet Asset Management et/ou (ii) des entreprises qui ont gravement violé les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption et aux armes controversées ou (iii) des pays soumis à des sanctions internationales; voyez également des informations détaillées sur les exclusions dans la politique d'investissement responsable de Pictet Asset Management.

Quelle était la proportion d'investissements liés à la durabilité?

15,42%

● Quelle était l'allocation des actifs?

Le fonds était aligné à 91,99% sur les caractéristiques E/S (#1 Alignés sur les caractéristiques E/S) et investi à 8,01% dans Autres (#2 Autres). 15,42% ont été alloués aux Investissements durables (#1A Investissements durables) et le reste a été investi dans des investissements alignés sur d'autres caractéristiques environnementales et/ou sociales (#1B Autres caractéristiques E/S).

L'allocation des actifs décrit la part des investissements dans des actifs spécifiques.

La catégorie **#1 Alignés sur les caractéristiques E/S** inclut les investissements du produit financier utilisés pour atteindre les caractéristiques environnementales ou sociales promues par le produit financier.

La catégorie **#2 Autres** inclut les investissements restants du produit financier qui ne sont ni alignés sur les caractéristiques environnementales ou sociales ni considérés comme des investissements durables.

La catégorie **#1 Alignés sur les caractéristiques E/S** comprend:

- La sous-catégorie **#1A Durables** couvrant les investissements durables sur le plan environnemental et social.
- La sous-catégorie **#1B Autres caractéristiques E/S** couvrant les investissements alignés sur les caractéristiques environnementales ou sociales qui ne sont pas considérés comme des investissements durables.

- Pictet Asset Management a utilisé un cadre exclusif pour définir les investissements durables. Les investissements «#1A Durables», et «Environnementaux autres» ont été calculés sur la base d'une approche discrète ou «pass/fail» incluant les obligations labellisées, les obligations générales de pays qui réduisaient les émissions de CO2 ou mettaient en œuvre des politiques susceptibles d'améliorer de manière significative la réduction des émissions de CO2, et les titres d'émetteurs ayant une exposition combinée d'au moins 20% (mesurée par le chiffre d'affaires, l'EBIT, la valeur de l'entreprise ou des paramètres similaires) à des activités économiques qui contribuaient à la réalisation d'objectifs environnementaux ou sociaux.

Dans quelle mesure les investissements durables ayant un objectif environnemental étaient-

ils alignés sur la taxonomie de l'UE?

Non applicable.

● Le produit financier a-t-il investi dans des activités liées au gaz fossile et/ou à l'énergie nucléaire conformes à la Taxonomie de l'UE¹?

Oui:

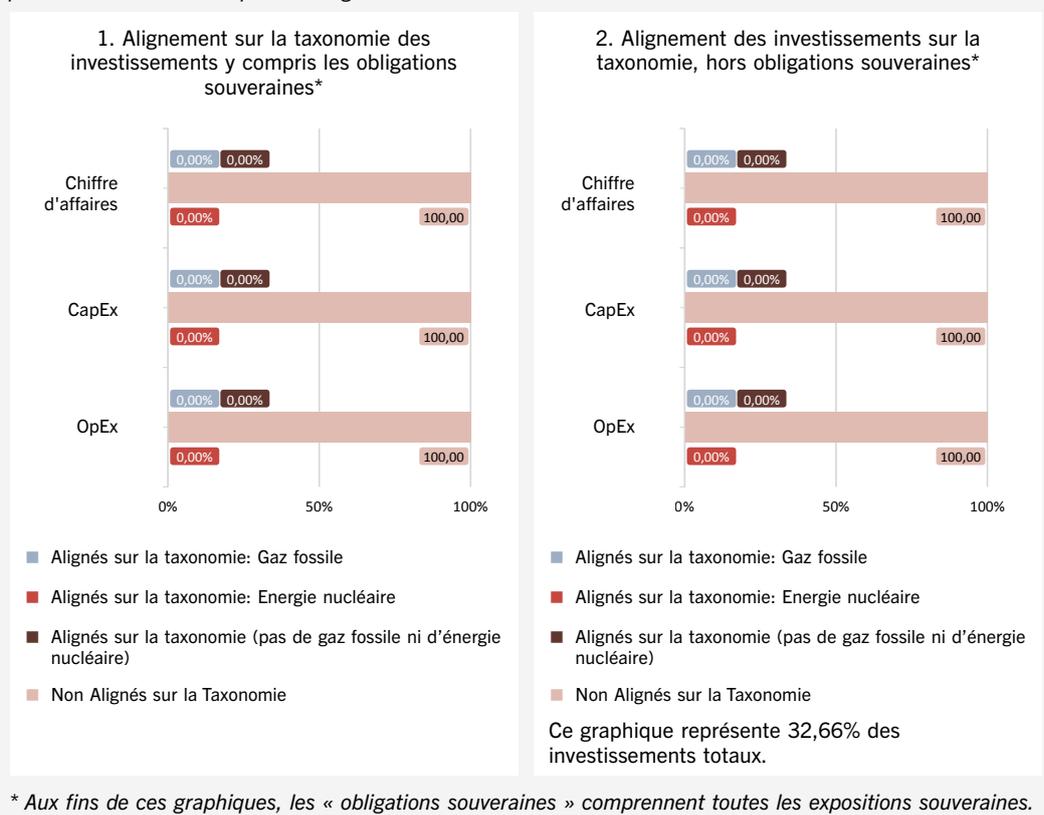

Dans le gaz fossile Dans l'énergie nucléaire

Non

Pour respecter la Taxonomie de l'UE, les critères pour le **gaz fossile** incluent des limites d'émissions et le passage à des énergies totalement renouvelables ou des carburants sobres en carbone d'ici fin 2035. Pour l'**énergie nucléaire**, les critères incluent des règles exhaustives de sûreté et de gestion des déchets.

