Investment strategy

The Ethna-AKTIV is a multi-asset fund that is actively managed on a flexible basis, independent of benchmarks. The Portfolio Management team's focus is on asset allocation. Investments are concentrated in bonds and equities, as well as currencies and commodities. Through a top-down analysis of financial markets and macroeconomic developments, the expert Portfolio Management team decides in which asset classes, regions and sectors the investments are made. At its core, the Ethna-AKTIV consists of a high-quality bond portfolio that is invested in corporate and sovereign bonds; it also includes an equity portfolio accounting for up to 49 % of the total assets and which may comprise liquid index derivatives, as well as individual equities. Currencies and up to 20 % gold and/or other commodities may be used to further diversify the portfolio. To optimise the fund's risk/return profile, the duration risk of the bonds, together equity risks, are managed as part of a dynamic risk overlay strategy that may also involve the use of derivatives. The individual corporate bonds and equities are selected on the basis of a strict, fundamental bottom-up analysis.

Investment objective

Through its flexible multi-asset allocation approach, the Ethna-AKTIV aims to achieve an attractive, positive return over a medium-term investment horizon (3-5 years). The goal of capital preservation is taken into account at all times. The fund is therefore suitable as a base investment for investors seeking risk-controlled access to macroeconomic developments on global fixed income, equity, currency and commodity markets.

Commentary on the hist. asset allocation

The actively managed multi-asset allocation of the Ethna-AKTIV is the result of macroeconomically derived strategic considerations and tactical considerations that are adapted to the market environment. The Ethna-AKTIV is always invested in the basic portfolios of the two main asset classes equities (maximum 49%) and bonds. At the strategic level, the aim is to achieve an optimal allocation of the asset classes by both investing on the basis of a top-down analysis and considering a risk/return perspective. In addition to the prevailing growth projections, monetary and fiscal policy are also decisive factors. Tactical risk limiting or risk-managing interventions are carried out in the asset allocation by overlaying derivative positions. This usually occurs when the portfolio management anticipates possible changes in the market environment that require a more in-depth analysis of further data points, or when sentiment and flow or positioning data indicate possible extremes. For example, successful risk reduction in 2022 limited the drawdown in both equity exposure and interest rate sensitivity and was thus a prerequisite for attractive participation in the rising markets in subsequent years.

ESG – taking environmental, social and governance criteria into account

Our aim is to offer clients responsible investment solutions with a competitive and sustainable return, as reflected in our investment guidelines and processes. The Ethna-AKTIV pursues an ESG strategy that complies with Article 8 of the EU's Sustainable Finance Disclosure Regulation (2019/2088). In its bond and equity investments, the fund therefore gives preference to companies that have low exposure in terms of significant ESG risks, as well as companies that actively manage and thus reduce the ESG risks inevitably associated with their business activities. In addition, the sustainability approach taken by the Ethna-AKTIV is underscored by comprehensive exclusions:

- Investments in companies with a core activity in tobacco, pornography and/or the mining/distribution of coal are prohibited.
- Furthermore, we do not invest in companies that have been found to be in serious breach of the principles of the UN Global Compact and have no convincing plan in place to remedy the situation.
- In the case of sovereign issuers, we exclude investments in countries that have been designated as "Not Free" in the annual analysis carried out by Freedom House (www.freedomhouse.org).

Distribution of ESG risk categories (in %)

To assess the ESG risks relevant to the individual companies as well as evaluate the active management of ESG risks within the companies, we use analyses by external ratings agency Sustainalytics. Sustainalytics sums up the results of its analysis in an ESG risk score ranging from 0 to 100, where:

- a score below 10 indicates negligible risks
- 10 to 19.99 indicates low risks,
- 20 to 29.99 indicates medium risks,
- 30 to 39.99 indicates high risks,
- 40 or more indicates serious risks.

Based on this ESG risk score, the Ethna-AKTIV aims to achieve at least a medium ESG risk profile (score of under 30). Individual securities with very serious risks (score of over 50) are only considered for investment in the Ethna-AKTIV in justified exceptional instances, and must be supported by an active engagement process designed to improve the ESG risk profile of the investment.

As part of the investment process, we also check whether the companies in which investments are made employ good governance practices. To that end, the ESG policy of ETHENEA includes multiple mechanisms including checking for controversies and compliance with the UN Global Compacts. These in turn lead to downstream escalation steps extending from various engagement options through to hard exclusion of non-compliant companies.

Note: Information about the sustainability of the fund as well as further documents on the subject of ESG can be found at: www.ethenea.com/esg-related-documents
Any investment decision should take into account (in addition to the sustainability aspects) all the objectives and characteristics described in the sales prospectus.