Les activités alignées sur la taxonomie sont exprimées en pourcentage: - du **chiffre d'affaires** pour refléter le «caractère écologique» actuel des sociétés bénéficiaires des investissements; -des **dépenses d'investissement (CapEx)** pour montrer les investissements verts réalisés par les sociétés bénéficiaires des investissements, pour une transition vers une économie verte par exemple; - des **dépenses d'exploitation (OpEx)** pour refléter les activités opérationnelles vertes des sociétés bénéficiaires des investissements.

Les graphiques ci-dessous font apparaître en vert le pourcentage d'investissements qui étaient alignés sur la Taxonomie de l'UE. Étant donné qu'il n'existe pas de méthodologie appropriée pour déterminer l'alignement des obligations souveraines* sur la Taxonomie, le premier graphique montre l'alignement sur la Taxonomie par rapport à tous les investissements du produit financier, y compris les obligations souveraines, tandis que le deuxième graphique représente l'alignement sur la Taxonomie uniquement par rapport aux investissements du produit financier autres que les obligations souveraines.

● Quelle était la part des investissements réalisés dans des activités transitoires et habilitantes?

Non applicable.

Les **activités habilitantes** permettent directement à d'autres activités de contribuer de manière substantielle à la réalisation d'un objectif environnemental.

¹ Les activités liées au gaz fossile et/ou à l'énergie nucléaire ne seront conformes à la Taxonomie de l'UE que si elles contribuent à limiter le changement climatique («atténuation du changement climatique») et ne causent pas de préjudice important à aucun objectif de la Taxonomie de l'UE - voyez la note explicative dans la marge de gauche. L'ensemble des critères applicables aux activités économiques dans les secteurs du gaz fossile et de l'énergie nucléaire qui sont conformes à la Taxonomie de l'UE sont définis dans le règlement délégué (UE) 2022/1214 de la Commission.

Les **activités transitoires** sont des activités pour lesquelles il n'existe pas encore de solutions de remplacement sobres en carbone et, entre autres, dont les niveaux d'émission de gaz à effet de serre correspondent aux meilleures performances réalisables.

- **Comment le pourcentage d'investissements alignés sur la Taxonomie de l'UE a-t-il évolué par rapport aux périodes de référence précédentes?**

Non applicable.

- **Quelle était la part d'investissements durables ayant un objectif environnemental non alignés sur la taxonomie de l'UE?**

15,42%

Ces Investissements durables ne sont pas alignés sur la Taxonomie de l'UE car leurs activités économiques (i) ne sont pas couvertes par la Taxonomie de l'UE, ou (ii) ne respectent pas les critères d'examen technique permettant de réaliser une contribution substantielle au sens de la Taxonomie de l'UE.

Le symbole représente des investissements durables ayant un objectif environnemental qui **ne tiennent pas compte des critères** en matière d'activités économiques durables sur le plan environnemental au titre du règlement (UE) 2020/852.

- **Quelle était la part d'investissements durables sur le plan social?**

0,00%

- **Quels étaient les investissements inclus dans la catégorie «autres», quelle était leur finalité et existait-il des garanties environnementales ou sociales minimales?**

Les «autres» investissements du fonds comprenaient des positions de trésorerie principalement détenues pour répondre aux besoins quotidiens de liquidité et de gestion des risques, comme le permet et le prévoit la politique d'investissement du fonds. Le cas échéant, des garanties environnementales ou sociales minimales s'appliquent aux titres sous-jacents.

- **Quelles mesures ont été prises pour respecter les caractéristiques environnementales et/ou sociales au cours de la période de référence?**

Au cours de la période de référence, les caractéristiques environnementales et/ou sociales ont été atteintes en suivant la stratégie d'investissement et en respectant les éléments contraignants.

Les éléments contraignants du fonds comprennent:

- l'exclusion des émetteurs qui:
 - sont impliqués dans la production d'armes nucléaires de pays qui ne sont pas signataires du Traité sur la non-prolifération des armes nucléaires (TNP), et dans la production d'autres armes controversées

- tirent une part importante de leurs revenus d'activités préjudiciables à la société ou à l'environnement, telles que l'extraction de charbon thermique et la production d'électricité, la production de pétrole et de gaz non conventionnels, les armements militaires et les armes légères, les produits du tabac, les opérations de jeux d'argent et la production de divertissement pour adultes. Veuillez-vous référer à la politique d'Investissement Responsable de Pictet Asset Management pour plus de détails sur les seuils d'exclusion.
- violent gravement les principes du Pacte mondial des Nations Unies relatifs aux droits de l'homme, aux conditions de travail, à la protection de l'environnement et à la lutte contre la corruption.
- exclusions de pays soumis à des sanctions internationales
- analyse des critères ESG des titres éligibles couvrant au moins 90% de l'actif net ou du nombre d'émetteurs présents dans le portefeuille