Risk profile ¹⁰

Opportunities

- A professional Portfolio Management team with many years' experience.
- Reduction in value fluctuations due to combination of multiple asset classes and spread of invested capital across a variety of individual securities (diversification).
- Active risk management and hedging transactions (emphasis on capital preservation).
- Active portfolio management with the aim of achieving attractive returns in every market phase.
- Stability and continuity through a focus on fixed income securities.
- Participation in positive performance on equity and bond markets.

Risks

- Market, sector, and company-related price losses in the fund's equity and bond investments; also as a result of a general rise in yields and/or increase in yield premiums for specific bond issuers.
- General, geographical and geopolitical country risks: these include the risk that an issuer of a bond, despite being solvent, cannot fulfil its obligations due to an inability or unwillingness on the part of a particular country to transfer funds to another country.
- Issuer, counterparty credit and default risk due to investing in bonds, equities and hedging trades: this includes the risk of insolvency due to issuer or counterparty debt overload or illiquidity. A total loss of the affected investment instrument is possible.
- Exchange rate risks through investing in foreign currencies or in equities and bonds denominated in a foreign currency.
- The investor suffers a loss if they sell the fund units at less than the acquisition price.

Information about the fund

An open-ended mutual fund managed by ETHENEA Independent Investors S.A., an undertaking for collective investment in transferable securities (UCITS) under Luxembourg law. The Ethna-AKTIV is classified as an Article 8 fund under the EU's Sustainable Finance Disclosure Regulation (2019/2088).

Footnotes

- ¹ Performance is calculated using the BVI method (corresponds to the AMAS-method in Switzerland). Distributions are directly reinvested in additional shares on the distribution date. The individual costs of the investor, e.g. account keeping fees or subscription fees, are not taken into account. Taking these costs into account will reduce performance. All costs at fund level however, i.e. management and custodian fees, are included in the calculation.
- ² Source: own calculations ETHENEA
- ³ Historical performance is not an indicator for current or future performance. The performance shown does not take into consideration any subscription or redemption fees and/or commissions.
- ⁴ The "Ongoing costs" mentioned in this section do not include transaction costs. Detailed information on the costs and their impact on your investment can be found in the key Information document (PRIIPs-KID), the sales prospectus and the latest annual report.

- ⁹ Modified duration, taking into account the application of use of derivatives.
- ¹⁰ Summary Risk Indicator scale from 1 (lowest risk) to 7 (highest risk); risk 1 does not mean a risk-free investment. This indicator may change over time. Source: Key information documents (PRIIPs-KIDs). Any investment involves a general risk of loss of capital.

Important notices

Please read the prospectus and the key information documents (PRIIPs-KIDs) before investing in the fund.

This marketing communication is for information purposes only. It may not be passed on to persons in countries where the fund is not authorized for distribution, in particular in the USA or to US persons.

The information does not constitute an offer or solicitation to buy or sell securities or financial instruments and does not replace investor- and product-related advice. It does not take into account the individual investment objectives, financial situation, or particular needs of the recipient. Before making an investment decision, the valid sales documents (prospectus, key information documents/PRIIPs-KIDs, semi-annual and annual reports) must be read carefully. These documents are available in German and as non-official translations from ETHENEA Independent Investors S.A., the custodian, the national paying or information agents, and at www.ethenea.com. The most important technical terms can be found in the glossary at www.ethenea.com/glossary.

Detailed information on opportunities and risks relating to our products can be found in the currently valid prospectus. Past performance is not a reliable indicator of future performance. Prices, values, and returns may rise or fall and can lead to a total loss of the capital invested. Investments in foreign currencies are subject to additional currency risks. No binding commitments or guarantees for future results can be derived from the information provided. Assumptions and content may change without prior notice. The composition of the portfolio may change at any time. This document does not constitute a complete risk disclosure.

The distribution of the product may result in remuneration to the management company, affiliated companies, or distribution partners. The information on remuneration and costs in the current prospectus is decisive. A list of national paying and information agents, a summary of investor rights, and information on the risks of incorrect net asset value calculation can be found at www.ethenea.com/legal-notice. In the event of an incorrect NAV calculation, compensation will be provided in accordance with CSSF Circular 24/856; for shares subscribed through financial intermediaries, compensation may be limited.

Information for investors in Switzerland: The home country of the collective investment scheme is Luxembourg. The representative in Switzerland is IPConcept (Suisse) AG, Bellerivestrasse 36, CH-8008 Zurich. The paying agent in Switzerland is DZ PRIVATBANK (Suisse) AG, Bellerivestrasse 36, CH-8008 Zurich. Prospectus, key information documents (PRIIPs-KIDs), articles of association, and the annual and semi-annual reports can be obtained free of charge from the representative.
